GREETINGS TO “THE ARMOUR NEWS”

The establishment of this student newspaper is just another significant illustration of the spirit of progress at Armour. It is my earnest wish that this student newspaper be in keeping with that of our other publications, so that we may cooperate and contribute to the effort of publication, then all honor to the Board of Editors who have the success of this venture at heart.

To produce a worthy and interesting news sheet commensurate with the standards to which we are accustomed is a responsible undertaking, and I wish here to assure the members of the staff that they shall have the heartfelt cooperation of the authorities of the Institute in this new and notable student enterprise.

I shall keep a copy of this issue in the archives of the Institute along with our prized first editions of Institute publications. My wishes to "The Armour News." May it have the loyal support of the student body and be as good as the best.

HOWARD M. RAYMOND,
President of the Armour Institute of Technology.

School Calendar

Tuesday, April 10—Baseball—Game at Oak Park.
Wednesday, April 11—"Armour News" Staff meeting in Physics Lecture Room at 4:30 p.m.
Friday, April 13—Baseball—Game at Oak Park.
Tuesday, April 17—"Armour News" Staff meeting in Physics Lecture Room at 4:30 p.m.

Faculty Members Enthusiastic Over New Publication

The establishment of this newspaper at Armour seems to have met with satisfaction and approval on the part of the Faculty, if the opinion of a few of their leaders can be taken as representative of the whole. Everyone remarks the high quality of the work. Even those who are not familiar with the style of the paper are enthusiastic over the issue. Everyone is pleased with the result, and the Faculty feels that the time has been well spent on the project.

Juniors to Run Boiler Test

Today the Junior electrical engineers will hold their annual and proceed to find the efficiency of the new Junior boiler installed at the Institute. Every member of the class and a few invited guests will be present, and the engineers are enthusiastic over the event. The test will be a success and a credit to the Junior class.

Dr. Raymond Takes First Two News Subscriptions

Dr. Howard M. Raymond, President of the Armour Institute, was the first to subscribe to the "Armour News." At a meeting of the committee of editors of the "Armour News" it was decided to proceed with the launching of the new paper, and Dr. Raymond, being the first to subscribe, was met with expressions of joy and enthusiasm. He was assured that the paper would be of the highest quality and that all who read it would be guaranteed satisfaction.

BERRY, MARSHAL, ANNOUNCE PLANS FOR JUNIOR WEEK

Open House, Junior Prom, Class Rush, Are Week's Features

Many new awards have been established for the past few weeks and are rapidly nearing completion under the direction of William H. Berry, who has been recently elected to the position of Junior Chairman. The data have been closely observed and all work is progressing favorably. The members of the committee have been in constant consultation with the students to ensure that the awards are properly administered.

Mr. W. B. Berry has announced plans for the Junior Week for the past few weeks, and has been very active in the planning. The Junior Week will take place next week, and will be a great event for the students.

Subscription Deadline: Friday, April 17, 1925

NEW PUBLICATION AT ARMOUR TECH MAKES ITS DEBUT

News to Become a Weekly

PROF. HENDRICKS ADVISES

This issue of the "Armour News," represents the climax of a long series of plans for the establishment of a newspaper at the Armour Institute of Technology. The present issue is the first of this series, and is the result of a long and careful planning and execution of a project that has been under consideration for some time. The newspaper is hoped to be a source of information for the students, faculty, and alumni of the Institute, and to provide a medium for the expression of the views of the students and faculty.

I shall keep a copy of this issue in the Archives of the Institute along with our prized first editions of Institute publications. My wishes to "The Armour News." May it have the loyal support of the student body and be as good as the best.

The Underwriters' Lab Awarded Borehead Acetylene Medal

The James Turner Borehead Medal, founded by James H. Borehead in 1901, was awarded this year to the Underwriters' Laboratories for its work in the development and testing of electrical equipment, in the advancement of the use of acetylene gas.

The Borehead medal is awarded annually by the International Acetylene Association to the person or company whose work has done most to advance the industries of manufacturing or utilizing acetylene gas.

The discovery of acetylene was made by a scientist known as the "father of acetylene," and the method used was not applicable to a commercial use. In 1852, Mr. and Mrs. Borehead, in association with Thomas L. Wilson, working at the North Carolina academy of science, made a patent for acetylene. The method was rapidly adopted throughout the country for the manufacture of acetylene gas for the electroplating process at Niagara Falls. In 1858, Borehead and the Borehead Company, with the assistance of the Underwriters' Laboratories, began to study the manufacture of acetylene gas. They were the first to receive this distinction.

The Underwriters' Laboratories' young president, Mr. V. E. Borehead, in his presiding over the Association of Laboratories in the field of acetylene and expressing his deep interest and appreciation for what they have done and are doing, wished that the continued benefits will be forthcoming from contacts in the future. Mr. Borehead expressed his gratitude for the work done by W. H. Borehead, treasurer and first president of Underwriters' Laboratories, and his associate, W. C. Robinson, first chairman of the board of the Laboratories.

President Daniel Bee, in accepting the award for the Laboratories, outlined the different projects which have come to the laboratories for test. The laboratories are now in full swing and the official results of their work are being released by the Borehead Company of Chicago. Many other laboratories are being established in different parts of the country. The Underwriters' Laboratories has always been interested in the work of the Borehead Company and has been working closely with them in the development of acetylene gas for many years.

The Underwriters' Laboratories has always been interested in the work of the Borehead Company and has been working closely with them in the development of acetylene gas for many years. Underwriters' LAB

The Underwriters' Laboratories is an independent testing laboratory established in 1910. It was founded by a group of scientists who believed that the use of acetylene gas was essential to the progress of industry. The laboratories are located in Chicago, Illinois, and have been in operation since that time. The laboratories have been responsible for the development of many new products and processes in the fields of acetylene gas and related products.

BASEBALL CALL BRINGS FLOCK OF 35 CANDIDATES

Eight Are Letter Men

of Last Year's Squad

Coach Kiffner, second the call for his 128 team, and some 35 men responded, indicating that the team for next year's squad. Among the new men the highest number of letter men were expected to be chosen, there being hopes of another good ball team this year.

Among the veterans back are Cap-

tain Rossitti, who will start in the old fill-in short stop; King Illin-

ois, our dinen picker; Edyhill, Con-

ning, and Boisseau, all man-

sfield letter men. Johnny Dewey-

and Menge, who have received minor letters, are back in uniform. Yount and Vanderhoe, who were with the squad last year, are again out doing their stuff.

According to Bill Kiffner, the same "fate" that befell the last year's squad will again be in force with an emphasis on the "yes" so far. "I say it with heavy heart." This sign-up may have been in part responsible for the record left by the last year's team. This year's team was, 106; 1, 1; 0 so far. Nothing sensational has passed beyond the usual routine prac-

tice so the team did not get outside until last week, but the usual prelim-

inaries, such as feeding the ball,

second, library, etc., have been

tried out. For the first week, work

must be taken a little slowly to

work our arms and shoulders. Otto

Koonz has been in charge of the

team most of the week since Kraft is off-

clating at the National Basketball

Tournament at the University. The

pitchers and catcher have been work-

ing out for some time in the gym, as

they are in pretty fine shape and are

ready to go. The first game will be

with Crown College on Ophers Field.

April 16. Many of our old rivals are

looked upon again this year, and in addi-

tion, Luther College of Decorah, Iowa,

will be the champion-

ship of town for the past five years.

All home games will be played at

3:30 p.m. on Ophers Field. Come

out and support the squad with a

few cheers.

Track Team Bows To

Crane Tech, 57-37

On March 28 the track team had a

track meet with Crane Tech and Chicago Normal at the Chicago Nor-

mal grounds. Crane was the meet with a score of 57: Armour was second, and Crane Tech third, with 37.

The meet was held in a long narrow gym which permitted the running of a 10 yard dash. The small track was 13 lanes in the mile and other narrow lanes, but the quarter mile was not run, but a three lap race instead. The relay each ran two laps, Normal winning, with Crane Tech, and Armour third. In the shot put, Paul must have been thinking of what he saw at Illinois to throw the shot for a new school record of 45 ft. 6 in., which was 10 ft. longer than the old record. Sturm ran a nice race in winning the 2 mile from a fast field. In the mile, Captain Davis, although feeling well, easily won the event.

40 yd. hurdles—Norman (C.C.), Nobel, Merchine (C.C.), Speed, Aurel (C.C.), Time, 5.3.

50 yd. hurdles—Noblet (C.C.), goe (C.C.), Sorensen (C.C.), Time, 6.

50 yd. dash—Sturm (A.L.), Nobel (C.C.), Yount (C.C.), Time, 6.3.

Mile—Davis (A.L.), Nobel (C.C.), Time, 4:45.

100 yard race—Bauer (A.L.), Foster (C.C.), Time, 10.3.

440 yd. race—Bauer (A.L.), Foster (C.C.), Time, 52.

880 yard race—Noblet (C.C.), Hinkley (C.C.), Time, 2:05.

1 Mile race—Noblet (C.C.), Time, 5:05.

Four Regulars

FLYING BACK FOR WORK ON TENNIS TEAM

With the return of four letter men from last year's team the prospects

for a successful season are very

bright. It may be realized at this

time that our team has been beaten

only once in three years unprecedent

ably. We hope that Coach Tilbany will

continue again this year with one of

his good teams.

George Jennings, our second doubles

partner, will again be head of the

team, trying out a few of his new

challengers. George is quite the

athlete, mixing up tennis and base-

ball during the season, which is a

rather touch mixture when one con-

siders the schedules of the teams.

The other veterans returning are

Stirrat, Langan, and Lamb, all men of

two years standing on the team. Langan is singing his own song this

year with the graduation exercises,

but the other men are Juniors, so

Tilbany will still have a team to

work on next year. Several men now

enjoying tennis have not been report-

ed to Coach Tilbany. If enough in-

terest is shown there may be an

interesting meet.

The season's opener is slated for

April 15. The boys have been work-

ing out at Hamilton Courts

McGILLVRAY HAS BUILT STAR NATATORS

Swimmers' Paddle to Make .50 Average

The swimming team, coached by E. W. McGillvray and managed by B. L. Beish, will finish their season soon after Easter with a return meet with "S" College. The stroke men have splashed their way to a fine rec-

ord, and will be in possession of a .50 average when the curtain falls

on their activities. Among the team

men were Notre Dame, Crane Junior College, Chicago Normal, and "S" College.

The men who have starred this

year's team are: Stone, Captain Brown, in

swimming; and Ditter, in the free-

style. The team is composed of the

following:

45 yd. free style—Brown and Mc-

Lain.

200 yd. free style—Ditter and Mar-

heuser.

200 yd. breaststroke—Troggnitz and

Brasch.

One stroke—Hill and Trognitz.

Utility man—McHaffay.

In all, nine letter men with Crane.

1921 and 1922, were honored by
trohnnitz and Brasch.

Track Team

Enjoyed Travel to Urbana

On March 17 the track team com-

peted in the University of Illinois

Gymnastics at Urbana. Armour

won the meet in four events, but

came in last in three, the 120-

yard relay, shot put, and the stan-

dard. Paul Sturm, our Sophomore back, tried his stuff in the shot put, but the compe-

titor was a little too fast, being about

46 feet and Sturm was doing nearer 40. Paul's shot put was a new

track record of its kind. Armour placed fourth in their

Gymnastics. These two teams broke the

Gymnastics record for this race. The

men running in this race were Rovin, Tunnissen, Capt. Dewey, and

Yount. Coach Sturm timed Dewey in his half at 2:58 which is better than the school record. Several of the team and their followers went

on auto. Fox and Yount, who paired with Dewey and Sturm, ran in the mile

relay. In the evening, the team watched the Univer-

sity and special events. Coming home, our men and the U. of Chicago team

had a sleeper of their own, so the first part of the evening was spent in a quiet

football field. The sides were not too
dull mixed up, therefore neither school could claim a victory, although Paul and Payne claimed it for their boy's side. The program included number of

perfect shots made.

The Relay Carnival is the largest

indoor meet in the country. This year there were over seventy schools

entrants. Bob Mashiham, a former letter man of A. T. Y. raised the record of the U. of Illinois team, and also sent his team to the boys. Bob Hull and Doug Philipson, former athletes of Armored are at present attending school at the University, and

were asked to come on hand to welcome our man. Doug was a fresh sweater for his

work on the soccer team last fall.
