**NOTICE!**

Rumors that a local newspaper will be automatically replaced as the daily news source in the community should be corrected. The recent increase in interest and also the demand for men versed in science and engineering are the reasons for the new initiative. The Armour Institute of Technology, which is the leading institution in the field, will offer a program of courses in aerodynamics and airplane design. This program is sponsored by the Department of Aviation, and is intended to provide qualified personnel for the civil aviation and the armed forces. The program will last for four years, and graduates will be awarded a degree in Aeronautical Engineering.

**ADDITIONAL COURSES IN AERONAUTICS PLANNED**

Since 1914, or five years after the initial flight of the Wright brothers, Armour Institute has offered courses in aerodynamics. Due to the recent interest in the subject and also the demand for men versed in science and engineering, Armour Institute plans to offer a course in aerodynamics and airplane design, which will be open to the public. The course will be taught by Armour Institute faculty members and will be offered on a part-time basis.

The Armour Man

For about a third of a century, the Armour Institute of Technology has been educating engineers. Its position is one of distinction, not only because of the caliber of its graduates, but because it has been a training ground for the engineers who have brought about the revolution in modern technology. In recent years, the Armour Institute has been at the forefront of this revolution, and the Armour Man is one of the leaders in the field.

Mr. Paul N. Nestor, President of the Armour Institute of Technology, will be one of the judges at the recent issue of the National Collegiate Invitational Physics Contest. The contest is open to all college students, and the Armour Institute of Technology has been invited to participate.

The Armour Man is the symbol of the Armour Institute of Technology, representing the excellence and dedication of its students and faculty. He is a living embodiment of the school's commitment to providing the best education possible for its students.

The Armour Man is a figure of great respect and admiration for students and faculty alike. His presence on campus is a constant reminder of the values and ideals that the Armour Institute of Technology holds dear.

In conclusion, the Armour Man is a symbol of the excellence and dedication of the Armour Institute of Technology. He is a reminder of the school's commitment to providing the best education possible for its students, and a constant source of pride for the students and faculty alike.

Spectacular In First Day (5-1) In a spectacular first day for three and one-half hours, the new students at the Armour Institute of Technology showed their enthusiasm and excitement for the start of the new school year. The students were greeted by the faculty and staff, who welcomed them with open arms.

A total of 1,000 students registered for classes, and the halls were packed with students eager to learn. The atmosphere was electric, and the energy was palpable.

The first day of classes was a success, and the students were eager to get started. The Armour Institute of Technology is off to a great start, and the future looks bright for the new students.

ARMOUR OUTFITS CRANE COLLEGE TO WIN 10-7

Seven Runs in Sixth

Crane College surprised Otisfield Field Wednesday, April 14, to open the season in the second game of a doubleheader. In one of the most unexpected upsets of the season, and quite a few scores into the home of the Otisfield Field, Armour's visiting fans were on hand by the players in the victory. The score of the first two innings was 3-0 in favor of Otisfield. In the sixth inning, however, Armour scored five runs, four of which were driven in by the hit of Bob Reed. Armour scored a total of seven runs in the sixth inning, and won the game 10-7.
