John Ballheim Appointed Assistant DOS
by Joe Sidd

During the Fall semester, courses were made by the University. In order to allow DOS time to get established, Ballheim together with the Computer Science Department, has decided to appoint a new assistant DOS. This will allow Ballheim to concentrate on his duties as DOS, while also allowing him to continue his research in computer science.

Comfit Announces Ethics Study

The idea of a study on professional ethics was originally considered by the university in the spring of 1974. At that time, the university felt that it was important to address the issue of professional ethics in the workplace.

Enrollment Up 36%

The Department of the Future and the next academic year will be the first time that undergraduate students have been allowed to major in professional ethics.

Tuesday Night Two Little Pigs Barbecue
Wednesday Afternoon Barbecue Luncheon
Wednesday Night Disco Night at TEP House
Thursday Night 15th Annual Boat Ride & Pizza Dinner
Friday Night Rallye to Roman's
Saturday Night Party at TEP House
Sunday Activities all day
Out of the Dark Ages

Traditionally, ITT has had the rigid formal image of being a respected institution of higher learning. The student's time here is spent in classes, colleges, and the occasional social activity. However, over the past few years, the school has been making efforts to change that image. Efforts have been made to improve the facilities, expanding the offerings to include more extracurricular activities, and encouraging students to get involved in the community. These changes have improved the atmosphere of the school, making it a more enjoyable place to be. The students, faculty, and staff are all proud of their achievements.

Get Involved

Part of college life is involvement with what's going on in our community. Whether it's a political issue, a social problem, or a cultural event, there is always something happening that we can get involved in. By getting involved, we can make a difference and feel a sense of accomplishment. It's also a great way to meet new people and make friends. So why not give it a try? There are many opportunities to get involved, from volunteering at local charities to participating in student government. Whether you're interested in politics, the arts, or community service, there is something for everyone. So why wait? Get involved today!
Student Engineering Council
Evaluation of Engineering Courses and Instructors

(The council consists of representatives from all of the student professional and honorary societies within the Armour College of Engineering.)

A major function of the recently organized Student Engineering Council is to provide evaluation service to students concerning their classroom, faculty, and administration in areas of general interest. Among its activities, the SEC has assumed responsibility for developing and instituting a regular questionnaire for faculty and course evaluation. Progress in engineering courses.

The general evaluation schedule consists of a questionnaire, a statement of four responses desired for calculation. The calculations given below consist of the averages of the ratings and become a measure of the contents which were examined by several students.

The index which follows is a summary of the results of the evaluation program conducted by the SEC at the end of the spring semester. The questionnaire consists of many engineering classes to ensure that the information was as complete and accurate as possible to complete a Faculty and Course Evaluation Form. The form consisted of 180 evaluation questions, representing as overall rating in terms of the course, the text, homework assignments and examinations; the instructors, and the laboratory. For each category, the students were asked to grade the performance of each instructor on a 1-5 scale, with 1 being poor and 5 being excellent, and to assign a numerical rating in accordance with the scale shown below.

- **28th SATURDAY**: Beverly Shores Picnic
- **29th SUNDAY**: End of the Beginning Party

**COME AND SEE US**

"It’s NOT WHAT WE'RE TRYING TO SELL IT'S WHAT WE WANT TO SHARE"
Jazz Labs

The IT Jazz Labs are made up of two main areas: sound and music. The sound portion of the lab provides a musical setting for the IT programming, and is accessible to all students, regardless of their level of knowledge. The music portion is divided into two areas: a small studio and a large studio. The small studio is equipped with a digital recorder, a MIDI controller, and a variety of sound effects. The large studio is equipped with a full range of musical instruments, including a grand piano, a cello, and a drum set. Both areas are open to all students, regardless of their level of knowledge.

Chaverim

by Alex Fainsod

The IT Jazz Lab's "Chaverim" (Hebrew for "friends") is a gorging sound and "fury" at the same time when programming jazz on eight channels. The DJ showcases the latest jazz developments through "Chaverim." Each week, a different DJ brings to the campus various performances, interviews, demonstrations, discussions, concerts, and other types of events related to the field of sound and hearing culture. It is one of our greatest assets. We plan to have an innovative event, a Chaverim performance on the courtyard stage, a site and time.

WIT

"WIT," the student council and organization of over 600 members, offers the opportunity to become a part of the council and gain valuable experience in various areas of student life. The council is committed to providing a voice for the student body and is dedicated to enhancing the overall student experience at the university. The council is divided into several committees, each focusing on a specific area of interest, such as academics, athletics, student activities, and community service. The council's main goal is to promote student involvement and leadership, and to provide a platform for students to express their ideas and concerns. The council also sponsors a variety of events, such as social gatherings, volunteer opportunities, and community service projects, to engage students in the local community and foster a sense of belonging.

The Program of the Year isn't on TV. It's in the Air Force ROTC.

Look into Air Force ROTC. And there are 4-year, 3-year, or 2-year programs to choose from. Whichever you select, you'll leave college with a commission as an Air Force officer. With opportunities for a position with responsibility...challenges...and, of course, financial rewards and security. The courses themselves prepare you for leadership positions ahead. Positions as a member of an aircrew...or as a missile launch officer...positions using mathematics...sciences...engineering.

Look out for yourself. Look into the Air Force ROTC programs on campus.

Lt. Col. Norman K. Jensen
USAFA Illinois Institute of Technology
(312) 567-3525

Put it all together in Air Force ROTC.
The Navy-Marine Corps College & Scholarship Program

Purpose:
Our purpose is to educate young college men and women to serve as officers in the United States Navy and Marine Corps.

Qualifications:
Students are selected from freshmen already enrolled at participating NROTC colleges or universities. Selection is by personal interview, school and community reputation, and academic record. There are almost no restrictions on undergraduate academic courses you may choose, provided that they lead to a bachelor's degree. All that is required prior to graduation is the successful completion of naval science courses and certain specified university courses.

Benefits:
You'll receive all the required uniforms, naval science textbooks, and, when you become an advanced NROTC student in your junior and senior years, a monthly tuition-reimbursement allowance of $100 for a maximum of 20 months.

Students in the NROTC college program who are judged to be outstanding can compete for NROTC scholarships awarded by the Chief of Naval Education and Training.

Career Possibilities:
Once you graduate and are commissioned, you will be expected to serve three years active duty in either the Navy or Marine Corps. Once you complete your active duty you will, if you wish, be released to inactive duty in the Ready Reserve. However, if you decide that the Navy or Marine Corps is the career you want to pursue you can apply for a commission as a regular Navy or Marine Corps officer.

For more information, contact or visit the Naval Science Department in Alumni Memorial Hall (567-3530).

The Navy. It's not just a job, it's an Adventure.

Join the Naval ROTC.
**Orientation Week Fall 1976**

**Tuesday:**
- FOCUS meet on the quad then, off campus for beer and good times.

**Wednesday:**
- Alarm clocks at 7:15 a.m. Students will be guest speaker followed by a coffee house featuring live jazz music. A bowl of grits with eggs and sausage at lunch.

**Thursday:**
- All new members, outgoing seniors, will be guests. Followed by a jam session and dance in the education party club.

**Friday:**
- All senior party, dinner of scholarship, speech followed by free in the country with banners and lively square dance.

**Saturday:**
- All senior dinner, dancing free in the country.
