Ethics Center Becomes Reality

by Sue Bick

The Ethics Center at the Institute of Technology has a broad and ambitious agenda. The Center will be creating new educational opportunities for students, faculty, and staff, and it will be seeking to develop new programs and initiatives to address ethical issues in technology.

Changes in Financial Aid Office

The office has undergone a significant restructuring, with the addition of several new positions and the restructuring of existing ones. The new positions include a director of financial aid, an assistant director, and several case managers. The office has also implemented a new online application process for students to apply for financial aid.

Dec Graduation Back

The December graduation ceremony has been rescheduled to accommodate the needs of students who were unable to attend the original ceremony due to the COVID-19 pandemic. The new date will be announced in the near future.

Mark McGowan, Director of the Ethics Center at the Institute of Technology, and Raymond C. Evans, Director of Financial Aid at the Institute of Technology, have been interviewed for these stories.
Mini-Programs Preview

New works from freshmen will be shown in this year's Mini-Programs. On Saturday, September 29th, six short plays will be presented at the Thayer Center. The performances will be held in the school's auditorium at 7:30 PM and 9:30 PM. The audience is expected to be large, and tickets are available at the school box office.

Union Board News

The Union Board is planning an open forum on Wednesday, September 26th, at the Thayer Center. The forum will feature a panel of students discussing issues related to the student body. The forum is open to all students and will be held in the school's auditorium.

Bee

By Bill Parham

The bee is a fascinating creature that has been around for millions of years. It has a unique life cycle that involves both male and female bees. The male bees, or drones, are produced in large numbers during the summer months. They are not involved in the production of honey or pollen, but they play a vital role in the reproduction of the species.

Shackelford Improves Aid

New Beer Policy at Events

Campus Parking—"No Problem?"

ATS Can’t Work Without Input—Yours

Shackelford Improves Aid

In the last 12 months, the campus parking situation has become a major issue. Students, faculty, and staff have all complained about the difficulty of finding a spot to park. The administration has taken steps to improve the situation, including the addition of new parking lots and the implementation of a parking permit system. However, some students have expressed concern that these changes have not been enough to alleviate the problem.

New Beer Policy at Events

The University has implemented a new policy regarding the consumption of alcohol at events. This policy is designed to ensure the safety and well-being of all attendees. Events that serve alcohol will now require a permit from the university. Violations of this policy may result in the suspension of the event or the loss of permit.

Campus Parking—"No Problem?"

Despite the improvements made by the administration, many students feel that parking remains a major issue. The University is continuing to evaluate the situation and has plans to implement additional measures to address parking concerns.

ATS Can’t Work Without Input—Yours

The administration is seeking input from the campus community to improve the performance of the Associated Technology Services (ATS). This service is used by students, faculty, and staff for a variety of tasks, including registration, financial aid, and academic advising. ATS is currently undergoing a review to identify areas where improvements can be made. Students, faculty, and staff are encouraged to provide feedback on how ATS can better serve their needs.

Shackelford Improves Aid

The administration has taken steps to improve the financial aid process for students. This includes the introduction of new online tools and the expansion of the financial aid office hours. Students have reported an increase in satisfaction with the aid process, and the administration is committed to continuing to improve this area.
We’re gonna be Number One!!

Letters

Thelemen's Policy

The “Letters to the Editor” do not necessarily reflect the opinion of the publisher or the staff of the Technology News. They are meant to provide a forum for readers to express their views on issues of importance to the technology community.

Letters are accepted at the discretion of the editor and do not exceed 400 words. They can be submitted via email to letters@technews.com. All letters are subject to editing for clarity and length.

Looking forward to December

We’re glad to hear that December graduation will take place in person, contrary to what was previously announced. It has been confirmed that the university will still hold a traditional in-person graduation ceremony on campus, with all the usual festivities.

ATS: people make it work

The Association of Technology Students is supposed to be a representative group of students that serves the best interests of the current student body. What’s going on? Clearly not enough people are trying to become the student representatives. Instead, we are left with one inactive representative who does nothing. What’s the point of having a 300-member group if no one can even be bothered to come to meetings? The only reason we have these meetings is to please the university, and the student representatives do nothing to make it worthwhile.

“Conversations” a good idea

The Dean of Students is presenting a rather innovative service in the form of the new “Conversations” series. For the first time, groups of tech students have the opportunity to talk with a tech-savvy representative of one of the most important corporate bodies in the state. Although professional groups often have experts from industry and business as speakers or guest lecturers, this new relaxed conversation can take place in those same settings without the usual formalities of a classroom situation. The students will not only benefit from the insights of these guests but also gain a better understanding of how the business world works and perhaps find their own careers more appealing.

Hewlett-Packard wrote the book on advanced pocket calculators.

And it's yours free!

Hewlett-Packard had the world's first advanced pocket calculator back in 1972. And led the way ever since.

If you're about to invest in your first pocket calculator—you will be everywhere—through college and beyond—your final choice in the automation you can get is a wise decision. That's why Hewlett-Packard put together an objective, informative 24-page guide entitled: "What To Look for Before You Buy An Advanced Calculator." And it's yours—free!

In it you will find such helpful information as:
- Detailed comparisons of "What To Look for Before You Buy an Advanced Calculator at your campus bookstore or telephone 608-806-7272 (for Calif., 800-886-0623) will free for the name of your nearest dealer.

HEWLETT-PACKARD PRESENTS THE ENTIRE FAMILY OF ADVANCED CALCULATORS.

HP-22 Scientific.

Like new price, $80.00.

The HP-22 makes short work of the advanced calculations even called "non-trivial" or "non-calculator" courses require. If you need a calculator for more than simple arithmetic—then this is especially at its low price.

- Backlash functions and exponents.
- Admissible memory.

What to look for before you buy an advanced calculator.

- Perform all standard and logarithmic functions (in radians and degree).
- Perform miscellaneous transcendental, trigonometric and statistical functions.
- Two-selectable display modes: fixed-point and scientific.
- Converts fixed-point format.
- HP-22 Business Management

$165.00.

The HP-12 can handle the kind of calculations found in business courses, including management science. Hewlett-Packard's unique microcalculator makes business math calculable.

- Business oriented sample card.
- Convertible from business administration.
- Displays the value you want.
- Combines financial, statistical and scientific calculations.
- Performs simple, single-focused series of instructions including memory in use, memory in use, memory in use, memory in use.
- Performs single-step and divided function continuously.
- Performs standard and transcendental functions, as well as memory in use, memory in use, memory in use, memory in use.
- Two admissible memories.
- Full decimal display control.
- HP-25C Scientific Programmable with Continuous Memory.

$250.00.

The HP-25C is Hewlett-Packard's programmable, basic design - automatically for the more common problems every user and engineer.

What you need in Continuously Memory capabilities in your own programs and documentation is included.

- Continuous memory capabilities.
- Hexadecimal and octal operations.
- Keyable programmability.
- Handling conditional test and following capabilities.
- Only available in white.
- We also offer the HP-25C to the Continuously Memory Shock for $174.00.

HP-22 Scientific/Plus

$200.00.

The HP-22 Plus is the computer science student— whose course work involves business administration. The science of science is making your programmed scientific functions as easy to use and remember as your name and your favorite book.

- Users' programmed instructions.
- Full decimal display control.
- Also available in white.

What you need in scientific programmability in your own programs and documentation is included.

- Only available in green.
- High-contrast color stripes make it easy to read your calculations.

- Double-deck display control.

For more information, including the complete options available, contact your nearest dealer. For more information, including the complete options available, contact your nearest dealer.

- Double-deck display control.

For more information, including the complete options available, contact your nearest dealer.
If you covet the best, you can afford to have it.

HR-85. The ancient Pisa coliseums weigh a total of 900,000 tons and are located in a central area of the city. They are renowned for their monumental size, grandeur, and architectural precision. The ancient coliseums were not only a symbol of Roman power and wealth but also a testament to the ingenuity of the Roman engineers.

John Wallace Spencer

The Bermuda Triangle

"More than a thousand people and over a hundred ships and planes have mysteriously disappeared in an area stretching from Bermuda to the Azores. The Triangle is a place of magnetic disorientation of planes and ships off the southeast coast of the United States in an area sometimes called the Bermuda or Devil's Triangle. Live by live, Spencer delves into the missing ships and planes and the stories behind the missing military crafts in a period ranging primarily from the end of World War II to the present. While he recounts many theories advanced to explain the mysterious losses, Spencer says in an interview featured at the end of the book that he always subscribe to one of them, the theory of alien abduction. He believes that the Navy has known of the abductions for many years but chooses to conceal them as a matter of national security. His book is a message of concern for the average person that says we have to do something about the disappearances."

in music

J. Brahms: Piano Sonata No. 1

Drew August

J. Brahms' Piano Sonata No. 1 in D minor marks a new phase in his chamber music, rich in subtlety and expression. The work is characterized by long, flowing melodies, rich harmonies, and a depth of emotion that sets it apart from earlier works. The slow first movement opens with a serene, introspective theme that is developed in the second and third movements. The allegro con moto finale is a tour de force, with intricate counterpoint and aたちの夢をかなえる。のぼって来る。水を飲む。

Brahms' Piano Sonata No. 1 is a masterpiece of late romanticism, with its complex structures and profound emotional depth.
The SR-56 is a tremendously powerful slide rule calculator. Yet you can program it whenever you're ready.

There are 76 preprogrammed functions and 100 program steps for computing arithmetic within all 10 memories. It has 455 — a unique algebraic operating system that lets you handle problems with up to 9 levels of parentheses. There's also a 3-digit accuracy, a built-in Mean, Standard deviation, degrees, radians, grade, and it works with TI's new scanner — the PC-100. Choose one, you'll be proud.

Fall Sports Preview

By Jerry Jeffries

The 1976 fall schedule for the ITF Sports teams begins today with the first football game in Ashland and the opening of the new ITF Sports Center.

IIT Football?

The football team is in the process of selecting a new coach. The search has been narrowed down to three candidates: Jim Smith, Frank Brown, and Bob Miller.

Smith is the current head coach at Western Kentucky University and has a record of 45-29-2. Brown is the assistant coach at the University of Tennessee and has a record of 35-20. Miller is the head coach at the University of Alabama and has a record of 25-15.

The ITF Sports Board will announce their decision soon. They are expected to make a decision within the next two weeks.

IIIT Football

By Jerry Jeffries

The IIIT football team is ready to start the new season. Coach Jeffries is excited about the potential of the team this year.

Last year, the IIIT football team finished with a record of 6-4-0. This year, the team is expected to be even better. Coach Jeffries is confident that the team will have a successful season.

The IIIT football team has a young, talented roster. The team has a lot of potential and is expected to be competitive in the league.

The IIIT football team will play their first game on September 1st against the University of Alabama. The game will be held at the IIIT Sports Center.

Baseball

By Jerry Jeffries

The IIIT baseball team has started their season and is off to a great start. They won their first two games against Western Kentucky University.

The team is looking forward to the rest of the season and hopes to continue their winning streak.

Coming Events

- September 11: Campus Events - Invite Western College Speaker: Patrick Johnson Date: September 11 Time: 7:00 PM
- September 17: On the Rocks Date: September 17 Time: 6:00 PM
- September 18: On the Rocks Date: September 18 Time: 6:00 PM

New P.E. Instructor

Mr. Mike Johnson has been appointed as the new P.E. instructor for the IIIT Sports Department. Mr. Johnson has a strong background in sports and is excited to join the IIIT community.

Mr. Johnson will be responsible for overseeing all P.E. activities, including coaching the IIIT football and baseball teams.

Mr. Johnson is a former college football player and has a deep understanding of the sport. He is looking forward to helping the IIIT football team achieve success.

Mr. Johnson will be working closely with the IIIT Sports Board to develop a new P.E. program for the IIIT community.

The IIIT Sports Board is excited to have Mr. Johnson join the team and look forward to his contributions to the IIIT community.
