Federal Funds Up 94%

More Money for Financial Aid

This year IIT has received a number of significant increases in support from the federal government, including increases in both the Department of Education and the Department of Energy. These increases will allow the university to expand its research and educational programs.

The Department of Education has increased its funding for IIT by 94%, from $50 million to $100 million. This increase will allow IIT to expand its programs in areas such as environmental science, energy, and technology.

The Department of Energy has also increased its funding for IIT, from $30 million to $60 million. This increase will allow IIT to expand its programs in areas such as renewable energy, nuclear energy, and energy efficiency.

These increases will help to support IIT's mission to provide a world-class education and research environment, and to prepare students for the challenges of the 21st century.
There is only one fraternity at IIT, whose membership is EXCLUSIVELY engineers, architects and scientists.

...discover the difference!

Has Block Scheduling Got You Down?

Don't Worry . . .
Satisfaction Guaranteed

by Mark Sullivan

The Thursday, August 23rd, will be great for those
who love school and plan to stay in classes but
may find the block scheduling system a little
stressful. Many students are wondering how
their grades will be affected by this new
system. To help ease the stress, Mark Sullivan
from the Student Union has compiled a list
of things to remember when you're dealing
with block scheduling.

First and foremost, don't worry if you're
not doing well in a certain subject. Block
scheduling is designed to help improve
your grades by providing more time for
schooling in each subject. The 45-minute
classes are spread out over two days, giving
you more time to focus on your studies.

Secondly, remember that grades will not
be affected by your performance in block
scheduling. Grades are determined by your
overall performance in all subjects, not just
the ones you're taking in block.

Thirdly, don't be afraid to ask for help.
Teachers are there to help you succeed, and
they are more than willing to assist you in
the new block scheduling system.

And finally, don't forget about extracurricular
activities. Block scheduling does not
disregard these activities. You still have
time to participate in sports, clubs,
and other activities.

In conclusion, block scheduling is
designed to help you succeed in school.
Don't worry about grades, focus on
improving your performance in each
subject, and take advantage of the
extra time available.

Financial Aid Gets Big Boost

The most significant component of financial aid for college students is typically the scholarship portion. With the introduction of block scheduling, the amount of financial aid available to students has increased significantly.

- Student Loans
  - 5.8
  - 5.3
  - 5.0
  - 4.6
  - 4.4
- Grants
  - 5.6
  - 5.2
  - 4.8
- Work Study
  - 4.6
  - 4.2
- Total
  - 20.1
  - 18.8
  - 17.7

As a result of the changes in financial aid, more students are able to attend college without the burden of heavy debt. This has led to an increase in the number of students who are able to complete their education.

IIT Looking For A New Image

Traditionally, IIT has had the right formal image of being a research oriented university at the technological and technological world. Those of us who have been around this school for a few years can still remember when the IIT was the way going out of here and going home. Hopefully, now all this is changing. It seems that a lot of energy is being put into improving the social atmosphere and around the academic work that is being done. If all this is correct, IIT may evolve into a more socially involved institution with the student body. Since the student body, IIT is now on an upswing, morale and attitude here are getting better and better, and the general atmosphere of the school is moving into a more relaxed mode.

It is clear to everyone that we are entering this school at a time of transition, when things are pretty good and still improving. It may very well be able to once again fully compete with her academic rivals not only by turning out excellent professionals, well prepared to face and change the shape of the real world, but also fully-balanced whole people capable of coping with the restrictions of our complicated social environment.

The general philosophy seems to be realizing that a successful educational regimen is not a strictly diet of academics, and that's sensible in giant leaps forward from the dark ages of stagnation in IIT's past. Go forth, and have a good time!

Get Involved

Part of college life is involvement with what's going on in and around the campus, and sometimes at IIT's a difficult thing to do is easy. Committees pop up and students look for hands on their faces and do not care what the wave of the student student organizations, academic and otherwise, because these organizations are the culture or university life. Symposiums elsewhere on this campus with presentations on Univeristy Day (Saturday) will not see something about the group... the result is up to you.

letters

Dear Member of the IIT Community,

I hope this is the last time I’ll write to you, as I’ll be moving out of the dorms in a few days. I trust you all will understand the need for the move as well as the responsibility and faculty that come along with the burgeoning demands and workload associated. As you all know, IIT has been making progress in the last few years, and it’s time to move on to the next level. I would like to take this opportunity to express my gratitude to the staff and faculty for their support and guidance throughout my time here. I will always remember the lessons learned and friends made during my time at IIT.

Sincerely,

[Name]

letters policy

The letters page is the place for students, faculty, and visitors to express their opinions and ideas on a wide range of topics. Letters should be written in a clear, concise, and informative manner. The editors reserve the right to edit and condense letters for clarity and brevity. Letters should be submitted to the editors via email or in person.

Course Evaluation Results Announced

Student Engineering Council Evaluation of Engineering Courses & Instructors

A major function of the Student Engineering Council is to provide mechanisms for better communication between students and faculty and administration in areas of mutual interest. The Council's members, through a combination of meetings and individual discussions, have been working to improve the quality of education in the College. In this spirit, the Council's Student Evaluation Committee has conducted a review of student evaluations of Engineering courses.

The evaluation program conducted by the SBC in the spring of 1977 consisted of two sessions: one for engineering students and the other for non-engineering students. During the evaluation sessions, students were asked to evaluate the quality of instruction in their respective courses. The evaluation questions included a rating of the course, the teacher, the textbook assignments, and examinations. The responses were tallied, and the results are reported in this bulletin. For each category, the evaluations were compared to the total number of students and the percentage of students who rated the course below average in each category.

In general, the evaluations indicated that the quality of instruction and the textbook assignments were generally satisfactory. However, a few areas for improvement were identified, and suggestions for improvement were made. The Student Council is committed to continuously improving the quality of education at the College, and it is hopeful that these evaluations will contribute to this goal.

Sigma Phi Epsilon

6-Week Schedule

MONDAY  CASINO PEGIS
TUESDAY  PLAYBOY AFTER DARK
WEDNESDAY  HAWAIIAN FESTIVAL
THURSDAY  ALL NITE GAZONK
FRIDAY  END OF THE BEGINNING PARTY
SATURDAY  BEACH BLANKET PARTY

UNION BOARD

For those of you who have been at ISU for a while, you know that in an event like the Student Involvement Fair, the Student Involvement Division has a great way of getting organized. They plan and coordinate events, register students, set up and tear down, and generally have a lot of fun. The Student Involvement Division is responsible for all of the events on campus, including the Student Involvement Fair, which is scheduled for next week. The Student Involvement Division also coordinates with the Student Activities Board to plan and sponsor events. This is an exciting time of the year, and we are looking forward to seeing all of the events that the Student Involvement Division has planned for this semester.

WOULI RADIO

WOULI, the student-owned and operated radio station of ISU, is excited to announce the launch of its new music program, "The Morning Show." The program features a new format each week, with a different theme and guest DJs. The Morning Show is scheduled for 7-9 a.m. on weekdays, and will be hosted by student DJs from the Student Media Management Program. The first show features a mix of current hits and classic rock, with guest DJ from the Student Media Management Program.

The Student Media Management Program is a new program at ISU that focuses on teaching students the skills needed to work in the media industry. The program offers courses in broadcast journalism, radio production, video production, and more. The Student Media Management Program is located in the Student Media Center, and is open to all ISU students.

The Morning Show is a great opportunity for students to gain experience in the media industry, and to get involved with the student radio station. The program is also a great way to get involved with the ISU community, and to meet new people. The Morning Show is broadcasted on 91.7 FM, and can be heard online at wouli.isu.edu. The Student Media Management Program is open to all ISU students, and is a great way to get involved with the ISU community.

Soccer, Baseball Begin

Soccer

The Illinois women's soccer team is set to begin their season on Friday, August 24, at 7:30 pm against the University of California, Berkeley. The team is looking to build upon their successful 2017-2018 season, where they won the Big Ten Conference championship.

Baseball

The Illinois baseball team will host an exhibition against Western Illinois on Friday, August 24, at 3:00 pm. The game will be held at the Illinois Baseball Stadium. Illinois has been working hard in the off-season to improve their performance and is looking to make a strong start to the season.
