CB Votes ‘No 1977-78 Yearbook’

Communication Board, at last Tuesday’s meeting, voted to reject the 1977-78 Yearbook. It’s finding justified. The board took two hours with the manuscript, prepared by the book of back-breaking labor, and unswerving the best of its efforts.

Julie Gebauer, dean of Student Activities, represented the Board. Stated Gebauer, “The present policy is to publish an idealistic, but fanciful yearbook.” The yearbook, Gebauer continued, is a reflection of what the students want, not what the students need.

The board then voted to reject the yearbook, with Gebauer in the majority vote. Gebauer stated that the yearbook is full of “selfishness and lack of concern.”

The board then voted to reject the yearbook, with Gebauer in the majority vote. Gebauer stated that the yearbook is full of “selfishness and lack of concern.”

Tempers Flare at Crown

by Jan McCallum

Last Thursday afternoon, Crown Hall was the scene of heated discussion between students and faculty. The students, led by Crown Hall President, were protesting the crown’s decision to increase tuition. The faculty, led by Crown Hall Dean, were defending the decision.

The students argued that the increase would be a hardship for many students. They pointed out that the Crown Hall tuition is already high, and that the increase would make it impossible for some students to continue their education.

The faculty countered that the increase was necessary to cover the costs of operating the Crown Hall. They pointed out that the Crown Hall tuition is one of the lowest in the country, and that the increase was needed to keep the hall running.

The debate continued for several hours, with both sides making their points. In the end, the faculty won the vote, and the increase was approved.

Counseling Center ‘Briges Gap with University’

by Bobo Robinson

The Counseling Center, located on the first floor of the Student Union, is working to bridge the gap between students and the university. The center provides counseling services to students, including individual counseling, group therapy, and crisis intervention.

The center has seen an increase in the number of students seeking counseling services. The center has responded by adding more counselors and increasing the number of counseling hours.

The center also offers a variety of support groups for students, including groups for students with anxiety, depression, and stress.

The Counseling Center is working to make sure that all students have access to the services they need. The center is open Monday through Friday, and is staffed by trained counselors.

The Counselor’s Office is available to help students with any concerns they may have. The Counselor’s Office can be reached by calling 555-1234.
Is Bankruptcy a Solution to Students’ College Debts?

The issue of education has been a pressing topic, especially with the rising costs of higher education. Students often find themselves burdened with significant debt after graduation. In recent years, bankruptcy has emerged as an option to consider for those who are struggling to manage their college loans.

From 2017 to 2018, 13,000 homeless students filed under bankruptcy claims, indicating the increasing prevalence of this issue. Many students are finding themselves unable to make payments on their loans, which has led to a wave of defaults.

Bankruptcy, in this context, refers to an individual's legal protection from creditors. It can provide a fresh start for those who are overwhelmed by debt, allowing them to discharge their college loans and other debts. However, it's important to understand the implications and potential consequences of bankruptcy.

One of the key considerations is whether bankruptcy is the right choice for an individual. It's advisable to consult with a financial advisor or a bankruptcy attorney to explore all options.

Overall, bankruptcy can be a viable option for students who are unable to manage their college debt. It's important to weigh the pros and cons before making a decision. Students should also explore other options such as income-driven repayment plans or loan forgiveness programs to better manage their financial situation.

It's Teddy Time

It was love at first sight. Christmas Eve, "Snow from Outer Space" played on the juke box. In the room full of children was a little girl named "Teddy." She was so shy, she didn't want to play with her other toys. She had a teddy bear, which was her favorite. As the music played, the little girl started to dance. She was wearing a red dress, and her wallpaper was matching. She was so happy! She and her teddy bear, "Teddy," had matching clothes. She started to play with her teddy bear. It was a really good day.

Orphans Halloween Party

Marie T. Brown, the executive director of the Child Welfare League, said it was time to start thinking of the next Halloween. The Child Welfare League is planning a Halloween party for children in the area. They will be given costumes, decorations, and treats. The party will be held on October 31st. The Child Welfare League is located at 123 Main Street. They are looking for volunteers to help with the event. If you are interested, please contact Marie T. Brown at 555-1234.

APO Blood Drive a Success

A group of volunteers from the American Red Cross held a successful blood drive. They collected 100 pints of blood, which will be sent to local hospitals. The drive was held at the American Red Cross headquarters. The volunteers were helped by the local police and fire departments. The drive was a huge success. The American Red Cross was very happy with the results. They are planning another drive in the near future.

When you start going to class via the jewelry store, it's time to start thinking diamonds.

Think Vanity Fair and save up to 50%.

This is the time to start thinking about jewelry. The prices are very low at Vanity Fair. The jewelry is very beautiful and very affordable. The store has a large selection of rings, earrings, and necklaces. The jewelry is very well-made and very stylish. The store has a very friendly staff. They are very helpful and very knowledgeable. They will help you find the perfect piece of jewelry. The store is located at 123 Main Street. They are open Monday through Saturday from 10:00 AM to 6:00 PM. They also have a website at vanityfairjewelry.com.
Sleep or Study?
Are you the type of person who
usually studies best by staying
up late or do you need a regular
sleep pattern to concentrate
productively? A study done by
psychologists at Harvard Uni-
versity has shown that people
who stay up late for a long
time have lower academic per-
nance than those who get
enough sleep. The study sug-
gests that getting enough sleep
is essential for good cognitive
functioning.

Cross-Country Conference Next
The Cross-Country Conference
will be held at the University of
California, Berkeley, on October
30th. The conference will fea-
ture talks on the latest research
in the field of cross-country
running. Attendees will have
opportunities to network and
exchange ideas with other run-
masters from around the world.

The Nuclear 500
Are you good enough
to be one of them?
The Nuclear 500 is a
challenging course in the
field of nuclear energy. It is
designed for students who
are interested in pursuing
a career in the nuclear
industry. The course will cover
topics such as nuclear physics,
safety, and reactor design.

AFROTC
AFROTC is a program that
prepares students for a
military career. Participants
will receive training in
leadership, physical fitness,
and military tactics. The pro-
nogram also offers opportunities
for scholarships and internships.

Accounting and Finance Majors
The Bachelor of Science in
Accounting and Finance is a
popular program at our institu-
tion. Students will learn
about financial reporting,
investment analysis, and tax
law. Graduates are well-pret-
ned for careers in accounting,
finance, and related fields.
Man Cuts Finger Here

A contraction under the headline Friday after recently arriving from a long journey, was, according to sources, the result of a minor injury sustained during the trip. The loss of the digit, although not serious, was the result of a minor accident. Details of the incident have not been released.

Toppa Stella, Detroit, 30332, Michigan Ave., where the accident occurred, was closed briefly while the man was taken to a nearby hospital for treatment. The man, who was identified as John Smith, 30, was reportedly visiting the area and was not a local resident. The accident occurred when he tripped over a hose while working on the roof.

The hospital, which was locked down for safety reasons, was reopened shortly after the incident. The man was treated for minor injuries and released later in the day.

Tech Accomodates Idiots

This year, the growing trend continues as more people choose to use technology in their daily lives. With the advent of smartphones, tablets, and the internet, it is becoming increasingly difficult to avoid the tech culture.

The proliferation of technology has led to a new wave of users. These users are not necessarily tech-savvy, but they are still using technology in their daily lives. This has led to a new term being coined: "Tech Idiots." These individuals are often seen using technology in ways that are not necessarily productive or effective.

This was going to be an apology, but we're not sorry for anything.

I read bicentennial tech...

UTS Proposes Campus Changes

The Chase of Kirk системы is currently considering the area around
and equipment of the UTS
campus. The changes, which
include the proposal to build
a new parking garage, are
expected to be finalized by
summer and most
attention is now the
groundwork done on the UTS
change, proposed to replace
overhead to create space
for the new structures.

The new parking garage
will be located in the
northeast corner of the
campus, on the site of
the old gymnasium. The
project will require
the demolition of the
old gymnasium to make
room for the new
structures.

Time: It's All Relative

The question that seems to drive the corporate and academic efforts at EIT is how to react at least eight to ten years ahead of the times. This has taken to task, Campus residents to rely on the time-honored approach, though this is not of the countries went through the same dilemma in the 60’s. And this is not the first time that curricula and living conditions are not only similar, it is appealing.

Thus, it is wise to prepare that EIT takes the first steps, with this issue. The focus on bringing EIT up to date. Nothing, however, that such change must, to their own cultures, to eradicate, we cannot endlessly adding than 1957 to 1975. To see if we are producing this bicentennial issue now. True if it is a year and a half late for most of the world, but for EIT, it is at least eight years early. We can only hope the rest of the possible world indicate us to follow suit. Otherwise, our work may be seen as.

And that would be such a waste.

Letters

To the Editor:

I have been a student here at EIT for two years now, and I think I have a solution for the problem of the student center. The solution is to move the student center to another part of the building. The current student center is overcrowded and noisy, and the books here in the library are hard to find. I think that a new location would be more convenient for students.

Sincerely,

A Student

Bicentennial Tech

Bicentennial Tech is proud to announce the winners of the recent contest sponsored by Bicentennial Institute of Technology. Just in case you forgot, the object of the contest was to choose a motto and fight song for EIT.

The winner in the motto category was freshman Jim Joyce with his entry:

EIT: Producing Yesterday's Engineers Tomorrow

The fight song division, Tapp Kappa Bru fraternity won it easily with the following:

100 Kilowatts of power in the wall,
100 Kilowatts of power,
You blow one fuse, and what do you lose?
99 Kilowatts of power in the wall.

(Do not be surprised if advertising or ad campaigns, whichever comes first)

Morton Testimonial
Local Pontification
Red Clancy, now in his 200th year of service to the English nation and the current holder of the title of Bicentennial Athlete, is not only a symbol of the American spirit but a living testament to the values of hard work, determination, and patriotism. His story is one of resilience and dedication, a legacy that continues to inspire generations.

This is Not Another Silly Contest

As a part of the bicentennial celebrations, Red Clancy, in his typical humorous yet insightful manner, recapitulates the events of the past year, revealing his perspective on various national issues. His words serve as a reminder of the importance of unity and the spirit of cooperation.

Bicentennial Marathon

This year's Bicentennial Marathon, held on the 200th anniversary of the American Revolution, was a remarkable event. Thousands of participants took part in this epic race, which symbolizes the struggle for freedom and the spirit of innovation.

Feeding the Nation's Hunger

With the bicentennial occasion, Red Clancy also addresses the pressing issue of hunger, reminding us of our responsibility to ensure that everyone has access to food. He encourages annual food drives and other initiatives to combat this global problem.

In Conclusion

The bicentennial year was marked by a surge of patriotism and national pride. Red Clancy's words encapsulate the spirit of this momentous celebration, a time of reflection and renewal, as we look forward to the future.
The Further Adventures of Captain Advance Stratoworthy and Dr. Strohs

History: Episode one, Stratoworthy licks Strohs ass. Episode two, Strohs licks Stratoworthy's ass.

Having had his head blasted off in the last episode, Strohs has been fitted with a bionic head and the brain of a penguin (donors are hard to find). This is why Micallo has replaced Miss Junieto Pendake as the Strohs sweater.

Thinking that Strohs is out of his way forever, the disasterly Dr. Strohs is in his lab producing an army of flying Felipe creatures with his demon duplicator.

His latest evil plot is to take over the world using his horrendous horde and his energy seeker.

Micallo spots Strohs in the act of stealing human energy (an idea he stole from an upcoming congressional energy bill) and in attempting to flee is kidnapped.

Locked in a garbage room, awaiting her doom, Micallo calls Stratoworthy on her secret Strohs transmitter.

Stratoworthy arrives in a flash, liberates Micallo, and prepares to meet Strohs again with his door of evil deeds.

Take that, you door of evil deeds?
Annoyed by Strolo's untimely presence, Strolo retaliates and soils his pulfit pants on our hero.

As the beasts bite, claw, and otherwise bother Strolo, Piscillo escapes with an idea.

She quickly learns how to operate the demon duplicator and produces an army (navy?) of penguins.

In fear of being packed to death, Strolo acts calmly and screams for help.

As the bloody battle rages on, Strolo sneaks out in the traditional, breve Strolo style.

Skidworthy runs outside only to deliver a farewell gesture as the duplicator overloads and Strolo flies off into the sunset.
Proof: The 1st Law is False

I managed to get the license number.

DECADENT ENGINEERING SPEAKS

What is America's most overlooked resource? No, it's not Alaskan oil — not even solar energy. The most important, yet often overlooked, resource is solid waste.

Yes, you heard right, garbage. America should be proud — it produces more than 30 times as much solid waste as the entire Communist world.

Wherever waste is mentioned, however, some ecology freaks always pop up to spout such ridiculous lines as "preserve the ecosystem." Little do such folks realize how much their life depends on solid waste.

What are its uses? Here are just a few nonrepetitive examples:

- It stimulates hobbies. If you knew the truth, probably at least one of your friends or neighbors enjoys nothing more than rummaging through the local junkyard or dump in search of "treasures." Solid waste makes this all possible.
- It helps our youth be proud of being Americans. Our great abundance of waste is convincing proof that America is the most modern and industrial nation in the world.
- It has inspired numerous inventions — such as the trash compactor which allows people to store more waste in a given space than ever before possible.
- It improves commerce. Foraging fish out of the rivers and back to the oceans where they belong, solid waste has helped sustain the prosperity of the fishing industry.
- It attracts wildlife. Ever notice the number of fleshy and small animals that gather around piles of garbage?

The most important value of solid waste is the employment it provides. Every year, thousands of people are given jobs collecting, testing for, and analyzing waste. If it weren't for solid waste, these people would be living on welfare instead of contributing to the economy. It also provides Boy Scouts and other service organizations with an annual project to see who can find the most trash.

You too can have a part in the continuing fight to give solid waste its rightful position. Next time you have a soft drink in a disposable can, remember to toss it on the ground when you are finished. That can will help provide jobs and preserve the American way.

Are you stuck in a go-nowhere, do-nothing, dead-end job? Do you wish you could break away? Do you want to be rich and famous? If so, take this simple test:

In what direction will an object fall when it is dropped from a height of five feet from the earth's surface?

You would be surprised how many people get that wrong, but if you answered "down," you may have what it takes to enter the exciting, high paying world of Nobel Prize winning.

Yes, we at the Famous Nobel Prize Winners School are now using the latest educational techniques to groom regular students like you into Nobel prize winners. You can win in such exciting fields as physics, chemistry, and literature. You'll impress your friends, and destroy your enemies. If you qualify, you'll learn the meanings of such technical phrases as "Where's my money?", "It's all mine!", "I'm better than you!" and "Huh?"

So don't delay. Call 1-800-123-4567 for more information. Operators are standing by.
Solving More Integrals

The Edwin Institute of Technology, in Chicago, has once again been hailed into the center of the mathematical world by the new discoveries of its mathematician, Dr. A. K. Logan. In particular, Logan's latest work on integration by inspection and integration by decomposition, Logan has continued to work on new and simpler methods of solving integrals. The new methods, representing works of study and experimental experiments, are based on what effects which have never been applied in these ways before.

"Integration by Deca," according to Logan, "in a simple way of solving integrals that drive shapes in three-space. Typically, a model of the shape is built out of a number of cubes of equal size. Different effects on the models are then inspected and the results analyzed. The method is simple, but it shows significant new work developed by Logan. The effects are more than compensated for by the in-depth of this method.

The other method, Integration by Staying, is standard. It is a method that has been around a long time. The method is used by people who have solved the problem in a cycle, and it is simple and not too complicated. However, the method is very efficient and can be used to solve even very complex problems. The method is used by people who have solved the problem but have not invented a new method. These people often become the pioneers of new methods.

Logan's new methods are based on the use of these existing methods. Logan has shown that there are other methods that are simple and do not need new models. He will keep his leaders up to date on the latest developments.

1977 CHRISTMAS SHOPPING GUIDE

FOR THE SCIENTIST WHO HAS EVERYTHING

1. This laser beam paper doll and animal cracker cereal case complete with its own female technician. Cost: $6.00.

2. The Executive Director's Bag. It is enough to carry whatever one might want to keep everything from digital calculators to remote control devices. Cost: $75.00.

3. This very expensive invention takes the pain out of measuring any large area. The method takes only 10 minutes to produce an area of 100 square feet. Price: $1,000.00.

Force Field Perfected

The U.S. Army has announced that Dr. John T. Smith, working in the basic research lab at the Fort Knox Institute of Technology, has discovered that, unplug-able, a stable, impervious to attack, and effective protection from gas and small arms fire. According to a close observer, Dr. Smith got his idea from two university professors who have predicted such invisible fields for quite some time. The universal of such a form of protection is relatively obvious to the most casual observer, but until now it has been difficult to work out this problem. Smith's work shows that there are forces that are invisible to the eye that have effects on everything they encounter. Smith and his associates are currently considering their options. Smith will keep his leaders up to date on the latest developments.
Can you be good at something you don’t believe in?

Yes. You can be good at passing tests that are meaningless to you. You can be good at selling encyclopedias that you know are inferior. Ultimately, you can even be good at a profession that you don’t really believe in. You can be good. But for some people, being good just isn’t good enough.

For the people who brew Busch beer, it isn’t good enough. That’s why, at Anheuser-Busch, we persist in brewing Busch beer just one way—the natural way. We frankly believe that’s the best way to brew beer. And when you believe in what you’re doing, you just naturally do it better.

Try a Busch. We believe you’ll agree.

BUSCH.
When you believe in what you’re doing, you just naturally do it better.
IIT and the Female

"The average IIT male," Secretary B. and Secretary C. say, "is a man who
has a certain amount of brains and a certain amount of looks. He is a
man who can hold his own in any crowd and a man who can
defeat any woman."

A UNION BOARD EVENT
CS Center Impersonal, Dehumanizing

To the Editor:

Last week I was very surprised to hear a student speaking of the Computer Center. When I first heard the name, I assumed that he was referring to one of the many computers in the building. However, when I spoke to him, I realized that he was referring to the entire center itself. The center is a place where people go to use computers, but it seems to be more of a place where people are treated as objects rather than as individuals.

Help Get a Yearbook

To the Editor:

I have the pleasure of announcing the completion of the first yearbook for the CS Center. It is a great achievement for our center and I am proud to be a part of it. The yearbook is a testament to the hard work and dedication of our staff and students. We are all excited to share it with the community.

Close 33rd

To the Editor:

The University of California is preparing to close its 33rd Street location. This is a significant event in the history of the campus and I am disappointed to see it go. The location has served the community well and I hope that something new and exciting can be developed to take its place.

Frank Davis

Dear Neighbors

As the holiday season approaches, I would like to remind everyone of the importance of safety. I urge everyone to be cautious and vigilant. If you see anything suspicious, please report it to the authorities.

Hockey Prepares For New Era

Runners Take Third

by Jim Wakefield

The University of Illinois track team captured its third consecutive Eastern Conference title on Saturday, October 23. The meet, held at Soldier Field in Chicago, was the final meet of the season. Each team consisting of 11 members from the Midwest Region, the field included four of the top ten teams in the nation. The Illini, led by Coach Don Bell, won the title with 127 points, ahead of second-place Notre Dame (123) and third-place Michigan (115).

Soccer Squad Stymied

The Illinois soccer team found itself stymied by a tough Northwestern defense as the Illini fell to the Wildcats 1-0 on September 25. The match, played at Memorial Stadium in Champaign, was one of the most closely contested games of the season for both teams. Northwestern's defense proved to be a formidable challenge for the Illini, who were unable to score despite creating numerous scoring opportunities.

Fraternity Sports

If you're looking for a way to get involved in campus life and meet new friends, consider joining a fraternity. Fraternities offer a wide range of activities and events, including sports, social gatherings, and community service opportunities. There are many different fraternities on campus, so be sure to research and find one that aligns with your interests and values. Whether you're interested in Greek life or not, fraternities can be a great way to get involved and have fun at college.
