Sixth Tech-Expo Scheduled This Week

At present, the exposition is a popular event, and the annual Tech-Expo at the University of Illinois at Chicago (UIC) has been a success. The exposition is open to the general public and features a wide range of exhibits and presentations. This year, the exposition will be held on the campus of the University of Illinois at Chicago, and will feature a variety of vendors and educational sessions. The event is free and open to the public.

1981-82 Tuition Hike: $680

The rising cost of attending IT

As outlined on the financial aid page, which is a separate section of the college's catalog, the current tuition rate for full-time undergraduate students is $680 per credit hour. The tuition rate is broken down into two parts: the base tuition and the fees. The base tuition is calculated based on the number of credit hours enrolled in. The fees are charged to cover the cost of administration, technology, and other services. The total cost of attending IT includes the tuition, fees, and any additional expenses such as books, supplies, and room and board.

A Watery Mess In Main Building

An estimated 9,000 gallons of water from a underground source flooded the first floor of Main Building, the center of the university's academic and administrative activities, on Tuesday afternoon. The flood caused significant damage to the building's infrastructure, including electrical and mechanical systems. The university has set up a temporary facility for students and staff while repairs are being made.

From Technology News
Electrical Engineers, Mechanical Engineers and Computer Science Graduates

With Sun Electric, you will be part of the design and development of electrical and electronic components and systems for a variety of state-of-the-art, high-growth products. Our state-of-the-art facilities and equipment are designed for the production of high-quality, precision electrical and electronic components. Our atmosphere is one of progressive development, with the latest in technology and equipment. Our team of highly skilled professionals is committed to providing quality products and services to our customers. We are looking for individuals with a strong desire to learn and grow. If you are interested in a challenging and rewarding career in electrical engineering, mechanical engineering, or computer science, please contact us today!

Our newsletter will be on campus Thursday, March 3, 1981.

BUILDING YOUR ENGINEERING CAREER

HONEYWELL COMMERCIAL DIVISION
ARLINGTON HEIGHTS, IL

Doing it right requires the proper planning. Arlington Heights, Illinois, is one of the fastest growing cities in the country. With a population of over 150,000, it is a wonderful place to live, work, and raise a family. At Honeywell Commercial Division, we provide opportunities for experienced engineers to work in a variety of areas, including design, development, and production. We offer competitive salaries, benefits, and opportunities for advancement. Our current openings are for engineering positions in our North American Operations, with responsibilities in areas such as mechanical, electrical, and software engineering. These positions require a strong technical background and the ability to work effectively in a team environment. If you are interested in joining our team, please apply to Honeywell Commercial Division, 300 Main Street, Arlington Heights, Illinois 60005. We look forward to hearing from you!

The Rain
In Main—Damage on 5 Floors

A sudden, unexpected downpour caused damage to a number of floors in Main Building. The sudden change in weather conditions caught many students and faculty unprepared for the sudden downpour and resulted in water damage to several areas of the building.

IT'S Students’ Prison Plans Awarded

Students at IT’S College of Architecture, Planning and Design were awarded a prize for their prison design concept. The design, which incorporates sustainable practices and a focus on rehabilitation, was chosen from a national competition.

Tech-Expo

The annual technology expo was held this year, featuring a variety of exhibits and demonstrations. Students and faculty showcased their latest projects and innovations, attracting a large crowd.

How About an Engineering Career in Los Angeles?

Los Angeles offers a wealth of opportunities for engineering and technology professionals. From aerospace to software development, the city is home to many leading companies. The average salary for engineers in LA is $105,000, with some fields reaching over $200,000.

The Swim Season Closes

The swim season has come to a close, with the last meet being held this past weekend. The team finished the season with a strong showing, and many athletes have qualified for the national meet.

The Day of the Gunfighter Is Not Over

In a nod to history, the military has plans to continue training for the day of the gunfighter. This training is crucial for ensuring the readiness of military forces.

The Great Fegov

It's Only Money?

Four thousand, one hundred and seventy dollars is the total amount of debt twenty-one-year-old Jim Brown of the State University of New York at Albany is carrying. He has been working one hundred and eighty hours a week for three years to pay off his debt. The money was borrowed to pay for his education. He is trying to become a dreamer, but his dreams have been shattered by this nightmare.

Brown borrowed the money for his education and now has to work hard to pay it off. He is one of many students who are struggling with debt and the effects it has on their lives. The high cost of education has made it difficult for students to pursue their dreams and achieve their goals. The debt burden is a factor that affects not only the individual, but also the country as a whole.

The cost of education has increased significantly over the past few decades. This has made it difficult for many students to afford the cost of tuition, room, and board. As a result, many students are forced to take out loans to finance their education. However, the high interest rates on these loans can make it difficult to pay them off in a timely manner.

The government has introduced various initiatives to help students with their debt, such as loan forgiveness programs and income-driven repayment plans. However, these programs are not always accessible, and the process of applying for them can be complex.

The high cost of education is a problem that needs to be addressed. It is important to find solutions that will help students pay for their education without burdening them with debt. This will allow students to pursue their dreams and achieve their goals without the fear of financial strain.
College Bowl Results

The College Bowl that ended on Tuesday, March 31st, featured the University of Washington and Stanford University.

The UW team, coached by head coach John Matthews, won the game with a final score of 30-24. The team's performance was highlighted by quarterback Tim Shahin's outstanding play, which included two touchdowns and a key interception.

UW's defense, led by linebacker Jordan Peterson, held the Stanford offense to only 24 points, despite the efforts of the Pac-12's leading scorer, quarterback Jack Young. Young's efforts were mostly neutralized by the UW defense, which allowed only one touchdown.

The victory marked the sixth College Bowl win for the UW team, making it the fourth consecutive year they have emerged victorious.

WOU Needs You

As we begin WOU's sixth year, we need you to get involved in the community. We have had a successful year so far, but we need more active participation from our students, faculty, and staff.

We are looking for volunteers to help with various programs and events. If you are interested in volunteering, please contact our office at 555-1234. We have positions available in areas such as sports, arts, and community service.

Science and God

The Faculty of Science and Religion will be holding a conference on "Science and Religion" on Saturday, April 4th. The conference will focus on the relationship between science and religion and how they can complement each other.

The conference will feature keynote speeches from leading experts in science and religion. There will also be panel discussions and workshops where participants can explore the intersection of science and religion in their own lives.

To register, please visit our website at scienceandreligion.eventbrite.com. The registration fee is $50, which includes all meals and materials.

Poisonous

The Mariner runs their first of the season this Saturday, March 31st. Tickets are on sale now at the box office. Come out and support your team.

SUNSHINE IN A BAG

Make your own sunshine in a bag with our new product! This innovative item allows you to bring a little piece of summer indoors, no matter the weather outside.

Order yours today at sunshineinabag.com and receive a 10% discount with the code SUMMER10. Limited time offer, so act fast!

On Campus Interviews

Monday, March 25

FAIRCHILD

A Schlumberger Company

On-Campus Interviews will be held at the Fairchild campus on Monday, March 25th. The interviews will be conducted by top executives from the company.

FAIRCHILD

1000 Fairchild Way, Redmond, WA 98052

To schedule an interview, please visit fairchildcareers.com and register for the event.

SCHEDULED EVENTS

WEE NEED A JOB

The society of Women Engineers meets on Thursday, February 28th at 7 PM in the Engineering Building. The event will feature a talk on "Finding Your Dream Job" by a senior engineer.

Coffee Break

On Friday, March 29th, the Coffee Break returns with a special guest speaker. The event will be held from 3 PM to 5 PM in the University Cafe.

INTERNATIONAL STUDENTS CLUB

The International Students Club will be holding a potluck dinner on Saturday, March 30th. The dinner will be held in the Science Building from 6 PM to 8 PM.

FRESHMEN TUTORING

Freshman Tutoring is available for students who need help with their coursework. Tutoring sessions will be held in the Science Building from 10 AM to 12 PM on Monday, March 25th.

Science and God

The Faculty of Science and Religion will be hosting a conference on "Science and Religion" on Saturday, April 4th. The conference will feature keynote speeches from leading experts in science and religion and how they can complement each other.

"Scanners" Not Worth Attention

By Robert Alt

Scanners" might be able to save the video business, but only at the cost of video quality. The film's cinematography, special effects, and acting are all second-rate, and the plot is a mess. The film is a disappointment, and I can't recommend it to anyone. There are better movies out there, so why waste your time on "Scanners"?

An Exciting Visage

On this cover, Visage is featured, a band known for their fusion of electronic and pop music. Their album "Visage" is set to release next month, and they are touring in support of it. The band is composed of four members, and they are known for their unique sound and their energetic live performances. They are currently on tour in Europe, and they will be in the United States in the near future. The album is available for pre-order now, and it's sure to be a hit with fans of electronic and pop music. Don't miss out on this exciting new release from Visage!
1981-82 Baseball Schedule Set

By Mark Baker

It’s been a baseball season to remember for UVic, as the 1981-82 season is now complete. The team finished with a record of 24-31, and the season was marked by several notable events. The team played their first game against the University of British Columbia, and they ended the season with a victory over the University of Victoria Team.

Cougars End Season 5-22, 6-27, 1-30

The season ended with a disappointing loss to the University of British Columbia, with a score of 3-2. The team then faced the Victoria Cougars, and despite a valiant effort, lost 3-2. The team finished the season with a win against the University of British Columbia, with a score of 6-2.

Swimmers End Season

The swim team wrapped up their season with a strong performance. They finished the season with a win against the University of British Columbia, with a score of 8-4. The team then faced the Victoria Cougars, and despite a valiant effort, lost 3-2. The team finished the season with a win against the University of British Columbia, with a score of 6-2.

The Technology News

#7 Challenge

Five members of the UVic Engineering Society were selected to compete in the #7 Challenge. The challenge involved answering a series of questions, and the team that answered them correctly would win a prize. The challenge was organized by the Engineering Society, and it was open to all members.

HELP WANTED

- Fluent in English language
- Possess strong written skills
- Willingness to learn

This week’s prizes provided by the Bog and the IT Mart.

Solution to Puzzle Six

20, 45, 56, 45, 20

Mike Winkelston 1st
Jared Flores

All entries sent in for the puzzle must be received at the Technology News office by noon, Monday, 25th March.
