Reunion’ 81 Honors Alumni

600 To Receive IIT Degrees May 17

The upcoming departure of the Jane Sloan Library from the IIT campus is causing difficulties for its administration in the absence of the IIT Central Library, which moved into its new home last week. The Jane Sloan Library has protested against the sale, but to no avail. Following the announcement of the sale, Representative Thomas fronted the issue in the House of Representatives, under the aegis of Rep. J. W. Miller, who said the IIT Central Library was not the first to feel the pinch of state development.

A. J. Kline, IIT's Library Representative, stated that since the sale of the Jane Sloan Library, IIT Central Library has been unable to fill the vacuum. "We have been working since the 1960s to provide the same level of services, but we have been unable to do so," he said. "We are now in a position where we must make some decisions about the future of the library.""
PASSPORT LOST
No: 173X305
If lost contact Ramin Amadi Lavatari phone 4427288. An award will be given.

IT'S University Relations Office is seeking a student to serve as Student Sports Information Director for the 82-83 school year. The job requires about 20 hours a week. It involves covering and reporting on IT athletes and teams. Interested persons should contact Nancy Moss, Director, University Relations, (509-3106) for further details.

The Job Outlook for '81 Grads

In attempting to do the student part of the major issue of student employment work. Right now, in fact, the issues are more pressing than the job matter. As the number of graduates in the United States increases, so too does the number of graduates graduating next year. This puts a strain on the labor market, as graduates are competing for jobs with each other. It can be argued that a few graduates might benefit by this increase in competition, but it is a strain on the labor market overall. This means that graduates must be more competitive in order to secure employment.

The problem may be the job market. In the 1960s, the job market was more flexible and graduates could find employment relatively easily. However, in the 1970s, the job market became more competitive, and graduates had to work harder to find employment. This has continued into the 1980s, where graduates must be even more competitive in order to secure employment. This means that graduates must be more competitive in order to secure employment.
Goodbye

Letter from the Editor

As many of you know, this is my last issue of Technology News as Editor-in-Chief. I am retiring to the position of Editor, Emeritus at the end of the semester. I am very grateful to Sue Ball and Andrew Pryst. Both of them have been very helpful in the staff's transition. I have received many wonderful letters, and I am very grateful to all those who have helped me over the years.

I have enjoyed my time here, and I hope that the staff will continue to grow and succeed. I wish you all the best in your future endeavors.

Thank You

Letter from the Editor

I am writing this letter to thank you for your support and dedication to Technology News. I have enjoyed working with you all, and I appreciate your hard work and commitment.

Commutes At IIIT?

To the Editor:

I am writing to express my concern about the recent events at IIIT. As a student, I have been involved in organizing protests and we were able to make a tremendous effort to support the students who were involved in the protest. I urge everyone to support the students and to remain united.

Rehab Colloquium

The Rehabilitation Colloquium is a series of talks and workshops that aim to raise awareness about rehabilitation and its importance. The colloquium is open to all students and faculty, and it provides a platform for sharing knowledge and experiences.

Design Students Win Prizes in International Competition

The Design students won prizes in the annual International Design Competition. The competition is open to students from all over the world. The winners were chosen based on their creativity, originality, and technical skills.

Of Electron Bondage

The electron bond is a fundamental concept in physics. It describes the attractive force between atoms that results in the formation of molecules. Understanding the electron bond is crucial for many scientific fields, including chemistry, biology, and materials science.

Psych Students Honored

The Psychology Department honored several students for their outstanding achievements. The students were recognized for their research contributions and academic excellence.

Co-op Lanuchee

The new co-op program aims to provide students with opportunities to gain hands-on experience in their field of study. The program includes a variety of internships and volunteer opportunities.

Taur Beta Pi Celebrates 75th

Taur Beta Pi is a student organization that celebrates its 75th anniversary this year. The organization has a rich history and has contributed to the university community in numerous ways.

The International Visitor Center will host a special event on Saturday to celebrate the 75th anniversary of Taur Beta Pi. The event will feature a keynote address by a prominent figure in the field of science. Tickets are available for purchase.
Culture Comes to Tech

By David Winter

The Smithsonian Institution, in cooperation with the Boston Museum of Fine Arts, has mounted an exhibition called "Culture Comes to Tech." The exhibition, which opened in March, features a wide range of artifacts from around the world, including textiles, ceramics, and tools. The goal of the exhibition is to provide visitors with a glimpse into the diverse cultures of the world and to encourage them to learn more about the different ways people live and work.

Spectacular Sword & Sorcery

By Bob Lewis

Bad Reputation

By James McQuade

"Younger Rightful Wielder: The Provenance and Use of the Saber" by K. A. L. D. S. published in the March issue of Antiquity. It focuses on the provenance and use of the saber, a sword that was used by the Romans during the Roman Empire. The article examines the different types of sabers, their provenance, and how they were used in battle.

"Blizzard of Oz" is a novel by Robert Anstey, published in 1967. It is a post-apocalyptic novel set in a world where all technology has failed and people are forced to use traditional tools and skills. The story follows a group of survivors as they try to rebuild their world.

"Bad Reputation" is a novel by James McQuade, published in 2000. It is a mystery novel set in the world of organized crime. The story follows a detective who is trying to solve a series of murders that are linked to a powerful crime boss.

The Technology News Challenge

There are 14 different squares hidden in this 3 x 3 board:

- 9 smallest ones (3x1)
- 4 larger ones (3x3)
- 1 largest one (3x3)

(a) Find the total number of squares hidden in a chessboard.
(b) Find the total number of rectangles hidden in a chessboard.
(c) Find the general formula for polynomials for the total number of squares and the total number of rectangles in a general N x N board.

This week's winners:
1st Daniel Gill
2nd James Korenchan
3rd Jim McMahon

Prizes may be claimed by May 8. Please claim prizes at Technology News Office 12:45-1:30 most weekdays.
