Exchange Student Opportunity

Again this year, as in every year, the INS/AISNA Program Director is looking for qualified IIT students to take part in an exchange student program with INS/A (National Institute of Applied Science) in Lyon France. The program is open to students who will be juniors in the Fall of 1982 and are enrolled in a French language program (ME, EE, Eng, CS, CEE, Fine Arts, Mktng.), mathematics, computer science, physics and biology programs.

The two students chosen will undergo preparatory language training in the form of free private lessons at IIT. According to Dr. Lavan, these are "given at least corresponding to their knowledge of the French language. They begin their stay in France via the summer on the campus of INS/A where they take an intensive French language course."

After the completion of this language course, the students then choose the language training or spending a few weeks at one of number of vacation camps operated by the organization of French university students. Various sports and recreational activities are offered there, and this also provides an excellent opportunity for the students to become more familiar with the people and the culture of France.

After this training, the students are ready to begin their junior year at INS/A. The IIT student's program is carefully planned within the framework of the INS/A curriculum to match the degree program the student pursues at IIT. All grades are counted on a pass/no credit basis. In this way, full credit is given by IIT for the students' junior year without affecting the GPA. Of course, this is true only for those who get a passing grade.

The cost of this program to the student is no more than the student would normally pay to attend IIT for the same period. Selection of the participants is made by a special committee and is based primarily on academic record and motivation.

These who have participated in the program have found it to be worthwhile and enriching experience. Last year's participants, Aliya Yeru, Stephen Sheehan and Kenneth Knows are available for consultation for those students who may be interested but may want some first hand impressions.

Dr. Laven is anxious to hear from as many qualified students as possible. Those who are interested in this "unique international experience should contact me at 567-3189 (252 EJ). He stated, "But be sure to do it before the deadline on December 2. Selection of this year's participants will be made before the end of the Fall semester."

"Talk it over with your family and come and see me," Dr. Laven went on to say. And his hope would prove that every student eligible, seriously consider taking advantage of this singular learning experience.

USSA Revitalized

(CPS) - The student association, the Washington, D.C. based coalition of student body presidents that lobbies for student interests in the capital, is in trouble. To get out, it has "drawn up a detailed plan," according to President James Fine. The plan, which "must be moved forward," has two major goals: "to begin to confront the aging, and newly narrow focus of the newly created group that is the USSA President Janice Fine."

Her effort to pull USSA away from social and political issues not strictly confined to campus issues secures conservative critics of the group, which once balled itself as the voice of the student movement.

Conservatives unhappy over the group's treatment of foreign policy, race relations, women's rights and other "non-educational" causes have broken with the organization repeatedly over the years.

Conceding the USSA's membership has "decreased noticeably during the past year," Fine says the Reagan budget cuts require that USSA pull back from the "grassroots." "If we're not going to focus, we're going to get blown away," she claims.

"In the past USSA has been anesthetized in terms of the politicalubernatorial campaign...I think it's time for us to reinvent ourselves," candidate for the state legislature, one of the stronger USSA's, such as Commonwealth Association of Students in Pennsylvania and New York's State Association of the State Universities, are strong USSA supporters. Others, such as the Washington State Student Association of Western University, are considering severing ties with the national organization.

"There's definitely a trend toward state-level activity, toward putting together this more accessible to local students," says Pennsylvania's Joyce Cheepbrook. The role of USSA as our lobbyist on the Hill in Washington. They disseminate information, give us support.

Conversely, "I detect among students in Wisconsin a sense that USSA hasn't met the challenge of being a voice for the students," says United Council of President Robert Krawet. "They don't have effective lobbyists, and they have constant financial problems. It may be time for state contributors to take the "life support system" off USSA, and let it live or die."

"Our ties with USSA are stronger than ever," states ASK's Bob Bingaman. "USSA is being much more efficient with its resources and its communications." Yet, recently Kansas State University withdrew from membership in USSA. "USSA spends so much time taking stands on social issues, they lose credibility with students," complains David Lehman, KSU student senate official.

Janice Fine bristles at such charges. "We're not making a political statement, we're making a perception. Ninety-nine percent of our time now is taken up working on education issues, lobbying in Washington and elsewhere. America's higher education system is going through its worst time in history, with the Reagan cutbacks. We simply don't have time to work on anything else." Bob James, president of the New Food Service Program for Next Semester

By Andrew A. Press

Anyone who has been attending classes at IIT for a reasonable amount of time, and is not a dorm or frat resident, has probably had occasion to eat in the HUB cafeteria. For all of those people, there is a change coming in the cafeteria food services. Beginning on January 1, 1982, Service Systems, Inc. will assume the responsibility of the food preparation in the HUB. Service Systems will establish the menus, procure the necessary food and, while for the most part the present service food staff will remain. Service Systems will also provide training for those people to insure that the food prepared will conform to the new specifications.

According to Jack Beware, Vice President for Finance and Treasurer at IIT, this change in food service for the HUB is just one part of a much longer program already underway to refurbish and modernize the many facilities in the HUB. Most recently, the projection and sound systems in the auditorium have been renovated. The study and lounge areas will also be relocated and improved with new furniture, tables and chairs.

In the cafeteria, the serving area will receive a facelift this summer to help improve the way in which the food is presented. Also, according to Mr. Beware, with the new service taking over, there will be more variety in the menu and the entire eating area in the HUB will be substantially improved.
Experience . . . Theta Xi Fraternity

Theta Xi Fraternity will be holding an open house for all students who might be interested in discovering more about the fraternity experience. Theta Xi offers a college home environment in which all students can benefit from: good meals, a comfortable living environment, and various social and athletic activities. Theta Xi offers the commuter an opportunity to become involved in a fraternity without living on campus.

The fraternity experience is not for everyone, but there is a good chance that it may be for you. We encourage you to stop by and talk with us. It may turn out to be one of the best decisions you have made.

A life-time time-of-your-life experience

Date: Friday, December 4, 1981
Time: 2 'til 5 O’clock
Place: Theta Xi Fraternity
        3340 S. Michigan
Phone: 842-9329
Ask for Steve or Tom

MAJOR UB & RHA EVENT

Keep 8PM - 10PM open on January 29, 1982.

Make sure you have $4 for each ticket

DETAILS LATER
What Will They Do Next?
The Physics and Chemistry departments will present a joint colloquium, Wednesday, November 28, 1981. The subjects are: Turning a Spheroïde Inside Out, and Modeling Chemical Reactions, and will begin at 2:00 p.m. in room 114, Wishedall Hall.

For more information contact the Ticket Office at 567-3075.

Kingdoms for Horses?
IIT is proud to present William Shakespeare's Richard II performed by The National Shakespeare Company at 8:00 p.m. December 1, 1981 in the Hermann Hall Auditorium, 3241 S. Federal. Tickets are $3 (adults) or $1 (students, age 22 and under), and will go on sale at 6:00 a.m. in the Ticket Office, 567-3075.

Entries for the horse-riding competition will be taken in the Ticket Office from 11:00 a.m. to 5:00 p.m. and must be dropped at least two days before the competition. The competition will be held on Saturday, December 11, 1981 in the cow pasture southwest of the stadium. For more information contact the Ticket Office at 567-3075.

WOUI Needs a Logo!
WOUI is back on the air and moving fast with exciting format. There will be national and world news as well as an interactive disc-jockeys that light up the air waves seven days a week from 9:00 a.m. - 9:00 a.m. If your choice of music includes rock, pop, jazz, religion or rhythm & blues then lead your ears and we promise to capture your heart.

As your campus radio station, we have an exciting deal to offer the organizations of the college community. If you are sponsoring an event and want it publicized simply submit the details to the Promotional Department of WOUI and contact us at X-3077. Remember, we are here to serve you, so take advantage of this opportunity.

In the past WOUI has utilized faculty members as disc-jockeys such as Janice Dawson, Asst. Dean of Student Life. Once again, this idea will be expanded, and there will be an open forum for all students for disc-jockey spots in spots for early jazz listeners. We are encouraging more faculty members to join this effort in providing a more comprehensive service to the IIT Community.

Students interested in increasing their budget by fifty dollars may enter our WOUI LOGO CONTEST. All that is required is that you design what you think is the best logo and the background color and submit it to the station's mail box in the Dean of Student Life Office by Wednesday, November 24, 1981. In addition, all students will be eligible to enter. WOUI personnel are excluded from the contest. The winner of the contest will be announced at WOUI's Holiday Social which will be announced at a later date.

WOUI's Station Manager, Prittie Vincent has pledged her energies and efforts towards providing a rewarding and positive format for the listening audience. So tune in to WOUI 88.8 FM for community service announcements, current campus news, new program innovations and the music of your choice.

Cram Finals up....
Need to cram for finals? There's an "Advanced Study Technique Laboratory" presented by the Counseling Center on Friday, December 4, 1981 from 12:00 to 1:30 p.m.

Learn and practice techniques in relaxation skills, concentration and 'cramming'. There will be a free spaghetti luncheon and you can contact the Counseling Center as soon as possible in Fair Hall, room 301. The phone numbers are 567-3503, 4.5.

New-Old Photographs
The Columbia College Galleries will present the important exhibit, "Avant Garde in Germany, 1919-1937." from Friday, December 11 through January 23, 1982. The Gallery is located at 600 S. Michigan Ave., Chicago.

The basis for much of what we think of as modern photography can be traced to the photography that took place in Germany in the 1920's. The growth of technology and consequent changes in society fostered a "new vision" in Germany in those years. Pushed by design, advertising and journalism, photography became the innovative edge of creative ideas.

Other exhibits, lectures, film series have been planned around Columbia College. The Edgewater Gallery at 4100 E. 59th St. will host and exhibit titled "The German Avant-Garde" from December 8 through January 17, 1982. At the Goethe Institute, 401 N. Michigan Ave., "German Expressionist Photography From Its Beginning until 1981" will be featured during November and December. The Chicago Public Library Cultural Center at 78 E. Washington St. will exhibit "Auguste Stellwag and Landscapes from 1924-1939" in its West Gallery, Main Floor, from Dec. through Jan. 16, 1982. Admission to the Columbia Galleries is free. Gallup hours are Monday through Thursday, 9:00 AM to 5:00 PM; Friday, Noon to 5:00 PM; Saturday, 12:00 Noon to 5:00 PM. The gallery will be closed for the holidays Dec. 31 to Jan. 3, 1982.

Come See 3-D
Discover Holography: The Museum of the Fine Arts Research and Holographic Center is featuring a collection of international holograms to run through December. Hours: Wednesdays-Sundays, 12:30 p.m. to 5:00 p.m. and Tuesday-Saturday, 12:30 p.m. to 9:00 p.m.
Bury a Tech Nerd Today

Jim Brant

Man is so impatient and amorous. We think we know everything right now. And yet, who are we to even say what life is and what has been? Such a judgment requires sensitive contemplation, and, above all, patience—things most people do not practice. Earth, for instance, can be said to have life or at least it exhibits the attributes of a superorganism.

It has the power to maintain a fairly constant level of body temperature and humidity despite a changing environment, just as man does by sweating or shivering. In fact, there is evidence that earth has kept a steady temperature throughout all its four billion years of existence despite the fact the sun has increased its radiation of energy, light and heat by two to three hundred percent during the same period. Even rocks are alive; we think they’re dead, but, actually, they are just in a different time span. Imagine yourself sitting on an electron. You would be moving so fast that almost everything else, including humans, would seem to be standing still, lifeless. The same relation is true of us and the rock. We seem very fast in comparison to the rocks that they appear to be dead.

But, more rocks actually do grow, only very slowly. They do get around, even ear in their own way, but no capacity to heal their wounds, and even bear offspring.

“attacks.” It can’t be long until the major and disastrous phase is over and overlay it like they do all good music. The slow stuff is the best since the third, even though none of it is up to par with “C’stas la Vie”, Zipplin never tops “Pamela” and “Heaven” either. The music sounds a lot like Blue Oyster Cult, which is surprising because Greg Lake used to write love songs. This is just another example of how versatile this man really is.

While I was at the record store, I saw lots of new albums but just wanted to buy the Christmas Tree: New Cars. Police, Ozzy, Osborne, Black, Miller, as well as two best of collections: Queen and Blondie. With all this music out there, it should be easy to find something for everyone on your shopping list. So get out there and buy, buy, buy.

Happy New Year. Don’t party too hard; remember the real meaning of Christmas; good luck on finals; don’t break anything; and buy those albums!!

A little bit of nonsense now and then is relished by the wisest men

We couldn’t force anyone to write a farele tale for this issue so we came up with this little ditty instead. Enjoy...

An old monk and a young monk were walking through a forest when they came upon a river. The old monk saw a beautiful young woman standing at the edge of the bank. The woman told the monks that she was afraid to cross the river because she might slip and fall and drown. The old monk told her that one of the monks might help her across.

It turned out it so happened that these two monks were members of a sect which practiced celibacy and they had both taken vows never to touch a member of the opposite sex. But the old monk, sensing the extreme anxiety of the young woman, lifted her onto his back and carried her to the other side of the river.

The young woman thanked him and went on her way. The monks continued on their journey, but the young monk was really happy. He had never seen his older companion break his vow so nonchalantly. Finally, after three hours of walking, the young monk, thinking, he could contain himself no longer and he burst out. “Tell me, old man, what did you feel like to have her smooth warm thighs wrapped around your waist, her breasts against your chest, her back, her arms around your neck and your soft cheek almost one with yours?” Tell me, old man, what is it like to carry such a beautiful young woman?”

The monk, who had been silent for several steps and then said, “It is you who should tell me what it is like to carry such a beautiful young woman. You see, I put her down three hours ago at the river, but she is still carrying her.”
The Technology News Challenge

Puzzle Six

Substitute decimal digits for the letters in the exponential equation: \((ABC)^D = DEFCEGHA\)

All entries, accompanied by name, phone, and address, must be turned in by noon, Friday, December 4, to the TN office.

Solution:

Solution to Puzzle Five: \(a+b+c = 401\)

\(a=44, b=240, c=117, k=267, l=125, m=244\).

Laurent Lagard was the winner.

The prize must be claimed by noon, Friday, November 27.

Correction to Solution of Puzzle Four:
The wrong points were deleted.

KING of ALL TIME

by MOLNAR
A KID CORRODE PRODUCTION
EARN OVER $950 A MONTH.

AND OPEN THE DOOR TO A TOP ENGINEERING FUTURE.

How many corporations would be willing to pay you over $950 a month during your junior and senior years just so you'd join the company after graduation? Under a special Navy program we're doing just that. It's called the Nuclear Propulsion Officer Candidate-College Program. And under it, you'll not only get pay during your junior and senior years, but after graduation you'll receive a year of valuable graduate-level training that is not available from any other employer.

If you are a junior or senior majoring in math, engineering or physical sciences, find out more today. And let your career pay off while still in college.

For more information, call collect (312) 724-8440 or send resume' to Navy Engineering Program
Bldg. 41, Code 034L
NH8 Glenview, IL 60026

Food and our Future

To feed one person in the United States annually requires five acres of land, 220,000 gallons of water, and the equivalent of 500 gallons of oil. Future shortages of these resources will have a significant impact on food production, according to Dr. David Pimentel, professor of entomology and agricultural science at Cornell University.

In the second of IIT's Science Technology, and Society lecture series "Food and our Future: the Role of Science and Technology," Dr. Pimentel will discuss "Food, Energy, and the Future." Thursday, December 3, at 12:30 pm in Crawford Auditorium of the Engineering I building.

The lecture, which is free and open to the public, is funded by the Crawford Foundation.

Basketball

continued from page 6

assists, 4 steals and 17 points.

Other top placers for Red were senior forward Clarence Ray (5 rebounds, 10 points), freshman guard Wes Cassatt (9 points), and freshman forward Greg Petsky (9 points).

As a whole, the contest indicated that the Scarlet Hawks will be ready to roll when they face Wheaton College on Tuesday, November 24, (away), for their season opener. They will entertain Condomia College the following Saturday, November 30, in IIT's home debut. Game time in Keating Hall is 7:30 pm.
Well, we're nearing the end of another semester. Things at the paper have been hectic, but we've always managed to overcome the problems that arose. This was due to the help, cooperation, and support that our entire staff provided. In the spirit of the holidays which are almost upon us, we wish to thank everyone who has helped us survive and thrive during our first semester as editors of your student newspaper.

ITT seems on the surface to have a lack-luster and apathetic atmosphere. It is our duty as students and editors to show that this is not the way it has to be. Don't wait for someone else to do something for you, get out and do it yourself.

In our issues this semester, we have tried to point out positive aspects of life at ITT and student events; to show that ITT is alive, and there is a spirit of willingness out there just waiting to be tapped.

We've been blessed with the number of people who have responded to our initial plea at the start of the semester, but we still have many positions open for talented people, who know we are out there. So if you have some constructive criticisms and ideas, let us know what you're thinking, and together we can make this an endeavour worthy of the excellent academic standards ITT possesses, as exemplified by our recent victory in the Collegiate Bowl Tournament, and by letters of praise from industry, such as that to Dr. Martin from Hewlett Packard president below.

We are already looking forward to next semester when we will be on a weekly publication schedule. This, of course, means we will have to depend even more heavily on our present staff. Hopefully, to ease this burden, we will be able to recruit additional layout, typesetting, and especially writing staff. This will help us in our continuing effort to publish a newspaper/magazine representative of the ITT community and particularly the student body.

So while everyone's in the holiday spirit of giving, seriously think about devoting some time next semester to stretching your talents, developing your abilities, making new friends, and having a bit of fun by supporting Technology News.

Remember that the best way to insure that your student newspaper reflects your needs and ideas is to get involved personally.

Happy Holidays to all, and may you all ace your finals.

Andrew Preisz, Managing Editor Robert Artz, Editor in Chief

Letters

At Last, Something to be Proud Of

Dear Dr. Martin:

Unfortunately we were only able to meet briefly at Tech Expo which did not give me the opportunity to express our appreciation for the excellent assistance, cooperation, and facilities extended to us by all the staff and people at ITT during our recruitment visit. ITT seems to have the qualities and characteristics that we think makes HP a good place to work: a commitment to excellence; recognition of the programs such as summer, co-op and affirmative action; organized toward getting the job done; open, friendly and direct communications. I would especially like to commend the placement office for their very professional and friendly service and assistance before and during our recruiting visit. The facilities were well done and comfortable, all the staff and personnel were very friendly and helpful, and the candidates well prepared.

Another unique and rewarding experience was participating in Tech Expo. The program that Mr. Thomas and his staff have put together leads up to arid part of Tech Expo is undoubtedly one of the best conceived, best managed, best implemented programs that the results to prove it, of any that I have seen or heard about. I am writing with Nate to see how HP can help. The turnaround for our recruiting visit was six to ten times greater than last year, which is the result of efforts by both the people at ITT and two of three members of the HP Team. We added another recruit during the last minute, and two of us worked the next afternoon to talk to more students and still was an overflow. We talked to some fine candidates both during regular recruiting and at Tech Expo (and I am confident we will find a mutual match for a number of them). This was my first visit to ITT and unfortunately I was only able to tour one of your departments, the Institute of Design. Charles Owen was our host and I was impressed with both the facilities and some of the outstanding student projects. We were able to meet for lunch with Dr. Haag, Dr. Francis, Marta Evans and Charles Owens to discuss the MI, ME, CS and Design Programs at ITT.

One concern that I have is that ITT seems to be very strict in grading standards. This was somewhat confirmed in subsequent discussions with Faculty Members, HP Team Members and others. This may be reality but it is the opposite of grade inflation at some other schools and does confuse managers reviewing resumes. Even though I wish that GPA was not a critical factor and that managers would take more time to evaluate capability it is often used as a benchmark. I tallied 1100 or so candidates with GPA's in the 2.2 and 2.4 area. I wrote a brief note to corporate and asked that it be attached to each resume. I estimate based on my inputs and experience that adding .5 to 1.5 to lower GPA's would make them more comparable to most other schools. If you or your staff have any additional data or comparisons it would help a great deal. Greg Cook, did give me the average GPA of the graduating class which was 2.76. Again, many thanks to you and your staff for making our visit pleasant and productive.

Sincerely,

Bob Pierce
Hewlett Packard GCA-US Manager

Grey Team Wins Intra-Squad Game

by Mark Haines

ITT's Varsity Basketball Team showcased their talent last Thursday, November 19 with their annual Red and Grey Intra-squad Game. The game was in preparation for their 1981-82 season opener at Wheaton College, Tuesday, Nov. 24 at 7:30 pm.

The Grey Squad, under the direction of new Head Coach Bob Tupper, was the winner in overtime 90-84.

The Red Squad, under the guidance of assistant Mark Haines, led for the entire contest, but ran out of steam late in the game.

The Grey Squad came back from a 15 point deficit, with 5 minutes remaining, to even the regulation time score at 80 apiece. Forward Dan Manipel sent the contest into overtime on a last second tip for the Grey.

Overall, the contest was an offensive affair, as indicated by the final score. The 174 points signify that the Hawks will be putting a lot of points on the scoreboard with their new attack and fastbreak philosophy, initiated by Coach Tupper.

Leading the attack for the victorious Grey Squad were sophomore forwards Frank Ricciardi and John Pazianis, and senior guard Bill Hamilton.

Ricciardi controlled play under the basket, grabbing 21 rebounds and scoring a gamehigh 22 points. Pazianis and Hamilton backed him with 21, and 10 points respectively.

Sophomore guard Brian Boniet (12 assists, 8 points), senior Captain Mike Bartels (6 rebounds, 9 points), and sophomore forward Dan Manipel (8 rebounds, 11 points) added to Grey's attack.

The Red team's play indicated that the Hawks will have difficulty in the clinic.

The squad's goal is to encourage school spirit via side-line cheers, half-time performances, and general promotion of the games.

If any girls are interested or just curious about the formation of the cheerleading and pom-pom squads, feel free to attend the clinics on Jan. 14, 15, 16, and 18, from 12 to 2 pm in Keating Hall. Tryouts will be held on Tuesday Jan. 19 between 12 and 2 pm in Keating Hall.

Swimmers Defeat Rockford

by David Jones

For the first time in 12 years, the ITT Varsity Swimming Team defeated Rockford College in a dual swimming meet. ITT had defeated Rockford in the NCAA Championship two of the last three years, but could not get close in a dual meet in the past decade.

The Hawks won 5 first places in the 13 event competition, but got second place in Rockford's 4, and in third places, the Hawks also won 7 and 4. The three individual first places were by Senior co-captain John Jamieson, who set a 200 yard breaststroke, sophomore Daniel Roberts, and in 50 yard freestyle, and senior James Labusz in the 50 meter diving. The team of Bill Pezzullo, Al Reayns, John Jamieson, and Gary Simms set a new varsity record when they won the 400 yard medley relay. ITT was losing 56-60 going into the last event.

Sports Notes

Men's Bowling

ITT's Men's Bowling Team is on the roll this year. As their 20-16 season record indicates, they've been quite successful. A major triumph for the squad was a second place finish in the Midwest Intercollegiate Bowling Conference.

Returning starters are Kevin Gross (captain), Kira Zevors, Dave Nicholas, and Randy Darling. Other bowlers include: Ernie Sevko (195 high average in conference), Rob Fowler, Derek Curtis, and Rich Clay. The coach of this year's team is Dave Cusmano. Next match is Nov. 22, against Triton College.

Men's Volleyball

There will be a meeting of the Men's Volleyball Club on Dec. 1, at 12:30, in the Schonauer Room of Keating Hall. For information contact Chris Meyer, X3296.

Baseball

Only 136 days left before the Hawks' home opener on April 8th.

Basketball

The first home basketball game of the season will be played on Nov. 28, at 7:30, in Keating Hall. Everyone is welcome to attend and watch the Hawks win their home opener on "Fraternity and Sorority Night". December 3rd will be "Administration, Faculty and Staff Night".

Ra, Ra, Sis Boom Ba

November saw the beginning of the 81-82 basketball season with the start of a new team and a new coach.

However, the Varsity Basketball Team would not be complete without campus spirit. That spirit will be developed and unveiled in January with the establishment of the ITT Cheerleading and Pom- Pon Squad.

Many girls are needed to help establish a strong squad. Cheerleading and pom-pom experience is not required to participate in the clinic.
