College degree can be worth $2.75 million

WASHINGTON, D.C. (CPS)—College graduates earn about 40 percent more over a lifetime than non-grads, but men continue to earn about twice as much as women regardless of educational attainment, a new Census Bureau study shows.

Male college grads can expect to earn from $1.3 to $2.75 million over a lifetime, according to the study, while male high school grads will take in only $600,000 to $1.3 million.

Women, on the other hand, will make from $530,000 to $1.2 million if they have college degrees, and between $380,000 and $500,000 with only high school diplomas, the study reports.

The bureau's findings, however, that the main purpose of the study was to show average expected lifetime earnings based on educational attainment, "notes Census Bureau statistician John Coder. A lot of people would like to say the difference between men's and women's earnings) is due to discrimination, and some of it may well be," Coder explains. "But to attribute it all to discrimination would be very unfair."

For one thing, he points out, "women tend to have more interruptions in their lifetime work schedules. And the occupations they go into may be lower paying than traditionally male-dominated job areas."

Nevertheless, Coder adds, "the ratio between what men with college degrees earn and men with college degrees earn has changed very little over the years."

"Things may be changing for women in the workforce," he says, "but they are changing very slowly."

Stealing home not worth it

by James Sute

Lighted stories about college student pranks and gags are loads of fun as long as someone else is the butt, of course,

The latest example, capitalized by the Sun Times, Tribune, WGN, and Newsradio 78, concerns a pair of 18-year-old men who after tipping a few beers at an IIT fraternity party were arrested for stealing home plate from Comiskey Park.

Great college fun! Probably a million or so people opened up those Sunday Sun Times and had a good laugh reading the little story describing the fracas. Certainly thousands others chuckled along with Witty Wallis Phylips from WGN as he beat the joke into the ground the very next day. Of course we can't forget about WBMM, the station that the serious Chicago area journalists prefer. Even they felt the story was newsworthy enough to chuckle the airwaves with.

In each case, the story was just too cute and the pun about "stealing home" was too irresistible to pass up.

I can think of two families who probably aren't so amused by all the light-hearted, fun loving coverage. Imagine opening up the Sun Times to page two of the Sunday edition and finding out that your son's stupid and unsuccessful college prank has turned him, and indirectly you and the rest of the family, into the butts of a citywide joke.

The story itself may have deserved publication, but printing the names and addresses of the criminals was not only unnecessary and irresponsible, but also in poor taste, considering that the story's sole journalistic purpose was to poke fun at a couple of drunk kids. (Who by the way, aren't IIT students.)

You may think that it's the men's own fault and that they deserve all the embarrassment they've received. After all, they did break a law, and police records are open to the public, but face it, when was the last time you've seen a drunk driver, a mugger or a robber on page ix....

The Technology News Challenge

Puzzle 4

AI and Bill, two inveterate gamblers, played a series of games. The first was played for $1, the second for $2, and so on, the stakes being doubled for each successive game. After eight games, AI had won $31 more than Bill. If there were no tied games, which games did AI win? In writing your answer, write the ordinal numbers (such as first, second, etc.) of the games AI won.

All entries must be accompanied by your name, phone, and address. Drop off entries at Tech News, 5th Main, by April 22, 1983.

Solve it and you could win a $5 purchase from the Bog.

Answer to Puzzle 3

N = 1

The Winner!!!

Mark Zak

The winner should pick up his prize by noon, April 15, 1983.

Friends of G and B. don't forget the big day is April 15th.
announcements

SOP meeting

All Student Organization Presidents! There will be a Preview Day preparation meeting on Thursday, April 14th in the HUB Mezz. At 12:30 p.m. the two (2) representatives that plan to work your organization table on Saturday, April 16th must attend this meeting. The two representatives that plan to work your organization must sign up prior to 12:30 p.m. on Sunday, April 15th. If you have not received this information, please contact us at 567-3310, the Registrar's Office, Room 104 MB.

Male Showoffs

The "3rd ANNUAL MALE PAGEANT" will be held Thursday, May 5, 1983, at 7:30 p.m. in the PRO ONCO Auditorium. There will be a $5.00 Entrance Fee per contestant which is refundable after the contest.

Pi Kap PUSH

The Pi Kappa Phi Fraternity will be having its 2nd Annual Wholesaler PUSH-a-thon on Tuesday, April 12th, in the downtown area. PUSH stands for Play Units for the Severely Handicapped. The PUSH-a-thon will go from 7:00 a.m.-7:00 p.m. Please help us to help them, by supporting us.

Enough philosophy?

Ethics, Morality and Law Interaction in a Pluralistic Society," and "The Renewal of National Purpose: John Gardner and Common Cause," will be topics for the Philosophy Student Council Forum on Friday, April 22 at 12:15 p.m. in the HUB Field Conference Room. Jeff Perl, Ph.D. candidate in Chemical Engineering, and Chaplain Ansel Amadou will introduce the themes at this meeting, to which all are cordially invited.

Your own self image

The Religious Studies/Biblical Prayer Group will meet Wednesday, April 13, in the Field Conference Room of the HUB at 2:15 p.m. The program, "Self Image and the PreviousSon," will feature the theme of person, self-image and religious commitment in Judeo-Christian tradition and prayer.

Final Conversation

There will be a final "Conversations at HUB" program for this year on Thursday, April 21, featuring Dr. Work, Eng, JIIT Physics Department Chairman. The program is open to all students, faculty, staff, and visitors. A special reception will be held Tuesday, April 12 at 12:15 p.m. in the HUB Field Conference Room. Phil Perl, Ph.D. candidate in Chemical Engineering, and Chaplain Ansel Amadou will introduce the theme of person, self-image and religious commitment in Judeo-Christian tradition and prayer.

Exec. Board of ATS

Nominations are now being open for all Association of Tech Students (ATS) offices. Applications are available at the DOSL office or in person at our meetings. This is your chance to run for office in ATS's Student Council. Elections are scheduled for April 25-26.

Work in New York!

Get a job with the city of New York! All IIT majors are eligible to apply. Please see the secretary in room 404, Farr Hall for the job descriptions.

quit smoking (cigs)

A five-day “I Quit” smoking clinic will be held from noon to 1:00 p.m. Monday, April 11, through Friday, April 15. Sponsored by the Illinois Intergency Council on Smoking and Disease and the Chicago Department of Public Health, the clinic is free and open to all IIT students and employees. Chicago Lung Association, Chicago Heart Association and American Cancer Society will discuss topics such as “Why You Smoke,” “Lung Cancer,” and “How to Quit and Not Put on Weight.”

Quit smoking (cigs)

For further information and registration, please contact Marjorie Moleynoux, executive director of the Council, 346-4675.

Gonna graduate?

A mailing pertaining to attendance at the May Commencement has been sent to all seniors. If you have not received this material, please contact us at 567-3310, the Registrar's Office, Room 104 MB.

Just for kicks

Anyone interested in trying out for next year's Varsity Soccer team is encouraged to attend the Spring practice sessions starting April 5th, at 12:00 p.m. on the soccer field. Practices will be every Tuesday and Thursday during this semester at 12:00 noon.

Time to register

Advance Registration for 1983 Fall Semester: Full time students in good financial standing may pick up Registration Packets on Monday and Tuesday, April 11 and 12, 9:00 a.m.-5:00 p.m. in MB 242. Bring a valid IIT card. Completed forms are due on April 22.

Get a job this summer

College students interested in working in summer jobs in their chosen professional fields should apply to either or both of the following: thousands of corporate and governmental internships and workstudy opportunities.

According to The Scholarship Bank, most internships are sponsored by corporations and government agencies and pay in the range of two to three thousand for the summer. Many will be paid $500-1000, and some will pay as little as $250. These internships are good sources of training and may lead to permanent jobs. For further information, call the Scholarship Bank, 1010 Santa Monica Blvd., Suite 700, Los Angeles, CA 90067.

New plans for gliiding outing

The American Institute of Aeronautics and Astronautics is planning a sponsored balloon (gliders) trip to Clow International Airport in Pilot, Ill. Due to an insurance policy, the AIAI has asked the cooperation of AIAI chapters in putting down as sponsors of this recreational event.

The idea behind this is to go as individuals without claiming any IIT affiliation. The point is, the administration is fearful of a student going to an IIT sponsored event and becoming injured, and the school would be hit with a suit against IIT. In order to avoid any law suits against IIT or any IIT organization, the chapters feel that they may be an independent effort.

Because the IIT Administration has made these rules clear, the IIT-Milus-Bus will not be available for this trip. Furthermore, the Student and Organizational Bulletin Boards cannot be used for advertising, and payment cannot be accepted in Room 112 E.

Deeper food drive

The sisters of Delta Phi Epilon in cooperation with St. James Church are holding a food drive for the poor, sick, aged or aged. Please come to the Autumn Bazaar on April 11th, 9:00-11:00 a.m. All proceeds will go to help the poor, sick, aged or aged.

Get a job at Cod

BARNSTABLE, Mass.—The resort areas of Cape Cod, Massachusetts, and the offshore islands of Martha's Vineyard and Nantucket have a growing problem in retaining summer employees to properly service a rapidly expanding tourism and convention industry. While seasonal jobs will be scarce elsewhere this summer, Cape Cod and Nantucket have over 55,000 summer jobs in 1983. Most require little or no prior experience.

As in the past several years, the Cape Cod Summer Job Bureau has compiled information on available part-time and full-time employment and has published this information in a concise directory of summer job opportunities listing over 100 categories. Hiring has already started, and there are over 2,000 open positions. The sole function of the Cape Cod Summer Job Bureau is to make available the names and addresses of local employers who hire extra summer help, with job descriptions and numbers of openings needed in each category, and a useful cross-reference map of the area. The Job Bureau is not an employment agency, and therefore charges no fees to employers or employees.

The directory is a listing of sumnmer educational opportunities, academic courses for college credit, as well as cultural activities in music, theater, and the arts.

For a copy of the 1983 Directory send $2.00 to cover postage: Cape Cod Summer Job Bureau, Box 594, Barnstable, MA 02630.
Some final thoughts before the election...

Chicago politics: honor among thieves

Jim Braniit

Believe it or not, Chicago politics is the kind of honor left among thieves in the world. Even the nationwide mafia, formerly known as members of the Roman Code of Ethics, no longer have any morals.

For example, recently some New York and Long Island mafiosos wanted to rob out one of their members who was trying to get out of the cocaine business. He found them in a bar and killed not only the troublemaker, but everybody else in the bar. That just doesn’t seem fair to the regular pedestrians.

In another instance, the Colombians killed an informer, his wife, and their two children, aged two years and eighteen months.

When the mafia used to have to deal with troublemakers or informers, they would always just kill the guy and tell his wife, "Hey, it’s just business." But ever since the mafia and Colombians have gotten into the cocaine business, such humane traditions have fallen by the wayside.

But the humane traditions still survive in Chicago politics. For example, you’ll notice that neither Harold Washington nor Bernardine Epton ever talked about each other’s families. They are also not attacking each other’s reason or intelligence, only each other’s morals and memory.

Actually, I don’t know why we would ever honor mention or morals or humaneness in the same sentence with Chicago politics. None of them has any place whatsoever in Chicago politics. Chicago. What is really underneath any election here is power.

How could anyone say that it would be moral or honorable or even for the good of all the citizens of Chicago to vote for either Harold Washington or Bernardine Epton? Let’s face it, they’re both clowns. Look at the facts about Washington. He failed to file his income tax for nineteen years. He was indicted and convicted for not filing for four years, and sentenced to a month in jail. (True, he only owed $600 in taxes, but how could anyone, especially a lawyer like Washington, forget to file his income tax return?)

Washington’s license to practice law was suspended when he failed to provide services for which he had already been paid. When he petitioned the Illinois Supreme Court to reinstate his license, he lied at least twice to the court. Washington has been sued for failing to pay his utility bill. Recently, it was revealed that Washington owed property tax on a derelict building on the south side. (This is probably the most interesting charge as it could prevent Washington from taking office. A Chicago ordinance forbids anybody that owes money to the city from taking office.) And finally, Washington stood up Wally Phillips. He failed to appear on Wally’s radio show last Thursday, and boy, was Wally pissed!

Now look at Epton. His only experience as an elected official was as a hack in the Illinois legislature for the insurance companies. And if he’s elected, he’ll be Ed Vroothsky and Charlie Swibel’s? funny. And there’s no way that a Republican mayor can control a Democratic Chicago, Epton would be pushed around and rounded for the next four years until “Fast Eddie” can get Richie Daley elected as our next mayor.

Washington nor Epton is a good candidate for Mayor of Chicago. Washington obviously has very little respect for the law and Epton just means four more years of “Fast Eddie” and Charlie Swibel.

The real question therefore becomes, “Who can do the most for me?” For the blacks of Chicago, the answer is obvious—Bernardine Epton. For the whites, it’s equally obvious—Harold Washington. Or is it the other way around?

always have been color blind. Or maybe it’s Washington who benefits and Epton for the Republicans. Or is it Epton for the Jews and Washington for the Christians? Who can do the most for whom?

As for me, no Mayor, even Daley, has ever done anything for me. None of them has ever helped me. And Washington and Epton aren’t likely to be much more helpful. In fact, I saw Epton in the St. Patrick’s Day parade and he just ignored me. He’s become so big, he can’t keep his hand out even the bastards.

always end up doing everything like mopped politicians the garbage, the paint, the house. I mow the lawn. I do my own homework. The mayor of Chicago never enters my life except to irritate me. And Washington and Epton irritate me. So I’m going to vote for the person who seems most likely to make my life better. And I suggest everyone else do the same.

Enraged by Ayatollah's cowardly attack

To the student population of IIT,

Over the years, the world has survived because of its pliability towards change. Our largest change has been the increasing awareness of one nation's attitude toward another. Gaps have been closed or passages opened because nations are opening their doors to other nations. One of the prime examples of this is the educational student exchange program.

The student exchange program is very valuable to the scholastic progress of all nations. It should be used to upgrade the quality of education as well as to extend the participating individual's growth.

Unfortunately, there has been a disruption of this process through interference for political and racial ends, as well as from outside sources. The "Death to Israel" poster publicly published meeting of an IIT student group on campus was definitely ill-advised. It did nothing but harm the organization's credibility. The same can also be said of the "Killing of an Arab" song presented at IFC sing last fall. Granted, the intent may have been far removed from that presented in Tech News, but a bit of careful reflection could have avoided any trouble. However, at least in these two cases, the statements and arguments, pro and con, were presented in public and in the common language of IIT's students, (English).

There has recently been another inflammatory remark released, yet in a more sinister vein. An announcement of a student organization's meeting was posted throughout campus as late as March 28, 1983. It was pictured a flowering plant and the silhouette of a woman in a veil. The text, aside from the IIT address, was in what appeared to be Arabic. Later, we were informed that it was Persian and advertised a meeting celebrating the fourth anniversary of Ayatollah Khomeini's rule. In the upper left corner there was a copy of Iran's official seal and written in the mouth of the woman was the slogan, "Death to America."

Was this sanctioned by Iranian officials in the U.S.? Apparently the announcement was not officially approved by the Dean of Student Life's Office. What gain is there in calling for America's death so tediously? The promoters of this event appear to have the courage and mettle of assassins. We should understand the group's using the First Amendment to shout their defiance in English. They are, after all, protected by the same Constitution as we. Yet, cowardice prevailed and they chose to hide behind a little understood language and use it as a code to promote what most consider to be a questionable end.

The poster calling for America's death was not just a simple attack or disagreement. It was an affront wherein the participants showed much contempt for and fear of Americans, that they insulted us secretly in a hidden message. By thus removing the chance of confrontation, they eliminate any possibility of understanding. Regardless of how anyone feels, this is a university, not a political arena. Governments including ours, should cease to politicize on campus. Furthermore, we would hope that the administration of IIT would take more than a nebulous stand on any slurs or interference, irrespective of the source.

Darlene M. Gilbert

Paul E. Dinardo

Technopinion asks:

How do you feel about the prominence of race and racism in this week's mayoral election?

All: I think it’s a big issue, but I don’t think it should be an issue. Our candidates should be judged by their ability to govern and not by their color. I think it’s totally disgusting. People should choose a candidate on the basis of their qualifications and not the color of their skin.

I think it’s ridiculous. If Harold Washington were white, there would be no problem in him becoming the next mayor. I think Epton has been running a subtly racist campaign.

I think it’s racist. If Harold Washington were white, there would be no problem in him becoming the next mayor. I think Epton has been running a subtly racist campaign.

It’s an issue being used by the politicians for their own purpose. The situation is unfortunate but it typifies the way men use each other.

However, unfortunately it may be, it is my belief that racism is playing a significant role in the mayoral election.

It’s a big issue, but I don’t think it should be an issue. Our candidates should be judged by their ability to govern and not by their color.

I think it’s totally disgusting. People should choose a candidate on the basis of their qualifications and not on the color of their skin.

Acne is a common skin condition that affects most people to varying degrees and for varying periods during the teen years. However, the disease is by no means unique to that age group: adults in their 20's may also have acne. Don't think that because acne is common, treatment is unnecessary. Wearing acne can be a serious mistake since treatment by a physician can prevent the development of pitted scars and may improve your appearance.

Acne consists of blackheads, whiteheads, pimples, and sometimes deep, deeper boil-like lesions. It most often appears on the face, but also is present on the back, chest, shoulders, and neck.

Basic research on the causes of acne links its occurrence to the biological changes that take place as young people mature from childhood to adolescence. Rising hormone levels during puberty result in enlargement of the sebaceous oil glands on the skin. During this time, the oil glands function at peak capacity particularly about the scalp, forehead, face, and upper chest. These glands are in greatest abundance. The oily product of the sebaceous glands, sebum, may be affected by bacteria, causing the irritation of characteristic acne.

The glands lie deep in the skin and empty their contents onto the surface through a series of ducts. The larger ducts, which are associated with larger glands, have openings that are visible as pores on the skin. Oil formed by the larger glands that does not reach the surface breaks through the walls of the ducts and causes pimples and boil-like lesions. Blackheads form because small kernels of hard tissue fill up the follicles or ducts.

The exact sequence of events following gland enlargement is not known, but one of the main events in acne is the development of the comedo. There are two kinds of comedones: the blackhead and the whitehead. The contents of the blackheads are sebum, bacteria, and skin tissue. Most blackheads do not become inflamed, probably because they are open to the surface. Some comedones, however, do not have as wide an opening. These are the whiteheads, which may rupture and cause the development of inflamed lesions such as pustules and nodules.

One major misconception about acne is that it is caused by bacteria. It is not; that is not, in fact, the usual sense of being infected. However, the bacteria that normally live within the follicle are believed to contain enzymes that may affect the sebum in the duct more irritating as it escapes to adjacent areas. While acne usually clears after several years even if it goes untreated, you need not wait for it to clear spontaneously. True, there is no instant or permanent cure, but much can be done to help.

Treatment of acne is a continuing procedure if the disorder is to be controlled successfully. Daily care is necessary. Keeping the following points in mind may help:

1. First, even though you may wash frequently, acne is not caused by dirt. However, dirt and dead skin clog pores. Wash your face with soap and water at least twice a day. Wash thoroughly, but gently. Shampooing hair is also in order; the more oily your hair is, the more often you should shampoo it.

2. Secondly, males with acne who shave should try both an electric and a safety razor to see which is more comfortable. If you use a safety razor, soften your beard thoroughly with soap and hot water. To avoid nipping pimples, shave as lightly as possible.

3. Third, acne is not primarily a dietary disease, and medical authorities vary on the importance of限制 to diets in the control of acne. However, most agree that chocolate, nuts, cheese, cola drinks, and pizza should be avoided. In addition, one should limit quantities of ice cream, butter, milk, salad dressing, rich pastry, and fried or greasy foods.

Fourth: many non-prescription lotions and creams available at drugstores. Many of these, if used excessively, most of them will probably produce dryness.

Fifth: if your acne persists even though you have been following a routine of good cleaning, see a dermatologist. Do not assume that medicines and methods prescribed for a friend will be good for you.

Lastly, if you have cystic acne, a severe and disfiguring disease, there is a relatively new drug used in some cases. This drug, called accutane, developed by Hoffman-La Roché Inc., is a vitamin A derivative. In clinical studies, those treated have cleared within 20 weeks of therapy. However, acne has been shown to cause birth defects in experimental animals. If you're pregnant or planning to become pregnant do not use it. For further information contact:

Broadway on 11th
by Cathy Linton

On Thursday, April 7, the Columbia College Theater/Music Center opened its production of George Abbott's and Philip Dunnav's 1926 melodrama Broadway. In its performance in a few weeks, I would have to say it was entertaining and a nice change of pace from the movies.

Broadway was last presented in Chicago at the Schubert Theatre 55 years ago in 1927, following its successful run on Wall Street, where, but Broadway.

The action takes place in the backstage regions of the Paradise Club, a shabby Prohibition-era cabaret off Times Square. Madame Roy Lane heads up the nightly show which also includes a middle-aged female singer and a line of six young chorus girls.

Backstage also functions as headquaters for the bootlegging activities of ex-box Steave Crandall, a gangster protectated at all times by two sinister bodyguards. As the plot thickens, there are examples of the fine art of hoofing, hair-pulling fights between chorus girls, and the tough talk of the profession and the acid smug of gangland giuns.

Certain portions of the production were well done as I got the feeling that I was living in the roaring twenties. The acting was also worth praising, especially the spectacular performance of Susan Dafon (La Riche), Dafon, who has been seen in productions at most of the major Chicago area theater and in Stavell on the Stage. The show's final act, of the show, which is still being shown, has been a hit at the Chicago Theater/Music Center. If you haven't seen Broadway, it's not too late. The production will run Wednesday, April 13th, through Sunday, April 17th, so you still have a chance to see it. It's showing at the Schubert Theatre. 72 E. 11th, and general admission is $5 weekdays and $6 Fridays and Saturdays. For students and senior citizens it's only $3 and $3, respectively. You should look into the telephone book for more information.

GET THAT JOB!

by Patricia Houston

Program Manager

WOU/h is back on the air! with good music and dynamic news. We are after the air several weeks by equipment problems, but now we're ready for full time. We're ready to go and eager to please.

Our schedule has been renewed and we're ready to check out. Here are just a few:

Science Chronicles—a brief look at news and issues from the near and distant future of science. The three-minutes program can be heard each Tuesday at 7 p.m.

And Man and Machines—Dimensions in Science—weekly news and views from many areas of science and technology: new topics and from week to week. You'll have to wait until the next Monday.

Focus—a half-hour program featuring public issues, both national and international. Questions that concern us all are examined by educators, government officials, and the people who are trying to make the world better. WOU is one of the limited number of stations across the countryChanged by the Local Radio Network to broadcast Focus. Listen on Fridays, at 5:30 p.m.

Thank you all who responded to WOU's article in this past issue of the Anchor. Your warmth is appreciated. Come join us! WOU—you tune us in, and we'll tune you on! 88-9 FM.
REALITY WARP

"This is the cliff."

"I don't believe this..."

"There's nothing, I mean nothing..."

"Look at this!" "Our rights as humans are..."

"Listen, we've got to get back to normal.

"Don't know what's going on."

"How do you think about the war?"

"No god, everyone here is suffering.

"Concentrate on something!"

"Tell everyone in the people's council..."

"Hello!" "Tell me what's going on..."

"Tell everyone in the people's council..."
Dismal outlook for summer jobs

GAINESVILLE, FL (CPS) — "I'm not really worried" about finding a summer job, says Steve Thomas, a University of Florida freshman. "I'm pretty sure I'll get something." "I'm sure something will turn up," agrees Mark Greenberg, another UF freshman. "There are higher priorities than summer jobs right now, like trying to get through the semester."

With U.S. unemployment rates stuck around 10 percent, a surprising number of students remain remarkably unconcerned they'll be able to find summer jobs this year. The nonchalance may be widely inappropriate, however.

Summer employment for college students doesn't look promising in most parts of the country, placement officials report. "This is probably one of the worst years," observes Capistle Kudowski of Fort Lauderdale (Fla.) Community College's placement office. "It is an employer's market."

Summer job offers are down 10 percent at the University of New Mexico. Florida job counselor Maurice Maysbery notes "the bulk of plum jobs have already been taken."

If you don't have a summer job lined up already, he says, you probably won't be able to line up anything that pays better than the minimum wage now.

Other suggest students will be lucky to find minimum wage jobs. "It's not real, real encouraging," says Mary Jo DuBois of Manpower, the nationwide temporary help firm.

Manpower's latest survey of employers found 15 percent plan to decrease staff positions from last year's levels.

Manpower placed 50,000 students in summer jobs last year, and DuBois hopes the company will be able to do as well this summer.

Ohio State Financial Aid Director Weldon Milheim also hopes to be able to do as well as last year, but isn't sure he'll be able to equal the number of work-study jobs he found then.

Full-time summer jobs, he speculates, will be even harder to find.

Even intern jobs, which tend to be snared, are expected to hold at last year's levels, at best. The World Bank in Washington, D.C., is currently sifting through over 300 applications from economics, finance and computer science students who applied for internships. But a World Bank spokesman says there'll probably be only about 120 positions open, the same as in 1982.

There are signs of hope. The College Placement Council's (CPC) November, 1982 survey of employers' intentions indicated businesses expected to lower hiring practice this May, but a CPC spokesman says relief doesn't look like it'll come in time to help summer hiring.

Fort Hays (Kans.) State University placement chief Robert Jenkins really thinks that, in Fort continued on page 5

Inflated rates really tells you is the number of loans that have ever been defaulted on, and doesn't take into account repayments later on.

But the after-collections default rate *is* misleading because it does not take into account people who again default on repayments. It simply assumes that once a borrower repays, it will continue. The real default rate is somewhere in between, the source says, "probably somewhere around eight to nine percent. But what figures you use depend on what the party involved wants to show."

We don't like the idea of overstating the default rate, but we're stuck with two different systems, neither of which gives the real default rate," adds Robert Coates, head of the Education Dept.'s college-based loan programs.

But El-Khawas and other officials suggest the government uses the pre-collection default rates to make the problem appear worse than it really is, "perhaps to make it easier to justify cutting the programs' budgets."

"I don't know their motives, and I don't think there's been any real conspiracy to deceive the public," El-Khawas says.

Math (majors/minors/aptitude) . . .

You're needed all over the world.

Air Peace Corps Math volunteers why their degrees are needed in the classrooms of the world-developing nations. Ask them why ingenuity and flexibility are as vital as adopting a new culture. They'll tell you that students know Math is the key to a solid future. And they'll tell you that Peace Corps adds up to career experience like no other. Add Peace Corps complements. Ask them why Peace Corps is the toughest job you'll ever love.

A Fascinating Film: Wed., April 13 at 5pm in Farr Hall I from 408-10 Peace Corps
Dismal summer

continued from page 8

Hays, any student who wants summer employment and is "geographically flexible can get it." Jenkins says he's gotten job orders from Yellowstone National Park, fast-food resorts, various overseas firms and summer camps.

Indeed, Florida's pessimistic Mayberry thinks his students' last best hope may be with Southwest Publishing Co., which annually recruits UF students, transports them to faraway Nashville, trains them, and then sends them around the country to sell books during the summers.

UF junior Hal Reddick, for example, claims he has made $9000 selling books in Indiana last summer, though after expenses he booked a relatively modest $1600. But in Portland, Kozlowski estimates there are as many as 2000 applications out for every local restaurant job.

To land any kind of summer job, he suggests students be ready to work "junk hours" and be "mobile."

BIOLICAL/PHYSICAL SCIENCES...

You're Needed All Over the World.

Ask Peace Corps volunteers why they are using their Science major, minor, or aptitude in health clinics and classrooms in Malaysia. Why do they use them in fish pond culture projects and experimental farms in Westen Samoa? They'll tell you their ingenuity and flexibility are as important as their degrees. Ask them why Peace Corps is the toughest job you'll ever love. Learn more about overseas opportunities!

Men's Tennis begins season

By Bill Gallagher

The HFT Men's Tennis Team was victorious in their last 2 matches, defeating Aurora College by the score of 5-4 and Illinois Benedictine 7-2. The Aurora match was extremely close, and was decided by the final doubles match Can Turketai and Rob Szbinski winning for HIT in three tough sets. Other winners for HIT against Aurora were Tony Frierson, Jim Muraida, and Tim Clancy in singles and Frierson and Turketai in doubles.

The match against Illinois Benedictine College was not as close, but was played in unfamiliar surroundings—the IBC gym. Winners for HIT in singles were Frierson, Muraida, Brett Bottwell, Clancy, and Ed Heinen. Doubles winners were Bottwell-Frierson and Muraida-Clancy. Muraida's singles victory was the closest match, 7-6, 6-7, 6-3.

This week the team has 2 away matches, Monday at the University of Chicago and Friday at North Central College.

The team will be taking a trip to Indiana during break and will play Oliver Nance College, DePaul U., Wabash College, and Rose-Hulman Institute of Technology.

The tennis team's record in 1982 was 8 wins and 2 losses, and with five returning players and talented newcomers should enjoy a successful 1983 season.

HIT MEN'S TENNIS Returning Players:

Newcomers:
Sr. Can Turketai, transfer from Rockford, Fr. Ed Heinen, from Eisenhower H.S.; Fr. Tim Clancy; and Fr. Brother Rice H.S.

Before We Put You In Charge Of The World's Most Sophisticated Nuclear Equipment,

We Put You Through The World's Most Sophisticated Nuclear Training.

It takes more than 16 months of intensive training to become a fully qualified officer in the Nuclear Navy. You begin with four months of leadership training. Then as a Navy officer you get a full year of graduate-level training unavailable anywhere else at any price.

Navy training is based on more than 1900 reactor-years of experience. Right now the Navy operates over half the nuclear reactors in America. And the Navy's nuclear equipment is the most sophisticated in the world. That's why your Navy training is and must be the most sophisticated in the world.

As an officer in the Nuclear Navy, you have decision-making authority immediately. You get important management responsibility fast. Because in the Navy, as your knowledge grows, so does your responsibility.

Your training and experience place you among the country's most qualified professionals. (No surprise that most of the men who operate the reactors in private industry started in the Nuclear Navy.)

It takes more time and more effort to become an officer in the Nuclear Navy. But the rewards are greater, too.

The rewards can begin as early as your junior year in college. Qualify, and the Navy will pay you approximately $1000/month while you finish school.

After four years, with regular promotions and salary increases, you can be earning as much as $40,500. That's on top of a benefits package that includes medical and dental care, and 30 days' vacation earned every year. More responsibility, more money, more future.

So, if you're majoring in math, engineering or the physical sciences, and you want to know more about a future in nuclear power, fill in the coupon.

Today's Nuclear Navy is an opportunity like no other in the world.

Navy Officers Get Responsibility Fast.
