President Martin latest T.E. guest

"Historically, one out of every seven IIT graduates becomes chairman of the board, president, vice president, or partner of a company. I don't think there's another school in the U.S. like that," proclaimed President Thomas L. Martin in his address to Tech Entrepreneurs last Thursday.

Martin, who received his Ph.D. in Electrical Engineering from Stanford, was the dean of several engineering departments and a member of the board of Texas Instruments before coming to IIT in 1974. Currently, he is serving on Governor Thompson's committee on math and science education.

Throughout his speech, Martin referred to the fact that a good portion of IIT students have the entrepreneurial spirit which is necessary for success in the business world. The question here is whether this is due to IIT's curriculum and programs, or is it the result of the type of student who chooses to come to IIT?

Martin believes it to be a combination of the two. IIT's purpose is "to educate leaders in problem-solving and decision-making" and this may certainly be the case in the past. As an example, Martin cited Jerry Jones who received an IIT degree in Physics. He now owns Southwest Airlines.

Research in these particular fields is currently taking place at IIT. "We are the Midwest center for technological research; but, we've been overlooked," stated Martin.

Job recruitment drop

Washington D.C., January 31, 1984: The annual Changing Times survey of jobs for new graduates found some bright spots for job seekers amidst what is generally characterized as a flat recruiting year. The survey, which is unique in that it seeks responses only from employers intending to hire graduates this spring, uncovered more than 100 companies and government agencies with definite job openings.

While many firms said their campus recruitment has been curtailed as a continuing result of the recession, many others offered encouragement, especially to students with specialized skills. About 40% of the companies surveyed reported that they are having difficulty finding qualified candidates for certain kinds of jobs. Those job openings are mostly in technical fields, such as engineering, physics, and science.

Education research headed by IIT

Dr. Harvey Ideus, Director of Placement and Dr. Richard A. Retting, Chairman, Department of Social Sciences are the co-principal investigators for a project on the IIT Campus which is considering important factors that are reshaping the world of work and the implications of such changes for employment and employment-related education and training. The project is funded by the Department of Adult, Vocational, and Technical Education, Illinois State Board of Education.

Among the many issues that project members are studying are recent changes in the US education system and the changing forms of regional development in the United States, the impacts of the increasing labor force participation of women on the US occupational structure, the influence of industrial changes on the deskillling and reskilling of US occupations, and the impact of automation on US factory and office labor. To understand these phenomena, the project is sponsoring conferences and faculty seminars, interviewing community leaders, and commissioning papers from experts in the fields under study.

The project plans to sponsor a one-day conference in June which will focus on the major shifts which are occurring in the US education system. Among the students with specialized skills.

Get to know Pakistan

by Jacqueline J. Jones

Events for the week: Monday: Patroon's 11:30 NE corner HUB; Tuesday: 11:30-2:00 NE corner HUB; Wednesday: 11:30-2:00 NE corner HUB; Thursday: 11:30-2:00 NE corner HUB; Friday: 11:30-2:00 NE corner HUB.

Pakistan, whose formal name is the Islamic Republic of Pakistan, will be featured in the third week of the One World, Many Cultures program. Pakistan is located in the west part of Asia, and is bordered north by Afghanistan, east by China, south by India, and west by the Arabian Sea. The total area is approximately 307,374 sq. mi. Pakistan is the home of eight of the world's highest peaks. The world's second highest peak K2 (Karokoram 2) stands at 28,250 feet and is located in Pakistan.

On Monday, February 13, the work will open with Pakistan being sold at the NE corner of the HUB. Tuesday is Valentine's Day and Sydney "Berge" Bhakth will be here to read your palms. Are you ready for some action? You're in page 4.

announcements
Meet a Cobra
The American Institute of Aeronautics and Astronautics (AIAA) will be showing a film on the Northrop P-38L Cobra. This film deals with the development of the P-38 in World War II. Showings will be on Wednesday, Feb. 15 at 12:10 pm, in Room 125 E-1. Open to everyone, admission is free.

Men's tennis to start
The Men's Tennis Team will have organizational meeting Monday, February 13th at 4:00 pm in the Schreiber Room of Kitting Hall. If you are unable to attend the meeting but are interested in the tennis team, please call Chris Meyer at x3296.

Summer jobs
This week marks the beginning of re-campus interviews by employers who are seeking student engineers for their Summer Internship and Employment Programs. The following is a listing of the employers who will be visiting our campus to interview potential summer employees:
- General Mills, Feb. 15
- S.C. Johnson & Son, Feb. 16
- Hewlett Packard, Feb. 21
- General Dynamics, Feb. 22
- Natural Gas Pipeline, Feb. 22
- Dow Chemical, Feb. 28
- Oscar Mayer Foods, March 6

If you are interested in pursuing career related employment opportunities for the summer months now is the time to register with the Placement Office. Contact Dr. Morrow in Room 416 of Pettit Hall for additional information and details.

3 new scholarships
The Independent Accountants Association of Illinois has announced that they will again be offering three $3,000.00 scholarships to college students of accounting. The IAAI and friends of the National Society of Public Accountants have established these scholarships annually to deserving students who intend to enter the profession of accounting. The IAAI is composed of over a thousand accountants in all parts of Illinois who have hundreds of thousands of small businesses.

Interested students with a "B" average or better should write for applications to the IAAI Scholarship Foundation, 251-F Lawrencewood, Normal, Illinois 61761. Completed applications must be received no later than July 1st. Scholarships will be awarded prior to the 1984 fall term.

Check the calendar
Please note that the end of the semester schedule in May differ from last semester's schedule. Classes will be held on the days indicated until Wednesday, May 2, which is the last regular class day.

Thursday and Friday, May 3 and 4, are study days when no classes may be held, either day or evening.

Final exams will be held from May 7 to May 12, as scheduled by the Registrar for undergraduate class days or by the instructor for all graduate class days.

Do you have talent?
Tryouts for the 2nd Annual Chicago College Talent Show will be held Thursday, February 17 and Saturday, February 18. You must register your act to tryout. Call 567-6879 Monday, February 13 through Friday, February 17, 6-9 pm.

Help wanted
Help Wanted: Student employee, 10 hours per week. Must qualify for work study and be able to perform a variety of tasks. Call 567-5200.

What to worry about
The Technology and Society Forum will meet Tuesday, Feb. 14, at 12 noon in the Field room of the HUB. The agency centers on further planning for a conference on "Human Concerns in a Technological Age". Those interested are cordially welcomed.

More bible study
The IIT Faculty-Student Group meets Thursday, February 16, at 12:15 in the Field room of the HUB. Reflections on the Letter to the Ephesians and its contemporary significance continues.

Important speaker
The Tenth Annual Distinguished Lecture Series of the University of Chicago's Institute of Science and Religion will present Dr. Viggo Mortensen, Professor of Comparative Religion at the University of Copenhagen, addressing the theme "Myth, History and Religion." The lecture will take place Thursday, Feb. 4, at 4 pm in the Convocation room of the university's School of Theology, 56th and University Ave. The public is invited.

J.S.O. invites all
The recently formed Jewish Student Organization of IIT cordially invites students and faculty to attend our second meeting for the Spring semester this Tuesday, February 14, at noon in Room 302 of the HUB. We need your input in planning our academic and social activities. Please come and tell us what you think.

If you need help...
Student counseling Services is offering one-on-one tutoring in: Math-151, 152, 251, 252; Chem-101, 102, 103, 202, 244, 243; Physics-103, 104, 203, 211, 212; Eng-225, 226; 230, 311, 317, 316, 211, 396; Accounting-130, 131, CS-100; Mach-141, 142, 221, 121, 122; Economics-201; EG-101.

Tutors upperclassmen from various majors with experience in tutoring and the subjects offered. Drop by Room 102, Farr Hall and get the help you need!

Sign for loan
Any student with either a school loan or a National Direct Student Loans must sign for their 1984 Spring Award. You may sign for your award at the student loan Office which is located in the Main Bldg., 5th floor.

Taste the Grape
Those of you who missed the last wine tasting will once again have the opportunity to learn more about wine, Friday, February 20, 6-9 pm in the HUB Marquee Lounge.

Free wine tasting by Canst Stock Liqeurs and the HUB Programming Office the tasting is geared for the novice, as well as the serious wine drinker, and will consist of 18 California wines. Admission is $5.00 for non-members and $2.00 for members.

Peace Corps volunteers on the increase
Due to the cooperation of IIT's Placement and Cooperative Education Office, the Peace Corps placed a record number of new volunteers (9,990) overseas last year.

Bruce J. Cohen, Service Center Director of Peace Corps, hopes to recruit an additional 2,500-2,900 trainees for Peace corps service during the fiscal year of 1984 in order to clear misperceptions about the program, he stated that:

1) Peace Corps volunteers only work in countries that have invited them and aid for their specific skills.
2) No Peace Corps volunteer has ever died as a result of political turmoil in his/her country of service.

For those who consider the two years of work experience in Peace Corps to have helped their careers.

Curricula rated

Northridge, CA (CPS) — Eight of every ten undergraduate programs are only “adequate” or worse, a joint-research study of undergraduate programs contends.

The study, based on solicited and unsolicited opinions of college deans, also says state colleges and universities are generally better education buys than private colleges.

French and Soviet graduate schools, moreover, generally are better than American grid schools. Dr. Jack Gourman, a political science professor at Cal State-Northridge, found in his compilation of academicians’ opinions released last week.

Gourman has published his rankings of schools for the last 10 years, but says he doesn’t get too many lative responses from people whose schools are slighted.

“We do get those who believe their schools should be ranked higher, but not often,” he says.

Among his more controversial assertions this year is that many state public colleges are better education buys than private ones.

He contends Berkley “competes favorably” with Stanford, recently ranked in a U.S. News and World Report survey as the best undergraduate program in the country.

Penn State, Gourman says, “is competitive” with the private University of Pennsylvania and Carnegie-Mellon, and Illinois is “neck and neck” with the independent University of Chicago.

But other states don’t have one college that rates above “good,” he found.

Among them are Alabama, Alaska, Delaware, Hawaii, Idaho, Kentucky, Mississippi, Montana, New Mexico, New York, North Carolina, South Carolina, South Dakota, Vermont, and West Virginia.

The best state schools, he contends, are Indiana, Michigan State, Michigan, Minnesota, Rutgers, State University of New York at Buffalo, Ohio State, Texas, Virginia, Washington, and Wisconsin.

Know Pakistan

continued from page 1

wondering if the flowers you sent with the box came through the NE corner of the HUB from 11:30-2:00 and ask Bege, he knows all. His name is Ali. Bege is probably also if the lines get long. So come out and hear about your future.

On Wednesday, a special meal will be served in all three dining areas. The entrée is Lamb Curry stew w/rice. The clothing of the country represents its history and beliefs, on Thursday, February 16, a Fashion Show will be held in the Exhibit Hall; the show will begin at 7 p.m. In addition to the show, an Art Exhibit is scheduled and a current documentary film entitled “Getting to Know Pakistan” will also be shown.

If you like a variety of music, on Friday at noon stop by Herman Lounge and listen to WOUI featuring music and a discussion on the origins of Pakistan music and current Pakistani artists.

Job demand

continued from page 4

and manufacturing. But some organizations report thousands more applicants for such diverse jobs as economists, linguists, restaurant managers, intelligence officers, physicists and nurses.

Overall, about 40% of the companies responding said they plan to hire the same number of grads as they did last year; and 30% say they plan to hire more this year. Only 18%, report they will hire fewer.

The graduates most in demand are those with engineering degrees: 65% of the companies in the listing report they need graduates in various engineering specialties, from aeronautics to aerospace and power specialties.

Behind engineers on the demand index are computer science graduates, wanted by 51% of the listed companies; accounting, sought by 48%; and business-marketing—economics grads, wanted by 43% of the companies.

Further down the scale are graduates in mathematics (wtted by 22% of the companies), physical sciences (21%) and liberal arts (17%). And 27% of the companies report they need graduates in specialties in other categories—agribusiness; animal sciences; home economics with emphasis on textiles; journalism and communications; industrial and manufacturing technology; logistics and procurement; nuclear medicine technology; nursing and health care administration.

Technology’s Leading Edge

Be a science or engineering officer in the Air Force. If you have a science or engineering degree, maybe you can qualify to join our dynamic team. See an Air Force recruiter today.

E.T. on contraception: Decisions and choices

In the last of this three-part series the decision aspects of birth control will be discovered along with a short introduction to new techniques currently being developed.

People tend to be unrealistic in their demands of a contraceptive method. Women want a low-cost contraceptive that combats long-lasting protection against unwanted pregnancy with no hazardous complications, no menstrual cycle disturbance, no side effects, and no interference with sexual activity. In addition, instant reversibility is often requested when pregnancy is desired. No contraceptive currently available or under current development can meet these demands.

The following statements provide an understanding of the risks and benefits involved in making a decision about fertility control.

1) The pill is the most effective contraceptive method for sexually active teenagers, and on the average, the safest. Yet, many avoid it because of mistaken fears of sudden growth or that the pill will compromise their future fertility.

2) The mortality resulting from pill use could be reduced if pill users stopped smoking and if women past the age of 35 did not take the pill.

3) The IUD is not recommended for young children because the likelihood that these women will expel the device or for those with more than one sexual partner due to the risk of pelvic inflammatory disease.

4) The major disadvantage of contraceptive use is the associated increased risk of heart attack and strokes. Yet, some methods appear to offer some protection against aortic pregnancy, arthritis, and ovarian cysts.

5) Fertility control is the responsibility of both partners, and in an activity that both can participate in to enhance their sexual activity if desired.

As with most decisions in life, making choices about fertility control can be complicated. But making those choices with eyes open to the risks and benefits involved, one can almost certainly that the choice made will be a beneficial one.

Will new technology soon make available a wider range of effective, safe, inexpensive, and acceptable birth control methods?

Only time can provide an answer to this question; here is a short description of new methods under development:

1) Clinical tests are now being performed on a spermicide-releasing diaphragm that can be thrown away after use (a disposable diaphragm).

2) Clinical testing of a potential antipregnancy vaccine is now underway. However, it may be at least 10 years before it is marketed.

3) Goospel, a derivative of contraceptive oil developed by Chinese scientists, and a synthetic analog of the brain hormone LH-RH may prove to be reversible contraceptives for men. However, it will be at least seven years before either method is made available.

4) Liquid silicone rubber fillings for fallopian tubes may provide a more advanced, but reversible form of sterilization in women.

5) Custom fit, computer generated cervical caps may become as popular as the IUD in as many years. In addition, recent tests in beagles and monkeys indicate that the drug may cause breast and endometrial cancer.

It should be noted, however, that many of the new methods involving major technological breakthroughs will probably be on the market for some time.

Good friends will give you a break when you’re broke.

by Valerie T. Jeffries

The Society of Women Engineers (SWE) held its second meeting of the semester on Wednesday, February 8, 1984. The guest speaker was Cheri Wilson of Union Carbide.

Seventeen SWE students were lucky enough to gain additional knowledge of interviewing and resume techniques from Ms. Wilson’s presentation. Also in attendance were Evelyn Rockar of the ML Department and Terri Jones of the Early Identification Program at University of Wisconsin. Ms. Wilson elaborated fully on resume preparation—from the type of paper required to the proper closing remarks. She also included a mock interview, information concerning proper dress for the final day of the job, and advice about the help desk.

During the question-and-answer session, the attendees were able to express their concerns about the whereabouts of the SWE reps and the locations of Union Carbide throughout the United States.

Cheri Wilson has also given a financial contribution to the SWE organization, as well as other assistance. She will be on the recruiters at TechExpo on February 23, in ML’s Herman Hall Ballroom. Any "it’s all right with at least one functioning cell in his cerebellum will stop by to seek an employment opportunity.

SWE’s meeting is held on alternative Wednesdays and are recommended for men and women from any field, not just engineering and technical disciplines. The next meeting will be held on February 23 at noon, in 118 E. The scheduled speaker is Connie Kelly of Hewlett Packard.

The dinner was sensational. So was the check. The problem is, the theater tickets that you insisted on buying broke your whole budget. Enough to declare bankruptcy by the time the coffee arrived.

A nudge under the table and a certain devious look in the eye were enough to produce the spontaneous loan only a good friend is ready to make.

How do you repay him? First the cash, then the only beer equal to his generosity: Löwenbräu.

Löwenbräu. Here's to good friends.
Tyrian throws a rage in the Bog Thursday

by Kevin Eng

With only one sixteenth of their light show and not enough power for their P.A. system, you'd think that Tyrant's show would stink, right? Hell no! Last Thursday night, they put on a fantastic three hours of rock and roll. Tyrant consists of Joe Beachi, guitar; his brother, Gerard Beachi, keyboards; Gerard's wife, Terrie Beachi, drummer; her sister, Kim Edinger, bass; and Gary Belmuk, guitar, no relation. By now you've probably thinking that the girls are in the band just for looks. Nope, those two rocked just as hard as anyone could have. The back beat of the band, Terrie, kicked out some great drums, while little Kim got down with the audience. The guys, meanwhile, cranked with some wild solos.

The evening started slow because of some electrical problems, but the band soon got on the right track. (The Bog now has air-conditioning, since Tyrant blew the roof off of it.) The party really began when Kim worked the crowd out with an original composition called "Show Me Your Uniform." She just didn't sing, she had fantastic interplay with the audience.

From their own material, they moved into some cover tunes. These songs weren't just played, they were pumped to the limit. For instance, their version of "Roadhouse Blues" could only be matched by Jim Morrison himself, but we don't have to worry about that. During this song, Joe did a solo that would put Robby Krieger to shame. They also did a lot of Pretenders music and even some Lou Reed. The best cover tune they did, however, had to be "Psycho-Killer." It started with a tape from the movie "Psycho" and Kim thumbing on the bass. Joe moved to the center of the stage and freaked out. He both sang and act the part out as well. I guess he was just being natural. By the time they played Thorogood's "I Wasn't Me," everyone was on the floor dancing, even Eric "The Bog Manager." Sampson was hoofing it, or at least trying. He also went one step further by helping Gerard sing "Rock and Roll." Thank god Eric's a manager and not a singer.

Overall, the band was great because it had a lot of personality and played to and with the crowd. You can easily tell that they were fans of rock and roll just as us and bands like Tyrant give us the reason for being fans. If you want to see what Tyrant is all about, they'll be back on April 28 to play at a party at PKS. Also be on the look for their new album called "Stick Your Neck Out."

Celluloid heroes:

Cry Wolf

by Kevin Eng

"Never Cry Wolf" is the most recent film from Walt Disney Productions. It's not one of those "kiddies shows" that Disney usually puts out, but rather, it's a deep look at the experience of a man named Tyler. Tyler is portrayed by Charles Martin Smith. Smith, you may recall, played that dopy-looking kid in "American Graffiti." In this role, Smith brings the audience into the mind of his character. The whole story is told through the eyes of the main character. In this way, the audience really comes to know the man.

Tyler is sent to Alaska in order to study the relationship between the wolves and the caribou. The United States government sponsors this trip because it wants to know if the wolves are killing off the caribou population. This information seems trivial, however, compared to what he finds within himself and nature.

The director, Carroll Ballard, also directed "The Black Stallion." His expertise in directing comes through in this film as well. The main focal point of this film is the setting. The Alaskan landscape is captured during summer and winter. The sequoia фильм the air leave you with a great sense of awe. The best aspect of this movie has to be the photography. The film really brings out the beauty of the wilderness.

This film is not for everyone. For the most part, only people who are interested in nature or this man's story of survival should see this film. There are humorous moments and moments of compassion in the movie. These moments define Tyler's soul and they do it well.

If you want to see this movie, you'd better hurry. It's run will end soon.

A young biologist (Charles Martin Smith) takes time out from his ecological study in the Arctic to play the drums.

Smith asks a bothersome bush pilot (Brian Dennehy) to fly him to the Arctic wilderness where he'll begin his work.

Campus cake buying scam uncovered in Miami

Miami, FL (CPS)—The U.S. Postal Service (USPS) is investigating a Miami man who supposedly wouldn't let buyers have their campus birthday cakes and eat them, too.

The man, who USPS officials declined to name, wrote phony letters to the parents of students at the University of Texas, Grand Valley State College in Michigan, Bethany College in Kansas, and Northwestern College in Iowa, asking them to buy cakes for surprise birthday parties for friends who were supposedly throwing the parties for the students.

Postal Service investigators say the cakes were never delivered, and no parties ever were held.

The parents all "received handwritten letters allegedly from college friends, telling them that they were going to have a surprise party for the students' son or daughter," says inspector Paul Feltsman with the USPS in Miami.

The letters also contained a brochure and order form for buying cakes from the L.A. deMontmollin Company in Miami.

But parents who ordered cakes soon found out there was no deMontmollin cake company in Miami, and moreover, no birthday party planned for their children.

"We've heard from about 35-50 people who got the letter, and I'm sure there are plenty of others who just haven't contacted us about it," says Mitchell Solomon, with the Office of the Students' Attorney at Texas.

"We know of about three people who sent in money, and to my knowledge no cakes were ever sent," he says. "Unfortunately, there's not much we can do," Solomon adds.

"The proper parties for any kind of civil action are the parents, and all we can do is represent student interests." Postal authorities are still investigating the cake caper, which would involve using the mails for fraudulent purposes.

Just how the man got students' names and parents' addresses remains something of a mystery. UT officials admit they released a list of about 11,000 student names, including birthdays and parental information, to the deMontmollin Company back in November, 1983. But such information is frequently released to companies in accordance with the 1974 Open Records Act, officials stress.

Besides, "he (the man being investigated) probably got the names and information from job applications," says the USPS's Feltsman.

"As far as we know, though, he is refunding everyone's money and has stopped the cake letters," Feltsman says. Postal authorities are still weighing evidence in the case, and "no decision has been made" whether to prosecute the man behind the phony letters.

FOR COLOR GIRLS... TO PLAY at the HUB Auditorium

by LaMonica Threat

Written by poet Ntozake Shange, "For Colored Girls Who Have Considered Suicide When the Rainbow Is Enuf" is a celebration of black beauty and being a woman. For Colored Girls is filled with music, jazz, soul, and salsa. It also speaks of simple things, of jealousy and friendship, of childhood dreams, and the exhilarating release in dance. But it always returns to its ultimate theme: the black woman's capacity to suffer pain and betrayals with courage, wit and reckless daring. As critic Douglas Watt wrote, "For Colored Girls is 'affirmative, joyous and alive... and overwhelming evening of theatre.'"

On Friday, February 24 at 8:00 p.m., Daedalus National Touring Company of New York will present the internationally acclaimed production of "For Colored Girls..." on HU's campus.

This Chicago performance will be sponsored by the Programming Office of HU. Tickets are on sale, in the Hermann Hall Director's Office, for $7.00 with IIT ID, $9.00 for non-IIT students, and $10.00 for the general public. For further information, please call 567-6879.

LEADER IN YOU.

Army Officer Candidate School (O.C.S.) is a 14-week challenge that will make you dig deep inside yourself for mental and physical toughness. For stamina and courage.

It isn't easy. But you'll discover what's inside you. You'll know you have what it takes to lead. You'll come out a trim, fit, commissioned officer in the Army, ready to exercise leadership skills civilian companies put a premium on.

If you're about to get your degree in engineering or science, it could be your next science should be O.C.S. Call your Army Recruiter.

ARMY, BE ALL YOU CAN BE.
With the divestiture of the 22 Bell Operating companies and the restructuring of the AT&T organization, questions arise concerning how the change will affect AT&T Bell Laboratories.

Will the ingenuity still be there? Will there still be the creativity, the innovation and the unique development capability that has made AT&T Bell Laboratories one of the nation's foremost technological resources? Yes. So what's new?

A New Name
What was Bell Labs, Bell Laboratories or sometimes simply "The Labs", is now officially AT&T Bell Laboratories. It joins AT&T Technologies, Inc. and AT&T Communications in an impressive corporate family... the new AT&T.

A New Freedom
The new AT&T is free to compete in a variety of markets. AT&T Bell Laboratories' discoveries and designs can now be extended to whatever applications and consequent markets they suggest.

A New Mission
AT&T Bell Laboratories will provide the technology AT&T needs to be a world leader in information systems, services and products. We will pursue a broad spectrum of research in micro-electronics, photonics, digital systems and software to fuel new ventures.

A New Beginning
It is a year of new beginnings. For AT&T and for you. If you are a graduate with a BS, MS or PhD in Electrical or Mechanical Engineering, Computer Science, Mathematics, Operations Research, Chemistry, Physics, or Human Factors Psychology talk to an AT&T Bell Laboratories recruiter.

We will be on campus, February 16 & 17
Check with the Placement Office for details.

If you would prefer to write, send a copy of your resume and academic transcripts to:
Director of Technical Employment, Dept. 127/3104/84
AT&T Bell Laboratories, 10 John P. Kennedy Parkway,
Short Hills, New Jersey 07078

An equal opportunity employer
COME WATCH THE OLYMPICS ON THE WIDE SCREEN T.V.
The OLYMPICS WILL BE SHOWN EVERY NIGHT IN THE ALUMNI LOUNGE, WHERE THE PING PONG TABLES USUALLY ARE.

DAVE RUDOLPH BAND... IN THE BOG

Do Thursday nights leave you flat? Do you find yourself with nothing better to do than watch T.V. or (gulp!) study? Then put some excitement into that dull and lifeless Thursday. For a mere $2.00 cover charge, you and your friends can enter the Bog and enjoy some fine musical entertainment.

On Thursdays past, the Student Union Board has brought to the Bog, Michael Mason (a great-sounding jazz band), Studebaker John & the Hawks (who put on an excellent show playing the finest blues around) and, last week, there was Tyrant (a rock group familiar to IIT students from their previous concerts on campus).

This week's musical guest is the Dave Rudolph Band, a folk-rock group guaranteed to continue the tradition of great Bog concerts established by this semester's line-up of musical entertainment.

So remember, make your Thursday something to look forward to; there is a mini-concert in the Bog every week from 9 pm to midnight. If you have not attended one this semester, now is the chance to redeem yourself. The cover charge is only $2.00 and the entertainment is excellent.

From one beer lover to another...

Union Board Members

Union Board is a student programming organization bringing entertainment to the IIT campus.

President: Sylvia Aguilar
Executive Vice President: Jeff Padderke
Public Relations Vice President: Bernard Pontillo
Major Concerts: Kenneth Matthews
Mini Events: Jeff Jankowski
Visas/Design: Kara Denahan

- Finance Vice President: Ned Tamburin
- Executive Secretary: Chris Mailander
- Treasurer: Tamara Burke
- Programming: Phyllis Turner
- Special Projects: Greg Washington
- Films: Doug White
- Editors of UB SS Notes: Angelo Berti, Valerie Jeffries

Wallace E. Goode, Professor
Rivas Johnson, Professor
James Vice, Professor

HUB Photographed by Kameel Balaihra

The Union Board "Movie of the Week" will be:

Three Stooges Festival

It will be appearing in the McCormick Auditorium located in Hermann Hall and will be shown on Thursday, Feb. 16, at 9:15 p.m. and Saturday, Feb. 18, at 7 p.m. & 9:30 p.m. The cost to you is a mere $2.00.

Brought to you with help from the beer with something extra.

HERMANN ALL NIGHT LONG

- 10:30 VIDEO DANCE PARTY
- 10:30 MOVIES - Abbott & Costello REFRESHMENTS
- 12:30 BAND - "Deluxury"
- 1:15 TREASURE HUNT FIRST CLUE
- 2:15 TREASURE HUNT SECOND CLUE
- 3:15 TREASURE HUNT THIRD CLUE
- 4:00 BREAKFAST

Admission - $5.00 Starts at 10:30

Entrance at Southeast Door Everything free except food and drink from the Bog.

Society of Women Engineers (SWE) Schedule of Events

Feb. 22 12:00 Meeting: Hewlett Packard, 118 E-1
March 5, 7 12:00 Meeting: Dominion's Benefit Days, 118 E-1
March 17 12:00 Meeting: Bell Labs, 118 E-1
March 21 12:00 Meeting: Commonwealth Edison, 118 E-1
March 22 12:00 Plant Tour - Any suggestions?, 118 E-1
April 4 12:00 Meeting: General Motors, 118 E-1
April 11 12:15 SWE Elections, 118 E-1
April 18 12:00 Meeting: Motorola, 118 E-1
April 27 12:00 SWE Party - T.B.A, 118 E-1
June 17-24 12:00 SWE National Conference, 118 E-1

Want to get on UNION BOARD?

Position applications are now available in the HUB Director's office. No vast well of knowledge is required in an area to become the director of that area. The only main requirement is the desire to get involved. So, if you are interested in getting involved, apply for a UB position. Applications accepted thru Feb. 24, 1984.
Swim team ends win streak

The Varsity Swim Team had its winning streak snatched at the Illinois Meet last Wednesday. The Hawks could only win 5 of the 13 events, and could only sweep one event, the 3 meter diving, which was won by Doug Lovato with Daniel Hook getting second place.

Six pool records were broken during the meet, with NBC and IIT getting the first two places. NBC’s Gordon set the 1000 Free and 200 yard butterfly record.

By Lewis Shank

Chuck Fee

Big loss for IIT was freshman Chuck Fee, who won both the 200 and 500 yard freestyle events, and set a new record in both.

February 21 and 22
9 a.m. - 4 p.m.

Winter fest begins

The Second Annual Chicago Winter Festival, sponsored by Maxwell House Coffee, WYFR Radio and the Chicago Park District, will be held on Saturday, February 18 and Sunday, February 19 on the South field area of Lincoln Park, off LaSalle and Cannon Drive.

The Winter Festival, which will continue from 10 a.m. to 4 p.m., will feature complimentary country, country ski rentals, instruction and demonstration as well as snow sculptures on both days. Prizes will be awarded for snow sculptures on Saturday and Sunday in the following categories: most humorous, best youth (under 15), best original, and best overall sculptures. To guarantee the event will be held, four acres of Lincoln Park will be covered by the Snowmakers from Villa Olivia Ski resort.

All the activities, cross country skiing, instruction clinics, demonstration, and snow sculpture contests are free; there is no admission charge. In addition, the participants can enjoy complimentary Maxwell House coffee and the sounds of WYFR Radio. For further information, please call Vicki Mann at (312) 861-4100.

True Olympic spirit

by Randy Kusselman

It doesn't matter whether you are an American, German, English, Japanese, Chinese, or Russian. When you sit in front of your TV screen watching your national anthem being played as the Olympic medals are draped around the neck of the winning athlete you take it to heart. In 1960 when the US hockey team swept the world and won the gold medal America rejoiced. Our pride was sensed all around the world. It was what we needed, the rekindling of the American spirit.

And when people say that the Olympics is a contest of amateur athletes of all nations competing among other athletes as individuals, not as representatives of their country, they're full of it. I agree that the pressure an athlete is under is simply more intense in the events, it is alone enough to send them into therapy. And to add the burden of them carrying the heart and soul of their country during that event is simply too much.

But the Olympics are special indeed, to an extent they are liked to world wars, if you'll pardon the expression. In hockey it's a group of young men living in the USA vs. a group of young men living in Russia, it was "Team USA" vs. "The Russians." No one gets killed, (except aside the stand-up in Munich) but the pain and sorrow, as well as the heroes that are produced are similar to that of war. Even the pagentry is similar during the opening ceremony the nations parade their teams carrying their flags of their respective nation before them. They meet in competition, total the wins, losses results and declare an overall winner.

There are good social statements made in the Olympics however. Comradery among3 teams for the most part, is encouraged. A mixture of ideas and customs are shared, friendships are made. At the same time the Olympics like the nations parade as one group, signifying the world brothers, unity and understanding that they worked for and hopefully in small way have achieved. Seeing the TV walking side by side with Russians gives you a feeling that there are no problems that can't be worked out in time, peacefully.

This year the US hockey team won't get a medal due to its losses but we still have many talented and dedicated athletes who will. Win or lose, our athletes are our ambassadors in competition and in friendship, they are truly representing the United States.

Swimmers get awards

Freshman Chuck Fee and Senior Mike Swanson won the Most Valuable award at last week's Luster-Lake Swimming Invitational at Luster Village in Decorah, Iowa. The sharing of the award was a "first" in the 13 year history of the invitational. Fee and Swanson won 2 individual firsts and were both on the winning 400 yard freestyle relay. Fee won the 200 and 500 yard record of 1:47.66, being a LaSalle College record.

Senior Mike Swanson won the 50 and 100 yard freestyle events, both by judge decisions, as the watches did not correspond to the judges call, he failed to break his own record in the 50 he set last year, but became the first swimmer in the men's history to break 50 seconds for the 100 yard event.

Freshman diver Doug Lovato came in 5th in the early morning diving competition on the 3 meter board, but won the 1 meter competition later that afternoon, setting a new point record at the same time. Doug has qualified for the Division II National Championships in two prior dual meets.

The only other first place in the meet was by the 400 yard freestyle relay team of Swanson, Fee, Steve Iida, and Richard Maleczka, who eclipsed 3:00's off the former record in this event.

Even though sophomore Steve Iida was not feeling well at the meet, he was still able to get two seconds in his specialties, the 200 L.M. and 200 butterfly races, and of course, he was on the record-setting 400 freestyle relay. In all IIT won 6 first places in the six team-13 event competition.

The teams next meet will be the Illinois Private College Championships at Illinois Benedictine College this coming Friday-Saturday. Last year IIT got the 3rd place trophy in this 10-14 team meet, but Coach Mitchux says "We'll be hard pressed to hold on to 3rd position, but we'll definitely have a lot more higher places to the individual events, and we could even pull three or four first place medals.

Before We Put You In Charge Of The World's
Most Sophisticated Nuclear Equipment,
We Put You Through The World's
Most Sophisticated Nuclear Training.

It takes more than 16 months of intensive training to become a fully qualified officer in the Nuclear Navy. You begin with four months of leadership training.

Then as a Navy officer you get a full year of graduate-level training unavailable anywhere else at any price.

Navy training is based on more than 1900 reactor-years of experience. Right now the Navy operates over half the nuclear reactors in America. And the Navy's nuclear equipment is the most sophisticated in the world. That's why your Navy training is and must be the most sophisticated in the world.

As an officer in the Nuclear Navy, you have decision-making authority immediately. You get important management responsibility fast. Because in the Navy, as your knowledge grows, so does your responsibility.

Your training and experience place you among the country's most qualified professionals. (No surprise that most of the men who operate the reactors in private industry started in the Nuclear Navy.)

You'll spend more time and more effort to become an officer in the Nuclear Navy. But the rewards are greater, too. It can begin as early as your junior year in college. Qualify, and the Navy will pay you approximately $1000/month while you finish school.

After four years, with regular promotions and salary increases, you can be earning as much as $40,500. That's on top of a benefit package that includes medical and dental care, and 30 days' vacation earned every year. More responsibility, more money, more future.

So, if you're majoring in math, engineering or the physical sciences, and you want to know more about a future in nuclear energy fill in the coupon.

Today's Nuclear Navy is an opportunity like no other in the world.

Navy Officers Get Responsibility Fast.

Navy Opportunity Information Center
P.O. Box 1000, Clifton, N.J. 07010

口 Please send me more information about becoming an officer in the Nuclear Navy - Age 17 or older. Name - Phone Number - Address - Age - College University - Phone to Campus Please return coupon with the coupon.

This is in the general information. We do not have any special information about the Nuclear Navy at any time.

Today's Nuclear
Navy is an opportunity like no other in the world.
