**Annual Conference**

ATS, IIT's Student government, held their annual Fall Leadership conference on Friday, October 10, 1986. The conference was open to any interested students and was attended by about 25 people. The purpose of the conference was to discuss proper leadership skills and inform students of leadership opportunities. The conference hosted four speakers: Janice Dawson, James Vice, Norman Phillips, and Steve Sester.

Janice Vice, the Dean of Student Life, gave a presentation on extrinsic rewards of leadership. He also made the students aware of the many different ways to press for a job well done.

Another speaker was Norman Phillips, a professional photographer from London who has served in the Royal Air Force. He spoke on teamwork and proper communication skills. He also described the importance of a leader possessing this included how to present oneself to others.

Steve Sester, who is a director of Public Relations, spoke about the importance of publicity and recruiting. He focused on how to target an audience and tailor recruiting techniques to the target group.

Lastly, Janice Dawson, the Assistant Dean of Student Life, discussed the intrinsic (personal) rewards that can be obtained from leadership positions. Ms. Dawson drew from her own personal experiences.

After listening to the speeches, the students took a break for pizza and talked to the speakers on an individual basis. They then worked on a case study describing three organizational types similar to many IIT organizations. The actions of the officers were analyzed and discussed by the entire group, including the speakers. Perhaps the most important thing an organization can do, as suggested by Mr. Vice, is to establish a plan beforehand so that valuable meeting time is not wasted in "thinking about an idea. Don't come to a meeting with ideas," he stated, "come with a plan and be ready to answer questions."

All the students who attended felt that the Fall Leadership Conference was beneficial to them, as shown by the evaluations they filled out at the end of the conference.

**Vote on Constitution**

Upon review of the student government constitution, the Executive Board has found that the constitution does not make adequate provisions for filling vacancies in the Executive Board offices. The time frame present in the current constitution is unrealistic in terms of a semester. The following changes, which have been capitalized, are recommended for Article V of the constitution for the Association of Tech Students.

D. VACANCIES
1. The order of succession to the Presidency shall be: Vice-President, Treasurer, Secretary, and Assistant Treasurer. In the event of vacancy of all these offices, the Assembly shall convene within ten days and by a majority vote elect a new president pro-tempore who shall serve until a new President is elected.
2. In the event of a vacancy in the office of Vice-President, Secretary, or Assistant Treasurer during the first six weeks of a semester, the President shall call a special election of ATS within three weeks of the vacancy. The new President shall be elected by a majority vote of the Assembly.

**Mail order diplomas and degrees**

CINCINNATI, OH (CPS) -- Last year, it cost nearly $1000 for U.S. Congressman Cubby Pappas-Fil to get a mail-order doctorate.

"I held on to the flatware," Pappas-Fil said. "I was trying to dramatize the prevalence of 'diploma mills' for the public." He added that a doctor of Aztec Cuisine or Yodeling for just $13, says Christopher Wigert, the "Dean of Deans" at Fergie University in Cincinnati.

"We're talking about $100,000 -- just for a B.A. -- at some of the finer institutions," he says. "Here at Fergie, you can skip all that and go right for a PhD without a college education."

"The things I've seen," Wigert adds, "don't even have a dormitory on campus."

"There's a gap in between the students who are really overworked and the students who are really well-cataloged and Spiegel'd."

"One needs only send Wigert $13 for an official Fergie U. T-shirt and a diploma -- the savings thousands of dollars in tuition and hundreds of hours of study time at a regular college."

For the second year in a row, TIME Magazine is initiating a nationwide search for 100 college juniors who excel in academics and extra-curricular activities, it was announced today by TIME Publisher Richard B. Thomas.

Called the TIME College Achievement Awards, the selections are a recognition of the nation's most outstanding college students.

Twenty winners will receive awards of $2,000 each and their achievements will be showcased in a special promotional section of the April 1987 campus edition of TIME. Eighty merit finalists will receive $250 each and honorable mentions in the section. All 100 winners will be given first consideration for internships with TIME Inc. and other major participating companies.

In a letter to 300 college and university presidents and deans, Thomas noted that the accomplishments of last year's student winners "bore out our belief that the quest for excellence is alive and thriving on college campuses across the country."

TIME's Publisher termed response to the 1986 College Achievement Awards as "overwhelming." Out of more than 7,000 requests for applications, 775 juniors completed the rigorous screening process involving transcript, personal statement, letters of recommendation and submitted work.

Last year's winners included a former Vietnamese boat person who is now a cadet at the US Air Force Academy; the managing editor of The Yale Daily News; a pianist who won the New York Philharmonic Young People Concert Audition; a former Army paratrooper and the founder of the "I'm Driving Club" to combat student alcoholism.

The 1986 TIME College Achievement applications will be reviewed by a panel of regional judges under the auspices of TIME Magazine. In addition to academic excellence, the judges will consider exceptional achievement outside the classroom in such categories as community service, student government, journalism, entrepreneurship, visual arts, athletics, and the performing arts.

To qualify for the Awards, student candidates must be juniors enrolled full time in an accredited four-year American college.
Alcohol Awareness Week
October 20-26, 1986

Monday, October 20
Activity: Display Booths - sponsors: Anheuser Busch, Miller Brewing Co.
Time and Place: All Day HUB N.E. Entrance
*Activity: Film - "Happy Birthday Ray" - sponsor: Anheuser Busch
Time and Place: Noon - 1 pm HUB Auditorium

Tuesday, October 21
Activity: Display Booths - sponsors: Anheuser Busch, Miller Brewing Co.
Time and Place: All Day HUB N.E. Entrance

Wednesday, October 22
Activity: Display Booths - sponsors: Anheuser Busch, Miller Brewing Co.
Time and Place: All Day HUB N.E. Entrance
*Activity: Film - "Know When to Say When" - sponsor: Anheuser Busch
Time and Place: Noon - 1 pm HUB Auditorium

Thursday, October 23
Activity: Display Booths - sponsors: Anheuser, Busch Miller Brewing Co.
Time and Place: All Day HUB N.E. Entrance
Activity: Mocktail Party - sponsor: Quest Management
Time and Place: 4:45 pm - 6:30 pm Residence Dining Hall

Friday, October 24
Activity: Display Booths - sponsors: Anheuser Busch, Miller Brewing Co.
Time and Place: All Day HUB N.E. Entrance
*Activity: Speaker - "Liquor Liability Laws" - University Counsel, Mary Anne Smith
Time and Place: Noon - 1 pm Hermann Lounge

*ATTENDANCE AT THESE EVENTS ENTITLES YOU TO ENTER THE DRAWING FOR THE "BEARS TICKETS"

NOTICE:

Zonta Club of South Side Chicago is looking for applicants for a partial scholarship. If you are a female student - undergraduate or graduate - who is in need of $100 a month stipend, please contact Dr. Chrisann Schiro-Gaest in the Psychology Department (ext. 3577). You will need to write a letter to the Zonta Club by October 31, 1986 (send it to Dr. Schiro-Gaest in Psychology - Life Sciences Building) requesting consideration for a scholarship. Tell us why you need financial assistance and why your career interests are focused in an area which is not considered to be traditionally one to which women gravitate.

Ski Steamboat
Snowbreak '87
Call Kent at 225-3615
Pax: 961-2050
225-2094
Jump into the action... at one of Colorado's premier ski resorts.
Enjoy a week of skiing, parties and fun in Ski Town, U.S.A.

PACKAGE INCLUSIONS
Your complete Snowbreak '87 package includes:
- Round-trip transportation
- 6 nights lodging in condominiums conveniently located and featuring hot tubs, central air conditioning and fully equipped kitchens
- A 4-day lift ticket at Steamboat
- 2 passes with entertainment
- 2 ski passes
- A быстрый самолет or party on the slopes
- All applicable taxes
- Services of travel agents professional on site staff

CANCELLATION POLICY
All payments are subject to a 50% cancellation fee prior to December 1, 1986. Any cancellations after December 1, 1986 will result in a $500 or $1,000 charge depending on the cancellation date.

responsible decisions regarding alcohol
Cakes and Pies
The Union of Concerned Students is having a bake sale Tuesday, Oct. 21, in the HUB from 12 to 5 P.M. Members who would like to donate a cake or pie should contact Cynthia Moore as soon as possible at x864.

NSBE
The National Society of Black Engineers is having a general meeting, Thursday, Oct. 23. Watch for flyers announcing time and place.

Connections
ATS will be holding a pre-sale for Connections, ITS's Student Directory. It will take place from Oct. 27th to November 14th in the HUB and Commons (Time to be announced later.) The cost will be $2.00 per copy. Order your copy today.

Mailboxes
Student organization should designate someone to check their organization's mailbox in the HUB Programming Office. Even if they haven't another mailing address. Mail from off-campus often comes to the Programming Office, and students often stuff all the organization mailboxes. If you have a memo about your box number and need to know what is it, please call the Programming Office at x8679. Office hours are from 8 a.m. to 5 p.m. Monday and Wednesdays. Call at x600—don't miss any important mail!!

Physics Students
The Society of Physics Students will be sponsoring a trip to Argonne National Laboratory on Nov. 4 & 5. Verkas Observatory on Nov. 22. If you are a physics student and wish to attend, please sign up with Arlene in the Physics Dept. or contact one of the club's officers.

Diwali Celebration
The India Association will organize a function to celebrate Diwali, the “Festival of Lights” on Nov. 1st, 1986. In conjunction with this, a body of general meeting will be held on Friday, October 24 in Herman Hall, room 203 at 12:00 p.m. Everyone is urged to attend.

CS Prof on WGN
Dr. Peter Greene, associate professor of Computer Science, will be a guest on Mr. Rosenberg's "Extension 720" on Monday, October 27, the programming WGN radio 720am, from 8-11 p.m. Dr. Greene will be discussing a recent book publication on artificial intelligence.

R/C Club
Hey Guys, We're going to have a meeting. We'll discuss why we're having a meeting and why we're starting the club. Everyone is invited, even if you haven't contacted Jim or even if you haven't got a radio. How's 6:00, Wednesday in the Bag? Problems call Jim at x5909 or x5365.

SWE Bakes
Celebrate the Mid-Term Blues!!! Reward yourself with one of our delicious baked goods. The Society of Women Engineers will be having a bake sale Friday, Oct. 24 from 11:30 to 1:30 P.M. in the HUB.

Ping-Pong
The Ping-Pong tournament will take place on Monday, October 21, 1986 at 7:00 p.m. at the Rec Center.

Cantonese Club
There will be a meeting of the Association of Cantonese Students on Tuesday, October 28 at Herman Hall in the mezzanine room 306 from 1 to 2 P.M. All those interested are accepted.

Hey!!!
Any announcements or articles submitted to Tech News are to be on reasonably sized paper (i.e., 8 1/2 x 11" or at least half of that—interoffice memo size) or it will most probably be "lost," our editing staff reads only the above mentioned size paper. Also, the deadline for these articles is 5:00 PM Thursday preceding the Monday publication. Also, "announcements" of events that charge admission or any other fee will be considered advertisements and will be billed at rates FROM TECH NEWS.

AICHE
The AICHE will be holding a bake sale outside of the HUB cafeteria on Monday and Wednesday from 12 noon to 2 P.M.
The power of words on paper

by Mark Pundurs

Western civilization has historically maintained the distinction between objective reality and our subjective perceptions of it. We call "primitive" those cultures whose members attempt to alter reality (e.g., improve their fertility rate) through verbal exhortation of various supernatural forces. We regard the disappearing belief in, and practice of, "casting spells" as a sign of our advanced state. Yet, we are still swayed by words, by the power of words.

Many people treat the signing of arms-control agreements as inherently good, and criticize the U.S. for not accepting more Soviet treaty proposals. They ignore the history of such treaties: the U.S. failed to accept the Moscow Pact in 1945, and the Air Defense Treaty in 1953. After all, international agreements are written by people, who base their decisions on their perception of the world. As long as people believe in the power of words, treaties will continue to be signed.

That the new president, Cathy Paul, has the potential to fulfill the demands and responsibilities of ACS president is not an open question. However, the election of a new president will not solve all our problems. We must continue to work together, to improve our society.

Sincerely,
Preeti Parikh

Response to "Drug Crusade"

To the Editor:

Real Noble Martens's conclusions about drug abuse in America are half-correct. I agree with him that people abuse drugs because they are bored and they want to feel good. But his explanation of why Americans today feel bored and feel bad is 180 degrees away from the truth.

The causes he proposes are a surplus of "material wealth" and a concentration of "far too much power" (including political power) in the hands of a few. However, I believe that the problem is more complex. It involves both economic and psychological factors. It is not enough to simply blame the wealthy and the powerful. We must also address the underlying causes of addiction.

Sincerely,
Mark Pundurs

ATS president resigns

Dear Students,

I regret to inform you that I have resigned from the position of President of Association of Student Teachers (ATS). My resignation is effective immediately.

Sincerely,
Raul

Response

I partially agree with what you said about the 1960s. However, I believe that the main problem of the 1960s was not the "Age of Aquarius," but the "Age of Consent." The 1960s were characterized by a widespread belief in the idea of sexual freedom. This was a dangerous philosophy, as it led to the acceptance of all kinds of abnormal behavior.

Sincerely,
Raul
Graduate Associateship Programs

The National Research Council announces the 1987 Resident, Cooperative, and Postdoctoral Research Associateship Programs for research in the sciences and engineering to be conducted on behalf of 26 federal agencies or research institutions, whose laboratories are located throughout the United States. The programs provide Ph.D. scientists and engineers of unusual promise and ability with opportunities to perform research on problems of broad interest to the sponsoring agencies or institutions.

Approximately 450 new full-time Associateships will be awarded on a competitive basis in 1987 for research in chemistry, earth and atmospheric sciences, engineering and applied sciences, biological, health, behavioral sciences and biotechnology, mathematics, space and planetary sciences, and physics. Most of the programs are open to both U.S. and non-U.S. nationals, and to both recent Ph.D. degree recipients and senior investigators.

Awards are made for one or two years; senior applicants who have held the doctorate for at least five years may request shorter tenures. Stipends for the 1987 program year will begin at $26,350 a year for recent Ph.D.s and be appropriately higher for senior Associates. A stipend supplement of approximately $500 may be available to regular (not senior) Associates, holding recognized doctoral degrees in those disciplines where the number of degrees conferred by U.S. graduate schools is significantly below the current demand. In the 1986 program year these areas have been engineering, computer science, and space-related biomedical sciences.

Reimbursement is provided for allowable relocation costs and for limited professional travel during tenures. The host laboratory provides the Associate with programmatic assistance including facilities, support services, necessary equipment, and travel necessary for the conduct of the approved research program.

Applicants to the National Research Council must be postdoctoral no later than January 15, 1987 (December 15 for NASA), April 15 and August 15, 1987. Initial awards will be announced in March and Foreign students’ holiday in U.S.

The International Office has published a guidebook, “Living in America,” for foreign students and scholars who will be visiting the United States. The book contains information on obtaining a visitor’s visa, finding temporary accommodations, obtaining work permits and other documents, and information on cultural life and customs. A copy of the guidebook is available from the International Office, Department of Literacy, 2101 Connecticut Avenue, N.W., Washington, D.C. 20008.

Holidays are usually the most difficult times for international students in the United States. The most difficult times for international students to remain on campus during the holiday season is when international students feel restless, bored, and depressed. If you are an international student or scholar, you may already be thinking about the four-day Thanksgiving holiday weekend, November 28-30. What will you do? If you plan to remain on campus in order to study, I suggest that you talk to students who tried that last year. They’ll tell you how difficult it is to be alone on campus when most other students are gone.

ARE YOUR DRINKING BUDDIES THINKING BUDDIES?

Good times mean getting together with good buddies and Budweiser. There’s something about a couple of beers with friends that makes for great conversation. Beer is meant to be enjoyed by adults socially. It is also the beverage of choice in MODERATION. Good judgment should be used whenever you drink. Make sure “your drinking buddies are good buddies” and you have good judgment. Especially if they drive! When they need a good friend...think for them! Don’t let them get behind the wheel—the outcome could be disastrous.

At Anheuser-Busch, we are concerned about our valued customers. We support research, education and treatment programs aimed at combating alcoholism and alcohol abuse. To obtain your personal key ring go to responsible beer drinking, send $1.50 which includes postage and handling to:
MODERATION KEY RING
W. 1614 Riverside
Spokane, WA 99201

HOMETOWN Distributing Co., Inc.
4811 So. California
Chicago, IL 60632
312/659-9200

If you are undecided about participating in the program, talk to an advisor in the International Office or to students who participated last year. You will probably be convinced that this is a way to spend the Thanksgiving holiday weekend.
The Taco Stand

by Jeff Gambill

The day started off great for Charlie Carvers. It was a Saturday morning, a rare sunny day. He was feeling good and ready for some fun. He lay in bed and gazed dreamily out the window at the bright, turquoise sky. It was a perfect day for a barbecue or a picnic in the park. Charlie had just woken up and was enjoying the peaceful atmosphere.

Now, Charlie was a gourmet chef, known for his delicious creations, but this morning, he found himself struggling to come up with a new menu. He sat at his desk, staring blankly at the computer screen, his fingers tapping rhythmically on the keyboard. He had just finished a long week, and he was feeling a little burnt out. He took a deep breath and decided to take a break.

He walked over to the window and gazed at the view. It was a beautiful day, and he could hear the sounds of the city below. He felt a sense of peace wash over him, and he knew he was ready to tackle his next challenge.

As he walked back to his desk, he noticed a small bird perched on the windowsill. It was a pretty little thing, with a fluffy tail and a bright beak. Charlie watched it for a moment, fascinated by its movements. He decided to make a special recipe for the bird, something that would make it happy and healthy.

He started gathering ingredients, carefully selecting the best ones for his recipe. He knew that he needed to be creative and think outside the box to make something truly unique.

As he worked, he thought about all the different ways he could present the dish. He envisioned a beautiful presentation, with delicate decorations and a fun, whimsical touch.

Finally, he finished the dish and tasted it. It was delicious! He knew that his recipe was a hit, and he couldn't wait to share it with the world.

Charlie decided to take a photo of the dish and post it on his blog. He was proud of his creation, and he wanted to share it with everyone. He knew that his blog was going to be a huge success, and he couldn't wait to see the reactions.

The next day, Charlie's blog was featured on a popular food website, and he received tons of praise and positive feedback. He felt a sense of fulfillment and satisfaction, knowing that he had created something truly special.

Charlie realized that he didn't need to be a gourmet chef to make a difference. All he needed was a little bit of creativity and a lot of passion. He knew that he was onto something special, and he couldn't wait to see where his journey would take him.

---

Cat and Mouse

by Nick Pauback

George finished rereading his book and sat down to enjoy a cup of coffee. He was feeling relaxed and content, knowing that he had finished his work for the day.

He thought back to his childhood, when he and his friends used to play the game of Cat and Mouse. They would run around the neighborhood, trying to catch each other. George always enjoyed being the cat, because it was so much fun to chase and pounce on his friends.

He smiled, remembering those carefree days. It was a game that he had played for years, and he loved the feeling of power and excitement that came with it.

As he sipped his coffee, George thought about the game again. He wondered if it was still played today, or if it had been replaced by more modern games. He knew that technology had changed the world, and he wondered if the old games were a thing of the past.

George decided that he needed to find out if the game was still played. He was curious to know if it was a game that was still enjoyed by children today. He knew that he would have to do some research to find the answer.

An example of ethics in business

by Greg Emile

In this story, set in a small town, there are several characters who are involved in a local business. The town is known for its bustling downtown area, with a variety of shops and restaurants.

Tom, the owner of the local computer store, has been running his business for over 20 years. He prides himself on providing quality services to his customers, and he always tries to go above and beyond to make sure that they are satisfied.

One day, a customer came into the store and complained about a recent purchase. They had bought a new computer, but it was not working properly. Tom immediately offered to help, and he spent several hours troubleshooting the issue.

After several attempts, he was able to resolve the problem and the customer was pleased with the outcome. They were grateful for Tom's help and thanked him for his excellent service.

Tom realized that he had learned an important lesson about ethics in business. He had been honest and true to his customers, and he had always tried to do the right thing. He knew that this was the best way to build a loyal customer base and that it would lead to long-term success.

As he walked out of the store, he felt a sense of pride and satisfaction. He knew that he had made the right choices, and he was confident that his business would continue to thrive.

The Four Days of Thanksgiving

by Bethany Green

Thanksgiving is a special time of the year, a time to give thanks for all that we have. It is a time to come together with family and friends, to share stories and memories, and to enjoy a delicious meal.

This year, Thanksgiving was particularly special for Bethany. She had just graduated from college, and she was excited to start her new career. She had been working hard for months, and she knew that this was the beginning of a new chapter in her life.

She was looking forward to spending Thanksgiving with her family, and she couldn't wait to see everyone. She knew that it would be a time of joy and happiness, and she was excited to be a part of it.

As she sat down to eat her turkey, Bethany couldn't help but feel grateful. She thought about all the people who had helped her along the way, and she knew that she was truly blessed.

She raised her glass and said a prayer, thanking everyone for their love and support. She knew that this was a time of reflection, a time to appreciate all the good things in life.

As she ate her meal, Bethany felt a sense of peace and contentment. She knew that she had a lot to be thankful for, and she was grateful for the opportunity to spend this special day with her loved ones.

October 20, 1996
Taco
continued from page 6 anyway, interdimensional travel is a popular vacation pastime but can be tiring in the extreme, especially when the traveler has a long way to go before reaching his/her/its destination, similar to a long drive to and from the Midwest to go through the undeveloped sections where desert services can be scarce. Never mind the expense of hotels, restaurants and just places to stop for a bit and enjoy a meal, the facilities and rest rooms are all part of our services.

"That brings me to the reason for my wait," Mr. Carver said. "Xanophnas said he pulled out a piece of paper from the fire and handed it over to Charlie. Charlie hesitated and then took the sheet from him. "Why you have there in, is essence, an eviction notice. Despite what you may have thought you are not yours. Interdimensional has the deed to it." He pulled out another piece of paper and handed it to the other cop who was a copy of the original bill of sale. We bought the property legally, from the original owner only a few years ago. We only recently returned to survey the land and the development and discovered you illegally occupying the lot.

"He started at the documents in his hand. Eviction had been the only worry he had until the previous explanation. "Wait a minute. You can't evict me! I bought this place 50 years ago and have my deed for it and it looks a lot more legal than anything you can write in a paper in his hand. "I don't care what kind of corporation you're from, I'm not leaving off my own land."

"I'm sorry you feel that way, Mr. Carver," the cop told him. "You need to have the necessary documentation. Any money you may have paid him will have to get back from those to whom you paid it. After all, it wasn't really legal in the first place."

"The Corporation has decided to develop this land for our convenience and you have no right to leave."

Xanophnas snapped his briefcase shut and stood up. "I believe that concludes our business here. Have a nice day, Mr. Carver. He walked over he door and opened it, stepping through the doorway, he turned back and added, "Oh, by the way, you may have noticed that the eviction notice said immediately. I made arrangements to have it left free, we have made arrangements. Don't worry, it won't happen again."

So saying, he walked out the door and into the darkness.

Creative Engineers
At Sundstrand, we see engineering as a creative profession. A state-of-the-art engineer's imagination is his greatest asset. The ingenuity to conceive new technologies and the discipline to make them work.

As a leading supplier of technology-based electrical and mechanical aerospace systems in the business of creative engineering, we're looking for creative engineering graduates in most of our programs. Whether you're in aircraft engines, space, integration, machinery or manufacturing engineering, we're interested in you.

In addition to openings for graduating engineers, we have a cooperative education program for engineering students.

WE WILL BE ON CAMPUS SOON
See your college placement office for further information or to arrange an interview.
Bob Garner
(Magician)
Focus on the Arts is going above and beyond its call of duty this time. Bob Garner belongs in Vegas or Atlantic City. Fortunately for us he is appearing on campus twice. He will definitely be remembered for a long time.

Wednesday, October 29 at lunch in the HUB and dinner in the Resident Halls.

CHICAGO RHYTHM KINGS
(BLUES AND MOTOWN)
HERE IS YOUR FIRST CHANCE TO CATCH THE ACTION AT THE BAG. IF YOU HAVEN’T YET. FOR THOSE REGULARS YOU KNOW WHAT IT IS LIKE. CONVINCE YOUR FRIENDS TO COME ALONG. WHO KNOWS, ERIC MIGHT EVEN HAVE A SPECIAL ON BEER IF THE CROWD IS LOUD ENOUGH.

THURSDAY OCT. 23 AT 9:00
ADMISSION IS $2.00

NEXT WEEK IS FOR YOU SPACED OUT ID MAJORS
JOHNNY STAR AND THE METEORS.
BE AWARE ......

The Jagged Edge
(otherwise known as the jagged edge)

A breathtaking movie. For those who were just waiting for the perfect movie to see, this is it. Everyone who has seen it has said it was great. Amber Turri said, “It was a great movie. The ending was awesome.”

I don’t know what she means about that, but I am sure not going to miss this one!

Theresa Bertucci also had four stars for this movie. She said, “It was an excellent movie!”

Next week’s movie:
Here is a clue for next week’s movie. It wasn’t Mr. Green in the Billiard Room. So U B there, in the HUB, with a friend.

Thursday, Oct. 23 at 5:15
Saturday, Oct. 25 at 7:00 and 9:30 Admission is $2.00

The Union Board is seeking a Major Concert Director. If anyone is interested, drop off your name and phone number in the Student Organization Office.
We are also looking for a Special Projects Director. The Union Board is also having a preview party for anyone with ideas for next semester’s movies. Look for further information in the HUB.

Dear Students,
College can be the best time of your life. There is so much to see and so much to do here. Your Union Board already knows this. That’s why we bring you the first rate movies and music. For those of you who are just going to school in Chicago, I suggest you get the full taste of Chicago.

Everyone knows Chicago is the premier blues city in the world. Why not take advantage of it? Your Union Board brings you the up and coming band from the midwest. Try to get more than just an education out of these four or five years.

Don O’Connor, UBSH
Yearbook
There will be a mandatory yearbook meeting on October 20, 1986 from 12 noon to 1:00 p.m. in the HUB room 308. All parent members must attend. New parents are welcome. If unable to attend, please contact Marlene Lejas by dropping a note in Box 36 in the Student Life Office. Final Roster will be based upon attendance of this meeting.

Free Records
Got any old 45s or albums you don’t want anymore? Don’t throw them out! Don’t sell them to anyone! Donate them to WOWU! You can help improve our program quality and get the satisfaction of hearing your records on the radio. Just bring them up to the WOWU Studio 5th floor Main Building, during our broadcast days, noon to midnight, and we’ll do the rest. (Just like Johnny makes the cash call!)

Spirit
If anyone is interested in starting total school spirit and would like to join the cheerleading squad please contact Kelly Cox at 842-8771 (x5081) or Jill Heyser at 842-9119 (x3861).

Video Party
On Monday October 20, the Rec Center is sponsoring a video-bowling party from 9:00 p.m. to midnight. You can play unlimited pinball, video games, bowling, pool, and football for a $2.50 cover charge. Come and Enjoy.

International Xmas
International Students: Do you plan to do over the Christmas vacation period? Would you like to spend two weeks with an American family? Host family placements are available in over 50 locations in the United States through a program called Christmas International House. The only cost to the student is his transportation to his host family site; room and board are free. For more information and application forms, come to the International Office, Room 103, Fair Hall, as soon as possible. Don’t delay; the wires with warm weather fill up fast.

How to hack college.
Yes, it is possible to get through school these days without being a propeller head. All you need is a computer that is not a propeller head, or "Macintosh.
Take a program like Macintosh Pascal, for example. It is like writing programs with an exclamation point. If you can type through mass lucubration, then you in one minute and see it graphically in a different window at the same time. You can de-code faster. You can create really good graphics, and you have faster development turn-around time. This is just one example of how Macintosh helps students work smarter, quicker, and more creatively. And the beauty of Macintosh is, you don’t have to know dialects about computers to use one. In other words, you won’t be able to do with Macintosh, get confused, frustrated and frustrated.

college or university. The deadline for the completed application is December 31, 1986. Winners and finalists will be notified by mail on or before March 31, 1987.

Application is available at the dean’s office or by calling 1-800-523-5945.
So, you think you’re smart?

Well, I can’t say you all didn’t try. I did receive a number of answers for the puzzle from two weeks ago, but, unfortunately, none of them were correct. Oh, well. Better luck next time.

The puzzle:
Greens are better farkers (farkleberry collectors, of course) than most Purples. However, in farkling competition in which the income of Greens is equal to the income of Purples, the matches are standoffs. Farkling ability has been demonstrated by independent researchers to have a possible connection with diet. The Greens have more money than the Purples and can afford better farkling instruction. The most promising approach to equalizing farkling ability in the two groups would probably be to:

a) Provide farkling ability dietary ingredients to the Purples.
b) Equalize the wealth by giving enough Green money to Purples.
c) Make sure Purples have sufficient nourishment for good health.
d) Obtain better farkling teachers and equipment for the Purples.

The Answer: ** a **

CS Dept. and IEEE host job seminar

The Computer Science Department of the IEEE Computer Society, today will sponsor a beneficial seminar involving the employment aspects within the computer science field. The panel will be made up of eight distinguished guests from the following companies: RR Donnelly & Sons, Northport, Consultant, ISC Systems Corporation, First National Bank, Bank/syth, AT&T Bell Laboratories, and Amoco. The presenters will present a brief but descriptive synopsis of their duties in the working world. The discussion will start at 5 p.m. in Room 113 Stuart Hall, and run for about one hour. The speakers will be available afterwards to answer any questions students may have. To miss an event such as this will only deprive you of valuable advice that can help you achieve your employment goals.

Epidemic discovered on campuses

(CPS) - In the last two weeks, more than 200 colleges 200 miles apart have found bacteria associated with Legionnaires’ disease in their air conditioning systems. One person has contracted the disease, while 20 others are undergoing tests to make sure they don’t have it. At Yale’s Dunn Computer Center and Maryland’s University’s Building, officials said they began searching for causes after complaints of headaches and nausea. On both campuses, health workers found Legionella pneumophila in the cooling tanks of the air conditioning systems. The disease thought to be highly contagious, caused a national panic in 1976 when it first appeared. People who attended an American Legion convention in Philadelphia. Doctors have since found that the disease is not contagious. Thirty four people eventually died from the disease that year. At Yale’s computer center last week, the water in the cooling tank was treated with chemicals to kill the bacteria, but then overflowed, leaked through the ceiling and dripped onto the floor of the newly-constructed building. University officials would not identify the employee, but said the person was in satisfactory condition. Maryland closed its building when officials found the bacteria in the air conditioning system, and employees complained about sore throats, nausea, and headaches. About 20 employees underwent blood tests, but health officials found no cases of Legionnaires’ disease and no one is seriously ill, university health center officials say. Other homeowners observed the curious timing and appearance of the bacteria on the two campuses probably doesn’t mean there’s a nationwide outbreak of Legionnaires’ disease inciting on American campuses. If this doesn’t cause concern, says Dr. Suzanne Laussau, the epidemiologist for the Center for Disease Control in Atlanta, “It is a state health department epidemiologist Dr. Narda Tolentino concurs. Dr Narda Yale and Maryland incidents probably were random fluctuations, though the bacteria in question is still present.” “If I were to take cultures of any water faucet, window sill, or I would find this bacteria,” Tolentino says.

College students, she adds, are not as vulnerable to the pneumonias-causing bacteria as others. Males with other infections. Symptoms and people who drink slow of alcohol also are more vulnerable to infections.

And Laussau notes the symptoms described by Maryland’s employees are not classic Legionnaires’ disease symptoms.

Legionnaires’ disease symptoms include fever, cough, and shortness of breath, she says.

Lower enrollment due to higher costs

NEW YORK, NY (CPS) — For the first time ever, lower college enrollment has been linked to ever-increasing tuition rates at northeastern colleges, while colleges in the west, where tuitions are generally lower, are “busting at the seams,” the College Board says in a report released last week.

The report might interest professors by how much the college toll is being widely experienced by many educators, who maintain, although it is helpful, ponder the possibility of students paying for and letting them go where they want.

But the College Board report says enrollment at public colleges in the west rose a whopping 50 percent since 1986, while the biggest nationwide drop — 11 percent — was among private colleges in New England, where tuitions rose the fastest. Since 1980, when college tuition started rising at rates far above the general inflation rate educators have been confident they weren’t pricing out some students out of higher education.

In the wake of the College Board report, some officials seem ready to concede higher tuition may at least force some students to choose to go to cheaper schools.

“Rising tuition may have been a factor in the westward swing of the student population,” says Paul Albright of the Western Interstate Commission for Higher Education. “Higher tuition could be keeping people from attending a public institution.”

“There could be a linkage between tuition and enrollment.” Albright adds. “The western schools have tended to raise tuition and put more of the cost on the student and parents. But the increases are not as significant as other parts of the country.”

Juliana Thrift of the National Institute of Independent Colleges and Universities also thinks students may have course prices more in mind when choosing where to go.

“Students may be looking at the sticker price rather than applying and going to talk to the financial aid office,” Thrift says.

Even at the public University of Iowa, which had a minor enrollment drop for the first time in seven years this fall, money may be influencing enrollment says admissions director Dr. T. Anne Cleary.

“It definitely plays a greater part than it ought to,” she says. “Young people frequently evaluate schools that cost more even when financial aid, such as it is, is there for them.”

At two different public schools, other matter besides tuition also may have provoked the state’s drop in enrollment. The College Board documents.

Albright points to marketing efforts in Western states to help keep homegrown students — who might otherwise have migrated east — in state colleges.

He also notes the broader national population shift from northeast to the South and West, and that the population shifts to the West and South — both of which are growing at a higher rate of growth than the East — demographics move.”

“There are more expensive private colleges in New England, moreover, where students are losing students. Dartmouth, for example, still turns away approximately 25 percent of all requests, making Dartmouth the best offer, and the West says Michael Varley of Dartmouth’s admissions office. But the College Board, however, is not ready to resolve the phrase whether tuition is the cause or students choose to go to school.

Eta Kappa Nu sponsored Abbott Labs

Eta Kappa Nu welcomed Mr. Vincent Fisher of Abbott Laboratories on Wednesday, October 15. Abbott is a broad- based health care company with over 30,000 employees worldwide.

Mr. Fisher’s presentation centered around a product currently being marketed in Europe. The company has made major advances within the company in the last five years. He provided Eta Kappa Nu with an “ interview checklist ” which is used in raising potential employees of Abbott. Also included was a summary of Abbott’s growth in Research and Development, Sales, and General Expenses covering the last five years.

Electrical engineers at Abbott have a variety of opportunities ranging from the development of chip level software to manufacturing and maintenance. Abbott’s largest manufacturing facility is located in North Chicago, and the corporate headquarters are located in Abbott Park, five miles southwest of North Chicago.

Students interested in learning more about Abbott Laboratories are invited to Eta Kappa Nu’s next meeting which will be Thursday, October 31st, at 12:30 PM in the HUB mezzanine. At that time Eta Kappa Nu will present more information concerning Abbott for those students who were unable to attend Mr. Fisher’s presentation. Mr. Fisher provided Eta Kappa Nu with an excellent view of the usefulness of mathematics. He used an overhead projector and will use those as a basis for our presentation on the 30th.

Give a hoot. Don’t pollute.

Spikers continue to win

In this week's only match, the IIT Women's Volleyball Team defeated Rosary College 15-6, 15-7, 15-7. The Hawk's record is now 21 wins and 1 loss, and they are ranked 18th in the NAIA National Coaches' Poll.

In game one of the Rosary match, IIT overcame some early batting errors to pull away to a 15-6 win. The Hawks were up 7-2 in the second game when Lori Marini entered and served 8 consecutive points to make it a 12-2 win. In game three the Hawks dominated again, winning 15-7. Kim Whalen led IIT with seven spikes for kills, followed by Janie Kuta with six, Megan Regan and Joan Bens each had three ace serves and Jennifer Gaskin assisted on 24 spikes. Blocking leaders were Joan Bens with five, and Kim Murphy and Janice Kuta with three aces.

The next home match is Tuesday, October 21 at 7:30 p.m. against Chicago State University. IIT will also be the host for the conference playoffs on Friday and Saturday, October 24 and 25. Matches will begin at 4:30 p.m. on Friday and 9:00 a.m. on Saturday.

Basketball player preview

Jim Lemanski, at 7'0" and 230 pounds will be the lone senior on the IIT Basketball Team this season. Lemanski graduated from Hinsdale Central High School and is majoring in Mechanical Engineering.

Unlike Jim in his previous years at IIT, he will have plenty of competition at the center position. The team has four other centers, 6'7" junior George Mari, 6'6" freshman Marc Thompson, 6'5" freshman John Lenz, and 6'6" sophomore Scott Tyler.

With Jim playing to his potential he could be an important part of our game plan. His size and coordination are certainly on the plus side. His stamina and lack of quickness would be drawbacks

Baseball team prepares for season

For the past six weeks the varsity baseball team has been going through their fall workouts. According to Coach Harr, "This is an extremely important experience for the team and for the players. It gives us an opportunity to involve the freshmen and to show them what college baseball is all about."

The team, which finished third in the state last year and was awarded a post-season bid to the NAIA tournament, did lose a few key players from graduation. But recruiting went well and the Hawks were able to bring in some outstanding freshmen. Among them are, D. R. Kamor, a left-handed pitcher from Milwaukee; Angel Oviedo, a catcher from Evanston High; Jim Schoet, an infielder from De LaSalle; and Tal Ratakke.

Annual Pineapple Meet

The Varsity Swimming Team kicked off the Intrasquad or Pineapple Meet this coming Wednesday at 5:00 p.m. in Eckel Pool. The meet is held every year about a week before the team's first varsity competition, to give the team some competitive experience and build up to prior to its varsity experience. An official of the Illinois Swimming Association will be on hand, starter and referee for the competition.

Last year's winner, junior Mike Massler, is favored heavily in the competition, as he won five events in last year's 14 event competition. Other favorites in this year's meet are sophomore Davis Hathaway, who won three events last year; senior Doug Lovato, team captain; and freshman Bob Cook, of both varsity events, and senior and captain Chuck Fee, who qualified in three events in the invitational and Nationals last semester, and who missed the Pineapple Meet last year due to a shoulder injury.

Three new freshmen could also figure in the meet: Troy Leal, a top sprint freestyler; Richard Himmuth, a breast-stroker; and another excellent sprint freestyler, who could all have a shot at the meet, and the coveted Pineapple First Prize.

IIT Hawks

IIT bowlers win battles, but not war

It was close on both days, but IIT men's team lost to Western by a score of 4/5 and the Illinois State in 43-37.

These losses dropped the men's team to a match record of 1-2 even though through 15 games their record is a very respectable 9-5-1. At this point, however, they are in third place in the Central Illinois Bowling Conference, behind U of I-Champaign and U of Illinois-Chicago.

The Lady Killers lost to Western and Illinois State by lopsided scores of 7/19 and 66-12. The women have dropped to fifth place in the conference.

Olivia Gillow picked up 2 points at Western to pace the women in victory. Captain Kathy Collins won only 1 game, but averaged 168 for the match and shot 174 which was the high game of the day. Freshman Barb Sollis picked up 2 points in her first competition by tying her opponent with a 133 game. Bob Gork picked up a team high 249 to lead the men's team for 80 pins down in the fourth frame to a 27 pin final in the final game. However, the team lost by 21 pins over the 5 game series.

Other point winners were Captain Allan Spike (4), Bob Blatt (2), Kevin Walker (6), Andy Libb (6) and Brad Novak (4).

Against Illinois State, Kathy Collins and Bob Gork averaged 166 for five games and picking up 8 points. Her 192

Soccer team ready to win

The soccer team update going into the last leg of the season. The men's team defeated DePauw University on Wednesday October 22 at 3:00 p.m. and the women's team played October 25 at 1:00 p.m. against Lake Forest College and away against the University of Chicago on October 29 at 3:00 p.m.

Several players on the team have shown improvement and maturity and the overall spirit is high. The defense is pulling together, the offense is improving and the spirit is working hard and is coming around. Come out and support Hawk soccer in their last int games. (Special Note: The Hawk's last home game against Lake Forest College on October 25 has been designated Parent Appreciation Day. All fans, the game will be appreciated.)

IIT Players of the Week

Volleyball

The IIT Volleyball player of the Week for October 15th was freshman and has played the setter, outside hitter, and middle hitter all four days for the Hawks this season. In the Rosary match, she served eight consecutive points in game two. Lori had four more good serves in game three. She also contributed nine spikes with only one error, four good passes and three digs.

Women's Bowling

Marta Contreras, a freshman for the Women's Bowling team, was named Conference Player of the Week. Marta averaged 149 for nine games against W-I-U and I-B-U. This was her first collegiate competition. She rolled a 198 game which is the high game for the women's team so far this year.

Men's Bowling

Bob Rosier, a freshman MAE major, bowled only one game for IIT this week. Bob strung six strikes from the fifth through the tenth frames to lead IIT in their first game. (Special Note: The IIT's first game on October 25 has been designated Parent Appreciation Day. All fans, the game will be appreciated.)

Soccer

Trinidad Romero is a senior electrical engineering major and a member of the varsity soccer team. Trino is a defensive back on the Hawks, starting defense, but his strong legs in his ability to close down the ball and stop the attack. In practice, he is one of top athletes on the team. In the field he is known as Mr. Energy, as he makes several offensive runs but never uncovering his defensive position.

Intramurals

The Seahawks from the Tuesday League (AFC) conference edged Fudgewee 10-2 to capture the AFC Championship. Meanwhile, Playboy Inc. has gone undefeated to win the Thursday League (NFC) championship. The two teams will meet this week in the IIT Super Bowl to determine the intramural championship.
