HKN Contest Winners
by Jim Triano

"Just gimme one more noun," said one of the contestants. "I know I've got the verb and the adjective, but what about the noun?" Such was the common plea of the contestants who gathered Saturday for the HKN Programming Contest near their 4:15 deadline. With brows furrowed and hearts racing with excitement, they dug in and gave it all they had until it was over. Fifty people turned out to be in vam as the last few moments were decisive in choosing a winning team. All in all, 10 teams with a total of 40 people participated in the contest. The winning team, Kappa Nu (HKN), was the Electrical Engineering Honor Society and the CS Department to try and promote an extracurricular, recreational event which emphasized the "fun" of programming, but at the same time pointed out the importance of working in teams. "It builds a sense of camaraderie, which is crucial to working on a project," said one participant. "A real-life environment." A comment from the oversite and judging committee composed of Candi Surino, Dr. Thomas Grace, and Jon Paulson of the CS Department.

For some people, it was a common factor—the first prize. Some programmers, however, wanted to do it to see how well they coded "under the gun." Their expectations were fulfilled and even surpassed as evidenced by their comments afterwards. "I was surprised at how much code I wrote and how well it worked" was typical of the remarks of the winners. They had a good reason to be pleased with this year's outcome. The first contest had never been sponsored, while previous contests were more successful. Indeed, the smiling faces of the participants after the deadline were best witnessed by the type of satisfaction enjoyed by all who were a part of this contest.

Now that the contest is over, what do HKN and the CS Department have in store for the future? We would like to hold another contest tentatively in the early part of next semester, when students aren't as busy and will be able to participate:

In conclusion, HKN and the CS Department would like to extend their sincere thanks to all of the people who made the contest possible, and especially to the participants. Dean Vose, Dr. LoCicero, Chairman of the ECE Department, and of course all the technical people who generally contributed, namely the donors, the Bog, Union Board, and the IIT Board.

The following is a list of the winners in the HKN Programming Contest:

Winners: Robert Kraizik, Larry Vigilante, Pat Fielder, and an anonymous person who contributed significantly to the contest.

ASCE builds BBQ pit for IIT
by George Janny

The American Society of Civil Engineers (ASCE) is building a barbecue pit. This pit, which will be located between the Commons building and the outdoor tennis courts, will be for the use of all students. A procedure for scheduling its use has not yet been established.

The pit is being designed and built by students. Funding for the pit is being provided by the Illinois section of the ASCE and a private alumni donor. When completed, the grill and charcoal grate will be removable to prevent theft or vandalism.

Dr. Carlton Ho, the faculty advisor for ASCE, said that he wished to express thanks to students of the Architecture Department who designed the pit, the Department of Electrical Engineering, and the Office of Physical Resources, and the Illinois Masonic Institute. Construction began on October 4th and the dedication ceremony is scheduled to be held on November 14th.

Appointment of new police chief

The monthly meeting which deals with campus safety was held this past Wednesday. Capt. Gordon Wallace, the new police chief, was introduced. He had assumed his post on October 6th. The attendance was even larger than normal, which can be attributed to the fact that more concerned IJT members wished to express their views about security issues around campus. People attending felt the police officers should give attention to such areas as resident housing and fraternity lots. Both of these areas have been troublesome for IJT members.

Prof. Bush's discovery
by Julianne T. Cole

Kent awarded Joyce Grant

Illinois Institute of Technology has been awarded a $25,000 grant from the Joyce Foundation of Chicago. The grant will be used to support IJT students and projects in Environmental and Energy Law. This interdisciplinary program will be a partnership between the Chemistry and engineering science programs.

Dix new ASME Fellow

Rollin Dix, Ph.D., P.E., professor, associate dean for computing, Illinois Institute of Technology, Chicago, has been named a Fellow of the American Society of Mechanical Engineers (ASME).

The Fellow grade is conferred upon a member with at least 10 years of active engineering practice who has made significant contributions to the field.
So, you think you’re smart?

Last week’s puzzle:
C, G, Q are to F, V, R as T, X, H are to:
(a) V, L, G (b) B, F, Y (c) W, M, I (d) N, Z, D

The Answer: ** C **

Those who knew:
Phil Leear
Rajeev Trika
Diane Roach of Physical Resources
Umesh K. Jayaswal
Gary Lynch
Kevin Louie
Sean “Compiled With No Errors”

Once again, there is a huge space at the bottom of the page to be filled. Therefore, as promised, here are several personals from our readers. As mentioned before, if you wish your personal message to appear in this space, send it to: Henk Primov, Tech News, 5th floor Main Building. Please have it in by the Thursday noon preceding the Monday of publication. They will not be edited except to clean up the language. If we get enough, we may eventually start a separate personals column.

Craig, How long are you going to wimp out? The King
May an enormous entomopha encamp in your entrails.

(Here’s a long one) Something ought to be done about the load on the three VAX’s. It makes no sense putting all classes that used to use Groucho on Chico and Harpo. Now, getting on either of the 760’s is a matter of luck, especially when programs are due. Putting CS490 on the same computer as CS200 and CS331 is extremely stupid, especially when the computer won’t even stay up. The computer that can handle the most is now used for the least load. So tell me, does this make sense? I would like someone from ACC to respond to this, as I am also curious about why this was done. –H.P.

School sucks.

Phil, Serge called again. He is real anxious to get together with you again. He also mentioned the want you have is rather painful, and would rather switch sides next time.

Some people should not be allowed to drive a wheelchair.

Thunk!

This week’s puzzle:
Supply the missing number in the following sequence: 10, 11, 12, 13, 14, 15, 16, 17, 20, 22, 24, 31, 100, ???, 10000, 111111111111111111

Answer:

Name:

Solve this puzzle by Thursday, November 6 at 12:00 and you too can see your name in print. Please do not turn in an answer over the phone, as it is almost guaranteed to get lost. The poor soul who did so for the last puzzle had his message erased by one of the few mindless incompetents who passed through our doors last week, and therefore did not get his name printed here. If this puzzle appears to be too hard, there will be a clue in next week’s issue. Good luck.

Saving babies is our goal!

Woodsy Owl says Injuries Hurt!

Give a hoot. Don't pollute.

Forest Service, U.S.D.A.

- A Henk Primov Production
Phone A Friend

ATS will be having a pre-sale for Connections, the IIT student directory from October 27th to November 14th in the HUB. Come early as sales tend to sell out during the times listed below.

Monday, October 27: 12:00-1:00 p.m. in the Hermann Hall lobby.
Tuesday, October 28: 12:00-1:00 p.m. in the Hermann Hall lobby.
Wednesday, October 29: 12:00-1:00 p.m. in the Hermann Hall lobby.
Thursday, October 30: 12:00-1:00 p.m. in the Hermann Hall lobby.
Friday, October 31: 12:00-1:00 p.m. in the Hermann Hall lobby.

Minority Resumes

The deadline for resumes to be submitted to the National Society of Black Engineers Resume Booklet is Friday, October 31, 1986. Don't get left out! Turn in those $5 and have them delivered to the office in the basement of the Commons Building. We can't help you unless you help yourself.

HEY!!!

Remember..."announcements" for events that will charge admission, be sure to include the exchange of money ( /^[A-Za-z0-9]+@[A-Za-z0-9.-]+$/ ) etc. We consider advertisements billed as such from now on; this is our announcement policy.

Also...the deadline for articles and announcements is 5:00 PM on Thursday, October 31. Monday publications contrary to the statement on our door (but just like it says in the staff box...doesn't anyone read that?)

This issue is submitted on reasonably priced paper—that is, 8 1/2 x 11", or at least half that of (interoffice memo size) for those of you who think 3" x 5" is "reasonable." If you don't comply, there's a very good chance that your article will be "lost." Besides, our typists can only read words on the above mentioned size paper...and WRITE IT LEGIBLY IN ENGLISH...I.e., sentences, with nouns and verbs, not proper punctuation and correct spelling.

Yes, this is partial repeat from last week, but some people seem to have missed it then; we're not kidding. And, by the way, Hermann Hall has two "r's" in it. So there!

Air Announcements

Do you have an announcement? Send a copy to WOU and we’ll put it on the air, free! The announcement cannot be more than 15 seconds or it will be considered advertisement. The WOU office is located in Main Building on the 9th floor across from Tech News.

PfHiggs

Hey PfHiggs, Newton and new PfHiggs! Phi Eta Sigma, the fresmenmenorum society, will hold its next meeting Tuesday, October 28, from 1:00 to 2:00 p.m. in the Trustees Dining Room in the HUB basement. Hopefully keys and certificates will be in so they can be handed out. Also, we will be holding the election of officers and discuss future plans.

See you there and congratulations to the members (PfHiggles?)

Interviews

Sign-ups for the week of October 27-31 begin at 3:45 p.m. in Farr Hall, Room 311, as follows:

Early Registration

Advance Registration for all full-time undergraduates and graduate students will be held from Nov. 13-16. Registration packets may be picked up in the Office of Student Records and Registration (106 Old Main) according to the following schedule: A valid I.D. is required.

Wednesday, November 12, 9:00 a.m. - 4:30 p.m.
Thursday, November 13, 9:00 a.m. - 4:30 p.m.
Unclaimed packets will be mailed on November 13 at 3:00 p.m.
Advance Registration for all part-time students will be held from November 17-December 12. All part-time packets will be mailed.

Hard Motions

The Physics Dept. colorounique, "Classical Motion of Strings with Rigidity," given by Cosmas Zachos of Argonne National Laboratory, on Wednesday, October 28, 1986 will be in 217 Sth at 4 p.m.

IIT Ski Club

What happened to the IIT Ski Club? If you're interested we're going to Steamboat Colorado for the week of Dec. 11-17. Contact Chris Fry at 225-3650. If you have any questions please contact Sanjay Vyas, Tutoring Committee Chair at x3808.

Announcements

Color Seminar

The Society of Women Engineers will be sponsoring a Color Analysis Seminar with Kathy Adams from Color Signatures. It will be held on Wednesday, October 28 from 12:00-1:00 p.m. in the Alumni Room in Hermann Hall.空间的结束将会是色系分析服务的结束，所有兴趣者请注意。Schedule survey

This survey will be used to see if there is adequate support for a new shuttle bus service. If you are a rider of the shuttle bus please complete the survey (with your signature) and return it to the Tech News office by 1:00 PM Friday of this week.

E.P.A.W.

Happy Birthday Ed Powell!! The fun is just beginning. Hope you enjoy Ed Powers Awareness Week.

AIChE speaker

The IIT student chapter of the American Institute of Chemical Engineers will be hosting a presentation from Amoco Corporation on October 28. The presentation will take place from 12:00 noon to 1:00 pm in Pershing Auditorium. All students are welcome to attend.

Magic!!

Union Board's Focus On The Arts is sponsoring the wonderful talents of Bob Garner (Magician). He will be displaying his talents on our campus not once but twice! Come catch his act Wednesday, October 28 in the HUB cafeteria 12:00-1:00 pm and in the Residence Hall cafeteria 5:00-6:00 p.m. Come Feel The Force!!

Schedule survey

This survey will be used to see if there is adequate support for a new shuttle bus service. If you are a rider of the shuttle bus please complete the survey (with your signature) and return it to the Tech News office by 1:00 PM Friday of this week.

Op5!

In last week's Technology News article on the Time magazine we found that applications were available in the dean's office. The article should have read that the applications are available in the Dean of Student Life office, located in the northeast corner of the HUB, ext. 3080. They may also be obtained by calling 1-840-523-8548.

NSBE thanks

The National Society of Black Engineers would like to say THANK YOU!!! to the following members for giving so much of their time to the Region IV Conference: The CPC, P.R. Dawson, Robert Smith, John German, Gorreta Mosby, Kimberly Jamerson, Charles Newman, Gordon Terhune, Marva Boyd, Kevin Smith Arbor, Rengger Inn, Robin Wimberly, Alisa Dixon, Dierdra Bell, Zanette Sander.

Tutoring

The tutoring committee of ATS offers tutoring services to local 7th and 8th Grade I.I. High School students. The committee invites all J.I. students to join the committee as tutors. There are no requirements and tutoring times will be arranged to fit the tutor's schedules. The experience will be rewarding for you and very beneficial for the younger students. For further information please contact Sanjay Vyas, Tutoring Committee Chair at x3808.
The sponsors of Tech Expo
by Barry A. Schott

Another Tech Expo has come and gone. Tech Expo, that semi-annual gathering of companies to interview prospective graduates, has become the bane of the computer science and engineering students. This year, the event was held on the same day as the National College Night, and the students were more than a little bit upset. The event was held on the same day as the National College Night, and the students were more than a little bit upset.

The sponsors of Tech Expo

Sponsors of Tech Expo, S.T.A.N., U.C.B.S., and N.S.B.E. work together closely and effectively on Tech Expo as well as many other functions. The biggest reason they can work together is because they are all part of a common community. The community is defined by the student's major and the goals of the sponsoring company. The goal of S.T.A.N. is to increase the number of minority professors, while the goal of U.C.B.S. is to increase the number of minority professors. N.S.B.E. focuses on minority students.

S.T.A.N. is the chief sponsor of Tech Expo for the last few years, and one of the largest job fairs in the nation. They do this by inviting many other events in the planning stages that will benefit their members. Though their programs may be many, S.T.A.N.'s biggest event is their active participation in Tech Expo, which encourages academic excellence, personal growth, and professional development. S.T.A.N. has no Bench players, so everyone is a part of the team.

The National Society of Black Engineers theme is different from S.T.A.N.'s in that it concentrates more toward the development of necessary college survival skills for engineering and technical students. According to Nancee Gilbert, vice president of N.S.B.E., "The goal of the organization is to provide cultural and social enrichment for the minority students on campus and in the community." The U.C.B.S. traditional events are ice cream socials, pizza parties, and other events specifically for the minority students on campus to become more familiar with each other. The U.C.B.S. and S.T.A.N. programs are held at the university of students at the university of Illinois in Charleston Over the past several years, there has been a notable increase in the number of minority students on campus, and the university of Illinois has been successful in retaining and successfully graduating its minority students.

The University of Illinois is a force to be reckoned with, and its active participation in Tech Expo is an important aspect of its mission. The University of Illinois is a force to be reckoned with, and its active participation in Tech Expo is an important aspect of its mission.

Extemporaneous talk

S.A. N.D. A. (C.P.S.) -- it was unusual to come across a young Patty Randolph, jogging, stacking-fooled, in the ladies' room on campus. As a student, Randolph jogged to give her brain an oxygen boost for the day. She is also a development psychology major for San Diego State University, she says, accounting for two of her major study and test-taking tips. She says:

- "Studying is a kind of hoop-jumping event. Randolph says, "There are certain skills that you need to get your test, and some way to put you a few grades points higher."
- "You can make the difference between a 'B-plus' or an 'A' or a 'C-plus' or a 'B', she adds. Citing her own experience, Randolph says that the brain stimulated during a chapter exam is as important as keeping the rest of your body relaxed, she advises. Randolph recommends drinking fruit juice during an exam to maintain the brain's glucose levels.

When you receive the exam paper, she suggests putting it away, giving your brain a few minutes to rest and clear your mind.

"Take a deep breath and really concentrate on how much you know and don't worry about what you don't know. Randolph says.

ATS searches for V.P.

ATS, the student government hold its weekly meeting last Tuesday, Cathy Paul assumed the duties of Student President. It was announced that Connections, the IT student directory, will be on sale starting Monday, October 27. The booklet will be available Monday, Tuesday, and Wednesday from 12 to 1 in the HUB and Commons, and on Thursday and Friday from 12 to 1 in the HUB and Commons. Prices are $10 each.

Now that Cathy Paul has assumed the role as president of ATS, the position of V.P. is open to any student of the ATS. Also, a vacancy in the Assistant Treasurer's position has manifested. If a student is interested in representing himself in ATS, he should contact any member of the ATS Executive staff at 567-6879. The next meeting will determine the election date.

Objections to the new bus schedule were voiced by concerned students. Complaints that the bus schedule didn't allow enough time to catch the downtown trains, were raised. Complaints should be expressed to ATS Security Director Richard Pfitzner at x3038.

The next ATS meeting will take place on November 4th at 1 p.m. in the HUB.

November 27, 1986

Study Marathon every week. The Study Marathon is held every Wednesday evening from 6 p.m. to midnight in Herman Hall. The Study Marathon acts as an incentive for students to study more, even if they would rather be doing something else.

The third organization, the University of Illinois Black Students, has a different goal from the previous two groups. Danny Washington, the president of U.C.B.S., reports that its goal is to provide cultural and social enrichment for the minority students on campus. The U.C.B.S. traditional events are ice cream socials, pizza parties, and other events specifically for the minority students on campus to become more familiar with each other. The U.C.B.S. and S.T.A.N. programs are held at the university of students at the university of Illinois in Charleston Over the past several years, there has been a notable increase in the number of minority students on campus, and the university of Illinois has been successful in retaining and successfully graduating its minority students.
Another View: Brazilian Jokes
by Raul Nobre Martins, Jr.

"The difficulties we do immediately. The impossibilities take a little longer."

American military joke. Every country has a variety of national jokes, but each country tends to have a different collection of them. For one thing, people in different countries have different ways of seeing things and looking at themselves. This is shown whenever one listens to comments from different nationalities.

Americans, for example, see themselves from a very positive and favorable perspective. The two lines quoted above state this very clearly. I have been told that these two lines—perhaps in a somewhat different shape—are actually used as a motto by the military department. On the other hand, Americans make jokes from a much less favorable perspective about Italians, Germans, Mexicans and many other nationalities in Brazil. I also have heard many jokes. One thing to do on Friday evenings, after work and before going home, is to sit at sidewalk tables of outdoor cafés, drink beer and tell jokes. Some can tell over ten jokes at a single try.

The amazing thing about many of these jokes is that although they have been made up by Americans, they are very critical of the Brazilians themselves. Compared to American jokes on Americanism, which are in the complete opposite side.

A few well-known examples:

Joke 1:

There is a great deal of natural resources. Being half of all South America, Brazil is bigger than the contiguous United States. Among other gifts of nature, Brazil has the biggest tropical forest, the power and the largest area of land in the world. Together with these positive factors, we do not have earthquakes, volcanoes, tornadoes or any of the bigger natural disasters.

No part of the creation of the Universe.
God and his entourage of wisemen are distributing natural resources for the different countries. He goes around giving some percentage of a particular mineral to one country, but He does not give that same country the next resource. He distributes it. He has been doing this for quite some time and the wisemen have pretty much grasped the line of thought — the equilibrating equation that inspired God's moves. Finally God starts on Brazil.

In Brazil God places the Earth's biggest river, lots of gold, silver and iron, precious stones, beautiful beaches, nice weather.

When God is close to finishing this job, the wisemen comment. God, we think you are not being fair. You have had a well balanced distribution so far, but you are not putting too much weight in this country. You will not reach a just result. God replied. Off course it will be fair. Just wait to see what kind of people I am going to put there.

Joke 2:

Rio de Janeiro, the former capital of Brazil (1785-1960), this town to be a city of more than five million people and has many people associated with a city of this size. Same is true about Sao Paulo (pop. over 8 million) and several other large cities in Brazil.

One of these problems is security. People cannot walk as freely as they used to. Cars get stolen and people get robbed.

"President Reegan (US), President Mitterand (France), and President Jose Sarney (Brazil) were together in a good-will plane trip around the world. Each one of them was very proud of their knowledge of world geography and how much they knew about their own country.

They were talking about world affairs when President Sarney started to say: 'Gentlemen, I put my head

The College credit by tests

NEW YORK, NY (AP) — A record number of high school students took college advanced placement tests and college credit this year, the College Board reports.

Students who pass the test earn college credits while still in high school, getting a head start on their general college requirements and saving tuition money.

The 1986 four-year college major at Southern Cal, for example, recently passed five of her courses, saving about $8,000 in tuition and about a year of degree work, notes Janie Gams, coordinator of the College Board's Advanced Placement (AP) Program.

More than 205,000 students took advanced placement tests last year. Forty-two of them were tested in nine different subjects, eight tests in ten subjects, while six took a record 11 advanced placement tests each. Gams says,

They're limited only by their knowledge and their motivation,” Gams says. Though some students choose to "zoom through high school or go to college and earn their college years," she adds. "They can take that extra time and take the courses, participate in extracurricular activities or run the student government and spend through higher education by advanced placement.

Nearly 2,000 colleges now participate in the College Board's program, and many believe, helps prepare students for college and for future employment opportunities in their field.

"Our high school's graduation requirements are now near what's needed to be successful in college," says then-Room, USAP American history professor at West High in Denver.

In such cases, the tests help good students to learn how to challenge and discipline themselves earlier in life, she says.

"I think a kid who's going to go to college should start exploring what it's like in college," she says. "I think these students don't have it easy, but their test-taking experience isn't hard," Gams says. "They've learnt how to cope."

Advanced placement provide recent gain in the math and sciences in particular, and in which U.S.
Clue

The Parker Brothers board game is entering the third dimension. All your favorite suspects will be there, Miss Scarlet, the Butler, and my favorite professor C. S. Green. And now for you skeptics, yes, we are having all three endings. UB is a top rate organization - nothing but the best for our students. See the person at the door for info.

A different ending for each show, for a low price you can see all the endings.

Dave Hathway says, “My dad is a cop and he even liked the movie.

BOB GARNER
Students are concerned and involved

"preoccupation" with career and material goals. This is a result of other studies, most recently from Mount Hood College in Oregon, which documents that student attitudes generally change and become less ego-centric during the course of their college years.

And many of the other impressions of students as overly materialistic are derived from studies done at "private elite schools in the East," Notube, he notes.

McClure's study, done at a midwestern state school, may be better able to describe what students' attitudes are nationwide, he says.

"Students' career aspirations, moreover, have more to do with "trying to make a living in a chaotic world," McClure concludes. He believes that there is a way of exercising control over oneself in a world frequently perceived as out of control.

"Some say it's greedy, while others say it's uncertainty over making career and student career aspirations.

"When I have asked a college audience about how many of you have already lost their job? I see a sea of hands," Green adds.

For a lot of portfolio-building behavior among college students, McClure notes, it's also enhanced, but that the campus police staff has lost two officers. A search is on to find their killer. The police are concerned that I.T. officers must keep an eye out for any suspicious activity. A bulletin has been posted including a brief explanation as to why all the parking gates are broken. The gates feed off the E-tracks for power and during one of the thunderstorms, lightning struck one of the towers, causing a power surge throughout the gate controls. The circuitry was badly damaged and parts have to be ordered.

Finally, the campus police unit has undergone a new simplified Operation Identification. It is a property identification and return system that police in the area have been trying to help project you and your property. Students can contact the Campus Police, x3334 and report one of their items. By marking valuables with your driver's license number, you create a way to identify the item, and if it is stolen, the T.D. provides a way for the police to contact you when the property is found. In the event that a student has to leave part in this program, go to room 100, Mearns Hall, present a copy of your license, and a police officer will even put a little in the engraving tool.

Resumes

NEED A RESUME? TYPESET? TECHNOLOGY NEWS IS AVAILABLE TO PROFESSIONALLY TYPESET YOUR RESUME. OUR PRICES ARE REASONABLE AND OUR TURNAROUND TIME IS SHORT. IF YOU PLEASED SEE US AT THE DRISIT Providers. We have a professional resume builder and may be able to type set your resume. The feature is available at a number of locations.

For more information call 312-424-3500 in Chicago or 312-645-0867 in New York.

WOO meeting

The next WOO meeting will be held on Tuesday, Nov. 6th at 12:30 p.m. in the WOO office, located on the 5th floor of Main Building. Anyone interested in joining the WOO staff should attend this meeting. All current members are required to attend or notify Kevin or Ed in advance, with a damn good reason why they can't be there.

CS Prof on WGN

Dr. Peter Greeno, associate professor of Computer Science, will be a guest on Mont Rosentstein's "Extension 700" on Monday, October 27. The program is broadcast on WGN Radio, 720 am, from 8-11 p.m.

Dr. Greeno will be discussing a recent book publication on artificial intelligence.

"The industrial and educational organization with 115,000 members, including 24,000 students, is the world's largest technical publishing organization, holds major technical conferences each year, and sets many industrial and professional standards."
Messler wins Pineapple

For the third straight year, IIT's ice backstroke and two-mile swimmer, American record-holder, 1000 yard freestyle racer and who could be IIT's best swimmer ever in the coming season.

Other firsts in the meet were IIT's oce diver and two-time All-American Doug Lovato, who won both 1 and 3 meter diving events, and IIT's Mark Taylor and Matti Kulish were victorious in the 100 yard breaststroke.

JIMMIE HAWKINS

Going into the last event, Mike was in second place by one point behind senior team captain Chuck Fee, but Mike won the 200 yard backstroke by 12 seconds to his nearest competitor.

In second place was Chuck Fee, who won three firsts and two seconds, followed by sophomore Paul Goss, who posted wins in the 400 and 1,600.

Masonic Football and Soccer Update

All of the football games are now completed. Triangle defeated Tau Epilson Phi 28-0. The Alpha Sigmas defeated the Phi Kappas 24-22 in the first annual "Bowl For". With the loss, the Alpha Sigmas assured themselves of third place in the conference. The Tau Eps secured last place with their loss to Triangle. Final football standings are: Delta Tau Delta 1-0, 1-0; Alpha Phi Omega 0-0; Sigma Phi 0-0; Phi Kappa Pi 1-0; Sigma Phi 0-0; Delta Tau Delta 1-0.

On the football gridiron, the Sig Eps and Delta Eps will meet this afternoon for the championship. In the first round games, the Phi Kappas made an early exit with a 26-23 loss to the Tau Eps. The Tau Eps scored on a long pass, an option play, and a punt return. The Sig Eps and Delta Eps will meet this afternoon for the championship.

IIT bowlers 2nd in CIBC

For the second straight year, the men's bowling team defeated the University of Illinois 235 to 230. The team's final score was 62-18. The 490 total team series was the highest in the Central Illinois Bowling Association (CIBC). The 62 points accumulated by the Hawks also surpassed the previous point record against any CIBC member.

IIT is now in 2nd place in the CIBC with a point record of 2918. Illinois won over University of Illinois-Chicago and is just ahead of U of I-Champaign and Northern Illinois University. With an effort and a little luck, a conference championship and an automatic bid to the NCAA will be within the Hawks' grasp.

A total of thirteen '200' games were rolled on Sunday. Brad Novak led the team with a conference high of 651. He was followed by all of his matches. Brad had a low game of 203 and a 225 score in the first game of the day.

Andy Labus has left for this week's final match. The IIT team has been working early this year, and his hard work is starting to pay off.

Basketball player preview

George Mari, 6'7" center, a graduate of East Leyden High School, will be forward player. Student from Michigan Tech University and a graduate of St. Laurence High School are the two remaining reinforcements on the IIT basketball team. Mari, a member in the College Department, started 1 games last season. In the last game, he led the team with 14 points. "George is from a fine high school team and was cosmopolitan," said Goodwin. One of the high school coaches around, to be very honest, I am not sure what Bake did all summer. We are still in the building up stage of his senior year. We are still in the building up stage of this year. We have added four new players this year, and the team will be a much better team this year.

IIT Players of the Week

Men's Bowling

By winning all 5 matches and averaging 218 for the victory over Illinois, Brad Novak is the Bowler of the Week at IIT. The Sophomore Architecture major only missed 2 splits conversion in 5 games while throwing 31 strikes, his opponent averaged 198, but lost every match.

Women's Bowling

By winning all 5 matches and averaging 218 for the victory over Illinois, Brad Novak is the Bowler of the Week at IIT. The Sophomore Architecture major only missed 2 splits conversion in 5 games while throwing 31 strikes, his opponent averaged 198, but lost every match.
