MACOMA, IL — Finding the typical college town is the challenge a Western Illinois University professor has set for himself.

John V. Bergen, professor of geography and map librarian at WIU, has been studying data gathered from towns that have institutions of higher learning, and through questionnaires, soliciting opinions from professionals about the concepts of a college town. Bergen is attempting to find common patterns in towns with colleges and universities and use them to describe the "typical" college town in the Midwest.

At this early stage in his research, Bergen believes that a typical college town is one where the college's proximity plays a major role in the town. For example, Macomb can fall in this category because the lifeblood of the town is WIU.

"Many towns have institutions of higher learning that are the major players," said Bergen."If a town's economic growth and population is contingent on a college or university, then it meets one of the major criteria of a typical college town."

In addition, the physical location of the college or university in the town is an important variable. Bergen believes that most colleges that began in small towns prior to 1950 were built away from the center of town and in an elevated area.

The criteria as "college on a hill." Bergen believes the physical location of a college as well as streets named "College" or "University" lend evidence to the importance of the institution of higher learning to the social and economic aspects of the town.

Bergen mentioned some specific examples within 70 miles of WIU: Carthage, Monmouth, and Canton, MO fulfill the criteria he's proposed.

Bergen became interested in this pattern while working on a historical atlas of a county in Indiana. He observed the changes the county seal had encountered. This town had a college that was built away from the center of town on elevated ground. The town grew with the college in both population and size. This case study fostered Bergen's belief that the same pattern could be found in the Midwest.

Bergen is familiar with this type of town because of his dissertation research. He presented a pattern of typical market towns. Urbanization and population census to classify towns, he discovered that many small urban centers are less economically viable.

Towns with residential colleges showed up as one of the most distinct of the specialized types. "I grew up in a college town and have lived in them all my life," he said. "I think this as well as my interest in area planning and architecture have contributed to my desire to do this study."

Bergen has received completed questionnaires from more than 200 participating towns. Continued on page 15.

CHICAGO — February 16, 1987 — Nathaniel Thomas has been appointed assistant VP of External Affairs at Illinois Institute of Technology. He will be responsible for managing the university's governmental relations program, maintaining relationships with key city, state, and federal legislators, and monitoring public policy issues which affect the university.

"Government is the invisible partner of every institution," said Thomas. The influence of government on educational issues makes it vital for us to secure support for our position."

Thomas said he will spend some time at first defining the level and extent of current contact the university has with government officials.

"Nate Thomas' numerous contacts in the city and state, his proven administrative abilities, and his commitment to excellence makes him the ideal choice to head our governmental affairs efforts," said Clyde Watkins, vice president of external affairs.

Before being named assistant VP, Thomas, at IIT since 1985, had been executive director of pre-university and minority programs. Continued on page 15.

Campus Security discussed

The monthly Campus Security Meeting took place last Wednesday the 18th. The crime reports for January were released and discussed during the meeting, since school did not formally begin until the 20th of January.

The report showed that no assaults took place during the month. One burglary, of a type never seen before New Year's Eve. The suspect was apprehended, thus becoming a suspect no more. Two robberies occurred during the month. One on the E1 platform and the other near the Life Sciences Building.

With a great deal of activity occurring near or on the E1 platform, Capt. Wallace announced that while combined efforts of the IIT campus security and the Chicago Police force, criminal activity around the El has lessened. "Since they (the Chicago Police Dept.) have made arrests, it has been very quiet in and around that area," stated Capt. Wallace.

It was brought up that some neighborhood youths are using IIT student ID cards with false pictures. The El police allow the holder to go where no trespasser has gone before. It is suggested to report all lost ID cards to the campus police. Since a couple of trespassers have been detained by the campus police, it is urged to watch out for any unusual persons in and around the campus.

HKN hosts Con Ed engineer

The members and guests ofEta Kappa Nu, the electrical engineering honor society, were once again treated to an outstanding presentation by an engineer from local industry. On Tuesday February 17, 1987, recent IIT graduate Carl Sheutz talked to the attentive group about his experiences with Commonwealth Edison.

Carl discussed with the audience advanced degrees, salary, and work responsibilities for a new engineer. Those in attendance agreed that his presentation helped to see what a young engineer at Commonwealth Edison would be asked to do.

NROTC unit changes command

by Robert Houston

Last Thursday afternoon a change of command ceremony was held. The Naval Reserve Officer Training Corps. A new commanding officer, Capt. Lorin W. Brown replaces Capt. Jerome L. Martin at the termination of his three year tour of duty.

Capt. Martin started his three year tour of duty at IIT in December of 1983. As commanding officer Capt. Martin has greatly increased the recruiting of midshipmen. He also started activities such as morning and evening colors every Thursday, and active participation in IIT's NROTC unit in America's Marathon. Captain Martin's next tour of duty will be in the Persian Gulf.

DO YOU WANT SOME MONEY?

Yeah, I'll just bet you do. Well, if you think we owe you some, come and get it. That's right, come and get it. We (Technology News) are preparing the writers and photographers payroll for Volume 122, issues 1 thru 5. If you have written or photographed anything that appeared in those issues only and you want to get paid for it, you must submit a completed payroll form for each article/photograph to the National Business Manager on or before February 26, 1987. If you are not a staff member, don't bother. Even if you are a staff member, we will not come and ask you to fill out the forms on a personal basis since we feel that if we owe you money, you should come to us to get it. We also feel that if you work for the paper you should at least read it. Therefore, if you are reading this notice, consider yourself informed. If you're thinking that no one is ever in the office when you feel like stopping by to pick up the form, try showing up for a staff meeting for a change. In case you can't remember, we are located on the fifth floor of Main Building and the meetings are held every Thursday at 12:00 noon.

Sincerely, your Editor
Binding Molecules
The Chemistry Department's colloquium, "Designing Catalysts based On Reversible Cyclodaddition" will be given by Dr. A. W. Gannick of the Ohio State University. It will be at 4:00 p.m., Wednesday, February 25 in 11SW.

King Celebration
There will be a Martin Luther King Celebration held Friday, February 27 from 6:30 pm to 8:30 pm in Herrman Hall Auditorium. Activities will include origami folding, dancing, skits, guest speakers and a partial re-reading of Dr. King's famous speech. Admission is free so COME LIVE THE DREAM!

Chapel Eucharist
The Celebration of Holy Eucharist and Communion is available Sunday, March 1st at 4:30 p.m. in the IIT Chapel, located directly north of the Residence Halls. The IIT Community is welcome.

Video Presentations
Students interested in participating should join the following presentations and activities.
Feb. 26, 1987: Northrop Corporation. The Northrop video tape will be shown at 3:00 pm, Farr Hall, in the Placement Library. It is at 6:00 pm, the Placement Library on Wednesday.
March 2, 1987: New York Power Authority. The New York Power Authority video tape will be shown at 3:00 pm, Farr Hall in the Placement Library on Sunday, Feb. 27.
March 3, 1987: HoneyWell. The HoneyWell video tape will be shown at 3:00 pm, Farr Hall in the Placement Library on Monday, March 2.

PHIGGS
On Feb. 24, Phi Eta Sigma will meet at 7:00 pm in the Trustee's Dining Room. On the agenda is to welcome new members and planning initiation. Please make plans to be in attendance.

ASME is also now taking orders for ASME logo clothing. Sign up for your items and show IIT spirit. All ordered items must be paid for before or at the next general meeting on Thursday, Feb. 26 at noon in room 241 E1. Sign for prices. An order form for the available items, including the ASME office, will be on the floor of the ASME office.

Foreign Taxes
Foreign students: questions about filing your 1986 tax returns? Have no fear, the IRS will be here. The IRS office will be open from March 13 to 1987 from 1:30 to 2:30 PM in the Herrman Hall mezzanine, room 302. Space is limited so call for reservations now! Call the International Office at x3031.

Summer Jobs
Students interested in summer employment with the following companies (interview date—company name—comments) should register with the Placement Office and sign up for interviews:
2/28/87—Amoco Oil (Winkley) is a summer schedule, EE, CE, ME.
3/2/87—Micro Switch Info. Micro Switch, a division of HoneyWell, is looking for a leader in the design and manufacture of electro-mechanical & electrical switching and sensing devices. Micro Switch has a long history of providing summer interns with meaningful and challenging assignments in a state of the art technology. This summer, students will tackle projects in design, manufacturing, quality and marketing. Approximately 30 Summer Engineering Internship openings are available to those interested in participating. (EE, ME, CE, CS. Materials Engineering Plastics and composites). First, freshen through post-graduate level should report to the placement library, room 408 in Herrman Hall to obtain an application. Micro Switch will be coming to IIT to recruit, therefore, it is up to those students interested to obtain and complete an application by May 31. The candidate Review/Interview will be in March and the final selection will be in April.
3/11/87—Financial Services CS only. Will interview seniors who will be starting the fall semester.

Book Sale
Attention Charlotte Brown, Aric Aberson, Moyn Leung, Jeff Cade, and Mike Schmidt. We at Phi Eta Sigma still have your books from our book sale. Please pick them up. We will be having a meeting Tuesday, Feb. 24 at 1:00 PM in the Trustee Dining Room in the basement of the Hub. If you can't make it, call David Lu at 3206-9830 or x3289.

NCA Review
Over the period of March 5-6, the Commission on Higher Education of the North Central Association (NCA) will conduct an accreditation review of IIT. This is a process that occurs on a ten-year cycle in the life of a university. The visiting team will meet with representatives of NCA officials, representatives from the department of education of the state in which the university is located, etc. The university will be advantages of this opportunity to provide our visitors with a perspective of IIT. An Institutional Self-Study has been prepared for the NCA visit and is available in the office of the Vice President.

Addition information is available from Dr. Geoffrey T. Higgins.
103 Main Building, x3025.

Wild Blue
Mac Users
The "Macintosh Club" has now been formed at IIT. Exchange ideas and ask questions with fellow Apple Macintosh users. Watch for more information. Our first meeting is Thursday, Feb. 24 in the HUB. For more information, contact Dan Mcleod or Banyh at x3954.

DPMA Meeting
An orientation meeting for the Student Data Processing Management Association chapter will be held Thursday, February 28th, 7:00 pm. If you are interested in membership, but unable to attend, please sign the list posted at 206BB.

ASME Meeting
The next ASME meeting is Thursday, Feb. 26th at 12:00 noon in room 241E1. Top Gun Rules and procedures will be discussed and ASME logo clothing orders and money will be collected. All orders must be paid for by Friday, Feb. 27th. If you plan on attending the Spring National Design Show, you are in charge of the tickets and trip organization will be discussed. The meeting is open to all students and faculty.

ASME will have a SWEE meeting on Friday, Feb. 27, 1987, in room 1025. The guest speaker will be Mr. Jackie Abell from IIT. Refreshments will be served. All are welcome and please plan to attend.

SoftBall
There will be a softball meeting for women on Thursday, Feb. 26th, 7:30 pm in the Carnes Hall and playing come to Keating Hall or contact Sue Haley at x3336.

India Assoc.
A general body meeting will be held in room 301 of Herrman Hall on Feb 28th at 8:30 pm to make arrangements for the Hotel dinner. All volunteers are requested to attend.

Chess Tourney
The HUB Rec Center will hold a Chess Tournament on Tuesday, Feb. 24th at Noon. Sign-up now in the Rec Center. Next week's tournament will be backgammon.

Job Workshop
Students registered to attend the Illinois College Job Fair on March 13, 1987, at the College of DuPage PE and Community Recreation Building. Only registered members of the NSBE Regional Conference who will be held from Feb. 24th to March 10, 1987 in Herrman Hall, Mezzanine Level, at 3:00 pm.

Attention
NSBE will be having a general meeting on Thursday, Feb. 26th at 1:00 PM. All students are encouraged to attend the Job Fair Workshop. It will be held on the campus, March 10, 1987 in Herrman Hall, Mezzanine Level, at 3:00 pm.

Attention
If you wish to have announcements on the Campus Source message boards in the HUB, please email them to the HUB, huxcom@iit.edu. Personal information will be dropped off the message in the HUB Programming Office NO LATER THAN noon Monday. Messages submitted later than that may be held to the next week, if it is still valid.

Personal Source
Persons are back...keep it clean!

Assistant
Encounters
The student-faculty life reflects group, "The Bible and You Today," will continue its exchange over the New Testament's First Letter of Peter this Tuesday, Feb. 24 at 12:00 PM in the Federal Conference Room of the HUB (SW corner). These moderated sessions of shared concerns are open to the campus community.

CLIP BOARD ILLINOIS AR DETROIT ON LINE ON DELL Future for the Future... Future for the Future...
AIDS and Ads

by Ralph Nobre Jr.

Year's ago I once sat down to imagine an answer to the following question: What would someone from a completely different culture think if he happened upon the outer space if you wish—that they could come here to the U.S. and witness the evening of TV commercials? Or, speaking from a broader perspective, how much about a particular culture can one learn from its advertisements?

When I first thought about this, back in 1989, there were some interesting answers. Judging from commercials, the first assumption was that cats and dogs were some sort of sacred animals in America. Coming from a culture where a dog is just a dog I was amazed to see how many ads were dedicated to selling articles for pets, especially food. It was very strange to see pet children portrayed as annoying and noisy, and the pets and cats were always wonderful.

I was also impressed by the great number of commercials saying good things about the sponsor and the company's product. Nowadays, they also serve as a way of criticizing the competition.

There is also a bittersweet feeling when one realizes that the world has changed. Some of us have grown up with advertisements, and those who remember them can smile and recall the days when TV was the main source of information. Today, with the advent of the Internet, the world has become more interconnected, and advertisements are now seen on websites, social media, and mobile devices.

Preventing the spread of AIDS

This seems completely obvious, but it is important to remember that prevention is the key to controlling the disease. People need to be aware of the risks and take steps to protect themselves and others from the disease.

This is why it is important for people to be educated about the disease and the ways in which it can be transmitted. Education is the key to preventing the spread of AIDS, and this is something that all countries need to work on.

AIDS news

AIDS is a disease that affects people all over the world. It is caused by the human immunodeficiency virus (HIV), which attacks the immune system and makes it difficult for the body to fight off infections and diseases. The virus can be transmitted through sexual contact, sharing needles or other drug paraphernalia, and from mother to child during pregnancy, childbirth, or breastfeeding.

Treatment for AIDS is available, and it can help to manage the symptoms and slow the progress of the disease. Antiretroviral therapy (ART) is the most common form of treatment, and it helps to reduce the amount of HIV in the body.

Prevention is also important, and this includes things like using condoms during sexual activity, not sharing needles or other drug paraphernalia, and getting tested for HIV.

In the United States, the Centers for Disease Control and Prevention (CDC) recommends that everyone between the ages of 13 and 64 should be tested for HIV at least once in their lifetime.

It is important for people to be aware of the risks and to take steps to protect themselves and others from HIV. This includes things like getting tested, using condoms, and not sharing needles or other drug paraphernalia.

Conclusion

AIDS is a serious disease that affects people all over the world. It is caused by the human immunodeficiency virus (HIV), which attacks the immune system and makes it difficult for the body to fight off infections and diseases. Treatment is available, and prevention is also important. It is important for people to be aware of the risks and to take steps to protect themselves and others from HIV.

IIT students win fellowships

Three Illinois Institute of Technology students are among 16 winners of a nationwide competition as GEM Fellows for 1987.

The awards, announced on January 27, 1987, are offered annually by the NATIONAL CONSORTIUM FOR GRADUATE DEGREES FOR MINORITIES IN ENGINEERING, INC. and funded by 51 university and 50 industrial/governmental laboratories and foundations since 1976. GEM provides opportunities for minority students and faculty to participate in extra-curricular studies at the masters level in engineering through a program of paid summer internships and fellowships at a member university. To date, 450 minority students have received paid summer internships in engineering through the sponsorship of GEM.

Ethics center to train cabinet

CHICAGO — February 17, 1987 — The Institute of Technology of Illinois and the Ethics in the Professions (ISEP) conducted an ethics training session recently for the cabinet of the Illinois Governor, Harold Washington's cabinet.

ISEP Program Director, Dr. Ronald G. Cohn, Associate Professor and Research Associate, and Professor Tom Calero, from IIT's Stuart School of Business Administration, conducted the session with the assistance of Vivien Weil, Acting Director of ISEP. This form of ethics training is increasingly required of government officials around the country and is a new phenomenon in city government.

The four-hour program included presentations by Dr. Cohn focusing on the basic principles of the Code of Ethics and the creation of an ethics program. It also featured workshops in which participants, organized into "ethics boards," deliberated about ethical problems presented in case vignettes drawn from interviews by Davis and Calero with the department heads. The program concluded with an evaluation and solutions to the ethics problems proposed by each of the participants.

Dr. Davis and the Center for the Study of Ethics in the Professions was established in 1976 as one of the first in the country focusing on social and moral issues that arise within the professions. It is nationally recognized for innovative research and teaching on ethical issues in business, engineering, science and business.

IRHA convention coming up

by Domingo Delgado

RHA Secretary

"Let me get wild!" Peppino Le Grand

"We belong!" A.H.

Yes, indeed, we belong to the Illinois Residence Hall Association (IRHA). The purpose of IRHA is to integrate the ideals and exchange the ideas of its members, to provide programs of mutual benefit and through achievement act as the representative, academic, intellectual, cultural, and social understanding among the individual member schools, to stimulate interest and effort in campus and residence hall affairs, and to foster the development of leadership and maturity in self-government; to petition the General Assembly and universities, and within the states of Illinois may become a member of the association.

The Illinois Residence Hall Association will have its XVIIth annual convention in Normal, Illinois (IUI) from February 27th thru March 1st. In this convention the following universities will be participating: Blackburn, Bradley, DePaul, Eastern Illinois University, Elmhurst, Illinois State University, Millikin, Mundelein, NIU (host school), Northwestern University, University of Illinois-Chicago, University of Illinois-Urbana, Western Illinois University, and IIT. The convention will be composed by: RHA's President, Enrique Fabregas; RHA's Chief Planner, John Burmeister, Karin Stanfield; Katya Daniel (C.D.); Peter Falk; Bart Beals; Peter Oleson; Dawn Angell; Paul Baldwin; Laura Bellmecchi; and RHA's Secretary, Domingo Delgado. Bob Morgan will be our advisor and director (OCPIS). By the way, our delegation will be departing from IIT at 3:00 pm (hopefully).

This year IRHA's convention will be full of activities. On Friday night, after the opening session the delegates will have a friendly gathering to get acquainted. On the 28th after the traditional fun-ed sessions, workshops and panels a general assembly will be held. The check out will be held on March 1st.

I would like to mention that the actual IRHA president is our beloved comrad Sid Chadda-Underserved.

Lastly, I would like to encourage everyone of IIT's delegates to get physically and mentally prepared for the convention. I know that all of you are looking forward to it in the mean time, have fun and be careful.

Students sought for Pan Am Games

BLOOMINGTON, Ind. — Applications are still being accepted for the 1,500-member student volunteer security force being mobilized and trained by Indiana University's School of Public and Environmental Affairs for the Aug. 7-23 Pan Am Games in Indianapolis.

The initial search among college students in Indiana and neighboring Midwestern states produced some 1,300 applicants from 70 universities, reported SPEA Professor Michael T. Charles of the IU-Purdue at Fort Wayne campus.

Another 72 applicants are being sought in the Hoosier hilly areas for drop outs and to assure having the required number. A mailing this week extended the search to universities in states between Indiana and Florida on the south, Missouri and Nebraska on the west, and Pennsylvania in the east.

The non-paid student security assistants will be given roles in support of the regular security personnel. The students assist in crowd and traffic control, assisting dignitaries and providing token protection, by their presence, against thefts, vandalism, and other illegal acts.

The students will be furnished uniforms, and will be housed and fed on the University of Indianapolis campus.

In addition to opportunities for free admission to a number of the Pan Am events, the students may earn three hours of college credit through a special leadership course established by the IU School of Public and Environmental Affairs. Those taking the program for college credit will be required to pay IU registration fees.

The project is being conducted by SPEA under an agreement with the Pan American Organization.

Involved is a four-week commitment on the part of the students, from July 20 through Aug. 23, allowing for an intensive one-week training of all extracurricular activities by representatives of the FBI, U.S. Secret Service and other professional law enforcement agencies.

Applicants must be registered college students, be at least 18 years old, and have completed the summer, have a minimum grade-point average of 2.0 out of 4.0, be willing and able, and be recommended by a screening commission.

The Pan Am Games, one of the largest multi-sports events, are expected to attract some 6000 athletes from 31 countries.

A competition is held every four years, in the year preceding the Olympic Games.

Mr. Tapps performs in HUB

Mr. Tapps, the tap dancer who performed in the HUB this past Victoria's Day weekend, was not only an instant hit with the audience, but he was also a success. He danced for the pleasure of those relaxing for lunch and just passing by. Their response was a matter of fact he lost one of his taps while jokingly trying to get a receptionist a message from a passer-by. He didn't get it.

Mr. Tapps' use of music from the swing was king as well as the type of music was blended together in a splendid array of dancing. He danced to classics such as Goodman, Count Basie, as well as Tina Turner and Stevie Wonder.

Mr. Tapps says that while he admires and relishes the jazz age, for which tap dancing was known, he has a dream of one day creating a factory that will produce dancing shoes that can be used in full swing and much more.

Mr. Tapps' dancing and entertaining those watching the show, I personally enjoyed the greatest one I have ever seen, but I also missed him, a treat.

Next month: Bob Garner - Magician

Featuring IIT's own comedieni and Scott Cornell of Delta Tau Delta

Full show — March 5 in the HUB at 7:30 pm. Admission $1.00. HE REALLY WILL SEE SOMEONE IN HUB.

Volunteers sought for artificial blood test at Reese

NORTHERN, Illinois, February 4, 1987—Volunteers are being sought to participate in the coming research designed to develop, oxygen-carrying blood substitute.

Testing will be conducted by researchers at Michael Reese Hospital, according to the developer, Northfield Laborato-
ries, Inc. Northfield's solution, known as Oxykine, follows a 15-year research effort by some of the world's foremost blood experts to perfect the first safe, oxygen-carrying substitute for blood. The artificial blood substitute is designed to save blood supplies.

For clinical test purposes, only men between the ages of 18 and 32 will be eligible for selection. Those accepted will be volunteers.

The test will include transfusion of the volunteers' blood with Oxykine followed by close supervision and monitoring of an in-patient for eight hours after transfusion. The test will be required after the hospital stay.

The testing will begin after February 20.

Volunteers can obtain more information and an application by contacting Marcel Muriel Sutton, (312) 791-5553, between 9 a.m. - 5 p.m., Monday through Friday.
NEWS FLASH . . . . No more cartoons before movies. For this week we have **Mr. Bill** clips.

**Focus on the Arts**

Bob Garner (Magician) and Scott Conwell (Comedian)

Bob will be back for his encore performance here at IIT. This time he will be joined by an IIT student. For those who missed Bob Garner last time, he is a Comic-Magician. He will come right up to your table and demonstrate first hand.

**Thursday 3/5 at 7:00**

**Union Board Films**

**Back to School**

School is just what you make of it. **Rodney Dangerfield** gives us his impression of what school is like for him. He shows us how to get good grades and have fun at the same time.

**Spotlight on**

**Union Board Spoken Here**

As UBSH director you are responsible for all Union Board material that goes on this page. You are free to design it or lay it out the way you want. It gives you a chance to be creative as long as you put what needs to be in the page there. This position is open for next year, and is, as all UB positions, a one year position. Elections for next year's Board are coming soon so get your applications from the Student Organization Office.
This was Wild Blue. . . .

. . . . and Colourtone, too!
Who Cares??? by Joy C. Brumbaugh

Most of us, if asked if we are caring people, would answer, "Of course!" I believe that most middle-class college students try very hard to be truly caring, for others, at least. We have recently become interested in the phenomenon we call "the sixties." I was born in 1960, so I don't remember the sixties from experience, but my parents were young then, and so were many other people who have lived through the sixties. I have heard and read about the social and political climate of the sixties. What touches me most about the sixties is the spirit of young people who were our age then. Like us, they were bombardeled with rules from all directions, parents, schools, local and U.S. government, and authority in general. So some of the rules they are against are the rules which we live with now. Even more different, however, are the ways by which the rules are enforced. This is true for young people. Rules of the sixties did not just sit quietly and accidentally gain the word of authority.

As almost every generation does, we have new ideas about what is right and wrong, and what is good and bad. And we have a new freedom to follow our own thinking. Many, instead of protesting, rebelled against the system by dodging the draft. They did not see the war as a necessary and justified cause. We, the younger generation, try to live in a world in which we are our own masters, and not pawns in the system.

TUCSON, AZ (AP) - Trying to cope with budget woes, a number of colleges across the country are cutting back the hours during which their campus libraries are open, prompting some of the largest students protests of the year.

Last week, for example, 2000 students joined the University of Arizona Library in protest of the library's closing at midnight. It used to be open 24 hours a day.

Two weeks ago, 600 students sat in at the Perry-Casteneda Library at the University of Texas at Austin, and then held a candlelight study-night outside the building.

And, trying to defuse student threats to hold similar library sit-ins, University of Wisconsin officials appropriated money to extend library hours, which had been shortened as a belt-tightening measure this fall.

Tom Swan, head of the United States Student Association in Washington, D.C., predicts there'll be more such demonstration across the country as more colleges, copies of ways to spend money, cut back library hours.

"The issue is not so much the hours," says Michael Whalen, a senior at UT Austin who heads the student protest group. "The things inside have not been updated."

"It is more important in the long run that books are bound properly, periodicals are kept in order and preserved, and that we are able to order new books," he says.

"We don't want to be incomplete or second-rate," he says.

The energy industry slump has left the state about $3 billion in deficit, and it'll have to spend this year to force state officials to tell public colleges to cut their budgets.

UT's library was just one campus service to feel the pinch. "We've been in a hiring freeze since March," says library spokesman John Kupernat. "We have to cut over 400 journal subscriptions and are likely to cancel more, and we've reduced our book budget.

The university faces an 18-month funding shortfall of about $300 million, and the full-time equivalent of more than 1,000 faculty and staff jobs were lost.

Librarians David Laird, having worked for the library for 18 years, said the budget is reduced to a mere $1.75 a book and that he has to work 12-hour days to complete the budget cuts.

Other libraries have chosen not to cut back hours as a result of budgetary cutbacks.

"We have not cut back services hours, but we have cut services and the level of staffing here," says Barbara Kemp, a librarian for the Washington State University Library.

"The amount saved would be about the same as the year is cut back," she says. "But things are definitely realigned more slowly."
WOU!: alive and well at IIT

WOU!, along with Tech News is the mainstream of campus communication. It is also fun. To find out about us all you have to do is check out 88-FM on your nearest radio. We're probably there right now. WOU! broadcasts from Noon till Midnight, Monday through Saturday. The kind of music we play depends entirely on what you want to hear. We have progressive, classic and modern rock: dance, R & B, house, heavy, folk, punk, and new wave. Where else in Chicago could you get so many diverse types of music? NOWHERE! WOU! is owned by the school and run by the students for the students. If you like music, explore us and see what we have to offer you. But WOU! is more than melodies. We're your communication link with the IIT life. Yes, it has one! There's actually a lot going on out there, and we'll let you know what it is through our announcements of campus activities. If you want to find out if there's still a world outside of IIT, listen to the news at 2, 4, 6, 8, and 10 if you're interested in the music industry, listen to Rock Notes at 11:15, 7:45, and 10:15. We even throw in a public service announcement or two. We give our reviews to the B.O.G. concerts and movies and let you know who's partying and where. The only thing we can't do is sell you something.

--- On music ---

by Tini Riley

Rock on television has always been loaded with contradictions. News reports of the Parents Resource Music Committee's cut from rock albums last year, for example, were interrupted by ads featuring rock'n'roll soundtracks. The strength of the music still can be measured by its popularity as much as by its popularity with listeners.

Time was when television scored the music or tried to make it "acceptable" by containing and controlling it. Now, Alan Shaler and Elvis Presley by way of the song "Hound Dog" to a basketbound in 1956. Dick Clark's American Bandstand played mostly white copies of songs for a clean-cut, all-American, safe audience. Presley's first few hits were explosive, but his movies were deliberate bore.

When the Beatles appeared on the Ed Sullivan Show in 1964, they changed all that. The influence of their success was utter unpredictability. That they were on national television at all time gave them that. Still, it wasn't too long before John, Paul, George and Ringo, who had been ignited by Smashed, staggered into the weekend morning Animation characters. It's hard to tell whether the Monkees were based on "A Hard Day's Night" or their cartoon counterparts.

Now, 30, rock'n'roll has entered middle age, and Madison Avenue has finally wired up to the music's selling potential. Today we hear pop on McDonald's commercials, a synth-pop on Vital Sassa and a Springsteen sound-making Chrysler. A black teenager steps into the familiar David Lee Roth toe-touching split in a Bounce spot to the tune of Van Halen's "Jump!".

Music videos and Holly-
wood probably did the most to push rock'n'roll into the mainstream. "The Big Chill" soundtrack surpassed all sales expectations, and soon the rest of Hollywood started using simple rock'n'roll songs instead of the thunder of John William's "Star Wars" scores. In "Witness", Harrison Ford danced atop Vital Sassa and while singing along with Sam Cooke's "Wonderful World". "A Day in the Life" is Tom Cruise seducing the same actress to the Righteous Brothers' "I've Got Love That Lovin' Feelin'". Bob Reiner revived Ben E. King's "Stand By Me" for his current film of the same name.

--- End of Los Angeles Times Syndicate ---
An indepth review of "How Peace Came to the World"

by Mark Fendrick

The Trolls in the tunnels don't really care
A lot of people fill up the soda in 7-11, then take a big drink, then fill it up again.

Apple at A.C.C. don't really want to help you.

Tech News should allow 7-11 to place their condom ads in the campus spurt out hot waste water.

If you walk under the El tracks as a train is passing over, you will get 23.3% poorer on your next exam.

B.O.S.S. sponsors secret meeting

For those of you who don't know Nate, he's the head of a University and Minority Programs, located in the Commons basement. You attended the B.O.S.S. METING, sponsored by the black Organizations of Students (B.O.S.) and the black girl secret behind Nate's removal.

Actually, Nate has been promoted to Assistant Vice President of External Affairs at IIT.

The SECRET MEETING, which was conducted in Cohen Lounge in the dorms on February 6, 1987, was an effort to try to re-unite the black student body at IIT. There was a large turnout of students, but the B.O.S.S. had to publicize the meeting in order to get such a large attendance. I wish that we could have that much participation in the three black organizations, namely UCSB, SNTA, and NSBE.

When students thought that Nate was being fired, they came up with great suggestions to try to find out why he had been removed from his position. The students thought of making petitions and letters to the Dean. While attending the meeting, I could see the look of concern on students' faces. I noticed something different about this meeting. I rarely see on this campus. There were feelings of disappointment about Nate's removal and emotions of worry and concern among the students. Among many other issues discussed, students were interested in resolving the problem of apathy.

At the meeting, Nate mentioned that lack of interest is a problem among black students at IIT. People attending the "secret function", including myself, are concerned about the black support of IIT. Are we attending college just to get the big bucks? In the continued page...

Fred Filipiak to play at Chit Chat

Fred Filipiak is a professional guitarist and guitar teacher.

The most prominent musicians, Fred began studying the guitar at an early age. He went on to study from Dale Nelson and Jack Cecchini in Chicago. At the same time, he attended several John Smoot workshops.

After playing in a number of rock and jazz groups, Fred worked in orchestras as a soloist backed up such great entertainers as Liza Minnelli, John Lennon, and the Rolling Stones. Tony Orlando & Dawn, as well as Barbara Rush at Ravina.

For the past 10 years, Fred has worked as a Guitar single and played in the metropolitan Chicago area. He has written a few guitarists to become accomplished at playing the guitar and fine piano simultaneously.

Fred is a serious musician, an innovator and improviser, playing in a variety of musical styles from contemporary as well. As an entertainer, Fred is known as Fred Filipiak.

Fred is also an experienced guitar teacher, working for 12 years at the Lyon-Healy Music Store in Oakbrook, Illinois. He also taught guitar at immaculate Heart of Mary High School in Westchester and Morgan Park Academy in Chicago. Fred currently limits his teaching to private lessons in his own studio.

This year, Fred is creating his own line of educational materials for the electron guitar and writing guitar arrangements. He hopes to have these published as they are completed.

The desire for peace is praiseworthy; but if free people insinuate themselves in this country's cotton-candy daydream, they will not be able to be peace fighters, not the devout of peace, fixing their soul on their shoulder, but the just disciples with the hard case of domination stamping on their face—forever.

Would Chicago cop chase a robber during their coffee break at 7-11? UB should have another Rocky-Horror Night. But no "Trash the Place" chants please.

If every person in China yelled at the same time, we could hear them over here.

Why do people still try to walk through the Bookstore's Emergency Exit Door? Isn't the sign big enough?

Why, when you call up the Ph-Kapp's flat house, do they say "Skull House"?

A rumor is spreading that the Tech News EIC wants to fire the whole staff of all computer-science majors.

Excuse me while I go somewhere. For some reason, before the food is all gone.

Do E.E.'s ever talk about something else beyond classwork?

What ever happened to the Mr. Necht Contest at IIT?

A little known fact: only the Cash Station will split out the cash to you.

You take off all your clothes and stand on a heat print of your body on the big Bookstore window.

What do you hear about any wild sex weekends anymore?

Are you ketchup bottles tail and skinny while mustard comes in a short & fat container?

Do teachers really care that much trouble during the Board meetings?

The shuttle bus ride is the best form of excitement you can have.

How does wax eat food?

What ever happened to the Chop Shop?

And also, can we kill the Serpent Girl cartoon?

Is deja vista going to erase all the party information off the tunnel walls?

Where do I go to pay for all those parking tickets I threw away?

We should give Mr. Connors a full scholarship to IIT so we could all get a large discount off the pizza.

Will the personnel ever rise again?

A sign that evolution still has a long way to go will likely be seen in the words, "I am not the one in Chicago looking forward to the Cubs' victory.

And finally, some quick thoughts: never volunteer to do girls' laundry, and if you go to the teacher's house for a better grade, or smoke cherry flavored cigars, or lie and say you're doing something during Spring Break, or expect to hear a requested song on WJOL.

P.S. I didn't know that America was spelled this way.
A tribute to Dr. Martin Luther King Jr.

by Earl B. Beales

When I think of the late fifties and sixties I always envision a country in violent change. I think of the Civil Rights Movement, of the war, and radical social upheaval. Some of the songs and styles seem to reflect the violent times; but it is ironic that one of the major figures of this time period did not believe in violence. The person I am referring to was Dr. King. Dr. King would say, "Let no man drag you so low as to hate." This was spoken by a man who had been brutalized and arrested more than 30 times. He suffered through, having his home bombed and the lives of his family threatened. He still stuck to his nonviolent beliefs even after suffering those previously mentioned attacks. He abstained from violence even during times when the air was thick with racial tension and passionate hate. Even as a child Dr. King showed signs of being an exceptional individual. He was able to skip three grades and entered high school when he was age of fifteen. At the age of twenty-two, Dr. King had received his B.S. degree (one in sociology and the other in divinity). Two years before he completed his dissertation, in 1953, he married Coretta Scott. His father performed the wedding. Dr. King finally received his Ph.D. in philosophy from Boston University in December of that same year. It is fitting that the University of Alabama happened that would eventually propel Dr. King into the public's eye.

In December of 1955 a very tired black woman, Rosa Parks, refused to give up her seat to a white man and go to the back of the bus. She was eventually called before the court and her seat to a white man. This event spread through Montgomery, Alabama within five days. The Montgomery Improvement Association was appointed under the leadership of its president. Dr. King soon organized a boycott of the bus lines that lasted for over a year (1955-1956). In a Supreme Court decision declaring Alabama's bus segregation laws unconstitutional. This victory accomplished two things: It established Dr. King as a prominent civil rights leader and it opened blacks eyes to how much could be accomplished by working together. Dr. King later went on to hold many other nonviolent demonstrations for jobs, better educational opportunities and, open housing. Dr. King did not preach solely for the benefits of blacks; he preached out against the oppressors and for the poor and the abused. Dr. King received over 300 awards, most notably being the Nobel Peace Prize in 1964. But even so, the world was robbed of a compassionate and great leader on April 4, 1968, by an assassin's bullet. He was survived by his wife, Coretta Scott, and their four children.

Dr. King was a great man and we will all be forever robbed if we always will be greatly missed. His greatness stems partly from his ability to get his fellow man to accept him. He got a country that had operated for well over a century and a half, to stop, to turn its face into its heart and recognize the cancer that had developed within the country's body. He attacked to his moral's even in the face of danger. The one thing that stands out is that there was no how much he accomplished, but the fact that he did not have to compromise his moral views to accomplish his goals. Dr. King had the strength to stand up for his and other's rights and stand up for what was right with just his love and understanding to defend himself. Martin Luther King and Charles Scott continued his dream in their children, and it is hoped that we can continue to put into practice his dream. I feel that not only should we keep the dream alive, we should cultivate it, take care of it and help it grow so that it will eventually blossom into reality. We owe a lot to Dr. King's memory, to free our country of the shackles of racism and oppression.

School in uproar over鳗ng distance charges

by Jeanne C. Sinkford

Jeanne C. Sinkford, DDS, PhD, Dentist and Educator was born in 1925 in Washington, DC. She received both her BS (1953) and DDS (1955) degree from Howard University. She went on to complete her PhD from Northwestern University in 1965. She held the Louise C. Bell Fellowship for Graduate Training. Sinkford is not only a dentist but also a black female scientist, was but the first woman dean of a dental school. In 1985, Sinkford was named Associate Dean and Research co-ordinator at Howard University in 1985.

Did You Know That..."The Atlanta Coupler" which greatly reduced the number of deaths and injuries of railroad accidents in 1898. Inventor Andrew J. Beard, an early black inventor. Prior to Beard's invention, railroad cars were manually coupled which meant that a single car dropped into place as two cars crashed together. Many were caught between cars and crushed to death or severely maimed during this split second. This invention was an automatic device which locked two cars together through bumping them.

Did You Know That...Lewis Temple invented a toggle harpoon which enabled the 19th century whaling industry to more than double its catch. In the 1840's working as a metalworker in New Bradford, Mass. Temple designed and manufactured a new version of the harpoon which allowed time to be quickly launched and the whale. With the toggle harpoon, the whaling industry entered a new era of prosperity.

Did You Know That...Freddrick McKinley Jones, an engineer and inventor, patented in 1902 workable truck refrigeration systems, air conditioning and other mechanical aids. Born in 1895 in Minneapolis, Minnesota, Jones became involved with the idea of a refrigerator for trucks when he worked as an engineer. The company asked if such an invention could be designed. Jones designed a cooling device, utilizing another of his inventions, the self-starter. Refrigeration units were made in 1912, 14,000 trucks were equipped with the device.

Did You Know That...Edward S. Bouchet, PhD physicist, set two precedents which were landmarks in the history of black education in America. He was the first black American to receive a PhD degree in physics in 1878, just ten years after Yale became the first American University to confer that degree; it was twenty-five years before another black received a PhD. Bouchet's second and pilot accomplishment was that he was the first black to become a Phi Beta Kappa member.
PERSONALS

Yes, personals are back...

I'm chilling and cooling,
I'm the king that's ruling,
I preach and teach,
and I'm always schooling!

King Iroc

To Jenny T.: Thank you for giving me a reason to go to Thermopolis this semester.

R-BMA

Pulsating, Dominating from up above,
Cold chilling and I'm willing, the name is E-LOVE.
Creating, devastating in the place to be,
It's the sole mic control because it's easy to "E".
I'm making, never failing chilling all the time.
Ball playing, rhyme saying, and I get mine.
No way to stop me, no way to rock me.
It seems quite shocking to those who mock me.
And that's not all, suckers have the gall,
To pray and pray for my downfall.
You see, I'm not running, I'm just stunning.
I'm smart, not stupid and I'm so cunning!

E-LOVE

King, Celebrate!

If you’re black, white, red, brown, yellow, or just don’t care, come and enjoy yourselves on Friday, Feb. 27th at Martin L. King celebration and on Friday March 6 at our Gospel Jubilee Help us celebrate the birth of a new month by coming in our events. We’re the Union of Concerned Black Students.

BY-U.S. Elections

Officer nominations for SNTA/JUBS/NSBE will soon be available for members, now is the time for action. Watch, listen, and learn. For more info, dial $584 and leave a message for Kevin Smith. This is part of the Black Awareness of the UCBS. This is an event to meet one that you are called the meeting will be held on Tuesday, Feb. 27, 1987 at 12 noon in 131 Perci Hall. The guest speaker will be Susan Tubbins from Johnson Wax. She will be talking about Employee and corporate responsibility. All are invited to attend.

ACC Seminars

All seminars are at 1:00 pm (please let them know that you are coming by calling Dots at $5862). Tuesday, February 24, 1987 - First Choice on the PC. This is an integrated word processing, database and report, electronic spreadsheet and communications program from FFS, it is easy to learn, costs only $44 for the software, on a 256KB, two floppy, system, and will probably be used with all freshmen next year. If you are interested in buying a copy dial Dots at $5862. Seminars are open to IIT students and faculty.

Minority Scholars

Amoco Corporation is sponsoring a minority scholarship and will be recruiting in the Placement Office on February 16. Two minority scholarships, per year, will be established. Each scholarship will cover tuition, books, living expenses (school year) and related internship expenses on an annual basis, with an estimated annual expense, per student, of approximately $15,000. Actual scholarship money will vary depending upon the tuition, books, living expense at the college or university and additional internship related expenses. In order to be eligible for the minority scholarship, you must:
1. be a full time undergraduate minority student
2. be a Computer Science or Electrical Engineering major
3. have official classification of sophomore
4. be in the top 50% of class
5. have U.S. citizenship or permanent resident status
6. have no other corporate financial aid to be received
Interested students must complete:
1. Amoco Corporation Information Services Minority Scholarship Program Application
2. One essay addressing:
   a) professional objectives
   b) leadership achievements
   c) why college will assist you in achieving your career goals.
   Essay is limited to two typed/double spaced 8 1/2 x 11 pages.
   Please contact Debbie Ryan in the Placement Office for further information at 507-3837.

It's eleven p.m.
Do you know where your paper is?
Let's be real. Compare the equipment she's using to yours. If you were both trying to tunnel through a mountain, she'd have a bulldozer and you'd have a storm fork.
Don't despair your problem is already half solved. For a limited time, you can buy an Apple Macintosh Plus or a Macintosh 12K Enhanced computer with Microsoft Works—for less money.
Which is wonderful.

You get a Macintosh, with its speed, ease of use, and graphics capability. Plus, you get a software program that lets you use all this Macintosh power in all your subjects.
Microsoft Works is not just one program, it's four integrated programs: word processing, database management, spreadsheet with charting, and communications.

Meaning you can put charts in your history essays. Spreadsheets in your economics papers. Call Dow Jones News Retrieval at 2:00 a.m. to get the facts for your journalism story due at 8:00 a.m.
So if you're taking more than one subject this semester, you should check out Macintosh and Microsoft Works.
But don't wait till the eleventh hour. This offer will end soon.
And your paper must stay out all night.
Hawks ranked 5th in state

The Scarlet Hawks Basketball Team is still in the play-off hunt. The recent polls have then ranked 5th in the state, their highest ranking ever! This ranking comes on the heels of an overtime loss (81-80) against the University of Illinois-Carbondale and an overtime victory over Olivet Nazarene University. The Hawks are still in the running for the Postjan尤其是 slump and are playing fine basketball. SUPPORT THE HAWKS!

Swimmers lose double dual

The varsity swim team lost a double-dual swim meet last week against the University of Illinois-Chicago and Lake Forest College 66-46. These losses brought the team record to nine wins and four losses. Against Loyola, IIT got only four first places, with sophomore Jeffrey Brown edging out the I and 3 meter diving event. Rich Fernandez winning the 200 meter breaststroke event and junior Mike Massler winning the 200 meter backstroke event. Against Division Three powerhouse Forest Lake, the swim team came out with 16 first places with sophomore David Hathaway winning the 800 freestyle and senior Jeff Mark winning the 400 meter medley. Coach Mike Shriver's time of 21:26.68 also set a new pool record.

ID's continued from page 5

construction site of a new ECU classroom building.

University of Illinois in Champaign, W. Va., a student newspaper found that students were being encouraged to buy liquor, regardless of their ages. The most common method was to use student identification numbers or college IDs.

"False IDs are a lot more widely used among students because students who have been allowed to drink for the past two years used them freely," says Partnership director Burgetta Eipin.

And few students have questions about breaking the law because few of them agree with it.

West Virginia, like all the states of the union, was forced to reduce minimum drinking age from 18 to 21 by a federal law which says states that don't comply will lose millions in federal highway funds.

As of August, only eight states had passed laws setting the minimum drinking age at 21. Throughout the nation, colleges have had to make up ways to force students—many of whom are courses are younger than 21—to change their drinking habits. Some have banned alcohol altogether. Others have made fraternities and sororities hold dry noshamois, among other things.

But some students aren't giving up their bottles so easily. A recent survey of 400 undergrad student questioned in the Parthenon survey conducted by a friend to report his driver's license missing. The friend found out the necessary paperwork to

obtain a new license, and gave it to the 19-year-old, who returned it with his own picture to state police office.

The underage student was issued a license with his picture and his driver's license, and told not to drink.

To control student drinking, Yale began issuing "dry" cards to students who were old enough, but now some students report there's a brisk day ' across the counterfeiting cards, too.

One unnamed student reported that counterfeiters are producing ' fake cards, driver's licenses and even other I.D.s for a personal computer, and then selling them to underaged students.

"Since September we've had 20 or 25 cases of false I.D.s," says William Laughlin, public relations director at the University of Maine at Orono. "But I don't think drinking or the influence of the I.D.s is increasing.

"They were increasing several years ago, but we came down hard then and it leveled off," Laughlin says. Students using fakes can get fines up to $50 and jail terms of up to 30 days.

University of Texas students are using fake I.D.s that bear faces of as much as $200. People who manufacture the fakes get as much as 15 years in prison.

Nevertheless, Maine's lawmakers are currently investigating a tip that an on-campus group it altering driver's licenses from Maine and several neighbor states.

With or without rules, "we get a lot of fakes all the time," says Bill Cummings, of Bloomington Liques, a store near the Indiana University campus.

With many of them, it's impossible to detect they're fake I.D.s, but if the person carrying it is caught, we can still get into trouble.

Hawks lose to Lakers in OT

The 7th ranked (District 20) Scarlet Hawks traveled to Hammond to take on the CGAC League leading Lakers of Purdue University-Calumet in a hard fought game. The final outcome was a 61-66 overtime loss.

The Hawks took an eight point lead into half-time but couldn't hold back the storming PUC Lakers who took a seven point lead at the 12 minute mark of the second half. Then hawks got rolling again with the help of their 30 plus traveling fans and finally knotted the score when high scoring Ryan Kirkland hit on a short jumper after a time out.

In the overtime the Hawks fell slightly short and Lakers Senior Mike Systma took control. Kirkland again led in scoring with 14 points, rescounds with 10 and, along with Marc Thompson, in assists with four. Thompson also fouled out 9 rebounds. Others in double figures were Mike Klok with 12 points and John Manoney with 11.

Super Hoops representation

The two teams that represented IIT at University of Illinois Chicago on Sunday, February 22 were: POLITE GUYS: Sam Unsicker, Keith Guenther, Brian Salapatek, Dave Butthuss.

RUDE BOYS: Niel Hose, Gerald Charles, Donnell Starks, Marvin Watson.

John Marsh was a referee during the contest.

IM Basketball results

Tuesday League: ACHIEVE 2-0, Elite 1-0, Anything 1-1, The Arch-U, ECP 0-2.

Game 3: Tuesday February 24.

Varsity swimmers end season with loss

The varsity swimming team ended its dual meet season last Thursday with a 76-37 loss to the University of Illinois.

Chicago. IIT was able to get four first places in the 13 event meet. David Hathway got IIT's first first-place in the 100 yard freestyle race and also broke the former varsity record in this event by over 10 seconds.

Troy Leaf, a freshman on the squad, had his best dual meet of the season with wins in both the 100 and 200 yard freestyle events. Not only did Troy win over three very capable U of I swimmers, but he reached his teammates and captain of this year's squad, Chuck Fee, the first time Troy has taken Chuck this season.

IIT's last first place was by junior standout Mike Messler in his specialty, the 200 yard backstroke. Mike has gone unbeaten in this event for the entire dual meet season. This was automatic entry into IIT's Ecko Pool Hall of Fame Gallery.

The team finishes its dual meet season with nine wins and five losses and is now preparing for the national championships in Milwaukee, Wisconsin on March 4-7.
