IIT makes Ch. 7 news

Tim Weigel, popular sports director for WLS-TV, Chicago, visited campus last Wednesday and thoroughly delighted a milling audience of students, faculty and staff during a forty-five minute "conversation" in the Gallery Lounge of Hermann Hall. The initial invitation, extended by the Student Life Office and the Institute of Drama, was to commemorate Mr. Weigel's visit at the Triathlon competition of April 14 in a future image of "Intelligent Athletics" as practiced at IIT.

When Weigel's arrival proved impossible because of prior commitments, Tim Weigel, a winner of the Triathlon at lunch and then to hold an open forum to supplement to ABC's arrival in a drizzling rain. Weigel happened upon the "Rathbone Round" during the Interfraternity Greek Week competition and held that day with ABC and HUB. He was fascinated by the event and after extending Weigel a manicure in the ABC TV studio, a starter that no fire collapse, he discoursed on the rules and regulations of the "Ch. 7" camera unit to the Quad the following noon to film the bed race. The promise was fulfilled, as many Chicago-land viewers attended watching the 6:30 pm telecast on Thursday. Unfortunately, one of the beds became unbalanced, Peter Sim of ABC's TV network, who framed his ankle in the collapse, said it was difficult to explain hisinandress as having hit a bed.

In the course of his interview by students, Weigel presented some autobiographical and personal insights into the game as it is today. He said it had been difficult to explain his impressions of having hit a bed.

Further developing this perception of the competitive nature of the game today, Weigel cited the Big Ten NCAA football conference as an example. The conference has become an all-conference affair with the expansion of the conference's influence on the national landscape. Weigel acknowledged that the conference's influence has grown significantly since its inception in 1946, and it has become a major force in college football.

Triathlon winners announced

The IIT Triathlon '88 competition on April 14th filled the HUB Ballroom with paper airplanes and clouds of interest rising from the spreadsheet program. The course, consisting of a 400-yard swim, followed by a cycle of 26.2 miles, and a 6.2-mile run, provided a picturesque setting for the athletes to showcase their skills.

The complete list of winners includes:
1. John L. Gossage
2. John Jacob

The varsity swimming team selected juniors Matthew Fernandez and Daniel Hathaway for the NSAA event. Both Fernandez and Hathaway are 3-year lettermen, who have both represented IIT in the National Championships these last 3 seasons. Both Fernandez and Hathaway also won all-American academic honors this last season for their academic as well as athletic honors. Coach Matthew stated that both Matt and Dave are battle-hardened competitors. Fernandez is the best backstroker IIT has ever had and Hathaway is the closest distance freestyler we've ever had. Both hold varsity records in individual events as well as relay events. They should make excellent team leaders and captains for next season.
WAKE UP!

Dear Students,

Now comes the time for student government. Are we coming up quickly and we would encourage all of you to get out and vote for your candidates that will be your student representatives. However, we must ask you that do you not go in uninformed. Before you place your mark on the ballot, examine each of the candidates for their platform and what they plan to do. If you find that these people stand for, read the last issue of Technology News (April 18, 1988). They will be more dangerous than not voting at all. If someone tries to get you to vote without knowing the person that stands for, just say no.

Now consider what student government is all about. It is something that as a group of people, students. What has student government done for the student body? What has student government benefited the students and other organizations? One can argue, "no one has a right to judge student government." In our opinion, it is the responsibility of the student government to make the students aware of student concerns and problems, not just sit back and wait for something to be done. By forcing student organizations to attend student government meetings or the other way around, it is something that has tried us and we are sure many other student organizations. Groups should be encouraged to attend meetings and should know what goes on. In some meetings, there are no items which appear to affect their group or the students as a whole. In these cases, attendance, people should want to come and voice their opinions (that is why these are voluntary organization.

Now consider what projects student government has done in the past and ask yourself, "did that help this school and benefit the students?" Without the 1986-87 year's candidates plan to do and will they benefit the students?

We suppose the bottom line is that in the years we've been at SIU, student government administration has been very active, done much to help the students, for the students, student concerns. Remember the library campus? There was much controversy over this and we are sure many students wanted to know what went on and if their tuition money went to this project. Unfortunately, not many people pointed out much about. We feel that it was the student government's responsibility to keep us informed and report its findings to the students.

Consider the problems that were addressed by the previous SIU-Palooza's student committees. If student government had been actively finding out about the problems, perhaps the same things could have been accomplished by the student government. Some people should have originated from the student government since these issues were things like the campus (security, maintenance, academics, student life, information sharing, etc.).

This is the point at which the electing someone for only a semester just to have someone else take over in the spring? Why don't you just vote for one of us and we'll hand the reins over to the VP for two weeks. Being president of this organization entails a lot of responsibility and it is typically takes nearly a semester to understand and get used to the position. One may argue that this will be a VP or similar office. We learn the ropes, but the vice-president's responsibilities are different from the president's, and they aren't even the same. Each officer should be so busy addressing their duties and responsibilities that they will not have time to know someone else's.

We've probably figured something out, but we aren't just going to say what we are going to do. Vote for your government and make an educated choice.

Sincerely,

David Lu

UB cartoon angers students

Dear Tech News:

We were present patrons at the 6:15 showing of RAW, and we were highly offended by the showing of the "Angel Pu" cartoon. Upon the first viewing, the cartoon depicted a stereotypical black character named Lil' Sambo, who was portrayed as a taunting, evil figure who was extremely insults to the Black community, such as "nigger" and "black garbage." By gaining Lil' Sambo's attention by shaking dice, Sambo's exaggerated physical features, his broken dial, and his yelling, Lil' Sambo is frequently aired on WGN-TV, but never have they shown a cartoon as tasteless and offensive as "Angel Pu.

We feel that in the future Union Board should be more attentive to whether or not the context of a pre-feature selection would be offensive to other groups in the IIT community.

Shereen Downes, Alisa Dixon,
Sabrina Bremfud, Kelly Casey

The Muslim holy month

This month hundreds and thousands of Americans are abstaining from eating, drinking, and sex from dawn to dusk. Why? They are fasting. Who are they and why do they fast?

They are Muslims. They are fasting because they think it is good for them. Fasting is both a physical and spiritual act. It helps the human beings get rid of excess fat which accumulates in their bodies. It purifies their blood stream and rejuvenates their entire system.

Fasting is one of the purest religious and spiritual beliefs. Islam institutionalized it in the form of a month of fasting each year. It is one of the highest forms of worship for Muslims. About 1.5 billion people around the world fast in this month. It builds strong moral character. It educates the mind.

It helps one to know how a hungry person feels and it is like to be an emptiness which teaches one to share the sufferings of other people. It prompts one to be thankful to God for whatever he has. We believe that Islam is the guidance which has been revealed by God through his prophet the last of whom is Muhammad. Please be aware that fasting generally means peace and submission. It seeks to harmonize man's will with that of the Divine. There is no winning, no peace or tranquility. Fasting is one such means to bring about his harmony.

Human beings contain angelic qualities and animal instincts. Their salvation lies in strengthening the angelic potential, and they are damned if their animal instincts dominate their thoughts and actions. Islam has mercifully guided human beings to fast, that a balanced personality is created.

More discontent over UB cartoon

To the members of the Union Board and the IIT Community

Last Thursday, April 14, 1988 I attended the UB Movie RAW. But I'm not writing to comment on the movie but what was shown prior to it. For our pre-show 'entertainment,' UB showed us a Warner Bros. cartoon entitled "Angel Pu." This basic storyline went as follows:

A man had a cat and he wanted to get rid of it, so he decided to put it in a bag and threw it in the river. The cat, however, escaped from the bag and only pretended to be drowned. The painted himself white and portrayed himself as an angel, only to haunt the man, and finally, supposedly throwing the cat in the river.

Sounds okay, doesn't it? The part of the cartoon that I totally disliked was how the man portrayed his name was "Lil' Sambo." His character was just too stereotype and big while he was talking. He spoke with a broken dialect. In addition to his demeaning physical character, Lil' Sambo's personality insulted other things. For instance, once while "the cat was" was in Lil' Sambo's broken down house, he frightened the man. Lil' Sambo, upon seeing the white cat, naturally ran, screaming. "Fear the cat," said Lil' Sambo to him. But the cat cunningly put a pair of dice in his hands and began to shake them. When Lil' Sambo heard the sound of clicking dice, he slowed down and started running backward toward the street outside.

On another occasion, as the beginning of the picture, Lil' Sambo was debating whether or not to throw the cat in the river. After the cat escaped from the bag and filled it with rocks, he told Lil' Sambo, "pretending to be an angel is what I'll do, I'll throw that cat in the water." Lil' Sambo was still unsure because he didn't want to have any contact with the water and not because it was cold or because he was afraid of drowning.

The cartoon was totally demeaning to the black community. The audience, which consisted of a large proportion of the black population at IIT, showed its displeasure. Even though we booed and yelled to turn the cartoon off, our shouts were ignored and the cartoon was shown in its entirety.

I want to know why UB would choose this cartoon and what they believed would be accomplished by showing it? Aren't they selective in the types of films that are shown? If our Union Board doesn't choose quality filming for IIT's community, maybe we should no longer have a Union Board.

Tracey Rimble

A plea for help

Every single week this semester Technology News has been faced with an embarrassing failure of some type. The waxer breaks, the paper feed jams, the phototypesetter loses files or refuses to come on together all at once, the light table breaks, and the photo chemicals become contaminated. It is becoming impossible at an exponential rate to produce a newspaper under these conditions.

Due to student apathy we are working with a skeleton crew. If you could do even the smallest thing to help, you could possibly cover every campus event and news story! Most of the people 'I don't care' about Technology News are people who contribute nothing. The only thing worse than a poor campus newspaper is a campus newspaper that is not produced because the editor-in-chief, faculty or staff member who complains about it and does nothing to help. If you don't have time to be on the staff, contribute to our fund drive for new equipment. Technology News cannot be a professionally produced and informative publication without IIT's support.

Sincerely,

Natalia Richardson
Editor-in-chief

American Cancer Society

The space contributes as a public service.

ATTENTION Technology News staff members!

To get PAID for work done on issues printed this semester, you must contact the National Business Manager before the end of the semester. Failure to do so will result in forfeiture of any and all claims we owe you for said work. It is not the responsibility of the business manager to track you down. It is your responsibility to contact him at x3085 or come and fill out a payroll form from his desk, 5th floor Main Building.

THERE WILL BE NO EXCEPTIONS!
In early 1978, Pi Kappa Phi fraternity began searching for a project that would offer the challenge of new growth and the opportunity to address unresolved problems. The search led to designer Thomas Sayre and a concept that a free and enriched environment is essential for human growth, particularly to those with severely handicapped children. Too often, these environments were sterile and barren, lacking many of the stimuli needed to promote adequate growth and development. It was here that P.U.S.H., Play Units for the Severely Handicapped, came along, changing these existing environments with provision of equipment, offering audio, video, and tactile stimulation to enhance the learning process.

Although these stimuli are all things we take for granted, for a severely handicapped child, a simple act such as pushing a button and hearing music can be a major achievement and source of enjoyment. More importantly, perhaps, the first time the child may come to realize that he can affect the world around him.

Throughout its existence, P.U.S.H. has continued to experience corporate growth and development. Indeed, it was in 1972 that Pi Kappa Phi expanded its services to handicapped kids.

In 1981, P.U.S.H. expanded its services to handicapped kids with the establishment of P.U.S.H. Individualized Care Services (P.I.C.S.).

Licensed to provide foster care services by the state of North Carolina, this branch of P.U.S.H. provides community-based residential services for handicapped children and adults.

Today, P.U.S.H. has come full circle. The philosophies of the P.U.S.H. design are now being applied to the traditional home environment. Here, P.U.S.H. takes a primary space, such as a bedroom, and through special design, transforms it into an environment which achieves a greater degree of freedom, independence, and range of choices which were not previously available. This gives handicapped kids a chance to enjoy a better quality of life at home, where they belong.

To date, the national service project of Pi Kappa Phi fraternity, over $750,000 have been raised for P.U.S.H. by the undergraduate chapters of Pi Kappa Phi.

This total exceeds that of all other fraternal organizations, and was raised over a period of 11 years. This year, Pi Kappa Phi fraternity has its national fundraising goal set at $150,000. The Alpha Phi chapter of Pi Kappa Phi fraternity at Illinois Tech supports this goal and has set its sights on raising $5,000 for P.U.S.H. this year.

On April 27th and 28th, the help of the sisters of Delta Phi Epsilon sorority, Pi Kappa Phi will hold a P.U.S.H. a-thon to raise funds to help the severely handicapped. For thirty-six hours, Pi Kappa Phi and Delta Phi Epsilon will push wheelchairs on and off campus talking about P.U.S.H. and following contributions.

Although we will be soliciting contributions during the P.U.S.H. a-thon, the majority of the funds raised through this event are from people pledging the students on a per-hour pushing basis. In this week Tech News, you will find a pledge form for the P.U.S.H. a-thon which can be returned to Pi Kappa Phi through the campus mail to enclose in an envelope with the words: Campus Mail - Pi Kappa Phi (P.U.S.H. chairman).

3333 S. Wabash

In addition to the P.U.S.H. a-thon, at noon on May 4th, the last day of classes, we will be sponsoring a Car-Swash to benefit P.U.S.H. Bids for the windshield, windows, and lights will be accepted at x3990. The highest bidder will be used as the starting bid in auctioning off the car on the 11th, so that people can help out without have to re-invest in the destruction of our fine automobile for a mere one dollar per hit.

The brothers of Pi Kappa Phi hope you will support our efforts to improve the quality of life of severely handicapped children. We would also like to take this opportunity to thank the sisters of Delta Phi Epsilon for their help and support in these activities.

Blood Drive

There's your chance to donate blood and win your organization, Fraternity, Dorm, etc. a pizza party and/or $50 in cash. Navy ROTC will be sponsoring a blood drive on Monday, April 25th from 10:00 a.m. to 5:00 p.m. in the Mezzanine from 10:00 am to 5:00 pm. To make it a little more interesting, I.C.O. and I.H.T. have challenged each other to see who can get the highest percentage of donors. The organization from the winning school with the highest number of donors will win a pizza party. Also, the organization from I.H.T with the highest percentage of donors will receive $50 in cash. So bring all your friends from your organization to this event and see if you get any questions, contact Craig at x5078.

Chemistry Courses

Registration for Chemistry Summer evening course: June 8-9 1988, 8:30pm - 10:00pm. Lab sessions will be held Monday through Thursday, 7:00-10:00 pm.

Chem 125 Principles of Chemistry II (3 hours lecture, M, Th, 6:20-9:50; 4 hours lab M, Th, 10:40-1:40). Molecular basis for chemical reactivity, kinetics, equilibria and introduction to thermodynamics. Prerequisite: Chem 124.

Chem 237 Organic Chemistry I (3 hours lecture, M, Th, 6:20-9:50; 3 hours lab M, Th, 10:40-1:40). General principles of synthetic and theoretical organic chemistry. Prerequisite: Chem 121.

Chem 244 Physical Chemistry I (3 hours lecture, M, Th, 6:20-9:30). A study of the equilibrium properties of chemical systems. Laws of thermodynamics. Prerequisite: Chem 121.

Chem 245 Physical Chemistry II (3 hours lecture, M, Th, 6:20-9:30). Continuation of previous course. Advanced topics in thermodynamics. Prerequisite: Chem 244.

For more information, please contact the Department of Chemistry.

Tau Beta Pi

The last meeting of the semester will be held on Tuesday, April 26 at 11:00 PM in room 123 ET. We will discuss the upcoming initiation of new members and the graduation of current Tau Bites. All new initiates and members should attend this meeting. If you are unable to attend, contact one of the officers. The initiation will be held Friday, April 29 at 5 pm in Stuart Auditorium.

Register

Advance registration for all full-time undergraduate and graduate students will be held April 18-29. Registration packets will be picked up at the Office of Student Records and Registration (154 Main) on April 13, 14, 15 from 9:00am to 4:30pm. A valid ID is required. Completes registration packets will be mailed on April 15 at 5:00 pm. Advance registration for part-time students will be held from April 18 to May 6. Registration packets for all eligible part-time students will be mailed.

Dunk a Prof

Worried about finals just around the corner? Here's your chance to send those infuriating professors to the bottom of a tank of water. Alpha Sigma Phi will be holding a dunk tank to benefit the American Cancer Society.

Graduating Students

Would you like to receive your DIPLOMA or request a TRANSCRIPT immediately after you graduate? If so, you may now receive a N.D.S.L. PERKINS, BORJENBERG, MANSHER, OR A STRONG LOAN, please make an appointment to see the Student Loan Office. M.E. Room 204, x4952.

Passport

Did you receive your IIT Harriman Hall Passport, which is your passport for the HUB all semester long? Use your passport through the semester and be eligible to win the grand prize at the semester-end party on May 1st. Necessary are the HUB Director's Office Staff for official rules or call x4705. The passport drawing is on April 30 in the Auditorium. So bring your passports in to the drawing.

HKN

The initiation ceremony, reception and award ceremony will be held on the evening of Friday, April 29th. If you will be unable to attend, contact Eric Sabado at 380-6620.

IEEE

Dr. Melch Pazarchi will be speaking on Tuesday, April 26, at 12:30pm in the Siegel Hall Auditorium, Room 217. His topic will be High Definition Television. All IEEIE members and IEEIE students are welcome.

Pencils

The ASME is now selling 0.5mm mechanical pencils for 100 cents each. Thank you to all of these stylish writing instruments. To get yours, stop by room 112 or 118 E4 or see John Baggio.

Writer's Cramp

Maybe you need a new pencil! Why not buy one of the new and improved ASME 5.5mm pencils? See John Baggio or stop in at 118 E4.
**Scholarship**

The Metropolitan Life Insurance Company has announced a scholarship program for Chicago area business students of Asian Indian descent. Students must submit a 1200 word essay describing their career goals. The deadline for applications is August 31, 1988. For more information and application forms, please contact the International Office, Room 103 Fair Hall.

**Physics**

On Wednesday, April 27, 1988 at 4:00 p.m., Dr. Frederick O’Neill from the Department of Physics at IIT will be speaking on “Muse and Physics: A Harmonic Function.” The colloquium will take place in Rooms 303-304 in Hermann Hall. There will be a precolloquium social at 3:00 p.m. in Room 202 Siegal Hall.

**Learn Lotus**

The Stuart School of Business Administration (SSBA) Computer Lab will be presenting a seminar on “Introduction to Lotus 1-2-3” by Mr. Nicola Grubich on Tuesday, April 26, 1988 from 12 noon to 1:00 p.m. in Room 113 Stuart Building. All interested students, faculty and staff are invited.

**Wordperfect Presentation**

The SSBA Computer Lab will be presenting a lecture on “Introduction to Wordperfect” by Ms. Deniz Dowell on Thursday, April 28, 1988 in Room 113 Stuart Building from 12 noon to 1:00 p.m. All interested students, faculty and staff are invited. For more information, call Peter Reynolds or Ahmed at 587-3746.

**GOP**

The College Republicans of IIT will be hosting speakers on April 27 from noon to 1:00 p.m. in the Hub Ballroom. Students, Faculty, and Staff are invited to attend. The speakers will include:

- Vrbnyak-Candidate for Clerk of the Circuit Court
- Slone-Candidate for Recorder of Deeds
- Gainer-Candidate for State Attorney
- Dvorak-Cook County Republican Chairman
- Holowinski-Candidate for Congress
- Key-Candidate for Metropolitan Sanitary District

(Confirmed)

---

**Charity**

Members of Phi Kappa Upsilon will be participating in the Fannie Mae Candy Day this April 29th from 4 to 6 p.m. at the Merchandise Mart. Proceeds from the day will go towards Misericordia. Last year the event raised $145,000 to help over 350 children. Come out and support this worthy cause.

**Encounters**

The faculty-study group in biblical themes, “The Bible and You Today,” continues to develop its Spring Series this Monday, April 25 at 12 noon in the Field Conference Room of Hermann Hall (SW corner of the HUB). Current focus is on the dynamic of spiritual growth in human decision making and its effects on personal growth and development, as witnessed by Biblical sources. The guest presentation to open the IIT community.

**Collect $200**

... Every time you pass “GO” at the 1st Annual IIT Monopoly Tournament. The event will be held on Tuesday, April 26, from 12 noon to 5 p.m. Registration will be at noon on Tuesday. The tournament will be held in the HUB Gallery Lounge and is sponsored by Techno-Mate.

**Weigel**

continued from page 1

that their salaries compensate for the physical sacrifice.

Accordingly, Weigel expressed a high regard for the athletic program at IIT and spoke enthusiastically of the model for physical conditioning achieved here with athletes whose primary commitment is to their academic development into the various professional careers available to them at such an institution. Just as important was the more relaxed environment and satisfaction IIT athletes experience by playing the game for the love of the game and the enjoyment of the sport.

SPARC (Students Participating in Activities to Raise Cash) Presents:

THURSDAY APRIL 28

BIG TWIST

and the

MELLOW FELLOWS

-AND-

EDDY CLEARWATER

HERMANN HALL AUDITORIUM

Concert begins at 8:00 p.m.

Doors open at 7:30 p.m.

******************************************************************************

BUY YOUR TICKETS NOW at the
Hermann Hall Director's Office
and all Ticket Master locations, $7

******************************************************************************

FOOD!   BEVERAGES!
THE EVENT OF THE YEAR!!!

LIVE in the HUB AUDITORIUM!

This is NOT just another BOG concert!

The money raised will be donated to Technology. News for the purchase of typesetting equipment.

This event is sponsored by the Alumni Parents Association, WOUI-FM, Union Board and Hermann Hall.

Tickets for Big Twist alone go for $9 In the Loop!
Black Widow

Thursday 5:15 pm
in the HUB Ballroom

Saturday 7:00 pm and 9:30 pm
in the HUB Auditorium

Three men die within a short time after marrying the same gorgeous woman. She may be pretty, but she's as deadly as a certain spider. Theresa Russell stars as a wealthy man's most delicious nightmare and Debra Winger is the one who will stop her and bring her to reckoning.

Admission: $2.00

Union Board wishes to formally apologize to any and all of last Thursday's movie goers for the cartoon which was shown before 'Raw'.

Union Board receives it's cartoons from the film distributors and it is our policy to preview cartoons before showing them. We apologize that this procedure was not followed during that week.

In future, this procedure will be followed most closely.

Thank you,
Union Board

Eddy Clearwater and Big Twist and the Mellow Fellows

The event of the year is here! In the HUB Auditorium, the blues will resound throughout the building as Eddy Clearwater and his friends make the building hum. Thursday April 28th will be the day, $7.00 is the cost. Come and support Tech News and their ongoing mission to be able to print the paper without any mechanical failures.

AIDS testing on college campuses

(CPS) — U.S. Surgeon General C. Everett Koop wants to start a federal effort to educate students and college health officials think it's a bad idea.

"Why?" asked Dr. Richard J. Schuch, the University of Illinois-Chicago student health director, who does not want to do this? He rather deal with the risks at hand. We shall accept the risks of AIDS, which is getting decent condom ads on television and addressing issues of how to get money on this stuff!

The tests, other critics say, work well in most cases against college AIDS.

Testing students at a California university, they say, tells you little about the University of Alabama.

"You are not going general," said Rutgers University Health Education Director Fenn Goodhart.

"There are opinions that college students, because of their general sexual promiscuity, are prone to controlling AIDS. A fatal virus spread through intravenous needles, contaminated blood products, and contact with an AIDS carrier.

But the money to test, Schuch said, "would be better spent elsewhere." We are "too fed up to deal with the testing," he added, and those taking part would not be told the results. Students who did not wish to be tested would not be tested.

The test anti-AIDS efforts also have drawn fire, especially from other Reagan appointees. The University of Illinois-Chicago student government president Laurie Paul.

"We are troubled by questions of privacy that could arise from the public ramifications of testing," she said.

"For instance, fears of the chosen students might have students with AIDS who could give others to transfer or change schools," said Goodhart. The college also could have trouble keeping the testing.

"I have a lot of problems with the way the government has approached this," said Ida Long, a 40-year-old Harvard doctoral candidate, who at a press conference last week, "I need time to study comparative literature."

One of the claims Boston University History Prof. Melvin Goldman at the same conference, may be deeper than that.

Goldman saw the new Chinese government effort to keep the country out of the "Western idea" that will unlock SATs for thousands of students who believe they should have because they're nervous.

The SATs are used by 1,500 colleges to determine which students to admit or to evaluate and counsel students. The College Board noted the figure represents 78 percent of the nation's 4-year, post-secondary institutions.

Where is Chicago?

(CPS) — American students don't know very much geography. Results released during recent week show.

Separate surveys of students studied by the University of Wisconsin - Oshkosh and St. John's University in New York City that are "Where is?" J. N. P. Douglas, a professor of geography and history at the University of Southern California, concluded that most students do not know.

"The tests are depressing but not surprising," said University of Southern California journalism and Los Angeles Times reporter. "When students face the Bering Straits off the coast of North America, they need to locate an island on the coast of Canada. The students are not locating the western Hemisphere. This is mostly because those tested could locate and identify Canada as the United States leading trade partner of the Soviet Union as the third most populous nation.

"More people know where Bart Simpson lives in "The Simpsons" than what the third most populous country in the world is?

At the University of Wisconsin-Madison's "Where is?" test, 97 percent of students recently surveyed could find Mexico, but only 72 percent knew Mexico, the United States and Canada. However, these surveys revealed that the national ranking was among the top eight. Disciplines of some democrats.

Chinese deported

(CPS) — Chinese students at U.S. campuses protested last week against the government to keep going to college here.

Some 600 Chinese students at various campuses around the United States in a student protest and held a protest rally at the Massachusetts Institute of Technology last weekend to object to a new Chinese government mandate to force thousands of them to return home.

"It is a bread-and-butter issue," said John Long, a 40-year-old Harvard doctoral candidate, who at a press conference last week, "I need time to study comparative literature."

But the Chinese are dealt. Boston University History Prof. Melvin Goldman at the same conference, may be deeper than that.

Goldman saw the new Chinese government effort to keep the country out of the "Western idea" that will unlock SATs for thousands of students who believe they should have because they're nervous.
Crackdown on Greek hazing

(CPS) -- Administrators at 2,700-student Hope College in Holland, Michigan, had had enough.

Hearing of "life-threatening" hazing, the administration put pledges in the middle of the night, forced them into a "stove sale," staged mock sexual acts during a "slave auction" -- at the Arcadian fraternity, they kicked the chapter off campus March 3.

"It was the second time in a year we had disciplined a fraternity," the administration said.

But for the first time at Hope, this was not just for one campus: other campuses around the country, administrators probably would agree.

"If that's their opinion, that's fine," said Hope spokesman Tom Renner. "But there's a growing national awareness that Greeks must be responsible citizens."

Still, Hope -- when 300 students signed petitions complaining administrators were too soft on hazing, and fraternities and sororities were charged with the most recent incidents -- had 50 members quickly discipline Greeks.

Since February 1, for example, Duke and Rutgers universities and the universities of Rochester, Texas, and West Virginia also have disciplined, suspended or barred outright certain chapters.

**Recruitment with football**

(CPS) -- To boost their public profiles and shrinking student bodies, some Midwest colleges in recent weeks have adopted an unusual strategy: They have decided to field football teams.

A California junior college, for example, announced it may go to play football in its first year and field a varsity team.

A 50-member club, for the first time in its 11-year history, is to play football.

Two week ago, Trinity College, a church-affiliated Illinois school that enrols about 600 students, announced it was fielding a team.

"We have to do what we can to be competitive with other small, church-affiliated, liberal arts colleges," said Bob Moeller, Trinity's athletic director.

Another school, Greenville College, started a team last fall but dropped it without a gridiron squad. The team did well in its final season.

School officials, however, helped attract dozens of new students by giving the school a larger public profile.

Greenville's success, said Moeller, "is a major change."

"Another thing is that Trinity is healthy and doing well after a couple of tough years," the athletic director said.

---

**Student crime wave**

(CPS) -- An odd crime wave washed over 2 campuses recently.

At the University of Pennsylvania, police arrested 2 students, including a 35-year-old Saudi student, for a series of burglaries.

And at the University of Texas at Austin, police caught the grand theft of a campus leg lamp, a plastic reproduction of a work of art.

"We had a couple of thousand dollars," estimated UT librarian John J. Heidt.

"We would never remove enrollment at a college drop-off," the school's head of public relations said.

"I'm no jock," said Moore, "and I don't think too many of us are doing big trouble."
STAGES

FAMILY RESTAURANT

* Complete Menu breakfast, lunch, dinner
* Dinner Cocktails
* Breakfast All Day
* Greek, American, Italian Specialties
* Cup of Soup w/Deluxe & Hot Sandwiches
* Carry Outs
* Fresh Pastries Daily
* Soda Fountain
* Appetizers
* Private Parties Up To 35 People

20 DAYS UNTIL GRADUATION!

BUILD A CAREER IN THE CLOUDS.

Learn how to fly helicopters in the U.S. Army. Not only could it be one of the greatest experiences of your life, but it could be the start of an exciting career. The Army's Warrant Officer Candidate Flight Training Program makes it all possible. To qualify, you'll need a high school diploma and, preferably, at least 2 years of college. Before you learn to fly, you'll need to complete Army basic training and pre-flight training. But once you complete your flight training program, you'll be an Army Aviator. And you thought only birds got to wear wings. Call your local Army Recruiter today for more information.

FROST INSTITUTE of Professional Psychology

Frost Institute is an accredited graduate school. Our mission is to give you the tools to pursue knowledge, skills, abilities—to be effective psychologists.

We offer two graduate degrees:
- Doctor of Psychology in Clinical Psychology
- Master of Arts in Psychology

Our five-year Psy.D. program develops well-rounded, highly skilled practitioners. This is followed by at least one year of internship required by the APA. Our five-year M.A. program builds a strong foundation in theory and clinical training for the Psy.D. student. You also have a choice of three learning environments: campus in Evanston, Illinois or in Chicago suburban. And we provide minority scholarships.

For more information, write or call:
