Admissions wins awards

IIT received national recognition recently when two new admissions brochures were honored with Merit Awards in the first Annual Advertising Awards. IIT was entered into the division for schools with 5,000-10,000 students.

The admissions office has been working hard to capitalize on information sent to prospective students, which had undergone many revisions for 3-4 years. The "search piece," which is sent in late April to May to high school students, performed well on the PSAT test, won the Merit Award in the direct mail category. A larger brochure, which is sent to students who send reply cards to IIT to request more information, was also honored. Both brochures received the Merit Award in the "viewbook" category.

Collaboration between IIT Public Relations and the Administration was deemed necessary to choose the content of the brochures. For design expertise, Spruill and Company, Inc. was chosen to be part of the team. The Spruill representatives interviewed with faculty, staff, and students and spent several days photographing last spring.

In addition to the search piece and viewbook, several other new admissions publications were produced including a new pamphlet describing the freshman year at IIT, a booklet about women at IIT, and a brochure of information about the Career Association Program.

In May the new admissions pamphlets will be reviewed by CASE, the Council for Advancement and Support of Education. This is a major lobbying group for education and they will be presenting their findings to the National Council for Education next spring. The prospects for another award for IIT look promising, should it be decided to use the IIT viewbook as a ...continued on page 10

On-going orientation helps freshmen

Everyone knows how hectic freshman year can be. Massive efforts resulting in several dozen counseling services are working to change that. This student guide, the quality and quantity of service for freshmen is being improved with a new On-going Orientation.

The traditional freshman orientation has taken place during the summer. Once the fall semester begins, the students were left empty, but with the returning students, the orientation continues. The counselors at the counseling centers are busy and ready to help.

Recently, Project Hawk was created to provide additional counseling for freshmen. These counselors have been utilized for teaching personal computer skills, but are also available to advise the freshmen on other problems. Students cannot learn the ropes (such as how to deal with financial aid problems, deciding which courses to take, and choosing a major, etc.) in just one summer," said Dr. Bernstein. Engineering at the University of IIT Counseling Center. The new idea is to have the counseling staff work with the freshmen in the summer keep close contact with them throughout the freshman year. They will act more like a big brother or sister than a parent role. The staff will give support and advice about the ups and downs of college and the intricacies of getting around from experience.

Orientation Aids are chosen by their genuine interest in the freshmen, students. Each aid is assigned to approximately 20 students. They are expected to contact their aides weekly or bi-weekly. Training consists of 3 levels: crisis intervention, listening skills and referral skills. When the OAs handle a problem, they are taught to direct the student to the Counseling Center or other appropriate department.

Through this program freshmen will hopefully learn good study habits, how to read a textbook, how to deal with homesickness or IIT-sickness, what to do about problems with professors, and many other things. There is a detrimental effect on their academic career at IIT. This spring the OAs from last summer will be counseling the 400 freshmen, but any student who is interested in helping with this program should contact Dr. Shapiro at x5003.

Dr. Bernstein began his speech by conveying his observation that a change has occurred in the environment of universities. This change is due to engineering and scientific advancements such as computers, lasers, and...continued on page 10

Arzbacher named IEEE Fellow

Robert G. Arzbacher, director of IIT's Pritzker Institute of Medical Engineering, has been named a Fellow of the Institute of Electrical and Electronics Engineers. Dr. Arzbacher was honored for his engineering contributions to the field of electrocardiography.

A pioneer in the field of applying computer technology to the study of the human heart, Arzbacher has authored scores of papers on the subject. Among the studies currently being conducted under his direction is the Pritzker Institute's project dealing with computer-controlled diagnosis and treatment of abnormal heart rhythm.

Memphis, the University of Illinois-Chicago, and the U.O.I. Medical Center. He was director of the Medical Engineering section and attending biomedical engineer at Rush Presbyterian St. Luke's Medical Center and worked as an electrical engineer at Argonne National Laboratory. He has acted as a consultant to the American Heart Association, G.D. Searle & Co., the University of Tennessee College of Medicine, and Argonne.

Arzbacher said he was "very pleased and honored" to be among those chosen for recognition by the IEEE's board of directors.

A trip around the world

International programming begins today in anticipation of International Festival 1988, which will be held on Friday, March 4. In order to encourage the IIT community to get ready for Friday's Festival, international entertainment will be provided at noon in the Gallery Lounge of the HUB each day of this week. The schedule of programs is as follows:

Monday, February 29

Videotape of the Carnival in Brazil

Tuesday, March 1

Videotape entitled "People of the Dragon"

Wednesday, March 2

Live performance by Diqialis and the Women of the Veil

Thursday, March 3

Videotape entitled "Suleyman the Magnificent"

On Friday, March 4, the HUB will be alive with the sights, sounds and smells of International Festival 1988. From noon until 5:00 pm, IIT students, faculty, staff and guests will present cultural displays and sell food and cultural items in the HUB Rotunda. The event continues throughout the weekend in the Ballroom. Cultural films and videos will also be shown during this period. The evening's entertainment program, featuring music, dance and cultural traditions of various countries, will begin at 7:00 pm in the HUB Auditorium.

The International Festival is an annual, multicultural event which is always greatly anticipated and enjoyed by the IIT community. Everyone is encouraged to attend.

Should your prof. be an entrepreneur?

by Robert Huston

Thursday, February 25

Melvin Bernstein, the Provost and Academic Vice-President of IIT, gave a speech entitled "Should Your Professor Also Be an Entrepreneur?" The speech was the first in the Center for the Study of Ethics in the Professions 1988 series.

Dr. Bernstein began his speech by conveying his observation that a change has occurred in the environment of universities. This change is due to engineering and scientific advancements such as computers, lasers, and...continued on page 10

Privatized Mail: Bernstein invited students, faculty and staff of IIT last Thursday. The event was sponsored by the Ethics Center.
“Mom says the house just isn’t the same without me, even though it’s a lot cleaner.”

Just because your Mom is far away, doesn’t mean you can’t be close. You can still share the love and laughter on AT&T Long Distance Service.

It costs less than you think to hear that she likes the peace and quiet, but she misses you. So go ahead, give your Mom a call. You can cheer up a room later. Reach out and touch someone.

News

A series of editorials is published by the Associated Students of the Illinois Institute of Technology. These interviews promote the kind of open exchange that I wish this administration to be known for. Get involved...ask a question.

Yours truly,
President Meyer Feldberg

Finding your niche

The term "University Community" is frequently used to represent undergraduate and graduate students, faculty, administration, and staff engaged in a multitude of activities. But a true "community" cannot be defined in superficial terms. Communication and growth must be fostered if the implied interrelatedness of the Community is to make it effective. I am very pleased to say that at IIT we have formulated a plan of action to tap our resources and, just as important, to build and reinforce relationships that are all too easily taken for granted.

We are in the process of developing programs to encourage academic initiatives and establish creative avenues for student involvement. We are trying to stimulate interaction between and among segments of the IIT University Community, business and industry. As one tangible result, several months ago the Student Leadership Council was formed consisting of representatives from administration and student representatives to address issues of mutual concern and to develop plans of action. Decisions have been made and policies have been implemented because the participants

To the editor:

The news article published in the February 15th issue, entitled "Bishops okay discussing condoms" had an incorrect title and even more incorrect byline. Bishops believe: bishops may not be given their approval to teaching about condoms, but postponed the discussion to next meeting, in the spring. In fact, there was an unanimous agreement that the Church in no way would even give the impression of supporting the use of condoms. Only a few members of the bishops' conference remained unconvinced about the direct harmful effects of the teaching programs in question, which had been started, in any case, without their permission.

As you know, the name "catholic" means "universal" and entails a full adherence to the Creed points that the Church itself cannot change (either here nor in the Vatican) because they are a legacy from Jesus Christ. The prohibition of contraceptive aids (such as condoms) and of extramarital sex are part of these points, clearly explained in official Church publications such as "Catechism of the Catholic Church" and "Liberation of Women in the Church". The bishops want to ensure that the Church in no way would even give the impression of supporting the use of condoms. Only a few members of the bishops' conference remained unconvinced about the direct harmful effects of the teaching programs in question, which had been started, in any case, without their permission.

To the editor:

The chronically broken toll gates at the State and 22nd Street entrances to the general and the faculty parking lots (perhaps other lots too), my opinion is that these are usually smashed over the weekends. My suggestion is, take them off Friday afternoons before 5:30 PM and put them back Monday mornings before 8:30 AM. This will not only cost something in overtime, but it may be more than replacing the barriers. Further concern is the matter of cost, announce a firm tow policy, and a starting date, and tow and charge. Apply the tow charge net gain to the cost of the gates. If towing requires some license, or it is not easy to create such bad feelings that we may lose students, hire a towing firm and give them access to the parking lots. They specialize in hard feelings. Lest the students feel I am picking on them, at all. But you have the option of taking your tuition money somewhere else. Employees and Faculty! To paraphrase an old legal phrase, throw the bastards! The other legal phrase won't get the scofflaws off the hook this time; tow and be damned!

Response:

Dr. Ruiz:

If you will notice at the beginning of the article in question there is an acronym: CPS. This stands for College Personnel Services. However, "CPS" has been used as an abbreviation for College Personnel Services, and in this case, it was used to refer to the specific version of the article. This was written by Mr. J. M. Robin, who is employed by CPS. The title "CPS" suggested for the article was "Catholic College Try to Balance Dogma with AIDS Program," "Bishops Okay Discussing Condoms," and "Sex Isn't Extramarital Sex." If you disagree with the title or content of the article, contact the source: CPS, 2005 W. Second Ave., Denver, Colorado 80219-1630.
**Announcements**

**Union Board**
The Union Board proudly presents the hit film Roboco in the HUB Auditorium. Showtimes are: Thursday, 5:15 PM and Saturdays, 7 and 9:30 PM. The band will perform a special set of music to set the mood for the evening. Tickets are $5 and can be purchased at the box office.

**Gallery**
The HUB Gallery Lounge announces an exhibit by Lawrence W. O'Hara, whose photographs which call attention to the geometry and beauty inherent in contemporary buildings. The show will run until March 17. For more information call x3075.

**I-fest**
The annual International Fest will be held during this week starting with videos of exotic places on Monday, Tuesday, and Thursday in the Gallery Lounge all day. Friday is the day of the food fest at I.T. Come and taste the foods of many different lands. Then stay for the big International Fest variety show in the Auditorium that starts at 7:00 PM.

**Passport**
Did you receive your IIT Hermann Hall Passport yet? Your passport to savings in the HUB all semester long! Use your Passport through the semester and be eligible to win a free trip to New York. Enter your Passport in the drawing. No purchase is necessary. See the HUB Director's Office Staff for official rules or call x3075. This week's prize is a pass to the Versailles, with the purchase of any of the fine entrees offered in the Cafeteria. Call x3075 for more information on the discount.

**Ski**
Union Board is sponsoring a skiing trip. For more information, come to the Union Board Office in the Programming Office of Hermann Hall or call x3068.

**VCRs**
The Hermann Hall Audio-Video Department rents VCRs at low student rates for nightly and weekend rentals: 80/34. See also box next to television/ cages to reserve equipment. Watch for details in this column on the upcoming Mexican Fiesta to be held for three days in March.

**Other News**
The E.L.T. (beets, lettuce, and tomato sandwich) is back in the Cog. Get ready for the return of Hermann All Night Long. More information about this wonderful event will be provided in next week's Union Board News. In the meantime, you can still enjoy the upcoming Mexican Fiesta to be held for three days in March.

**Taxes**
Notice to foreign students...In the dark about how to file your 1987 tax returns? Have no fear...the IRS will be here...for a tax seminar on March 11, 1988, from 12 noon-2:00 PM in English 100 (first floor). This seminar is free of charge. If you have any questions, please call the International Office at 507-3077.

**MacClass 101**
The Macintosh Users Group is being held in the Macintosh Users Group Room, T101. The Macintosh Users Group Room is located on the first floor of the Macintosh Building. The group meets weekly on Wednesdays at 2:00 PM. The group is open to all students, faculty, and staff. If you have any questions, please call the International Office at 507-3077.

**Service**
The Sunday Eucharistic Prayer Service of the Word and Holy Communion will be celebrated at 11:30 AM. Come and join us in this beautiful service. The service is open to all, and all are welcome.

**Jackets**
Measurements for athletic award jackets will be March 26 from 12:30 PM to 2:30 PM in the Schommer Room of Keating Hall. All athletic award winners please attend to be fitted for your award jacket.

**Union Board**
Events don't just happen. Join the Union Board and make them happen. The Union Board is an organization on campus whose mission it is to create and maintain the social, cultural, and recreational atmosphere of the I.T. community.

**Encore of Thanks**
The people of IIT's concerned and generous response to the financial needs of the graduate student family budgeted out of their apartment has been impressive and inspiring. The many contributions of basic necessities and financial aid has communicated the sensitivity and concern for the human warmth and humanity of IIT's community. Such an experience reflects once more the desire of people especially to support those in this hour of their human journey.
Get Skills
Many students graduate from IIT without knowing much about the school they’ve invested so much in and without valuable communication skills. You can conquer both problems by becoming a part of WOUJ-FM. You will learn to talk and listen and actually get to know what’s going on around IIT. You can also learn and practice communication skills that can last a lifetime.

Rapid growth has left us with openings for broadcasters, committee members, and executive board officers. Come up to a general meeting on Tuesday, March 1 at 12:10 PM in the HUB Mezzanine. All students are welcome to attend. The specific topic will be announced in the next issue of Technology News. This event is sponsored by Eta Kappa Nu, the electrical engineering honor society.

mtg change
The Campus Life Committee meeting has been rescheduled for March 25 (the original date was March 9). The Campus Security meeting has been rescheduled for March 9 (the original date was March 5). Please make a note of these date changes. You must confirm your plans to attend these meetings by contacting the Student Life Office (x3060) no later than the afternoon preceding the meetings.

Hyper Iodine
The IIT Chemistry Department is sponsoring a seminar on hypervalent iodine in organic synthesis, scheduled for March 15 at 12:00 PM in 116 Wainhock Hall. The speaker will be Professor Robert M. Morin from the University of Illinois at Chicago’s Chemistry Department. The seminar will describe the synthetic utility of hypervalent iodine reagents such as I[II] and I[III] for alpha-functionalization of carbonyl compounds. Coffee will be served at 12:30 PM in the Wishnick Hall Lobby.

Be famous
The admissions office still needs women to volunteer to model for new award winning (see article in this week’s issue of Technology News) admissions brochures. Friday, March 4. Women volunteers are also needed for a “Tag-along Day” designed for prospective students. For all you have to do is take somebody to class with you. Call Ruth Erickson in the admissions office (x3026) for further details.

N.O.M.A.S.
The National Organization for Minority Architecture Students will meet Tuesday, March 1 at 10:00 PM in room 306 of the HUB Mezzanine. All architects and design majors are welcome!

Taw Beta Pi
The Illinois Beta Chapter of Tau Beta Pi, will be holding a meeting on Monday, March 3rd at 7:15 PM in 131 EIU. Attendees are asked to bring a quarter as a donation to our national scholarship fund. The donations will be sent to the national office.

Win $1
The semi-annual Eta Kappa Nu computer programming contest is coming up soon! Registration forms will soon be available in the CS and ECE department offices. All members and willing members are encouraged to participate. There will be separate divisions for people with CS100 or less and more people with more programming experience. Contact Luis Martinez at 539-5726 or Natasha Richardson at 3328.

Preparation
The newly revised (collectors edition) WOUJ-FM broadcast schedule. Look for it in the next issue or two.

TechMate
This week’s event is a party for the FirstMates. The party will be on Thursday, March 3rd at noon. Mates should call and invite their FirstMate to the party. Chris Sue or Dave for special instructions on the party.

NTSA
The Student National Technical Association is planning a room/su/Student social to be held on Friday, March 4 at 6:00 PM in the Faculty Club Lounge in Hermann Hall. This event will offer the opportunity for current NTSA members and alumni to acquaint themselves and to foster relationships between today’s and tomorrow’s minority professionals. Some of the alumni will brief the students on topics concerning the corporate world. The guest speaker will be Silas Purcell.

In addition to NTSA students and alumni, members of the Chicago Chapter of the National Technical Association will also attend. Please don’t miss out on the chance for a stimulating conversation and delicious fare afterwards. For further information, contact Lydia Gourey or Lynette Hutcherson at 567-5854.

All Students
A speaker from AT&T will be here Tuesday March 1 at 12:30 PM in the HUB Mezzanine. All students are welcome to attend. The specific topic will be announced in the next issue of Technology News. This event is sponsored by Eta Kappa Nu, the electrical engineering honor society.

Sign Ups
There will be no sign up week the week of February 29 - March 4 due to Spring Break being the week of March 14-18.

Presentation
Sheetz Corporation will be having a company presentation in Hermann Hall on Monday, March 7 from 4:00 - 5:00 PM.

Tech Directors
ITIV is in need of Technical Directors (Camera Operators) for the IIT WEST Campus located in Glen Ely, Illinois. Job entails operating three camera studios during live broadcast. Interested persons should contact 587-3460 or Room 228 in the Stuart Building.

Interviews
The following companies will be interviewing at the Placement Office during the week of February 28 - March 4:

- Monday, Feb 28
  - Underwater Laboratory, Inc.
  - Zenith Electronics
  - Illinois Bell
  - Midwest Technical

- Tuesday, March 1
  - LTV Steel
  - Sears Roebuck & Co. (2 schedules)
  - USI Chemicals Company
  - Monsanto

- Wednesday, March 2
  - Hughes Aircraft Company
  - Amoco Company (Whiting)
  - Northern States Power Company
  - Pneual

- Thursday, March 3
  - Navistar
  - Factory Mutual Engineering
  - Digital Equipment Company
  - Kraft, Inc.
  - Bell Communications Research
  - Scott Associates, Inc.

- Friday, March 4
  - NASA-JF Kennedy Space Center
  - USS-USX Corporation

Ask an Expert
WOUJ-FM and Technology News will be conducting interviews with senior administrators during the Spring semester. The formal of the interviews will be short statements followed by a question and answer session. The questions will be provided by you, the IIT community. Provost Bernstein will be interviewed on WOUJ on Thursday, March 10 at 12:10 PM. Professor Feldberg will be interviewed on Wednesday, March 23 at 3:30 PM. More details in later issues of Technology News. In the meantime, if you have any questions that you would like to ask Professors Feldberg or Bernstein, send them up to WOUJ or Technology News, both located on the fifth floor of Main Building.

Free Concert
The Vandercook College of Music Wind Ensemble will be playing at IIT’s Hermann Hall Ballroom on Thursday, March 3 from 7:30 - 8:30 PM. Works by Saint Saens, Offenbach, George Gershwin, and Low Preit will be performed. All are welcome to attend.
Avoid the Dan Ryan

Beginning March 8th, reconstruction of a critical stretch of the Dan Ryan Expressway (I-90/94) between 31st street and the Eisenhower Expressway will begin. A total of 11 lane closures will take place. All southbound lanes will be closed 4 weeks, and then 5 lane closures will be transferred to the northbound lanes, with two lanes for each direction. In addition, the Dan Ryan expressway ramps will be closed, including the 31st street ramp near IIT. Dan Ryan expressway reopened until March of 1989, when phase two of the project will begin. At that time, northbound lanes will be closed and traffic transferred to the southbound lanes. It is expected that the entire project will be completed by November of 1989 at a projected cost of $210 million. Beside regular maintenance work, portions of the Dan Ryan expansion will be widened from four to five lanes.

Why is this work needed? The Dan Ryan first opened in 1964. Since that time, the expressway has been the most heavily-traveled expressway in the world. Each day, approximately 225,000 vehicles use the Dan Ryan. Although the expressway is structurally sound, it is expected to be made soon. The heavy traffic load is causing not only traffic jams and accidents, but also driving on the Dan Ryan more hazardous. For instance, in 1988, there were 17 fatal accidents on the expressway from the Eisenhower to the connection with I-57, making it the most dangerous stretch of the Dan Ryan expressway in metropolitan Chicago. Furthermore, more accidents have been reported from Roosevelt Road to Cermak Road than anywhere else in metropolitan Chicago - 753. Expanding the number of lanes, widening and improving the shoulders, improving ramps, and replacing or reinforcing support pillars will make the Dan Ryan a much safer environment for its users.

Because the traffic on the Dan Ryan will only get worse, the Illinois Department of Transportation (IDOT) has implemented all necessary to avoid the Dan Ryan by taking alternate routes. When using Dan Ryan, they suggest you use Indiana and Michigan Avenues or Lake Shore Drive. If you make any mistake, information, alternate routes, or traffic condition reports, you can call IDOT Transpations special hotline at (312) DOT - INFO.

The campus police would like to offer 10 tips to protect yourself while in your car:
1) Always keep your vehicle in good repair.
2) Keep plenty of gas in the tank at all times.
3) Keep your doors locked and windows closed.
4) Keep change in your vehicle for emergency telephone calls.
5) Don't pick up hitchhikers.
6) If your vehicle becomes disabled and someone stops to help, roll down your window about one inch and ask them to call the police.
7) Limit traveling to well-lit, heavily traveled roads when possible.
8) If you happen to stop at signs or traffic lights, keep your vehicle in gear. If threatened, sound your horn and drive away as soon as possible.
9) Protect yourself from "smash and grab" type incidents, store valuables, including purses and briefcases, etc. in the trunk or out of plain view.
10) If you think you are being followed, proceed to the nearest location where you can get assistance (police, fire or safety stations, gas stations, etc).

The Heart" comes back to life

After a year of silence, the Museum of Science and Industry's famed 16-foot tall whale, "The Heart," will be reinstalled on the north side of the building by the time the renovated exhibit, "The Heart," opens Tuesday, Feb. 16, at 10 a.m.

Sponsored by the American Heart Association, "The Heart" exhibit examines the ways in which heart disease can be prevented.

According to Museum President and Director James S. Kühn, "The Heart" exhibit is an "active, entertaining and educational exhibit. More importantly, it's a relevant exhibit, which is timely for heart disease in this country. We are pleased that our visitors will be given an opportunity to learn about preventing heart disease."

The New "The Heart" exhibit opened in 1962. It represented the most up-to-date information on the heart that was available at the time. It was designed by Chicago artist Gary Wilner, M.D., co-chairman of the Heart Association's exhibit. It was the first major exhibit of cardiac research and training at Evanston Hospital. Since then it has been exhibited in 866 cities and has been made that it is extremely important to provide Museum visitors with all the medical science knows about the heart," he added.

Join the Olympic ranks of science pioneers such as Homer, Sophocles, Plato, Euclid or Thucydides by entering MIT's annual writing contest. The competition is now open, and all undergraduates are encouraged to enter. Prizes in four categories range from $250 for first place to $50 for third place. Deadline for entries is March 28.

The Edwin H. Lewis Essay Prize, with prizes of $250, $150 and $50 for the top three entries, is open to all undergraduates and offers prizes of $250, $150 and $50 for the top three entries. Short stories, one act plays, and screenplays are eligible.

With the Briefs Booklet: Part of the Institute of Design will begin testing full scale mockups at the Museum of Science and Industry's new interactive dynamic design techniques early this week. The exhibits being tested represent a new way for museums to provide "real" communication media available today. The project is to be completed by the end of 1988, according to Patrick Whitney, Chairman of the ID.

"Our concern is not so much designing the exhibit, as seeing how they can optimize the use of video, computing and interactive interface to bring these media together, as one. This allows the exhibit to be interactive and dynamic so that the observer responds to the exhibit, answering questions or solving problems, rather than just being dynamic, dealing with motion of objects," said Whitney.

"We personalize the information so that it appears to a broader spectrum of people."  "Exhibition design is difficult because of the wide variety of people who are involved in the process," Whitney.

The Dean of Student Life office will hold a series of workshops for students and faculty on campus. The schedule for the March workshops and their instructor is as follows:

3/1 - LEADERSHIP - For current student leaders to strengthen their leadership skills. Instructors: Anseim Amadio, Chaplain.
3/3 - GOAL SETTING - Are you ready to set your personal and project goals, and create a system to evaluate the entire process. Where is your organization going and where are you? Instructor: Nathen Keeth, Asst. Dean of Student Life.
3/5 - CLUB OFFICERS IN ACTION - How do you become a good officer, duties and responsibilities, maintaining records, advantage of meeting as small group. Instructor: Anseim Amadio, Chaplain.

3/7 - PROBLEM SOLVING - Recognize and evaluate problems, determine and develop worthwhile solutions through understanding and application. Instructor: Josephine Dawson, Asst. Dean of Student Life.
3/9 - FINE TUNING - Understand and explore the basic concepts of communication. Also learn about the non-verbal skills necessary to be a good listener. Instructor: Laura Nettow, Asst. Dean of Student Life.
3/12 - REPORT REDUCTION - Dealing with group conflict through discussion. Instructor: Anseim Amadio, Chaplain.

"Any student interested in attending any of these seminars can call the Dean of Student Life office x 3074.

Class of '90 parties

On Tuesday, February 9, local media, the occasion of the dog roasting over a fire, and the strange sight of IIT students in their finest business attire, could be witnessed in the HUB Ballroom. What was going on? A Beach party, sponsored by the Class of '90. The first beach party of the year was the event, and a chance to relax on a Tuesday night. Meanwhile, the American centennial celebration was in full swing with over 100 students gathering in the Ballroom from 3-5 p.m. Picture perfect, a good crowd of commuters, Greeks and dormers involved throughout the afternoon. Besides refreshments and hot dogs roasting over the Ballroom fireplace, there were open bars for the attending, boxers shorting "Beach Party 88" were handed out to all 1990 graduates.

As an IT students know, 1990 marks the beginning of the year-long celebration of the Centennial. Although the Class

ID department works with MOSI

by Chris Conley

Think of the Institute of Design and the Museum of Science and Industry. Think of the art and science and teaching and training and communication and entertaining and educational. Think of the Institute of Design, the Museum of Science and Industry, and you have the perfect symbiosis.

"I think the Institute of Design is doing very interesting work," says Whitney. "They are just coming up with another name for their studio. I think it's going to be called 'MOSI.'" Whitney also has high praise for the Institute of Design's work, "I think they are dealing with a very interesting theme that has a lot to do with Baden Powell, I think they are dealing with a very interesting theme that has a lot to do with the future of communication technology."
Savage is average

by Mark Punduru

Over the course of six albums, Eurythmics have exhibited a puzzling schizophrenia. From soaring rhythm and blues to poignant synth-pop, they've been capable of real emotional impact - but they've also been frigidly distant, as on the cold Touch. Their last LP, Revenge, was upbeat guitar-driven rock, by contrast, Savage is tame and mannered.

Savage, to give it its due, is a more interesting image of what could have been. Certainly not a total loss. The first single, "I Need a Man," is gritty R&B with raucous guitar and Anna Lenox's deliciously belted-out vocals - a less tuneful reprise of "Be Your Self Tonight's, "Would I Lie to You?," "I've Got a Lover (Back in Japan)" and "Wide-Eyed Girl" are engaging songs, similar (but distinguished by the staccato declamatory stanzas. And "You Have Placed a Chill in My Heart" is ironically, in light of the title, scarily, punchy, with singing as compelling as anything on the marvelous Revenge.

Unfortunately, it's all downhill from there. "Do You Want to Break Up?" is merely passable; the chorus has a chirpy, bubble-gum hook, and the lyrics are standard-issue angst: "Got a heart filled full of lead/ Pocket full of hearts/ Can crash in my head." "I Need You" could have been an affecting folk lament, but interspersed outbursts of audience laughter and overwrought lyrics ("I need you to really feel/ The twist of my break breaking") turn it into a humorless self-parody.

Another possible attempt at humor is "(I Love to Listen to) Beethoven," in which clangorous keyboards accompany artfully arch, snooty spoken vocals that are more annoying than amusing.

The catchy, velvet-smooth chorus of "Shame" is left hanging by detached singing and instrumentally thin strings. The title track, intended to be a portentous slow-burner, is just ponderous and sluggish. "Put the Blame on Me," with scant melody and rudimentary dance beat, recalls the worst of Seventies disco. The technosound nomenclature of "Heaven" can't stand alone, but is also supported by the vocalizations of the lyrics - in their entirety: "That's right/ That's right/ Heaven/ I love to/ Heaven/ Takes a little time." The closing track, "Brand New Day," should have stayed in the vault.

Eurythmics have made some excellent music out of this, and I'm sure, more. Not to mention, taken as a whole, Savage is sadly average.

IIT Residential Community News

Residence Halls Commuters

The Residence Hall Association is an organization that gives students a chance to become a constituent part of campus life in and out of the Residence Halls. It is a student organization, which is completely run by students. Every member of the Residence Halls is automatically a member of RHA.

RHA understands the importance of academic excellence to students at IIT. We also understand the significance of having a good social life, a voice and opinion about your living environment, conditions, a place for social and personal growth, and a place for further development and exercise of present and learned leadership skills. We strive towards the successful completion of all these goals.

We have taken an effort to strengthen the voice of IIT students. RHA offers representation in all aspects of campus life whether it be food, housing, security, or any other area of concern, for the students can be there for a determining factor in future decision making.

It's up to you!
Films:

It's here, people. He's more than a man, he's better than Superman... he's Robocop and he's going to exterminate evil, one body at a time. Come see it, again. Come on, you know you want to.
Thursday 5:15 PM
Saturday 7:00 and 9:30 PM

Concerts:

And when Robocop's done with a hard day's work, he hangs out at the Bog listening to the sounds of Shut Up N Drive. Hear Robocop's favorite music in the Bog.
9:00 PM - Thursday

Focus on

and coming to International Fest, are the gyrations of Djalaal and the Women of the Veil. Come and see the music. March 2. Robocop loves them.
Freeze! I’m a librarian

(CPS) Soviet agents are providing American campus libraries with student records so they can gather sensitive information on students and faculty members they suspect of being communists. The director of the FBI’s Moscow bureau, Howard M. Kinsman, said in an interview with the New York Times that the FBI is now investigating the possibility of a major leak of information.

"I have reason to believe that information is being leaked," said Kinsman. "The FBI is taking this matter very seriously and we are investigating the possibility of a leak." Kinsman refused to say whether the leak was caused by an individual or a group of people.

The FBI said that it has evidence that the leak was caused by a single person who had access to the information.

The leak was discovered when the FBI received a tip from a library employee who noticed that some of the records were missing.

The FBI said that it was not sure if the leak was caused by a single person or a group of people.

"We are still investigating the matter," said Kinsman. "We have evidence that the leak was caused by a single person who had access to the information." Kinsman refused to say whether the leak was caused by a single person or a group of people.

Ecstasy
continued from page 9
It’s "very dangerous stuff," asserted Trina Brugger, associate director of the American Council on Drug Education.

"It kills the nerves in the brain that govern eating and sleeping. It increases cardiac output and blood pressure. It’s very dangerous for anyone with a heart condition," Brugger said.

California’s Institute on Brain Research has shown that a single dose of Ecstasy produces damage in monkey brains.

"Initially," Peroutka believes, "it was thought to have no bad side effects." It became known as a good party drug, one that created a sense of closeness and understanding," he reported.

"Some students see (Ecstasy) as a happy, fun drug, that’s not as scary (as cocaine)," said Charles, a Stanford senior who spoke with Associated Press.

"The day after taking Ecstasy, the user might have a hangover," suffering from aches and depression. With repeated use, the user might experience panic attacks.

New, Peroutka believes, "this drug can kill people at low doses. There is little difference between the dose people take and the potentially lethal dose."

But Dr. Robert Cole, a staff scientist with NASA’s Division of Space Biomedicine, said that while Ecstasy may cause a decrease in humans’ brain receptors, it did not necessarily poison them.

"It took a triple dose of Ecstasy, given intravenously over 4 consecutive days, before brain cell degeneration was shown in a monkey. Cole said.

"People have taken similar drugs for up to 10 years without any loss of IQ."

"If used properly, this drug can be beneficial," Cole noted, adding, "It is potent, it can have a negative effect.

Contest

The Freshman Essay Prize offers awards of $200 and $100, is open to freshmen only, and encourages essays in the same categories as the essay prize for upperclassmen.

For all entries in essay categories should be received by an educator with no special training in the subject of the essay.

The Moleh Poetry Prize is open to all undergraduates and graduate students, awards of $200 and $100. Entries may be submitted to demonstrate mastery of the craft of poetry are encouraged. All entries will be held for 1 year, then posted throughout the campus, and are available from the Hunt Library, University of Life Sciences.

Awards

The conversion of research based publications in a recent speech. The admissions brochures will be slightly revised this spring. For this reason, student volunteers are needed for photography sessions Friday, March 4. If you think you have potential as a model (even if you don’t), this could be your chance to be discovered! Contact the admissions office for further details.

The quality and quantity of prospective student applications also look good this year. Student interest in science and engineering has taken 25% in the past 2 years, whereas the number of high school graduates is dropping. That fact is that IIT is currently ahead of last year’s application reception rate. The quality of the applications is up as well, according to Bill Black, Director of Admissions and Financial Aid. Nationwide, standardized tests are down, but the average scores for IIT applicants are rising. This could mean high scores, low test scores are improving, too, says Black. The applicants are showing a great deal of interest in attending IIT.

Other modes of student recruitment are also in play. Wednesday, March 2 will be a women’s ‘Tag Along Day’ for prospective female students. This event will allow them to see the campus and experience classes first-hand. Current female students who are interested in helping out with this program can contact Ruth Erickson (K322) for more information.

ID

people who will visit the exhibits. The usual routine for the designer is to appeal to a "middle-ground" intellect which results in an exhibit which is too difficult to understand for less educated people and too basic for students from IIT.

Design consulting is not new to IIT. We receive many requests from clients in the visual and communication design world. However, unless we feel it is on the cutting edge of design we will not do it," said Whitney. A project such as the one ID is currently involved in was focused on by both faculty and students. Five graduate students and a sophomore graphic design class are working on this revolutionary visual communication design.

In addition, ID is soon to celebrate its 50th Anniversary, complete with a $125.00 per plate dinner and live auction on June 1st. The President of Christie’s O’London, a famous auction house, will be on hand.

International Pursuit

Sorry about last week, folks, but that is what happens when you miss the deadlines set by Technology News. Here are all of the questions promised to you five short weeks ago. All entries must be in the Dean of Student Life Office no later than 5:00 p.m. on Thursday, March 3rd. The winner will be based on the most correct answers, tied to be broken by lottery. Good luck and see you at the International Festival on Friday March 4th. Cultural Exhibits and food in the HUB Ballroom from noon until 5:00 p.m. and singers, dancers and performers in the Herrmann Hall. Auditorium starting at 7:00 p.m.) Winners to be announced during the evening performance.

Win fabulous cash prizes at the International Festival on Friday, March 4!

First Prize: $50   Second Prize: $30   Third Prize: $20

All 26 questions are as follows:
1) What area of the world is known as the "Ring of Fire"?
2) Name the smallest (in area) independent state in the world.
3) What nation completely surrounds two other independent nations?
4) What is the native tongue of Brazil?
5) Name the only nation that does not place its national name on its postage stamp.
6) Name the three worldwide TV operating systems.
7) What is the longest undefended border in the world?
8) What is the only man-made item that can be seen from the surface of the moon?
9) In what Italian city are cars not allowed?
10) What European nation is called the Bridge Between the East and West?
11) What is the biggest national holiday in Iran and on what day of the year does it occur?
12) What is the most populous nation in the world?
13) In international trade, what do the initials M.F.N. stand for?
14) Name the nations of Eastern Europe.
15) What is the meaning of the name Thailand?
16) Name the smallest continent.
17) What man is considered to be the principle liberator of South America from Spain?
18) What national capital is set on the highest elevation above sea level?
19) One family has reigned continuously in this nation since the time of the Roman Empire. Name the country.
20) What body of water separates the "Pillars of Hercules" from the "Gates of Lebanon"?
21) What island has given its name to a kind of fortified wine?
22) In what nation do the oldest living things live?
23) What kingdom dominated Africa in 1600 AD?
24) What is the lowest point of land and how far below sea level is it?
25) Mexico City is built on the site of what Great Amerindian Empire?

Tie breaking questions:
1) On the Midway Plaisance in Hyde Park, there is a statue of a knight on horseback commemorating a former University of Chicago professor and first president of what country?
2) What great 19th century Chinese novel tells the story of an adolescent youth against the background of deterioration and revival of a wealthy family?
3) Who is the best selling author in the Peoples Republic of China today?

Thank you for your participation and I will see you Friday at International Festival.

Want to be an award winning model?

Be a part of the award winning admissions brochures. Photographs will be taken Friday March 4, all day. Contact the admissions office (x3025) for more details.

Need $$$?

If you can type and want to make some money, call Technology News (x3085) and leave a message. We're looking for a few good reliable typists! The pay is good, the hours are short. What a deal!
Hawks fight for winning record

The Scarlet Hawks Basketball team went 2-1 last week. The Hawks defeated Purdue-Calumet University in overtime, 88-80, and finally took out Northeastern Illinois University, 86-84. The lone loss came at the hands of Concordia College on the road as the Cougars pulled off an overtime upset, 94-106.

The two victories, both Conference games, raised the team’s record to 12-13 overall and 5-7 in the CCAC. The hooters have three games remaining before District 20 play-offs. The Conference leaders are the Missouri Valley, 16-2.

The Swimmer and Diving team will be sending the most qualified to the National Championships ever when seven Hawk swimmers and divers leave tomorrow for the NCAA National Swimming and Diving Championships in the Indiana Aquatic Center in Bloomington, Indiana.

For the three-day championship starting on Wednesday, March 2 and finishing on Saturday, March 5th, some 38 swimming and diving championships will be decided in these four days. ITT has been rated in the top 20, but Coach Matchuch said with a lot of hard work and luck, we could possibly sneak into the top 10. Last year we finished 14th in Gainesville, Florida and the year before finished our best ever with an 11th place in that same meet.

Representing ITT and their events will be:

Matthew Fareed, senior Mechanical Engineering, who has qualified on the 400 yard freestyle and medley relays and the 100 yard breaststroke event.

Katie Koenig, freshman Aerospace Engineering, who will represent ITT on the 200 yard backstroke event.

Troy Akin, sophomore Engineering, and ITT’s top distant freestyle swimmer who has qualified on the 400 yard freestyle relay and the 1650 yard freestyle event.

David Hathaway, senior Mechanical Engineering and ITT’s best distance swimmer ever who has qualified on the 400 yard freestyle relay and the 800 yard freestyle relays.
