New Chair Created With Finkl Donation

Professor Meyer Feldberg, of IIT, has announced the creation of an endowed professorship in Metallurgical and Materials Engineering. The professorship, established through a $200,000 gift from IIT alumni and Trustee Charles Finkl and his wife Lee, will be known as the Charles and Lee Finkl Chair in Metallurgical and Materials Engineering.

"IIT is indeed fortunate to number among its alumni and friends such industry leaders as Charles Finkl and his father, William Finkl. Steel has looked to IIT as a source of engineering talent for much of this century, and the Finkl family has been a bit of the fabric of the university for over the same period. The Charles and Lee Finkl Chair in Metallurgical and Materials Engineering is yet another example of this family's generosity. This particularly generous gift of an endowed professorship provides us with a unique opportunity to bring an outstanding materials scholar to the university, to strengthen both the program and the entire engineering faculty."

Charles Finkl is chairman and chief executive officer of A. Finkl & Sons, the Chicago-based steel forging company that has been a leader in the finished steel industry for much of this century. An innovator throughout his career, which he began as a lathe operator while still a student at IIT, he holds 100 patents and is internationally recognized in the industry for his invention of the vacuum de-gassing process.

Charles Finkl, a 1943 IIT mechanical engineering graduate, has been a trustee of the university since 1974 and currently serves as vice chairman of institutional resources. In 1985, he received the IIT Alumni Medal, the university’s highest alumni honor.

The Finkl family has a long association with IIT.

Study Abroad

You are invited to apply for the 1988-89 IIT/INSA exchange program. This program is available each year for a limited number of junior standing IIT and of the National Institute of Applied Science of Lyons, a French institute of technology comparable to IIT. INSA is located in one of the suburbs of Lyons, the second largest city in France.

Every year since the beginning of the IIT-INS A program in 1965, students from both institutions have participated in the exchange. Applicants must show evidence of successful completion of the first semester of their sophomore year and submit a formal application before the end of that period to the program director, Dr. Zalman Lavan (Room 252- E1). Shortly thereafter, the selection of the participants is made primarily on the basis of academic record and motivation. Knowledge of French is not a prerequisite. Intensive French language courses are provided at IIT and INSA. Candidates must be U.S. RESIDENTS OR CITIZENS.

Letters were sent to eligible students, however, Dr. Lavan feels that some eligible students may have been inadvertently overlooked and he encourages students in the 3rd or 4th (Fall 1989) semester with a GPA below 3.0 to apply.

Successful applicants leave Chicago in the beginning of July and begin the stay in France at a summer vacation camp of their choice operated by the Association of French Universities students. The IIT students proceed to the campus of INSA in Lyon where they attend an intensive language course of several weeks duration.

Grant Spurs Heart Technology

Some radical new ideas shaping up in the national laboratories may offer hope in the continuing battle against heart disease, the illness that claims more lives annually in the United States than any other. One of the places where original thinking is being brought to bear on the subject is IIT. There, researchers at the Pritzker Institute of Medical Engineering are developing a way to implant a computer-directed therapy system inside the body to monitor and control heart rhythm. A grant of more than $1,250,000 from the National Institute of Health virtually guarantees that this high-tech heart treatment will be brought through to clinical reality. Studies up to now, which have extended over several years, have been supported by an earlier NIH grant and by generous help from the Sears Foundation, according to Professor Robert Arzbach, director of the Pritzker Institute.

Arzbach and his medical colleague, Dr. Thomas Bump of the University of Chicago, are the project directors.

"We're naturally very pleased with this high level of support," Arzbach said in announcing the grant. "Especially since it demonstrates confidence in our work by experts who keep close watch on experimental studies going on in many different areas all over the country."

The IIT research takes aim at a type of heart ailment known as atrial fibrillation—which can be described as a speeded-up, uncoordinated beating of the heart; in other words, a form of irregular heartbeat. Atrial fibrillation is commonly associated with a variety of other heart problems, including congestive heart failure, and its presence is an additional aggravating factor to whatever cardiac problem a patient may be suffering. For instance, atrial fibrillation leads to clot formation in the heart, which can cause strokes and premature death.

When atrial fibrillation is a chronic problem, it is usually treated with a combination of drugs, which may include digitalis, procainamide, quinidine, disopyramide, verapamil and others, including coumadin, a blood thinner. The problem, however, is that all of these can produce serious side effects when taken on a regular basis. In many heart patients, therefore, an occurrence of fibrillation can only be treated with an intravenous injection or electric shock, both requiring a trip to a hospital emergency room.

IIT researchers developed the concept of automatic injection of a predetermined dose of medicine from a tiny implanted pump whenever any irregular heartbeat begins. The danger of a patient receiving an excess of medication is averted by terminating the delivery of medication at a certain point.
Tech News Poll on Teachers

Attention: students of IIT.

Tech News is taking a poll to see who you feel are the best and worst teachers currently working here at the university. The judging criteria is as follows:
1. Ability to teach. Defined as the skill of getting the students to learn and understand the required text.
2. Willingness to help. Defined as the teacher’s availability in office hours and their willingness to help students.
3. Willingness to help. Defined as the teacher’s availability in office hours and their willingness to help students.

Take a moment and express your opinion apart from what you put on the teacher evaluation forms. Get out some of that frustration that has been building up inside you, before the teacher just wouldn’t listen. Or take the time to credit the teacher responsible for getting you through the class. C’mon, just pick up that pen and fill this out. We’ll even give you a week to do it. (Deadline: November 30th)

(please print: Then turn it in to Tech News, 5th floor, Main building or through campus mail)

Sports Quiz

Answers to quiz #5
1. Mike Garrett, O.J. Simpson, Charles White, Marcus Allen
2. Iowa, Michigan, Michigan St.
3. Ohio State
4. Kirk Gibson
5. Bo Schembechler
6. Chris Hinton
7. Miami, Penn State, Oklahoma
8. SMU, Craig James, Ron Meyer
9. Archie Griffin, Ohio State
10. Herschel Walker, Vinny Testafore, Bo Jackson, Doug Flutie, Tim Brown, Mike Rozier
Winner: Daryl Dunker

Answers to quiz #6
1. Wally Pipp
2. Jackie Robinson
3. Gene Autry
4. “Catfish”
5. Mark Fidrych
6. Fred Lynn
7. Joe Dimaggio
8. Frank Robinson
9. Pete Rose
10. Babe Ruth, Joe Dimaggio, Mickey Mantle, Yogi Berra

Math Puzzle

The Math puzzle appears in Technology News on a biweekly basis. All undergraduate students of IIT are eligible to participate. The first student who submits the correct solution in each week receive a prize. The student who submits the largest number of correct solutions, during the semester, will receive a grand prize and a diploma.

This weekly math puzzle is sponsored by the IIT Mathematics Society under the supervision of the Mathematics Department. Solutions should be submitted to the secretary of the Mathematics Department no later than Friday.

*** This week’s prize is $20 and a book donated by the Mathematics Department.

Puzzle:
Consider a country in which there are no roads, and suppose that from each town we construct a road connecting it to the nearest town. Assume that to each town there is exactly one road closest to it. Show that there can be no more than five roads entering any town.

Greek Nite

First Home Basketball Game
Game time 7:30 PM
Schedule of Events:
6:30 - 7:05
Techmate Volleyball Team
VS.
The Faculty Volleyball Team
Warm-Up Time
7:10 - 7:25
Introductions of V.I.P.’s
National Anthem
7:35 - 9:27
Introduction of Fraternity Soccer and
Touch Football Champions and Runners-Up
Also, Fraternity Free Throw Contest

New Tau Beta Pi Initiates

Tau Beta Pi would like to congratulate the 20 new initiates for the fall semester. They are:
Tony Alvizu
Rachel Bell
David Bloom
Kevin Collagey
Michael Hart
Hoot Hur
Jim Huddleston
Bill Jacklin
Troy Leaf
Cara Ly
Steve Martin
Ron Nordmeyer
Barbara Patakby
Emil Sabados
Anh Thandai
Rajeev Trika
Jerry Witsoe
Jim Zmuda

A reminder to all electees and members that the initiation ceremony will be held on December 2, 1988 in the Stuart Building auditorium (room 104) at 5:00 PM. The banquet will be held at the Glass Dome Hickory Pit located at 2801 S. Halsted and will start at approximately 6:00 PM. The cost will be $15 for members (not new initiates) and guests. If you plan to attend please get in touch with Mark Tamowski by Friday, November 25 either by campus mail or by calling him at 685-6013. Finally, the next general meeting will be held on Tuesday, November 29, 1988 at 7:00 PM in 123 E1. Hope to see you there!
The Crusade Marches On

The 1988-89 IIT United Way Crusade of Mercy Campaign is nearing its current goal of $49,000, according to Manny Frias, the Campaign Chairman. The Crusade this year will allocate more than 90 million dollars among more than 400 human care agencies in Chicago and suburban communities.

For this season of Thanksgiving, Frias said, "when we feel so grateful for the many blessings we enjoy, it warms the heart to see how the IIT community is responding generously to the needs of our neighbors in Metropolitan Chicago who are not so fortunate." Frias is especially happy at what seems to be an increase in the number of contributors who pledge a "fair share" or a "fair share plus."

Frias said that President Feldberg, who enthusiastically endorses the drive, is sending a letter to all IIT faculty and staff urging them to fill out and return their pledge cards if they have not already done so. "Although we seem to be doing well," Frias added, "we won't be satisfied until the percentage of the campus community that participates is greater this year than ever before."

If you need a card, you can call Frias (ext. 3347) or Associate Chairman David Zeuser (ext. 3346).

With you, there's a WAY
.....to help people with handicaps to lead more fulfilling lives.

Your gift to the United Way provides education, rehabilitation, specialized job training, recreation and family support services to thousands of people with physical and mental handicaps in Chicago and the suburbs. To those who've given, to those who'll give, Thank You.

The Unknown Reviewers

THE UNKNOWN REVIEWERS IS A NEW WEEKLY FEATURE IN TECHNOLOGY NEWS. THE REVIEWERS, WHO HAVE CHosen TO REMAIN NAMELESS, WILL BE REVIEWING THE THURSDAY NIGHT BOg CONCERTS THROUGHOUT THE SEMESTER.

THE DUDE ON THE RIGHT

Shudd Up N Drive did it again. Every time I've seen them they seem to sound better. These guys just love to play and party, the leader and crazier the crowd, the more they like it. They certainly weren't disappointed with the crowd in the Bog last Thursday, seeing as how it was probably one of the largest of the semester. The last Dean of Student Life, Dean Vice, even made an unexpected appearance.

Talk about a wide variety of music: ZZ Top, Steve Winwood, Whitesnake, Toto, Pink Floyd, even INXS; I think these guys could play just about anything. At one point in the show Jerry Dales, a harmonica player joined the band for a blues set that would make Eddy Clearwater proud. During the blues jam, we got a good sample of what kind of talent the band really had.

The lead guitar player, Marty Carr showed off his guitar expertise with a great jam, which wound up with him playing and drinking while standing on a table; this really got the already excited Bog crowd to their collective feet. They even cowered to the dance music fans with their rendition of the INXS song, "New Sensation," which got the crowd dancing to the delight of the band.

The second set started with a shortened version of the Pink Floyd tribute which they have done during earlier appearances. Having seen Pink Floyd in concert I have to say Shudd Up N Drive does almost as good as a job as the real thing, and they are a lot more fun. At one point in the show some member of the crowd cried out for the band saw which they used last time they played here, but Ray Emsden, lead singer and guitarist, said there was a clause in the contract which read "No chain saws."

Shudd Up N Drive gets a big thumbs up from me. They have the energy, the willingness to have fun of a garage band, and talent that rivals the big names in music. They seem to have a lot of fun when they play, and they want to see the crowd have as good a time as they do. It was nice to see a large crowd at the Bog again, and I hope it continues, maybe if it keeps up, Bog Bands will survive after all. And remember, go buy Shudd Up N Drive's album so they can buy some hair.

As to the Union Board response to our reviews, I have a comment or two to make. I have no complaints with the bands you scheduled for this semester. On the contrary, this has been a very good concert semester. I also have no problem with original music. 1313 and Shudd Up N Drive both did original songs. It just so happened that I didn't care for Lil' Darlings' music, and thought maybe if they played an occasional song people knew they would help excite the crowd. In closing I just want to say we are only two guys who love to go to the Bog, and thought we would tell others what the bands were like, it's just our opinion. Let's just save the Bog.

THE DUDE ON THE LEFT

If there has ever been a band that has bridged just about all of rock and roll history in the Bog, I would have to say that band is Shudd Up N Drive. This is the third year they have played the Bog, and every year, their selection of songs is fresh, and the energy they have stays at a peak level. A few years ago, they played mostly a heavy metal set with highlights by Judas Priest and Whitesnake. Last year, Shudd Up N Drive's musical selection ranged from a very large Pink Floyd set to The Doors.

This year, I was pleasantly surprised to hear much of the same rock and roll they have been known for, but also reaching into the roots of a lot of modern day rock with a large blues set.

What else can I say that my swell looking counterpart hasn't said already about the show. It was a high energy show full of well played songs that everyone seemed to enjoy. They knew what the crowd was looking for in ranging the music from Floyd to INXS, from Elvis to U2, and from Whitesnake to Toto (how long has it been since you've heard "Hold the Line")? It was a show everyone expected and showed it by singing, dancing, and just having one big party. What really impressed me most was the blues set the band played. It was really a surprise hearing excellent blues jam from a band mostly known for its heavier rock sound. Marty Carr on electric guitar, Doug Jones on Keyboards, and Jerry Dales on harmonica all played very good jams that the Bog crowd received well.

The end of the show brought mostly original songs by the band, most of which were well played and sounded good. The crowd seemed to enjoy them and in the end, everyone went home happy.

I too give Shudd Up N Drive the big Thumbs Up. They are a band that seems to have taken the place of Eddy Clearwater and Lonnie Brooks as one of the premier Bog bands that everyone could have fun with. It was good to see a larger crowd at the Bog this time and I hope it continues, because as Shudd Up N Drive showed, it's always possible to have a good time, even here at IIT.

My comments to Union Board in response to our reviews go like this: I really had no problem with Lil' Darlings except that they just couldn't get the Bog crowd into their original music. I have no problem with bands playing their own songs, in fact, most of the time it is a treat. However, if you notice, most of our reviews are based on a few things: the quality of the songs, whether they be original or cover, the response the crowd gives the band, and the energy the band gives out to the crowd. Bands like 1313 and Shudd Up N Drive both played original music which was well received and an enjoyment to hear, where Lil' Darlings to me, as you put it, just didn't have their act together. They were a good band, and maybe in the future they will be like the 1313's and Shudd Up N Drive's of the world, but the time we saw them, they weren't. The quality of the bands this semester has been incredible, and original songs, if they are good, are always a treat. Let's just hope we can save the Bog for next year so we can hear some more.
Announcements

TECH NEWS DEADLINE

THE DEADLINE FOR ANY INFORMATION TO BE PUT INTO TECH NEWS IS THURSDAY AT 12:00 NOON. ANY INFORMATION RECEIVED AFTER THIS TIME WILL NOT BE ENTERED IN THE NEXT ISSUE. IT WILL BE HELD FOR THE FOLLOWING WEEK.

Tech News

There will be no issue on Monday, November 28, due to the Thanksgiving Holiday.

Winter Carnival And Dance

Need some excitement?? Like to dance?? Want the challenge of competition?? You do!!! Well, good, there will be a meeting to plan and organize a Winter Carnival and Dance for IT. The meeting will be held on Tuesday, November 22, 1988, from 5 - 6 pm in Room 302 of Hermann Hall. Please bring your ideas and comments. A special carnival notice goes out to all creative individuals, plus all student organizations including the Fraternities and Sororities and RHA members. We need support from individuals and organizations. For more information, feel free to contact Rich Dominik at any time through the Student Life Office, x3080.

Commuter Students

The Association of Commuter Students (ACS) will be holding the first meeting of the year and first meeting ever. The meeting will be held on Tuesday, November 29, 1988, from 12 - 1 pm in Room 303 of Hermann Hall. Any and all commuter students are urged to attend, especially all those students that have signed up already. To sign up for ACS, please leave a message in box #87 of the Student Life Office. This organization is for all commuter students at IT.

Faculty And Staff

A Challenge!!! The TechMate organization challenges you to a Volleyball game on Monday, November 28, 1988, from 6 - 7pm in Keating Hall. This event will be preceding the first home basketball game of the season. So, TechMates challenges all faculty and staff that are man enough (and woman enough!!!) to a couple games of Volleyball. Should you accept this challenge, please contact Rich Dominik or Donna Mostavoy through the Student Life Office, x3080.

Winter Carnival

Do you like excitement?? Dancing?? Competition?? Fun?? Well, then this is for you---I have an idea for a Winter Carnival and Dance to be held here at IT during the Spring Semester. This would be a campus wide event. Tentative dates for the carnival are either the 2nd or 3rd week of the Spring Semester. For a Winter Carnival, there could be events all week long, such as snowman building contests, sledding contests, cross-country skiing contests, etc. On Friday at the end of the week, there would be a dance. At this dance, IT could crown a Carnival King and Queen. There will be a meeting to plan and organize a Winter Carnival on Tuesday, November 22, 1988, from 5 - 6pm in Room 302 of Hermann Hall. Please bring your ideas and comments. Any organizations that are interested in helping out, please send someone to this meeting. ANY interested individual is welcome also.

Tired of apathy? Forget what the definition school spirit was? Need something to cure winter blues? Here is a solution!!! This will be a wild event, but, guess what, we need YOUR help, YOUR ideas, and YOUR support. Questions: contact Rich Dominik in the Student Life Office, x3080.

ASME

The American Society of Mechanical Engineers will hold its next meeting on Tuesday, November 22, at 12:30 in Room 118E1. Topics: Winter Annual Meeting, Jewel Day Fundraiser, Regional Student Conference and announcement of our next guest lecturer.

ASME Fund Raiser

ASME will be holding a Shop & Share fund-raising program on December 5, 6, & 7 at all Jewel Food Stores. By shopping at any Jewel on one of these days, 5% of the total purchases, excluding tax and Cosco merchandise, will be donated by Jewel to our organization. ASME will use the money generated by the Shop & Share for funding the Regional Student Conference which IT’s ASME Student Section will be hosting in April 1989. We would like to ask everyone’s help by shopping at Jewel on one of the assigned days. Anyone participating will need a “Shop & Share Identification Slip” to present to the register attendant upon checking out. These slips can be picked up in room 118E1. Thank you for your cooperation.

VanderCook Concerts

This year, VanderCook’s performance bands will be playing at IT’s Hermann Hall in a regular concert schedule. The schedule is:

7:30 p.m., Thursday, December 1, 1988 Concert Choir and Band
7:30 p.m., February 22, 1989 Jazz Band

7:30 p.m., Wednesday, April 26, 1988 Tour Show

Also, the following concerts will be held at VanderCook College of Music, 3209 S. Michigan Ave., 225-6288. Always on Friday concerts take place at 1 p.m. on the days listed below.

December 2
Connie Gottschalk, piano soloist
All concerts are free of charge and open to the public.

Scriptural Encounters

“The Bible and You Today” will meet Wednesday, November 23 at 12 noon in the Field Room of Hermann Hall (SW cor. HUB). Together with faculty and students, reflect and share the intersection of the Word and the Spirit with our daily life at IT.

Chapel Communion

The celebration of Holy communion at the Eucharist will be offered in IT Chapel on Sunday, November 27 at 11:30 a.m. The community is invited to share in this Christian Unity Prayer which integrates both Catholic and Protestant traditions in Scripture Readings, Chant and reflection.

The Sociology of Mental Health And Illness

Why is there a stigma attached to psychiatric help? What is the difference between “counseling” and “psychotherapy”? How does a psychiatrist decide how can you find a good one? How do the training of mental health professionals and the structure of service organizations affect treatment? What is the difference between serious mental illness and the normal problems of living that we all have? Are drug and alcohol problems mental illnesses? Can they be treated effectively by mental health workers? Why do we call crazy people mentally ill? Why do we call mentally ill people crazy? If you have a mental health relative, can you help? Could the Laurie Dann tragedy have been prevented? Who should be able to use the insanity defense? Are homeless people mentally ill? Can we make them get help? Should we? How many psychotherapists does it take to change a lightbulb? Answer these questions and more in SOC 451, Social Psychiatry, this spring. MW1 at 11:00. It is taught by Robert Davidson, who worked in the Psychiatry Department at the University of Wisconsin at Madison before coming to IT.

This course carries undergraduate or graduate credit. Rehab and clinical psychology students and undergraduates with some knowledge or interest are especially welcome, but the seriously curious and those satisfying distribution requirements will not be at a disadvantage. No special knowledge of psychiatry or psychology is required. An introductory sociology course is recommended. If you have questions, call Professor Davidson at (507)-519-240 or stop by Life Sciences 290 or 232 MW1 afternoons.

Colloquium

Professor A. E. Wieczorek of the Institute of Computer Science Polish Academy of Sciences of Warsaw, Poland on Tuesday, November 29th at 4:15 p.m. in Room 242 E1 will speak on Automatic Convexity and its Applications. Automatic Convexity is a subject that has grown in recent years, though it is still relatively little known. The talk presents the main ideas and the author’s original contributions to the subject, including fixed point theorems and their applications to game theory.

Refreshments will be served in the Faculty Lounge at 3:45 p.m.

Amoco Corporation Summer Opportunities

Amoco Corporation has Summer Internships and Minority scholarships for students looking for placement. They will be on-campus December 5, 1988 for a presentation in the HUB mezzanine between the hours of 5pm to 7pm. Interviews will be held in Hall, December 1, 1988. Sign up dates for interviews are November 22nd and November 23rd in Hall, Placement Office, 4th floor.

Requirements:
- Summer Internship - Open to all students with a Computer Science or MIS background only. Must be eligible to be at Senior status by May 1989. Minority students can sign up also.
- Minority Scholarships - Open to all Minority students with a Computer Science of MIS background only. Must be eligible to be at least Junior status by May 1989. **Foreign students must provide documentation establishing eligibility to legally work in the United States.** **Summer Students must be registered with the Placement Office by December 1 in order to interview with Amoco.**

Resume Writing Seminar

Speaker: Daniel Waldstein
Director, Placement and Cooperative Education
Session I
November 28, 1988
12 noon to 2 pm
Session II
December 1
6 pm to 8 pm
Fair Hall Room 301
All students are encouraged to attend these seminars. Recommended especially for seniors and those seeking summer internships. Please call the Placement Office at 567-3637 to sign up for a seminar.
Impress Interviewers

BMSA will hold a discussion on interviewing Nov. 22 at 12:15 in Room 111SB. A representative of the placement office will be giving some tips. All students are welcome.

Interviews

The following companies will be interviewing at the Placement Office during the week of November 21-27.

Monday, November 21
Chicago Area Boy Scouts
E I du Pont de Nemours & Co.
Union Wire Rope

Tuesday, November 22
Eaglebrook Plastics
E I du Pont de Nemours & Co.
Stepan Co.
Kraft Inc.

Pep Club

Are you looking for fun and excitement? Are you tired of your school being known as the 'School for Geeks'? Now's the time to do something about it. Join IIT's brand new Pep Club. We are looking for individuals who are interested in promoting school spirit. If you are interested for more information about the Pep Club, please contact Capt. Mid Snyder, ext. 3981 or Capt. Sharon Pritchett, B46-1965. (Co-Capt.) Tamika Kinsey, 221-6792.

"We don't need no music
We don't need a band
All we need is IT
Cheering in the stands."

Graduate Photos

The IIT Yearbook will offer a Graduate Photo Sitting for all Students graduating this December. It will be held on Tuesday, November 29 and Wednesday, November 30 from 9 - 5 in the HUB room 305. You may sign up for a sitting time at the Student Life Office starting Monday, November 14 until Wednesday, November 23. For more information, please call the IIT Yearbook office at 567-3561.

Plant Tour

IEEE is sponsoring a plant tour to Bodine Electric Company on Thursday December 1, 1988. The tour itself begins at 1:00 and the cost is $2.00. For students who can make it earlier, there will be a lunch at Bodine at 11:30. There is no additional cost for the lunch and all students are welcome to participate. For more information contact Regina Danilov at 676-4342 or John Baruni at 456-5507.

Summer Placement

The Placement Office has summer job applications and minority scholarships (summers) for the following companies:

ARGONNE NATIONAL LABORATORY
NORTHERN ILLINOIS GAS COMPANY
You can pick up applications in Room 407 between the hours of 2pm to 4pm, Tuesday - Thursday only.

Hermann Hall Events

The HUB is closed Thursday, November 24th - Sunday November 27th because of the Thanksgiving holiday. General Cinema ticket prices will be increased to $3.50 on Monday 1, so buy your tickets now and save $.25 on each ticket. Entertainment books are available in the Directors Office.

College Bowl Postponed

Due to timing difficulties, College Bowl has been postponed until the week of January 23, 1989.

Sample Questions and applications are available in the Programming Office and the Student Life Office. If you have any questions, call Michelle at ext. 3074.

Ski Trip

Union Board will be sponsoring a ski trip to Steamboat, Colorado over Spring Break. Details will be printed here in future issues. Any questions should be directed to John Danile (JD) at x3289.

UB passes for next semester will be available soon. They can be purchased at all UB events. Price is $15.00.
The Bog On Beer
by John Abbott
"No hard rules, just open eyes," said Frank Martin.

This was the hand meeting concerning beer in the bog, and the tension that had prevailed during the first meeting had subsided, creating an entertaining. A month ago, when the original meeting was called to order, student leaders had been encouraged by university officials to view the matter as a showcase for the number of pitchers of beer during the Thursday night concerts. In sharp contrast, the second meeting was filled with side jokes, as both faculty and students realized that compromises could be made without giving in to the faculty meeting, whose purpose was to evaluate the new rules that have been implemented at the bog.

The assistant director of Bog concerts, Greg Bowden, set the tone for the meeting when he pointed out that there were ways that the new wristband system of keeping tabs on minors could be beat. But the majority agreed, that such a system could be undermined by someone who is truly determined to beat it - including the use of fake ID's.

Another problem that were addressed included the problems of student and band members who have involved alcohol.

To a recently published case, 39 pledges to two Princeton University clubs required medical attention last February after a hazing incident during which other students were forced to drink their own urines. One of the students was hospitalized in a coma for 4 days, received $500 fines and 30-day jail terms in connection with the incident.

Students arrive (on campus) with established attitudes and drinking patterns, according to Dr. Edward Bloustein, president of Rutgers University. By the time they reach college age they have been conditioned by parental conduct, ratemyprof, and campus life. Unfortunately, an increasing number of students are alcoholics when we we them. They have acknowledged that drinking on their campuses is out of hand. In a 1988 GAO survey, more than 60 percent of college students admitted that alcohol was a problem for their schools.

But in recent years, national organizations, faculty members, college and university administrators and students themselves have mobilized to put an end to the irresponsible use of alcohol on campus. Some colleges and universities have dealt with alcohol abuse through punitive action by refusing to recognize the chapter of particularly troublesome fraternities. The administration at University of Lowell, Massachusetts last year decided it would no longer recognize any fraternities or sororities.

In response to pressure from college administrators, a significant number of fraternities have adopted the "dry rush" policies that have always been the rule among sororities.

Much of the effort in combating collegiate alcohol abuse has focused on education and funding for prevention.

Boost Alcohol Consciousness Concerning the Health of University Students. "BACCHUS" was established in 1989 to discourage the irresponsible and Wages of alcohol.

The 300 affiliated chapters of the Denver-based organization have sponsored various programs to draw attention to collegiate alcohol abuse. Those activities have included speakers bureau, designated drivers programs, drunk driving simulations and sponsoring events to raise money for alcoholism prevention programs. Many of those events take place during the University College Alcohol Awareness Week which this year will be Oct. 16 to 22.

Individual campuses are establishing their own programs to combat alcohol abuse among their students. Wellesley College in Massachusetts is one example of an improvisational Wellesley's Alcohol Information Theater (Project WAIT) in the spring of 1989.

In unscripted skits which have been performed in Wellesley Dormitories as well as neighboring campus, students act out various situations involving alcohol abuse.

They've portrayed confrontation with a drunk party-goer who insists on driving home, the rowdy fraternity get-together where peer pressure to drink is especially intense, and dealing with the friend who has a drinking problem.

In 1987, the foundation of the Xi fraternity initiated a substance abuse counseling, education and referral program throughout their fraternity chapters nationwide, called "Brother to Brother." One of the nation's largest sororities, Delta Gamma, also has recognized the seriousness of alcohol abuse on college campuses and in 1986 produced the 22-minute video "Options." The film, which has been distributed to all major Greek Houses across the nation, shows how to identify someone with an alcohol problem and how to get help for him or her.

Yet in Flint, Mich., a college town where there are no alcohol restrictions, and 100 percent of the adults drink alcohol, the procedure will be simple, requiring nothing more than a trip to the doctor's office for a hypodermic injection into the pump.

Neither the electronic monitoring of heart rhythm nor the implanted drug reservoir is new. But adding a microprocessor to the implant package to provide automatic drug medication constantly, at a fixed rate, without regard to the changing needs of the patient.

Along with the automatic delivery of medicine, the second important point about this proposed treatment, according to Aronbecher, is the speed with which medication can be delivered - seconds after the onset of irregular heart rhythm. In dealing with heart disease, the speed with which help can be provided can be of critical importance.

The two factors of automatic control and speed of delivery also make the computer-directed heart pump a potentially valuable tool for emergency room treatment of heart rhythm problems. In a recent study, Pritzker Institute researchers have been looking at the development of new drug infusion to intravenous use.

The basic principle of the method developed at IIT already has been utilized clinically, with external pumps controlling the actual injection of the drug. The patients were volunteers undergoing treatment for heart conditions at the Clinique d'Alleray in Paris, and at the University of Chicago. Aronbecher says the studies, even though experimental, were extremely encouraging. They demonstrated the feasibility of some minor changes in equipment design," he said, "but at the same time, they confirmed our belief that we're on the right track with the automatic drug infusion pump, and that it will work.

The first actual implant of the computerized pump still lies ahead, but the people at IIT are convinced that the day is coming when it will provide a practical treatment for some forms of heart disease.
Sail The Winter Away

The IIT sailing club has just pulled the boats out of the water after a very active fall schedule. The sailing club, which is open to all students, faculty and staff, charters 14 foot flying junior sailboats from the Chicago Yacht Club at Belmont Harbor. The club is broken down into 3 categories of activity: instruction, racing, and special activities.

For anyone who has ever been interested in sailing but hasn’t had the chance to try it, we offer lessons in small boat handling. The lessons are taught by a United States Yacht Racing Union certified instructor and run for eight weeks. During the course of the eight weeks you will learn how to prepare a sailboat for sailing, how the wind makes the boat go, and get plenty of on the water experience. Aside from learning to sail, you also get gym credit.

There is also a sailing team that competes against other colleges and universities from all over the Midwest. The Sailing Team is the University of Wisconsin in Madison, North Western, U of Iowa, S. Illinois, U of Chicago, Green Bay, Illinois Wesleyan, and IIT attended. The top three schools (Madison, North Western, and Iowa) qualified for the Jimmy Dean Angsten Championship Regatta held at the Chicago Yacht Club at Belmont Harbor on Thanksgiving weekend.

The club also holds special activities. This winter club members are going to the Florida Keys to spend a week of sailing on Sutton Wood Sound. We are also planning to charter a boat in the Caribbean during spring break, all are welcome.

If you are interested in any of these activities give us a call and talk to us. We will start sailing again right when the ice melts in spring and look forward to a fun filled semester. Jeff 204-3842 Will 567-5089 Dr. Williams X3192

Swimmers Take Second

The Varsity Swimming Team amassed exactly 100 points to take second in their own Hawk Relays last Saturday. IIT got two first places in the 11 event meet, when IIT swimmers led off with the 1800 yard freestyle event. The first event was won by 200 yards from their nearest rival the University of Chicago.

IIT’s other first place was the 200 yard Individual Medley race which was one of the most exciting races of the meet as IIT won over 1500 yards by over 50 yards. The team consisted of Ken Zuber, Tony Prokes, and Matthew Fernandez.

Four IIT second places kept IIT in the running till the last event, as IIT divers got 2nd place in both the 1 and 3 meter boards, Scott Turner and Yong Park gave IIT the precious points in both of these events.

Leaf, Zuber, and Fina left IIT a 2nd place in the 200 yard breaststroke relay. The only other record in the meet was the 300 yard breaststroke relay set by the University of Chicago. The 4th place team of Missouri St. Louis won the meet for the second year in a row with six first places.

Final Scoring - Hawk Relays
1. UMSL 1612
2. IIT 100
3. U of Chicago 84
4. Loras 74
5. U of Wis Oshkosh 48
6. Carroll College 32

GET ON THE TRACK TO A SCHOLARSHIP

An Air Force ROTC scholarship may get you on the right track to success. Find out if you qualify for tuition and other expenses, plus $1000 each academic month. Get on the right track. Talk to:

CAPT HASSON

December Grads

Medical Research Opportunities

Start your research career with Northwestern University’s Medical School as a member of our prestigious and dedicated research staff. Your involvement and challenge can start with research opportunities in such areas as:

- Pharmacology
- Molecular Biology
- Physiology
- Pathology
- Cardiology
- Neurology
- Cell Biology & Anatomy

Successful candidates will have Bachelor’s or Master’s degree in the biological sciences, with emphasis on independent lab research. Proven academic achievement is also required.

Northwestern University offers a very competitive starting salary and a comprehensive benefit package, including dental insurance, 3 weeks paid vacation your first year, and reduced tuition. For immediate consideration, please send resume, transcripts and references to:

YOUR UNCLE WANTS TO PAY FOR COLLEGE.
BUT ONLY IF YOU'RE GOOD ENOUGH.

Army ROTC offers qualified students two- and three-year scholarships that pay for tuition and required educational fees and provide allowance for books and supplies. You also receive up to a $1000 grant each school year the scholarship is in effect. So get out today if you qualify.

ARMY ROTC
THE SMARTEST COLLEGE COURSE YOU CAN TAKE.
