Joint Engineering Program

IIT has joined Illinois Benedictine College and Wheaton College to establish a cooperative program to provide undergraduate students at the two colleges with an additional way to earn accredited degrees in engineering from IIT's west suburban campus in central DuPage County.

Beginning next fall, students may concurrently enroll at IIT West and Wheaton College or Illinois Benedictine College, allowing them to earn accredited undergraduate degrees in aerospace, mechanical, electrical or chemical engineering, as well as in another bachelor's degree in a field of their choice. Students will take engineering and other liberal arts courses at Wheaton and Benedictine. Students at IIT will also take IIT West's engineering classes.

The program was established by agreement between IIT, Wheaton College and IIT and BHC. Each of the colleges will set up a committee to monitor the program.

Students attending Wheaton College will be able to complete both a Wheaton liberal arts degree and an IIT engineering degree in five years. Students at Illinois Benedictine College will have a similar opportunity and, in addition, can elect to complete only the IIT engineering degree in the usual four-year period.

Similar agreements between other schools in Illinois

Recycling Pilot Program

by Catherine M. Bertucci

A recycling pilot program of high grade paper will be starting Wednesday, November 8 in the Main Building, Stuart Building, and Perlstein Hall.

Full cooperation is expected from IIT employees as they will have to distinguish the recyclable paper from the garbage. They will be attending a scheduled meeting on Tuesday in the HUB, which will take place on what types of paper are recyclable and how they will be involved.

This operation is now considered a "desk side program" which will be placing the appropriate papers in a recyclable cardboard box in the offices.

This program is not targeted at money making, but rather as an environmental concern. Manny Friaus believes that there is not enough land space for garbage and that soon there will be a law controlling it. The little profit that will be made will first be used for the encumbrance to get the program started, then will be put into a fund that will be put to use at a later date.

In three months, Mr. Friaus would like to see this program expanded to other areas of the university. Hopefully this program will make everyone pollution conscious and when things become necessary, we will be able to have a program, says Manny.

IIT would eventually like to move from only high grade paper to aluminum cans, plastic, bottles and glass.

Earthquake Lecture in The HUB

A professional engineering society has called for an earthquake-proofing of roads and bridges in the Midwest. IIT will hold its first Midwestern meeting on IIT's main campus, the public is invited.

The Great Lakes Chapter of the Earthquake Engineering Research Institute will present Dr. Sidney Berg of Stevens Institute of Technology in New Jersey at 7 p.m. on November 15 in Hermann Hall. Dr. Berg will give his views on how structures can be designed to withstand earthquakes.

Dr. Suren Saxena, chairman of IIT's civil engineering department, is past president of the professional society's chapter. In the wake of recent earthquakes, Saxena has seen roads and bridges in the Midwest be designed to survive earthquakes in the interest of public safety - despite the 25 percent cost increase that would likely result.

IIT and the Structural Engineers Association of Illinois will co-sponsor the event. Dinner will be served in Hermann Hall's Faculty Club at 6:15 for $15. Call Dr. S. K. Gosh at (312) 886-6200 for reservations.

The Crusade Marches On At IIT

The IIT United Way Crusade of Mercy campaign for 1989 has reached the halfway mark, according to Chairman David Zesmer and Associate Chairman Mark Angolini. The overall goal for Chicago and suburbs is $100.1 million dollars. IIT's goal is $365,000, an increase of about 11 percent over the amount raised in 1988. "This percentage is somewhat higher than that adopted for the Crusade as a whole," said Zesmer.

Renowned Research Chemist To Lecture On DNA

One of America's most recognized research chemists, Dr. Jacqueline K. Barton of the Beckman Laboratory of Chemical Synthesis at California Institute of Technology, will present a series of lectures at Illinois Institute of Technology on Tuesday, November 7 and Wednesday, November 8.

Dr. Barton is currently the Oregon State University since 1983. Earlier, as a National Institutes of Health postdoctoral fellow, she studied biophysics at Bell Laboratories and Yale University.

Presented as part of the Kilpatrick Lecture Series at IIT, Dr. Barton's programs include "Shape Selective Recognition of DNA Sites," at 8 p.m. on November 7, "Probing Nucleic Acid Structure with Metal Complexes" at 1 p.m. on November 8, "Reactions on a DNA Strand" at 8 p.m. on November 8.

For more information, contact the Chemistry Department at extension 3425.
From Frances Torres

When somebody told me about an article on the women in IIT, I was curious to find out what people thought of me, a woman that studies at IIT. To my disappointment I discovered the ignorance of some people. If you’re going to talk about a group of people (in this case, girls) first of all you have to meet them. I know there are few girls in this school, but most of the girls that I have met are very nice in life and for this we try to divide our time with studying and socializing. As a woman I want to succeed in life, I want to make my place in this world. I don’t want to get married and have kids before I graduate. In my years in college I want to enjoy my college life by socializing with parties, downtown, etc., and culture. I want to get experience and, at the same time study for a successful future.

To the person who labeled the women by majors and told them what he thought of them: grow up.

From Normandie Zagorski
ITT WOMEN’S NETWORK

If the column written in last week’s Tech News was designed to illicit a response, it has served its purpose. I think that the majority of men and women have felt the stinging words of thecolumnist. As a woman in the computer field, I am very sensitive about the way my sex is portrayed. I feel there is an area of education that is not getting the attention it needs.

The attitude and interest of the women in these departments is decreasing. If we have to work hard to get people interested in the field, then it is a real problem. The articles should be written so that they are informative and interesting. I think that the articles should be written in a way that is easy to read and understand.

This column has been written in a way that is easy to read and understand. I think that the articles should be written in a way that is easy to read and understand.

From Mary E. Kriz

After reading the article “The Attitude I Have Towards Women at IIT in the October 23rd issue of Tech News,” I would like to offer some comments on the article itself.

The article is well written and thought-provoking. However, I think that the writer’s attitude towards women is questionable. I believe that women have a right to be treated with respect and dignity, and that they should be encouraged to pursue careers in the sciences.

In my opinion, the article is too negative. It is easy to see why some women might feel that they are not being given a fair shake in the world of technology.

I would like to suggest that the writer consider the possibility that some women might be undervalued in the world of technology.

Apply yourself to some world-class problems.

The global weather pattern has shifted, leaving much of Africa in severe drought. What can be done?

Oil spills around the world threaten our wildlife and shorelines. What new oil tanker design can prevent oil spills? What new method or instrument can be used to clean them up?

Introducing "Math is Radical," with a $10,000 prize for the best solution.

Announcing a contest for the benefit of our entire planet. It's Math is Radical, a chance for science and engineering students to take their best shot at solving some of the world's most pressing problems. And win some cash if your efforts are judged among the best.

Here's how to enter. Choose any problem you feel pokes a tooth in your world -- the suggestions above are just a few. Then develop a solution, complete with the assumptions, formulas, and graphs that support your conclusion.

On April 15, 1990, we'll award prizes based on appropriateness, thoroughness, and viability of the solution. First prize is $1,000, second prize is $500, third prize is $250, and honorable mentions are $100. (All U.S. students are eligible for prizes in MA) For your complex! "Math is Radical" contest kit, including full contest rules and get started right away. Enter independently, or make it part of a class project or paper. But just make sure you get involved.

Because our planet can use all the help it can get.

math is radical

A contest for engineering and science students.

From Joe Zielinski

I'm just going to give my opinion of the attitudes of women at IIT. I'm close to being convinced that a few women here are really stuck up, but I refuse to totally believe it because I don't think that any woman can be that shallow and sophisticated. The only way they could make a judgment about the way they look at you is by how deep, down, a different person exists and can come out. But there are times I have my doubts, and it really seems like they can't see the world the same way. Women here can be very selective because they're the minority. They can get what they want because of the burden on the men. I don't know if they're really stuck up, but I don't think they're the same as the men.

From Paul Sjordal
aka Rapunzel

Okay, let's review the article about "Women's Attitudes to Sex". It can be paraphrased in less than one sentence: Guys bitching about women; women bitching about guys. While the complaints were dissimilar, I don't think there is a whole lot of the warring that is different.

Many will blame the male/female ratio, but this is more an exaggeration than source. A fundamental aspect of this apparent animosity boils down to this: most of us are tech-nods, which is why we're here. Hopefully this letter will help change some attitudes and habits.
GENERAL

TECH NEWS DEADLINE

THE DEADLINE FOR ANY INFORMATION TO BE PUT INTO TECH NEWS IS TUESDAY AT NOON. ANY INFORMATION RECEIVED AFTER THIS TIME WILL NOT BE ENTERED IN THE NEXT ISSUE. IT WILL BE HELD FOR THE FOLLOWING WEEK.

SPRING REGISTRATION

1990 Spring Registration Packets for full-time students can be picked up November 15, 16 and 17 in the Office of Student Records and Registration. Packets are available from 9 a.m. - 8 p.m. I.D. card is required. Part-time student packets and unclaimed full-time student packets will be mailed at 6 p.m. on November 17th. Packets for varsity athletes will be available on November 14.

MUSLIM STUDENT ASSOCIATION

DAILY PRAYERS:
*FAJR
*ADUHR
*ASR
*Maghrib
*Isha

* Prayers are held at family residence area.
* Prayers are held in Hermann Hall.
Please check Today's Events Board for room assignment.

WOU1

The WOU1 Executive Board positions of Station Manager, Program Director, Technical Director and Public Relations Director are open to anyone interested. Applications are available at the Station located on the fifth floor of Main Building. Come up during office hours or leave a message in the office mail box. Be sure to leave your place of contact so that we can get in touch with you. Interviews will be held on Thursday, November 9 at noon in Room 306 of the HUB mezzanine.

The WOU1 station managers are looking for assistants. Anyone interested should come up to the WOU1 office during office hours or leave a message addressed to Mark Mazanez, P.R. in the office mail box. You could also contact Mark Mazanez via his VAX account user name MAZAR or through the WOU1 VAX shell. Be sure to leave your place of contact so that we can get in touch with you.

WOU1 is looking for a faculty member and/or graduate student with technical experience who would be interested in providing WOU1 with technical advice and assistance. Anyone interested is asked to contact Mark Mazanez by letter addressed to Mark, Publications Director of WOU1 or by his VAX account, user name MAZAR. You could also call the station's business line. Be sure to leave your place of contact so that we can get in touch with you.

PLACEMENT AND COOPERATIVE EDUCATION

Amoco Information Services is looking for CS or Bus. Adm. students who are interested in participating in mock interviews for the company on November 7, 8, 9, and 10. For more information contact Jennifer Dolphn, Amoco at 856-7553. A $50.00 honorarium will be paid.

MONDAY

REJOICE IN JESUS

Rejoice in Jesus Prayer meeting will be held on November 4 in Room 305 HUB mezzanine at 12:00 noon.

TOO MUCH FUN?

The next Winterfest 90 planning meeting will be held on Monday, November 6 at 5:00 p.m. in the Student Activities Office. The dates for this year's winter festival have been set for February 2 thru February 9, 1990. The events are being planned, but we need more events and more help.

TUESDAY

ASME

On Tuesday, November 7, Mr. Archie Stevenson from International Magnesium Association (IMA) will come and speak to our organization on the uses of magnesium in designing and manufacturing. Everyone is welcome to attend.

This event will be held from 12:30 to 1:30 pm in Room 123 E1. Please come and bring a friend. Refreshments will be served.

SAE

There will be a meeting of the Society of Automotive Engineers on Tuesday, November 7 at 1:00 pm in Room 112 E1. Topics to be discussed include ordering materials and parts, rear suspension specification and fund raisers for the Mobile Baja.

Also the Super Mileage group will begin finalizing details including gearing and use of composites for the monocoque.

All members and anyone else interested are encouraged to attend.

TAU BETA PI

Congratulations to the candidates who have been elected to membership in Tau Beta Pi. Results are posted at:
- The Societies board outside the Dean of Student Life Office in the HUB.
- The Tau Beta Pi board in the E1 building (outside Room 103).

The next meeting is Tuesday, November 7 at 12:30 pm in the HUB mezzanine Rooms 303-304. Members and candidates should attend. Topics for discussion include tutoring, engineering seminar, semester projects, initiation and banquet, and stories for graduation.

If you have questions please call Christina Smith at 856-8373.

Thank you to Ken, John, Paul, Chanty, Tim, Tanver, and Gregory for cleaning the bent of Tau Beta Pi. It looks great!

PI TAU SIGMA

There will be a candidate meeting on Tuesday, November 7 at 12:00 pm in the Pi Tau Sigma office in Room 118 E1. All members must attend.

Congratulations to all of the Pi Tau Sigma Candidates:

Gabriel F. Allen
David Hwang Kim
Steve T. Bokorak
Mark Allen Reichnader
Michael A. Thimes
Jeffrey L. Goodman
James David Domanus
Jeffrey C. White
Kam Man Tung

Jamie Jesus Munoz
Stan Burjek
Mary Ellen Kriz
Scott Allen Ullrich
Lorna Kocian
Michael Joe DuBois
Belia Peter Szefler
John C. Bragg

John N. Schubyn
Jerry A. Wiltsie

Stephen M. Obrist
Jarron J. Kopala
Covino C. Ortiz
Patrick G. Mueller
Michael R. Losley

INTERVARSITY CHRISTIAN FELLOWSHIP

InterVarsity Christian Fellowship meets on November 7 at 7:30 pm in 105 East Hall.

WOU1

Attention! WOU1 will be holding a general staff meeting on Tuesday, November 7 at noon in the WOU1 office located on the 5th floor of Main Building. All staff members are required to attend and anyone interested in WOU1 is encouraged to attend.

WEDNESDAY

INTERVARSITY CHRISTIAN FELLOWSHIP

Biblical reflections and sharing of prayer will be the focus of the campus
KOREAN EVANGELICAL FELLOWSHIP

The Korean Christian Fellowship meets Friday, November 10 at 7:00 pm in the IIT chapel located between the Residence lounge and the high rise apartments. The program which is structured Biblical study with a prayer format, involves undergraduate as well as graduate students and their families in an experience of Korean Christian community on campus. All interested persons are heartily welcome.

MUSLIM STUDENTS ASSOCIATION

FRIDAY PRAYER:
At 12:00 pm in the I.I.T. chapel for Quran recitation.

KHUTBA:
Main group: 1:15 pm
Makeup group: 12:15 pm

SATURDAY

ATTENTION INTERNATIONAL STUDENTS AND SCHOLARS

Everyone is invited to the First Annual International Potluck Dinner! It will be held Saturday, November 11 from 5:30 pm to 8:00 pm in Rooms 303/304 of the Hermann Hall mezzanine.

Potluck means that everyone brings food. Bring a food which is typical of your country that will serve five to seven people. If you live in the halls and have no place to cook, you may bring something from the grocery store, fresh fruit, cookies or something from the deli.

Beverages and table service will be provided.

Call the International Office (567-3307) before Wednesday, November 8 so that we know approximately how many people to expect.

There’s about one hour after the dinner when everyone would enjoy some international entertainment! If you are interested in singing, dancing or playing an instrument, contact Joyce Mary Herko at the International Office before Monday, November 6.

CHINESE BIBLICAL SEMINAR

The Chinese Bible Study Fellowship at IIT gathers in the Field Room of Hermann Hall on Saturday, November 11 at 7:30 pm. Anyone interested in the Christian Biblical tradition through Chinese culture is cordially welcomed. The program is presently focusing on the New Testament gospel of St. John.

ALPHA SIGMA PHI

Going out to all girls, Alpha Sigma Phi is giving you the chance to bid on an Alpha Sig as escorts to a romantic dinner date.

Saturday, November 11
Admission Fee $1.00
6:00 A chance to meet the escorts
7:00 Bidding starts
9:00 Party begins (ladies and Greeks free)

Highest bid receives a dinner to the Rita Carlton! Don’t miss your chance! All proceeds go to the Children’s Memorial Hospital. For more information call 849-8999 or extension 3287.

SUNDAY

CHAPEL HOLY COMMUNION

Sunday celebration of Prayer and Eucharist-Communion takes place in the IIT Chapel Sunday, November 12 at 11:45 am. The Service Liturgy will include those present in the Scripture readings and prayer intercessions/music. This traditional Holy Communion Prayer of Christian Unity welcomes the IIT community.

NEXT WEEK

MONDAY

INDIA ASSOCIATION

India Association will have a dinner for Diwali on November 18. This time the food will be catered by us.

This dinner is free of charge for those who came for the Fall picnic. For those who did not, the fee will be as follows:

* $3.00 if you register ahead of time.
* $4.00 at the entrance.

So hurry up and register with any of the following:

i) Hiten Soli 225-7649
ii) Sadasan Deshpande 739-0248 or x-5184 or x-3019
iii) S. Sankaran 225-7586 or x-5887
iv) Manoj Kothari 842-1173 or x-6838
v) The menu for the dinner will be announced later. Hence all suggestions are welcome.

The last date for registration is November 13.
REJOICE IN JESUS

Rejoice in Jesus Prayer meeting will be held on November 13 in Room 306 HUB mezzanine at 12:00 noon.

TUESDAY

AIDS-WHAT YOU DON'T KNOW CAN HURT YOU

An A.D.S. Seminar will be presented on the facts about AIDS Acquired Immune Deficiency Syndrome. The seminar will be held on Tuesday, November 14 at 9:15 pm in Cribb Lounge of the IIT Residence Halls. The program will feature a guest speaker from the Howard Brown Memorial Clinic. There will also be refreshments, door prizes and a safe sex fair on 7. This is open to the entire IIT community.

ASME

ASME is sponsoring a plant tour of Caterpillar in Aurora on Tuesday, November 14 from 12:15 to 4:30 pm. There is a sign up sheet in Room 110 E1. Seats are limited and some seats cannot be reserved. We will meet in 118 E1 and leave at 12:15 pm sharp!

THURSDAY

AIDS TELECONFERENCE

A live interactive teleconference via satellite will be presented on the subject of AIDS in the college community on Thursday, November 16 from 12:00 to 4:00 pm in Rooms 219 and 222 Illinois Hall. The conference will examine on campus case studies, discuss the issues to be faced, and develop multiple solutions for ethical questions and policy decisions facing college administrators.

FRIDAY

MUSLIM STUDENT ASSOCIATION

The monthly meeting will be held on Friday, November 17 at Hermann Hall after Maghrib prayer and dinner will be served.

IN TWO WEEKS

MONDAY

INTERNATIONAL OFFICE CHRISTMAS OPEN HOUSE

Take a break from your studies and learn about the Christmas/New Year's Holidays. We'll decorate a Christmas tree and enjoy some traditional holiday cookies and punch. Come join us! Monday, December 4 from 3:30 to 6:30 pm at the International Office.

THURSDAY

STUDENT ALCOHOL POLICY COMMITTEE

The next meeting of the Student Alcohol Policy Committee will be on Thursday, November 3 from 5:00 to 6:00 pm in the Programing Office in Hermann Hall.

AROUND CAMPUS: MY REBUTTAL-THE ATTITUDES OF WOMEN AT IIT PART 2- THE SEQUEL

by Al Evon

It seems that my "around campus" column has finally got some people's attention out there. In the last week I have been swarmed at, kicked, yelled at, spat on and slapped. A very productive week if I do say so myself. None of this bothers me. I mean, I think criticism is good. It is one of the few instruments of change which actually has an effect on people. Let's see if you feel the same way now because now it is my turn.

Most of the controversy that I've been involved with lately stems from my article on women's attitudes at IIT. The response, yes, that is right, women's attitudes at IIT-the sequel.

First, I'd like to say that I did get many responses. I took a while, but I got the responses. Many of these responses were regarding the way the article was written. "You need more sources," "You don't paint the whole picture," and "You only give one perspective."

I can respond to these comments, I do not feel I was accused of not reporting that I have received or have seen that. If it weren't for these issues being brought up one way or another then we would not still be talking about it. I have heard nothing about them except for comments made in private or behind people's backs. If these issues were not brought up, people would not get so emotional and nothing would change.

We would live in a sheltered, static society and life would suck.

As for the number of sources, if I couldn't've gotten more, I would've. Unfortunatly, I am a very busy person and do not have the time to do everything that I want or feel is necessary. I would personally like to say to everyone that at least I took the time out of my hectic schedule to write about this, and give one perspective. I can give others perspectives when it comes to women's attitudes at IIT.

Right now I'd like to point out that there seem to be a lot of people that keep insisting on things that weren't true and have no facts behind them at all, my opinion isn't ever even expressed in that article. No where do you see me say: "Well, I believe this or I believe that..." If you want my opinion ask me; I don't assume for me to say it. I am the one that picked out the article and submitted it but that doesn't mean that I believe everything that appears in the article. No. I've heard nothing about what I've written or expressed my opinion, but I did go out and do all the hard work of interviewing people, placing the article together, writing it and submitting it so I will take all the credit that goes with it.

With this I have spoken my peace and perhaps cleared the air about the actual events which transpired and lied to the article. This is not, however, an apology and I do not regret writing the article. I will probably never apologize for something that I write which I feel can be done some good.

This is a very touchy issue and subject and almost no one of us would have touched it with a ten foot pole. But it is a subject which has been avoided and neglected for so long that it needed some attention. Someone asked me if I perceived the views which were expressed in my article as being the majority view on campus. My answer was a plain and simple yes. People can scream and stamp and shake their heads against this all they want. But this truth is majority of the campus. The feeling is so strong. At least from what I've seen. Personally, I may not feel this way but I do foresee this as not only a controversial issue, but also as a problem on this campus. If this wasn't such a controversial issue or a problem, people would not have reacted the way they did to it.

The first way to deal with a problem is to admit that there is a problem. Since this issue is now flagrantly out the garbage it is time for us all to deal with it. What if every IIT needs a women's advisor (this has been suggested on this campus. If this wasn't such a controversial issue or a problem, people would not have reacted the way they did to it.)

INTERNATIONAL FESTIVAL 1990

There will be a planning meeting held Thursday, November 9 from 2:00 to 3:00 pm in Room 306 of the HUB mezzanine. Anyone interested in planning for the festival please attend. For more information contact Joyce Hertko at the International Office (extension 3307)

STUDENT ALCOHOL POLICY COMMITTEE

Our meetings of the fall semester of 1989 will be held on the following dates:

Thursday, November 9, 3:00 - 4:00 pm, Programing Office
Thursday, November 16, 3:00 - 4:00 pm, Programing Office
Thursday, November 23, 3:00 - 4:00 pm, Programing Office
Thursday, December 7, 3:00 - 4:00 pm, Programing Office

If you can't make it to the meeting(s), please send a representative from your organization. We meet on these days could have a big affect on I.I.T. Campus.

The list of possible topics for the year:

1. Education programs (BAAUCHUS)
2. More social programs (alternatives to alcohol functions)
3. Need of training students and staff on how to handle difficult alcohol situations
4. Development of a resource notebook on programs, policies, etc.
5. Development of a fair and consistent policy of the campus
6. Development of a BAAUCHUS chapter on campus
7. Where bands in the Bog (do they work?)
8. What is considered "High Risk" drinking on campus?
9. What is the use of the Bog to other parts of the building
10. Should the committee develop education programs and policies for the whole campus community (students, faculty, and staff)
11. Mixed drinks - where and when do we serve them.
12. What process should there be for requesting alcohol functions, where and who do we serve them.
13. What do we do for those individuals that need help?
14. Should this committee look at other substance abuse issues at some point?
15. How do we "enforce" policies?
16. How can one determine who was回家 from a party who need help?
17. Drinking in the commons - is there a policy, where is it?
19. Drinking or the grassy areas - is okay? (many people do it)
20. Rush - dry or not
21. What will I.I.T. sponsor for group events?
22. Alcohol Awareness Week Programming (week of October 15 - 21)

These meetings are held up to ideas with which we can present to the Alcohol Education and Policy Committee.
Please attend them!
IN FOCUS:
Keating Hall: Where did all the money come from?

It was late in the spring semester of 1989 and the school year was coming to a close. Everyone was looking forward to a long summer break or graduation and the hope that next year would somehow be better. It was almost 9 a.m. on a Wednesday morning and I was at a Presidential Student Leadership Meeting. This would be the last Presidential Student Leadership meeting Meyer Feldberg would conduct.

As I look back and think about that meeting one event sticks out in my mind more than any other. Meyer Feldberg was trying to solidify the legacy he would leave behind, of being a student advocate and intuitive businessman, by playing off student concerns which were brought up right then and there. Frank Martin, now an IIT alumnus, was trying to say that the new weight room at Keating Hall would do for the school. As the discussion went on popular sentiment among the group seemed to be that if the weight equipment was there it would be used by many people, and would there for benefit everyone.

With this in mind, Feldberg looked around the room and as his final act told Jack Kelly, Vice President of Financial Affairs, to budget $20,000 for this new equipment. With no hesitation at all, the money was budgeted and IIT now has new weight equipment. What seemed to odd about that thought as was Frank, Nick Palermo (ex-Tech News editor, now alum) Mike Strahm (WOU General Manager) and my self discussed these events when the meeting was over and we wondered just where the money came from. It struck us as odd that the school could allocate $20,000 for a new weight room like that. The weight room was not a new concern, I've heard students bring it up at meetings many times before. So why at this time does the school come up the money for it?

Is there really that much money which is floating around unattended? And if so, why isn't it being used to do constructive things for campus? Was Feldberg just trying to secure a good opinion of himself as he left? What is the real story?

To find out the answers to these questions we must turn to the current and former administrators to get their stories. Jake Schinderman, Executive Assistant to the President, Jack Kelly, Vice President of Financial Affairs, Mel Bernstein, Provost.

My first conversation was with Jake Schinderman. Here is what he had to say: "For issues and concerns that are felt to be very important there is a small discretionary amount of money. Many issues and concerns that are felt to be very important there is a small discretionary amount of money. Many issues and concerns that are felt to be very important there is a small discretionary amount of money. Many issues and concerns that are felt to be very important there is a small discretionary amount of money."

I asked Jack Kelly for his account of the situation and here is what he had to say:

After my interview with Jake Schinderman, I talked to Jack Kelly, who gave me the following statement:

"The weight room came from the school's budget, $25,500 were allocated for it."

When the money goes through the budget process it is prioritized in some manner, such as the money for the academic and non-academic goals which have been set for the school, obviously get accomplished first. There is only a finite amount of money which is in the budget. This money is allocated by the priorities which have been set. The budget is used to respond to needs, as these needs arise.

As I said before, the needs with high priorities and which fit in with the objectives and goals of the school are finished first. There is no money which has been allocated and reallocated but only according to priorities. The students themselves are good at this as well, are opportunistic. When they feel they have the need which is important enough this budget needs to be flexible enough to handle these occasions and events.

It is the administrations goals to work with with students both in the classroom room and out of the classroom. We need to listen to the students, respond to their needs and build up life on campus. In this instance we were putting our money where our mouth was and enhancing as much life as we could in one swoop. Another example of the money for the budget which is allocated to the dean of students.

And no value can be put on all the benefits which are accrued to the students which was put up around campus to protect students and limit the number of muggings. The money which has gone for exclusive student use is now clearly identifiable and should be visible to everyone.

There are two components which make up your education at IIT. One is the actual education you receive, along with the research and the teaching. The second aspect is your out of classroom experiences and campus life. In the last three years the Residence Halls have gone from 56% occupancy to 90% occupancy. This is due to the issues an on campus facilities need for certain things like better food, better security and a richer campus containing more programs, activities and events for all the students. Hopefully this will increase the attractiveness of our university and encourage more students to get involved.

Extra nice because he was leaning.

This was an instance where this equipment was able to fit into our budget and the university had the capacity to meet this goal. However, the money for student activities must increase. Unfortunately, it is an either-or situation. Either we do this or we do that. People will always ask well if this is done than why not this. In the situation we were given it was the end of the year, the university was in the black and it was felt that this was something which would benefit us. We can't be frivolous with the money. We have to meet simple priorities. We have to find ways to ad

dress lots of needs in a broad needs.

This is just one example of doing that.

The university spends all of its money for the educational process and support. Most money is spoken for in the academic areas and the physical plant. There usually is a small amount left over after the decision process is done. The budget must be done one year in advance. However, with a 60 million dollar budget there must be capacity included in the system to react and be flexible. Resources are needed to respond to needs which are important and won't kill the budget.

With the money that is left over there are broad general categories that it can be used for. Of these categories the President has a small discretion ary fund which is used for needs and opportunities.

If we get our priorities backwards then the institution will not grow and the best functions of the money for educational purposes will not be served. We must balance the needs between the undergraduates and the graduates, we only have so many resources to address priorities with education comes first and then specific issues.

In this case Keating Hall had been neglected and it needed attention. The Parent's Association is going to follow up on this. As a visionary project which is very pleasurable for everyone, and by addressing this issue we were prevented from doing something to the extent that it was a great priority so it got the money it deserved."

JAK MAKRAL

ADMISSION IS $2.00
OR USE YOUR UB SEMESTER PASS

Michael Kochevar
keyboards, lead vocals

Mike, age 21, is a classically trained pianist who has studied for 11 years. Skilled in jazz improvisation, he's studied most notably with Ron Smith (who played with Chick Corea and Herbie Hancock) at the Cleveland Music School Settlement. Mike also studied voice, music theory, and acting at the Willoughby School for the Fine Arts in Cleveland and Indiana U. and has been a pianist and accompanist for several orchestras.

Tom Leddy
drums

Tom, age 22, from Barrington, IL has been playing drums for 12 years and has studied with Tony Cassel for 10 years. He's had 3 years of music study at Indiana U. where he played under David Baker in the IU Jazz Bands. Tom has played with such well known artists as David Baker, Jimmy Owens, Ralph Bowan and Bob Hurst (bassist for Wynton Marsalis).

Matthew P. Welker
guitar

Matt, age 24, has played guitar for 17 years, with experience in Blues, Country, Acoustic, Top 40 and Heavy Metal bands. He studied acting and guitar at Indiana U. and was a guitar instructor for 2 years. His talents include membership in the GRAFFITTI Improv Troupe in Bloomington, IN. Before joining JAK MAKRAL, Matt was musical director at Camp Wing in Duxbury, MA.

Jeff Hochemeyer
bass

Jeff, age 24, has been playing electric Bass for 11 years. He has 3 years training on classical double bass with Dr. Marion Edel, has studied choral arrangement under Ruth Arisman, and has 5 years experience as a pit orchestra accompanist. He became a member of JAK MAKRAL after teaching bass for 4 years. Jeff also plays guitar and his influences include Michael Manring and Andy West.
Tech-Nerds & Social Faux Pas

by Al Ross

Many students I talk to all seem to wonder the same thing: "Why are we known as 'Tech-Nerds'?" After these people mention this they begin to get defensive and irritable about the subject. "We have just as many parties on this campus, and sometimes more parties than they have on other campuses." Once people get to this point I get this feeling that it is time to give them a dose of reality. When I do this, I tend to get defensive and irritable. Okay, so maybe IIT does have parties on the weekends, but that doesn't mean that we're complete party animals. In fact, we're probably still tech-nerds. After all, except for those weekend parties, what do people around here do? The answer, plain and simple, is study. People at this school are so worried about their grades and futures that they have no time for the present.

Now don't get me wrong, your grades are important and so is getting a good job, but those are not the only aspects of college and college life. Your experiences that you have while you are here and your social lives are just as important. On other campuses people know this; they don't try to be one dimensional technocrats. Instead, these people try to make themselves as well-rounded as possible so that they are more marketable.

When you go out into the real world you will realize that your social and communication skills are just as important as your problem solving ability. Sometimes the way you present yourself is even more important than how you solve a problem.

This is the person, or people, will really upset me by saying that: "There is no way to develop social skills around here." That is the biggest lie I have heard. On other campuses, people usually develop their social skills and leadership ability by participating in campus events. This participation can come in the form of helping to plan the event, hosting the event or actually attending the event and having fun. Around here, students are pathetic, or maybe I should say apathetic. Events occur all the time, however, many students just don't seem to participate in them. If students can't take a few minutes out of their study time to relax and have fun then I feel sorry for them. Because it is actually they who are losing out and not the people who organize the event. Usually the people who organize the event have fun and do get upset that the turnout at their event wasn't the biggest of the best, but still they find a way to have fun. And when people decide not to participate the people who organize and run events can actually have more fun. This is due to the fact that if no one is going to participate and have fun then they can cater to their own needs and do what they want to do.

The other person usually gets upset when I say this and replies by saying: "But I thought that the events planned were supposed to be for everyone to participate in and not just suit the needs of a few." Well do you participate? I didn't think so. Maybe you should, if you want to see things change!

Spring Semester Advising For ECE

ECE students are strongly urged to see their academic advisor during the pre-registration period for the Spring Semester 1989, that is, from November 17 to December 4, 1988. Advisors will be available in the ECE Department office (136 S11) on November 16. Many ECE advisors will have block advising on Tuesday, November 21, from 12:20 p.m. and on Tuesday, November 28, from 12:20 p.m. in their individual offices. Nonseniors are not required to meet with their advisor. The ECE Department advisors will advise students on the prerequisites necessary for the courses they are interested in taking. For more information, please contact the ECE Department office.

ETC Quiz Contest

Top Ten Reasons You Should Enter ETC's 20,000th Quiz Contest

#1 Sorting entries will give ETC employees something else to do besides tutoring, monitoring, administering, and programming.

#2 Calculating data and time will sharpen analytical skills and help improve your grades.

#3 The greater the number of entries, the more interesting the results will be.

#4 More entries mean more fun.

#5 Contests are more fun than experiments in the chemistry lab.

#6 Entering the contest will provide good use of time while waiting in line to take a quiz.

#7 Students will have a chance to win a prize.

#8 Students will have a chance to win a prize.

#9 Students will have a chance to win a prize.

#10 Students will have a chance to win a prize.

The Unknown Reviewers

The Dude on the Left
What an exciting week it's been at IIT! With three different bands playing at three different places around campus, there was enough musical variety to suit any musical taste. Now on to the reviews.

The first band was the normal Thursday night Bog band. This band was called Shortcuts, and their music is best described as incredibly diverse. Before the show started, the band asked what kind of music they played. They responded saying Rock and Roll and pop Frouney, but added that if you request it, they probably know it. I was skeptical, but they almost proved me wrong. To show what I mean, here's a range of the songs they played: Bed Co. "Good Lovin' Goes Bad," ZZ-Top "Beer Drinkers and Hell Raisers and LaGrange," Led Zeppelin "Communication Breakdown and Rock and Roll," Jimi Hendrix "When the Wind Dies Away," The Cure "Just Like Heaven," Mill Vanilli "Don't Forget My Number," Bobby Brown "My Pergola," Joe Walsh "Rocky Mountain Way," and Kiss "Rock and Roll All Night." Now if there was something in that list that you didn't like or had never heard of, I'd be totally amazed. Alright, already, enough about the musical variety, how about the talent. Well, this unknown review was very impressed with the quality of talent in the Bog that night. Not only did the band know a variety of songs, but they played them incredibly well. There were also many highlights of individuals: member solos, especially noted by the tricky maneuver of spinning the guitar around the body done by the lead guitarist.

I give Shortcuts the BIG Double Thumbs Up. This band knew their stuff, and how to please just about any crowd. They started playing classic rock, had a second set full of 60's dance music, then reconvened the majority of the crowd wanted the classic rock back, and played it till the evening was over. The crowd was on its feet, and I think just about everyone had a good time. I really hope to see this band back next semester.

The second review is kind of strange, because it is of a band called The Drovers that played at the Phi Kappa Sigma Halloween party. This band was far from what you could categorize as a top forty band. In fact, it was actually an Irish folk band that played both Irish music and some current music to an Irish beat. This band is one of those classic foot-stomping, beer-drinkin' band playing music you Irish grand- parents would listen to, but you just want to dance to it anyway. What was interesting about this band was some of their vocals and how they were able to make them into Irish sounding songs but still keep their 70's or 80's originality when they were originally recorded. The Drovers were a good band who maybe should play in the Bog but I don't know how well they would go over.

The final band to be reviewed was the John Watkins Band which played at the Halloween Party in the ballroom. What else can be said about a classic blues band that has an excellent reputation and was able to prove it. There isn't much to be said about this band except they would probably be a lot more fun in a less-covered outs atmosphere like the ballroom.

Well, that's it for this review. Next week we'll be reviewing a new band to the Bog, State of Mind, while in the Bog this week will be Jack Makrul. I hope that unlike the last-time they played, they expand the musical variety of the songs they play instead of just being able to take the song list I have from their last show and now what they're going to play before they do. They hinted the last time they were here that there was to be a second set with more music further than just the typical dance music that they normally play. I hope they don't disappoint me.

The Dude on the Right
Hey music fans, what a great week of music here at IIT, huh? I suppose I'll skip all the preliminaries and get right down to business.

Last week at the Bog, a new band, Shortcuts, rocked the crowd with their varied styles. The first set was mostly classic type rock, consisting of tunes from ZZ Top and a few songs from The Doors. The second set was more country, showing off their covers, they were very talented. They were the first band in a while that wasn't discouraged by the lack of attendance early in the evening. I suppose the rowdy guys in back gavethem a little hope for us.

As the night progressed and more of the dancing sort of Bog crowd arrived, Shortcuts changed from a country band to a dance band. Songs from the Cars, INXS, and Millie Vanilli (?) kept the crowd lively. "Love is an Elec- tric" one of my favorite personalities closed a second set full of electricity.

For the third and final set, the band reviewed. The set was made up of more classic rock Warren Zevon's "Werewolves of London," and Zep's "Rock and Roll," had the crowd dancing on their chairs, and I'm sure the tables were next.

I'm assured that they will be back again, and I hope that a Big Double Thumbs UP will change anything that didn't think they were on top. That gives Shortcuts THE BIG FOUR THUMBS UP. What a show.

Aside from the Bog, those of you attending the party at Phi Kappa Sigma were in for a real treat. The Band were a real band that really knew what they were doing. They kept things slow until the party got under way, then jumped into high gear, and had people dancing to songs by "Every Day is Ground- hog Day" on the ceiling. We would have been perfect if they had known DEXY Midnight Runners' "Come on Eileen," but you can't have everything. They're a band that I'd love to see in the Bog one Thursday for sure.

Directly across the street, the John Watkins Blues Band, gave the Halloween crowd at the ballroom a real treat. They played a number of originals, and some old favorites like "Sweet Home Chicago," that everyone knows. I only wish that the beer garden wasn't separated by a big glass wall because, even though I wasn't drinking, my colleague's glass frequently impeded the sound and the atmosphere a blues band commands.

I suppose that's all for this week's ramblings. I hope that music in IIT will stay on this level for a long, long time. So, C U Thursday. Next Thursday we can pack the Bog to the walls.

Soccer Team Finishes On Goods Note

by Mark Brewer

The IIT soccer team ended its season on a positive note with a 3-2 victory over Trinity College. Trinity came on strong early in the first half by controlling the play in the Hawks' zone and scoring the first goal of the game to lead 1-0 at the half. Soon, however, IIT went on the offense and pushed Trinity back across midfield. IIT scored the game-tying goal at the 80-minute mark. For the Hawks, Ryuuji Matsumoto assisted on the goal. Trinity was unable to gain any momentum in the remaining minutes of the period, and at halftime the score stood 1-1 in favor of IIT.

Trinity, as they had done earlier, controlled the early minutes of the first half, but IIT soon regained control. Pool had another scoring opportunity on a break away, but the Trinity goalie blocked the shot. As IIT began to exert more offensive power, Trinity became more physical. Their goalie, in an attempt to block a penalty kick, knocked an IIT player to the ground. They also were playing a physical defense, using slide tackles and fouls aggressively. The Hawks were not intimidated as they continued to make shots. Trinity had three shots, but one hit the crossbar and the other went wide of the goal. Neither team on target and gave IIT a two-goal lead. Trinity was able to get a shot on the second goal and preserved the victory for the Hawks. This victory was not without its own note however. During the second half, IIT player Tapan Galani Hamad sustained an injury to his ankle and had to be carried from the field. The injury appeared to be a sprain, and Hamad was taken to the hospital for treatment.

Volleyball Update

Our Lady Hawks wrapped up the regular season this week with two victories to raise their record to a stunning 9-1. This week's victories included North Park 15-6, 14-6, 15-13, 15-5 and wireless Berat 16-0, 15-0, 15-1. This weekend they travel to McHenry for the district playoffs. Coach Meyer says they must be at their best to defeat St. Francis, the number one team in the nation, yet they can't forget about though St. Xavier and McHenry. If the Hawks win on Saturday, they will travel to Iowa to play their winner. The winner of that match will travel to Illinois for the national title.

POSTER SALE

Herman Hall (HUB)

Monday, November 13th through Wednesday, November 15th

If you have a love for architecture, cars, girls or anything else, there's a poster for you.

This is a fundraising event sponsored by the AIAS, American Institute of Architecture Students, IIT chapter.
