IIT Changes Name to ITT!

In a real shocker yesterday President Cowins announced that the university will be henceforth be known as ITT since everybody thinks that's our name anyway. Sources close to the president said this development was brought on last week when the president was watching CNN News. Some Daily called our "ITT" on both the noon and 9pmnews. The 9pm mistake marked the one millionth time the local media referred to the school as ITT and the president went "bonkers". The board has yet to determine what the acronyms ITT will stand for, but not in a hurry and not on any new contracts either. ITT's president, Dr. Simon Cowins, Sr., said, "I am sorry folks but as we continue to grow, there will be a season of 'breath' until we know what the name finally will be."

One of the major problems with IIT is the usage of the acronyms ITT and ITS which was not confusion in the 1960s and 1970s. With the 1000th anniversary of the millennial that we all think of as the millennium, the millenium will be celebrated more as we celebrate the millennium. IIT's name is not going any time soon. Let's the ROTC programs celebrate. Let's the ROTC programs be a part of the world. Let's a ROTC program become a part of a� stos. Let's IIT celebrate and build projects on the new millennium. Let's continue something elsewhere.

Cold War Over-Projects Close?

It was announced last Tuesday that the projects would be closed. After years of investigation it was found that the housing projects were actually a secret military urban training camp. A top military official was quoted as saying "After WWII we realized that most modern wars would take place in an urban environment. We needed an elite fighting group to prepare for such encounters. The projects were just what we needed. They provided the high level training needed for such a force. We could use the human rights thing as a cover and also to appropriate more funds from an uncharitable congress. For the most part the project was successful. We had the usual accidents associated with such intense training and a Battery or two. I'm sure this program was a major factor in the ending to the cold war. It's a shame to see it all go."

The housing projects have been under investigation for many years but the information has not been available until recently. One investigator stated, "There has been speculation over the projects for over ten years. At first everything seemed plausible but then we noticed that the projects didn't really function in a positive social way. Personally, I never really bought the human rights scenario. Sure the depression scared a lot of people, but not that much. Since the cold war has slowed down more information has been obtained and it was only a matter of time before it all came out. I think the government was ready for the Projects to close, it being such a large expenditure. I'm not sure where the money will be allocated. If we can't find anything to fight I suppose we'll just pay the deficit and lower taxes. I really can't think of any other place to put it to good use."

RESEARCHERS USE "DEATH TRUCK"

EIT's Department of Mechanical Engineering has received a $50,000 grant from the National Safety Council to study the effects of large amounts of vehicles backing over human bodies.

The Department's project is one of many that the council is conducting throughout the United States to study the effects of traffic accidents on human bodies. The study of the two trucks was conducted for the purpose of determining whether a truck can be used to simulate a human body in traffic accidents.

Harrier Specialist To Speak At IIT

by Kevin J. McDonnell

The IFP chapter of the American Institute of Aeronautics and Astronautics is proud to welcome Dr. John W. Fozard, chief designer of the Harrier from 1963-1980, to IIT. Dr. Fozard will be present at 11:30 a.m. on Wednesday, April 11 at 3:45 p.m. in the E1 auditorium.

Dr. Fozard is a very respected man in the aerospace industry. Having served 45 years with British Aerospace, Dr. Fozard currently works in the U.K. as an aerospace consultant. He also holds an OFS (Setrakian) Lectureship in the University of Michigan's Aerospace Engineering School.

Dr. Fozard's brilliant career has encompassed many honors and achievements. In 1988, he occupied the prestigious Lindbergh Chair of Aerospace History in the Smithsonian Institution's National Air and Space Museum in Washington, D.C.

Dr. Fozard began his career in the aerospace industry at the age of 18, when he became an indentured engineering apprentice with Blackburn Aircraft Ltd. in Yorkshire, England in 1943. He graduated from the University of London with a First Class Honors BSc (Eng.) completed the postgraduate course at the College of Aeronautics, Cranfield Institute of Technology, and joined the Design Staff of Hawker Aircraft Ltd. in Kingston upon Thames, Surrey, UK, in 1950.

On becoming Head of Preliminary Design in 1961, Dr. Fozard was appointed Chief Designer on the P1154, a supersonic Variable Swept Wing Aircraft. Although this project was cancelled one year later, Dr. Fozard was named the Chief Designer on the Harrier/AV-8A, the "world's first operational vertical and short take-off and landing fighter aircraft."

From this time through 1979, Dr. Fozard and his team developed single and two seat Harriers for the Royal Air Force, the United States Marine Corp, the Spanish Navy, and the Royal Navy.

From 1976 to 1984, Dr. Fozard was a V/STOL Fighter - a 32 year Anglo-American Engineering and Operational Achievement Award Wednesday, April 11 at 3:45 p.m. in the E1 auditorium.

Among Dr. Fozard's many accolades are: 50th President of the UK's Royal Aeronautical Society (May, 1983) served on the Society's Council from 1977 and has been named a fellow in 1983. Fellow of the UK's Royal Society of Engineers; Fellow of the Institution of Mechanical Engineers; Fellow of the Royal Society of London; and Officer of the Order of the British Empire for services to export in the Queen's Birthday Honors List in 1981.

Dr. Fozard's lecture will center on the design and development of the Harrier with a particular focus on the V/STOL (Vertical and Short Take-Off and Landing) fighter. It will include the history of the development of the early Hawker P1197 to today's Harrier II/AV-8B. The V/STOL systems and operating techniques of how the Harrier as well as their effect in the Falklands conflict of 1982 will be discussed.

On behalf of the faculty, staff, and students of IIT, the members of the IIT chapter of the AIAA welcome Dr. Fozard. We are greatly excited to have the honor of hosting such a giant in the aerospace industry and are looking forward to his presentation, which will be April 11 at 3:45 pm in the E1 auditorium. Everyone is invited to attend.

International Fest by Night

Everyone knows about what happened at the International Festival by day, but not many know about the activities by night, too. The booths closed around 4:00, and by 5:00, they had disappeared along with all their trappings, giving HUB visitors the impression that the festival was over. But it was not. For International Students, the fun had just begun.

At 5:30, exhausted but happy International Students representing each booth, faculty and staff of IIT, as well as several representatives of Foreign Consulates in Chicago were entertained at a reception in the HUB.

The reception ended at 7:15, and the revelers adjourned to the HUB auditorium. They were treated to a varied program of entertainment for the next two hours. This program was free to the public. It is hoped that next year, more IIT students will avail themselves of this opportunity to see so many interesting acts, which this year included Chinese, Mexican, Indonesian, and Hawaiian dances; Pakistani sitar and American Jazz music; and a presentation of a "stone" virus or strange, unforeseen things happening if the user is careless enough to work without checking the system for viruses.

When a first hand information was sought, the PC assistant, Bryan Sager, said that the probability of infection is quite high at IIT with almost half the number of PCs getting infected every day, in spite of routine checking. He attributes the increased number of users as the reason for this virus boom. SCANRES - a disinfectant program that scans for 47 viruses has been installed in all the PCs. But most of the users are ignorant about viruses and ignore the warning if SCANRES when it detects a virus.

The most familiar ones at IIT are STONE virus and PONG PONG virus.

Jerusalem B. was once common, but of late doesn't occur much. It takes about two hours to fix an infected PC and most of the time a few PCs are being fixed and not available to the users. According to Bryan Sager the virus problem cannot be totally eradicated as long as hard driven PCs are being used. Users transmit viruses from their diskettes and these infect the subsequent users' diskettes also. But hard driven PCs cannot be suddenly done away with.

It is a bitter truth that many users are not aware of viruses. Seminars are being held to educate users about computer viruses. Various steps are implemented to control the surge of viruses at IIT like purging the systems often, routine virus checking, etc.

An updated version of SCANRES called CLEAN that scans for about 70 viruses has been acquired. Even though steps are being taken by the administrative staff of the lab, the effective control lies in the hands of the users who should be on the lookout for these cheeky destroyers and never dare to use a virus infected PC.

Currently IIT PCs can be treated for virus infections that are within the scope of CLEAN.
SO MUCH HOT AIR FROM SUCH A LITTLE MAN

by Brian Anderson

Some people have a knack at drawing attention to themselves. This can either be good or bad. For someone in the Syndicate, for example, it is not very wise to draw a lot of notice. It can have drastic effects, like finding himself at the bottom of the Chicago River with concrete shoes.

Politicians, on the other hand, make a living out of grabbing attention. The more exposure they can get, the better their chances at election time. Even though all politicians crave the spotlight, there is one man who is head and shoulders above the rest. The person I am referring to is Congressman Gus Savage. Mr. Savage is the type of politician that gave Chicago the name the Windy City. In fact, Congressmen Savage alone could create enough wind to power Rhode Island.

Mr. Savage has an interesting way of winning elections. Instead of talking about boring things, like issues, Gus screams about racism at the top of his lungs. Since his congressional, Chicago’s south side and a few suburbs like Blue Island, is largely composed of Blacks. This can be a very powerful tool. It is easy for him to use racism to put aside things like the fact that he manifested a Peace Corps worker in Africa. It’s easy to cry racism. His constituents don’t like the idea of the big bad white man taking advantage of them, and he plays on that.

What amazes me is the amount of racism that this man can find and the places he can find it. The real issue here is that if people don’t agree with him, they’re bad guys. So it seems that, instead of racism, Mr. Savage should be calling it Gus-ism. Congressman Savage has managed to make racism not only out of whites, but out of Hispanics, Asians, and even Blacks. If a black candidate only gets the black vote, it is because every one else is prejudiced. If a black candidate, on the other hand, has the support of whites and others, Mr. Savage labels him as an Uncle Tom. Boy, there’s logic.

At a time when politicians should be heading the way toward an end to racism, Congressman Savage is callousing it. But, if it continues to get him elected, I don’t foresee him changing his ways now. That I think about it, Gus-ism really doesn’t have the same wind power.

Letters To The Editor

A Few Comments On A Recent African American Story

Dear Editor,

I write to make a few comments on the fine article “The African American Veteran” by Bart E. Beals, published in the February 26, 1990 issue of Technology News.

Mr. Beals is correct to correct a couple of historical errors in the article. Andrew Jackson was, indeed, a general in the War of 1812 and later, the 7th President of the United States (1829-1837). He did NOT become an officer in the confederate army. “Old Hickory”, as he was called, died in 1845. By the way, before the Civil War. The man Mr. Beals referred to was Confederate general Thomas J. “Stonewall” Jackson, who was accidentally killed by his own troops.

With reference to our 28th president, his name was Woodrow (not Woodruff) Wilson.

Robert Filler
(Deprartment of Chemistry)

Some Facts On The Homeless Count

Dear Editor:

Brian Anderson should have put less sermonizing and more fact-checking into his March 26 column.

Brian claims there are “tens of millions of homeless people in this country,” even noted homelessness exploits Mitch Snyder only claims three million. The National Academy of Sciences reports that tenable studies find between 500,000 and 600,000 homeless — only a few percent of Brian’s favored claim.

I believe that the results have really wanted to know what “a thousand points of light” means, he should have gone to the source when President Bush first used the phrase (on accepting the GOP nomination), he explained it. It refers to the multitude of voluntary, community-based organizations that provide the basic human necessities — and provide them more efficiently at lower cost than centralized federal bureaucracies.

AROUND CAMPUS: Seven Year Med Program

Part 2 of 3

Last week the first in a three part series on IIT's seven year med program was published. That article was an interview with Dr. Bill Black. This week I have interviewed Dr. Jaeger who is the faculty coordinator of the program.

Q: How are you involved with the seven year med program?
A: I am the Director at IIT's end of the program. I coordinate the three departments which are involved in the program, RE, ME, CHE, and CS. If you would like a question answered about the program I'm the person to get an answer from. I am also the principle liaison with the medical school.

Q: How do you feel that the program is going?
A: It is going well so far there has been a good response with applications and the quality of these is high. That shows that there are motivated people who have a need for this type of program.

Q: What kind of requirements do the students have?
A: Besides doing exceptionally well in High School prospective students must come to IIT for an interview at their expense. During this day I am the host of a dinner which prepares them and answers some of the questions they have about IIT and the program. Then myself along with other key people involved interview at the medical school and decisions are made. When the student arrives at IIT and actually begins the program then they meet once a week as a group and meet more then the normal college student is exposed to. This is to help prepare them for medical school. The students also go to medical school on a regular basis and meet with some of the professors and students there to prepare them. The students must of course maintain good grades and prepare themselves to be engineers and doctors.

Q: What is the program necessary?
A: As we move into the future we notice that medicine is getting more technological and to have a background in research or engineering certainly helps.

Q: What is your vision of the future of this program?
A: The long term goal is to see in 25 years one of the people who went through the program win a Nobel prize. The short term goal is to see this first class graduate from medical school without losing anyone.

Q: What improvements could be made to the program?
A: The program is in good shape. We could always use more money but that is true of any program.

Q: Is there any undue pressure on these students?
A: There is pressure but the students know about it. It is not as if they were alone in uncharted water. IIT and the medical school both want a quality program and in order to ensure this they have made sure that people who care and want to see the program succeed are in place. If there are problems then they can be solved.

For example last semester the biology department offered an extra lab section in order to accommodate these students. I would like to make something that you want to see work a success then you have to make certain accommodations.

Q: Not many people, including the ones I know more about this program, how can that be changed?
A: I'd like to see the program gain quiet notoriety. With a steady stability of students people will talk about it. Thirty students at IIT that are achievers. Then they would get recognition by the faculty that the kids are great and that they are good students.

It is a small program but it is good. We have quality versus quantity. If the program kept small then it is manageable and you can determine whether or not it will be a success. Also there is less chance of burn out with a small program. Even with the help of these kids can get, they do an awful lot in seven years and it a challenging program.

Q: How can the students who are in the program help?
A: Their feedback drives the program. Some practical details are determined by them.

Q: Why is this program different and special?
A: I'm not sure of a point by point comparison with other programs but so few schools have a program like this one so it makes us special. Also many combined programs have biomedical engineering but we have real ABET accredited engineering and that is a big difference.

Q: Do you think that this program will expand to include other majors?
A: I don't expect the program to expand to other majors until we know whether or not it works. We have a responsibility to the people involved in the program and while the program is small we can more easily deal with problems.

Q: What is the role of the faculty in this program?
A: Within the four departments is a designated faculty advisor for the students. The students in the program are here for undergraduate education first and that is why the faculty is here to teach. Hopefully the students can work with the faculty and possibly later on they could get involved in a research project and get some hands on experience.

The kids do have a demanding schedule but any interaction with the IIT Faculty would be beneficial.

Q: How do you see the students outside the classroom?
A: The program will be a grind but we don't want the kids to shut all else out. There is more to college than just classes. Of course they will have less time for participation, and if the program is too intense they may burn out. However, these are the type of students who have difficulty doing nothing. They are just freshmen now and they may even find less time for outside activities and recreation as they go on.

I'd like to thank Dr. Jaeger for his time. The second of this three part series will be published Monday.

An AT&T Card helps you communicate better, because you can use it to call from all kinds of places. Like a friend's, or a pay phone, or out on the road. You don't even need to have a phone in your name to get one. Every month you get an itemized bill stating what you used the card for.

To apply for the AT&T Card, call us at 1 800 525-7955, Ext. 630.

Now, if only it were that easy to improve your grade point average.
UNION BOARD

THIS WEEKS FILM PRESENTATION:

"It soars beyond dreams. It is a fantasy about belief, about hope, about fathers and sons, about a passion for life. Field of Dreams is a masterwork of wonderment."
—Gene Shalit, THE TODAY SHOW/NBC TV

"It's about dreams, about what you would do if you had the chance to go back and make a dream real, and Kevin Costner makes you believe you can...An Oscar-caliber performance."
—Joel Siegel, GOOD MORNING AMERICA/ABC TV

"An American masterpiece. Kevin Costner scores again with a wonderful performance in the most original and appealing movie this year."
—Bob Costa, WOR TV

"A homerun to the heart. A magical, entertaining and genuinely touching movie."
—Kenan Longfield, ABC NEWS

CASINO NIGHT

On Saturday, April 21st from 7 pm - 10 pm in the HUB Ballroom IIT will have its second annual Casino Night. This event is free and open to all IIT students and their friends.

Any person presenting an IIT ID will receive $5,000 of "fun" money to gamble with. This money can also be used to purchase raffle tickets, as drawings will occur throughout the night. Prizes will range from IIT T-shirts to a VCR, and a color TV.

PARAKEET!

A parakeet, was found on campus and the owner can reclaim it by calling K. Schug at extension 3438.

WRITING CONTEST

The writing contest deadline is Friday, April 6. Abandon hope of winning your share in $4,000 of prizes if you don't submit your entries to the Humanities Department. Submitting Contest by 5:00 pm on Friday, April 6. Undergraduates are eligible for prizes of up to $250 in Fiction, non-fiction, poetry, and freshman essay. Information is available from extension 3455, and information and entry blanks are available in 108 Life Sciences.

MISSING MAC

A Macintosh SE Serial No. F839A27BM01 is missing from Perlstein Hall. If you have any information, please contact the campus police at extension 3354.

Ramadan's special note:
MESA is pleased to announce the upcoming of Ramadan, the Holy Month of Fasting, which is expected to start on Tuesday, March 27. For more information on exact day call (708) 430-5666 or (312) 725-9047. Wish you a month full of blessings!

WOUI

Applications to be on the Exec board for WOUI for the Fall 90 - Spring 91 school year are now being solicited. The applications can be picked up at the WOUI Office on the 5th floor of Main Bldg. These applications must be returned by April 17th.

On April 20th from 2 - 5 pm, these interested applicants will each have a 15 minute interview before the Governing Board. All positions are open. For further information please call extension 3087 and ask for AI.

MONDAY

INTERVARSITY CHRISTIAN FELLOWSHIP

Biblical reflections and sharing of prayer will be the focus of the campus gathering of the InterVarsity Christian Fellowship on Monday, April 2 in IIT Chapel at 7:00 pm. In recent weeks the Gospel according to John as well as Paul's letter to the Romans have been the sources for reflections on our life at IIT. The campus community is warmly welcome.

TUESDAY

INTERVARSITY CHRISTIAN FELLOWSHIP

InterVarsity Christian Fellowship meets on April 3 at 7:00 pm in Room 124 East Hall.

TAU BETA PI

Our next meeting is on Tuesday, April 3, 1990 at 12:30 pm in the HUB mezzanine Room 302. We will need to vote on officers so please plan to attend.

ASME

ASME will hold a general meeting on April 3 in Room 122 E1 at 12:30 pm. Anyone who is interested in becoming a member is also welcome to attend. Topics discussed will include election and party at the end of the semester!

INTERNATIONAL CLUB

There will be a general meeting Tuesday, April 3 in the HUB from 12 - 1 pm. Visit Chicago Botanical Gardens April 4, meet at the Commons at 10:00 am.

SAE

SAE Holds meetings every week on Tuesdays at 1:00 pm in Room 112 E1. Anyone who is a member or is interested in becoming a member is welcome to attend. Topics discussed include IIT's mini-baja car and IIT's super mileage entrant as well as news about SAE activities and trips.

WEDNESDAY

SCIENCE AND RELIGION

The Catholic Seminar "Science and Religion" will meet on April 4 in 306 HUB. The format of the seminar is flexible and ill be aimed at the interest of the participants.

THE ARMY ACTIVITIES CLUB

We will be having our first general meeting Wednesday, April 4 at 12:00 noon in R1 Room 136. All students welcomed to join us. All students welcomed to join us. No military background required. You will not be pressured to joining ROTC. This is a chance to get to know more about what the military does (picnics, parties, possible helicopter rides, visit museums at Ft. Sheridan).

IEEE

There will be a meeting on Wednesday, April 4 in Room 305 of the HUB mezzanine from 12:00 - 12:30 pm. Everybody interested is invited. For any questions contact Shibli at extension 5079. Membership forms will be available at the meeting.

YEARBOOK

There will be a staff meeting this Wednesday at noon in the HUB Field Room.

REJOICE IN JESUS

Campus wide Christian prayer will be held on April 4 in Room 305 HUB mezzanine at 12:00 noon.

THURSDAY

BIBLICAL ENCOUNTERS

The student and faculty prayer and study program, "The Bible and You Today," continues with the weekly meeting schedule Thursday, April 5 in the Field Conference Room of Hermann Hall (SW corner of the HUB) at 12:00 noon. The week's program will focus on the interdynamics of faith and human reason as reflected by the texts of the New Testament Scriptures. This past week we began looking at "Humans and their relationship to God as revealed in the Book of Genesis." Just because the program has been going on for a number of weeks does not feel intimidated: this opportunity to deepen insights into personal values, life purposes and the self in Christian perspective is definitely open to the entire IIT community. Your input would be greatly appreciated.
LIFE
There will be a general meeting Thursday, April 5 in the HUB mezzanine from 10-1 pm. We will have a guest speaker, Pablo Morales, an IIT Architecture alumus. If you applied for a scholarship they are due today. Anyone willing to tutor elementary children, on Wednesdays between 4-6 pm, meet in the lobby of Perlstein, in front of the fountain. New board members will be elected on April 27. New members are always welcomed.

ETA KAPPA NU
We will be discussing upcoming awards and events. There is also an internship opportunity available to members. A plant trip to Motorola is being considered and members are needed to help make these plans a success. All initiates must attend and all members should make a special effort to attend. Keys are in. Anyone wanting one can get theirs at the meeting. We will meet in Stigall Hall Auditorium. Refreshments will be served.

COMBINED INTERVARIETY CHRISTIAN GROUP
The Combined Intervarsity Christian Group meets in IIT chapel on Thursday, April 5 at 7:00 pm.

REJOICE
Rejoice in Jesus Bible Study meets on Thursday, April 5 at 7:30 pm in the Field Room of Herrmann Hall.

FRIDAY
KOREAN EVANGELICAL FELLOWSHIP
The Korean Christian Fellowship meets Friday, April 6 at 7:00 pm in the IIT chapel located between the Residence lounge and the high rise apartments. The program which is structured Biblical study with a prayer format, involves undergraduate as well as graduate students and their families in an experience of Korean Christian community on campus. All interested persons are heartily welcome.

SATURDAY
CHINESE BIBLICAL SEMINAR
The Chinese Bible Study Fellowship at IIT gathers in the Field Room of Herrmann Hall on Saturday, April 7 at 7:30 pm. Anyone interested in the Christian Biblical tradition through Chinese culture is cordially welcome. The program is presently focusing on the New Testament gospel of St. John.

SUNDAY
CHAPEL HOLY COMMUNION
Sunday celebration of Prayer and Eucharist-Communion takes place in the IIT Chapel Sunday, April 8 at 11:45 am. The Service Liturgy will include those present in the Scripture readings and prayer intercessions/music. This traditional Holy Communion Prayer of Christian Unity welcomes the IIT community.

NEXT WEEK
TALENT SHOW
On Wednesday, April 11, TechMate is sponsoring a talent show in the Bog at 9 pm. All contestants must sign up in the Student Life Office to register for the event. First prize is $75, second and third prizes are $50. Come along and have some fun!

Looking for a fraternity, sorority or student organization that would like to make $500-$1,000 for one week o campus marketing project. Must be organized and hardworking. Call Beverly or Mark at (800) 592-2121.

National Marketing Firm seeks mature student to manage on-campus promotions for companion this school year. Flexible hours with earning potential $2,500 per semester. Must be organized, hardworking, and money motivated. Call Beverly or Mark at (800) 592-2121.

WIN A HAWAIIAN VACATION OR BIG SCREEN TV PLUS UP TO $1,400 IN JUST 10 DAYS!
Objective: Fundraiser
Commitment: Minimal
Money: Raise $1,400
Cost: Zero Investment
Campus Organizations, clubs, frats, sororities
Call CMC at 1-800-932-0528 / 1-800-950-8472 ext. 10

ATTENTION: EASY WORK EXCELLENT PAY! Assemble products at home.

ATTENTION: EARN MONEY READING BOOKS! $32,000/year income potential. Details (1)-602-838-8885 Ext. R-T7733.

ATTENTION: POSTAL JOBS! Start $11.41/hour! For application info call (1)-602-838-8885, Ext. M-7733, 6am - 10pm, 7 days.

ALASKA NOW HIRING
Logging, cook, fishing, nurses, teachers, etc. Up to $7000/mth. CALL NOW! 206-785-7544 Ext. A-462.

AIAA
The AIAA chapter of the American Institute of Aeronautics and Astronautics will proudly host Dr. John W. Fazzard, who will give a lecture/seminar on the Harrier (vertical/short take off and landing) fighter. Dr. Fazzard was the chief designer of the Harrier Project from 1963-78. His lecture will be on Wednesday, April 11 at 8:45 pm in the R1 auditorium. All faculty, students, and staff are welcome to attend.

SPRINGFEST
On Thursday, April 12, TechMate is sponsoring a Springfest picnic rom 12-3 pm. Come join us for free food, softball, frisbee, tug of war, and a student/faculty dunk tank! The event will be held in Morton Park, north of Herrmann Hall, and Perlstein Park, east of Herrmann Hall.
Coming soon to a University near you.

It is SPARC Party Two. Bigger and Better than before.

A gala event for the whole campus with a beergarden, a band, and raffle prizes - grand prize is a mystery?? trip for two for one week expsense paid.

Admission $2 - Proceeds to Benefit Keating Hall

DATE: 4/26/90
TIME: 10 pm - ??
PLACE: The HUB

You be there or you won't win!!!

FUN - Prizes - Charity
SPARC
The Unknown Reviewers

This article was to appear in last week's issue of Tech News, but due to some technical difficulties, didn't beat the deadline.

THE DUDE ON THE LEFT

Well, the Unknown Reviewers did survive Spring Break; so guess what? You've stuck with us for the rest of the semester! Unlike my counterpart who lavished in the warm sunlight of Florida, I was stuck in this rainy city of Chicago. So, I did the next best thing to laying in the sunlight, watching beautiful beauties on the beach, who had no chance at... I stayed at home; and in the company of a few close friends, proceeded to watch as many movies and kill as many brain cells that can possibly be done in a week. Let's just say it was a least productive week. But still, spring break is meant to be. Enough of that, now to some slightly abridged versions of reviews.

City Limits was the band that closed the first half of the semester of Rockerdom. Yes, they were the band that was before spring break, and I'm amazed I can even remember that for back. Their music is best summed up by listing some of the bands they tried to imitate. Lou Graham, Bud Stewart, The Outfield, Don Jovi, INXS, Journey, and Night Ranger. In other words, high school music spanning the 80's. I have to say that either my hearing was starting to go (probably from that great Crack'd Actor show the night before) or maybe I'm starting to get too old, but it seemed incredibly loud, which made the music difficult to understand. However, I lasted the entire show, and was pleased at the renditions the band did of songs like "Raisin on Radio," "Just Between You and Me," "New Girl Now," and "Blood on Blood." Their original wasn't too bad either. They had a couple of good songs that probably would have made it five years ago, but I don't think the songs they wrote have the mass market sound of today's music. I liked them anyway. I'm going to give City Limits one thumbs up. They were a good band, and I wouldn't mind seeing them again.

Next Review - Emmit Stone. Who is Emmit Stone? Well, they replaced the vocal of Nikki Fox. When I told my informed sources, had to cancel at the last minute due to some unforeseen circumstances. Well, it was quite a disappointment for many of the metal fans, but Emmit Stone was an okay replacement. They didn't do anything that was later than somewhere around 1985, (except for "Unchain My Heart" by Joe Cocker). In fact, most, if not all of the music was pre-1980. Jethro Tull, Led Zeppelin and the Rolling Stones were the call of the night, with some Who and Steely Dan thrown in for good measure. They were a fun band, who unless you were a classic rock fan, you probably wouldn't have had a good time. Well, I did. I'm going to give Emmit Stone two thumbs up. They were a fun band to listen to, and an excellent replacement for a bunch of hoolin heavy metal guys (just kid-

The Unknown Reviewers

Now, about our rating scale (at least mine). A couple of weeks ago, I gave a band called Dr'Fran the thumbs up. I've heard through the grapevine that a lot of people didn't like them. Well, I'm sorry that I disagree with you, but I did like them. As a reviewer, that's my privilege. Until I get banned from doing reviews (kind of like Skakel and Ebert), I'll keep giving thumbs up or down as I see fit. If my opinion doesn't agree with your opinion, I'm sorry, but it's just an opinion. Enough ranting and ravings. That's all for this week.

THE DUDE ON THE RIGHT

Welcome back to IIT all you folks with no tails. Yes, while you all slaved away on your take home exams, homework, boring dreddugwork and stuff, I was lounging on a chic, infested beach in beautiful Daytona Beach, Florida. So, how was it? Groovy! And now on with the reviews.

Well, with the break and all, we have several bands to comment on this week. And the first band is "City Limits." They were the dudes on the Thursday b/spring break that sounded like the Outfield. Sure they sounded good (and loud too! recessed loud). And their originals showed quite a bit of songwriting talent. They included some quality renditions of Thin Lizzy tunes and some decent Van Halen and even INXS. But their real calling was in tunes from Night Ranger and the Outfield. Now this is purely a matter of taste, but I really don't care for that brand of top 40 music. I guess it reminds me too much of the pseudo-Pulp-hipster type people back in high school. You know, the pretty boys dating the cheerleaders. "Hey dude, you get the new Outfield album yet?" So, though I didn't really have a bad time, but I really didn't have a good one either. I guess I'll give them one thumbs up to this slightly abridged review.

But now on the real good part. You metal heads were probably pretty corned fused when Nikki Fox, the heavy metal band, was replaced due to circumstances beyond our control with a virtual unknown, "Emmit Stone." Now maybe it was the drive of a metal band, or the fact that it was the first concert after break, but you would have thought Jak Macrae or Shuddup 'n Drive was in the Bag. I don't think I've seen that Back that packed for a real long time. It was great. They started off the show with the "Peter Gun Theme" (which they repeated later in the night). From there we got some Spinal Tap, Chicago, Stones, Santana and probably the best Jethro Tull I've heard in a long time. Rick Reynolds had the perfect voice for Tull tunes, and the band was musically talent enough to actually play the flute parts (on a flute no less!). They definitely had a knack for 70's rock, and they included tunes from Edgar Winter and ELP.

The second set was kind of a let down. They did play some really good Chicago, and very rotten
good version of Golden Earring's "Radar Love." Some Who and Stones kept the crowd excited, but I think people wanted them to go back to Tull for maybe "Aqualung" or something. The band was really enjoying themselves, and wanted to play as much as possible, so they kept their last set back to a minimum so they could get a lot in before the 12:30 "time limit." The last set showed off their talents with songs from Steely Dan and Elton John. They even added some "Flows 'Us and Theirs." This semester is the semester for the Underdog, obviously. Yep, two big thumbs up for Emmit Stone. Hopefully they can come back again with a little more notice now that they know what a real Bog crowd wants. Well, that gives City Limits two thumbs up and Emmit Stone the big four thumbs up. Both a couple of good bands.

I should also note that the Wednesday 6-4 break Crack'd Actor and Artistic Feet played the Cobby Bear Lounge. The show was primarily originals, but some old favorites were included too. Artistic Feet is another band I really wouldn't mind seeing in the Bog, especially if they played a more Dead oriented set. But they were really good either way. Well, that's all for this week, a pretty good one too. Hopefully Thursday's attendance is a sign of things to come. A few fewes don't hurt either. So until next week, study, study, study... but take a break so we can CJU next Thursday, so we can pack the Bog to the walls.
Sailing
continued from page 12
and left the dock. We motored out of the long harbor channel into Biscayne Bay, hoisted the sails and headed south.
Everybody's body quickly forgot that it was moving at 70 miles per hour the day before and got used to the eight miles per hour pace the 14,000 pound boat was doing through the water.
The two boats played follow the leader down the intercoastal waterway to the first night's anchorage, Pumpkin Key. With the boat swinging gently on their anchor line, chef Sheila cooked a gourmet meal while the sun was setting over the horizon.
The following morning brought a little trouble for one of the boats. The batteries lost a lot of power and wouldn't start the engine which we needed to get through Anglafish Creek. After borrowing a battery from the other boat, we fired up the engine and headed through Anglafish Creek into the open ocean. The boats met high seas (four to six foot waves) and lots of wind, but it made for an exhilarating ride as we plowed through the turquoise sea.
That evening we anchored off of Rodriguez Key. Some people tried their hand at windsurfing while others went ashore to explore this deserted island. Night time brought a full moon peaking through the partly cloudy skies and anchor watches. The wind was really blowing in people were coupled off and took shifts, watching to make sure the anchor didn't drag.
The third day was a short sail back to civilization. We spent the rest of the day and night at Holiday Isla Marina. It was a happening place with four bars, two swimming pools, and lots of college kids on spring break. The night passed away into a fuzzy dream after a few of the best rum runners parked their boats in the Keys.
The next day we went out to sea and headed back toward Miami. Our plans of taking two days to return were quickly changed when one of the boats started taking on water. We decided to sail all the way back to Miami and finally made it to the harbor at 1:00 am the next day.
The extra day was spent in Miami going to the beach and checking out the other sights.

Everyone relaxed and talked about all the funny things that happened over the course of the week. Many good friendships were made and plans for the future were talked about while the moon set behind the palm trees.
The IIT Sailing Club holds meetings every Thursday at 1:00 pm in the HUB. This year's activities have already begun and anyone interested should come to the meetings (no experience necessary). For more information call the Student Activities Office (extension 6876) and leave a message.

How much do you know about what American women waste every year? Answer these questions and submit your responses in the Law mailbox by Wednesday, April 4, 2:00 pm. Prizes given to the top scorer!

EARTH AWARENESS QUIZ #1

1. Approximately how much water in our home is used in the bathroom?
   a) 90% b) 75% c) 63% d) 20%

2. How many cars are abandoned in the U.S. every year?
   a) 5 million b) 500,000 c) 3 million d) 1.5 million

3. About how many trees are used to make disposable dinnerware?
   a) 500,000 b) 500,000 c) 1 billion d) 6 million

4. To produce one steak, how many gallons of water are needed?
   a) 1000 b) 879 c) 1922 d) 267

5. What is the largest single source of waste paper collected for recycling?
   a) corrugated boxes b) newspapers c) aluminum cans d) plastic bags

6. Americans buy and throw away how many disposable cigarette lighters per year?
   a) 500 million b) 250 million c) 1 billion d) 780 million

7. Yearly, Americans purchase how many pounds of plastic for personal use per Earthday?
   a) 47 b) 10 c) 159 d) 42

8. The rate at which we generate garbage increases how many new dumps every year?
   a) 150 b) 296 c) 532 d) 500

9. How much of the Earth’s water is fresh water?
   a) 13% b) 3% c) 10% d) 5%

10. How much money do Americans spend on their lawn every year?
    a) $2 billion b) $17 million c) $6 billion d) $9 million

Renters and Landowners

Religion In The Age Of Science

Have you ever thought about how science and religion relate to one another, or if they do? The Chicago Center for Religion and Science located at 1100 E. 55th St., in Chicago’s Hyde Park neighborhood is attempting to address this issue with its series entitled PHYSICS AND BEYOND: CHICAGO TALK WITH THEOLOGIANS ABOUT THE WORLD THEY SEE, concluding to the end of the semester. The public is welcome to attend any or all of these free lectures which begin at 7:00 pm each Monday. The program for April 2 will feature Richard Burton (Theology, Religion, Indiana University, NorthWest), Linda MacDonald (Physics, North Park College), and Michael Modeford (Theology, LSTC). On April 9, the program will feature Robert Wald (Physics, University of Chicago), Philip Honef (Theology, Lutheran Seminary of Theology at Chicago). For any further information contact Ansel Amadio at extension 3080.

Issue: Date Rape At IIT

Part 1: A Candid Talk With Terry Shapiro

by Al Bron

One of the major issues on college campuses today is date rape. Many students, faculty, and administrators are clam­ ing to get more information on this subject, not only for the students but for all of us inside and outside of the Counseling Center.

Q: How many occurrences of date rape are known to have happened here?
A: Not much seems to have happened here. Few cases have been reported to the Counseling Center. I'm sure the problem does exist, but no one has wanted to discuss it. We have had a couple of sexual harassment cases, but not many.

Q: Why does date rape occur?
A: There would be less occurrences here than at a major university for many reasons: one is that we don't have as many students or students in general. The bigger university, the students we do have are of high quality they treat people well. Date rape to occur, you need a woman and we don't have a lot on campus, although we do have some.

Q: Do you have a problem with date rape?
A: Just because we don't see it doesn't mean that it doesn't exist.

Q: What does date rape mean?
A: Socially, men are trained that when women say no, they do not mean it. We grew up learning that that's how our lives. Unfortunately, it is wrong and men should try to listen to women in those situations, but men go forward when women say no. A male bears a female says no and he ignores it. It is in his nature to get started. It's okay to be assertive, but it is wrong to be aggressive.

Q: How can date rape be prevented?
A: One of the key things is communication. The man must listen to the woman and accept the fact that when she says no it means no. It would also help if people took things slowly physically. Young people have lots of hormones and usually the physical aspect gets ahead of the emotional aspect. An example of this is the one night stand. People don't develop as a couple but develop physically at that time.

People have to learn to control themselves. It's okay to have feelings and you can't control them, but you can control your actions. People don't realize the difference between feeling and acting. Feeling is a lot of people means that they must act. But if you feel anger that doesn't mean that you should kill. It is the same with this situation. If you feel attracted, it doesn't mean that you have to go to bed with someone.

Q: How important is this problem and the consequence?
A: This is a small but important problem. It is bigger than we know but it is smaller than what occurs at other universities. However, if it happens to one person then it is bad.

Date rape is actually bad for both people involved. Of course the woman feels the worst, but the man who also feels bad too due to guilt.

Date rape is a serious issue which can affect anyone at any time. In the future, to fight more about this issue, I'll be talking with the Campus Police, the IFC, and other members of the university community. The true way everyone should try to be considerate of others and their rights. And lets remember one thing, to be careful out there in that jumble known as social life.

Efforts To Draw Women Unsuccessful

(CPS) — Only a few more college women than 10 years ago major in science and engineering programs, despite efforts to draw them into the disciplines, a researcher told a science convention in New Orleans.

The women who do major in science or engineering, moreover, get lower pay, slower promotions, less visibility and fewer rewards than men. Jane Bayle Buffal told an audience at the American Association for the Advancement of Science meeting in New Orleans.

"A healthy society and economy must encourage the maximum talents of all its people," said Kahle, who is a professor of teacher education at the University of Miami in Ohio.

Only 14 percent of female first-year students, compared to 48 percent of the males, choose to major in science, Kahle reported. In addition, the number of women receiving degrees in 1980, compared to 1976, showed science or statistics fell from 4.4 percent in 1980 to 2.4 percent in 1989.

"It's certainly discouraging, but I don't think it's something that is keeping women out of the field," said Amanda Baer, a senior engineering major at Stanford University.

Kahle figures that the lack of female role models and colleagues in the fields is one of the reasons that many students majoring in engineering and science eventually change majors.

But Stanford's Baer, who only 594 of the 3,032 engineering students are female, said the lack of role models just gives her more incentive to do well in her field.

"Maybe I can become one of these needed role models," she said.

Bill Would Cut Work Study Aid

(CPS) — Students in College Work-Study jobs nationwide would lose up to 7.65 percent of their wages if Congress approves a Bush administration proposal to end a 52-year-old student Social Security exemption, University of Michigan lobbyist Thomas Butt warned March 20.

A House subcommittee is now hearing testimony about the bill, which would force students to pay Social Security taxes for the first time since 1939 on wages they earn under the College Work-Study program.

The measure, Butt said, "would be devastating to students working their way through schools."

Since colleges would have to match part of the Social Security taxes students would pay, schools might have to reduce the number of jobs they can give to students, testified Elizabeth Vose, staff for the National Association of Student Personnel Administrators.
Troy Leaf Enters Ecko Pool Hall Of Fame

For the second year in a row, senior swim team captain Troy Leaf has led the team in scoring - in Troy's freshman year he was fifth with 145 pts. His sophomore year saw him 3rd with 268 points, and he was leading scorer his junior and senior year with 231 and 267 points respectively. Troy's 4 season total of 911 points put him 3rd in all time scoring with 911 points. Troy also qualified for the national championship all four years and for the last two seasons has made the national scholar-athlete all America team, this year with his 3.508 GPA in Aerospace engineering. Troy is also up for the state scholar athlete award and is also under consideration by the College Swimming Coaches Association of America for their All-American Academic Award.

Troy's four years on the team has seen IIT win 24 and lose 23 dual meets, while getting national rankings all four years with its best being 14th place in Troy's freshman and sophomore seasons. Troy is also a member of all five varsity relay team records.

For all his accomplishments on behalf of IIT swimming, Troy becomes the next individual to be honored in the IIT Swimming Hall of Fame in IIT's Echo Pool Gallery. Coach Mauch stated that Troy will be hard to replace, he was a consistent competitor who could always be counted on in a tight meet, he's one of those athletes who's the backbone and the spear of your squad, and who you didn't worry about in the grades department. He will be sorely missed by the team and especially by his coach.

Sailing Away In Miami: With The Sailing Club

"It's not far down to paradise, at least it's not for me. If the wind is right you can sail away and find tranquility." (Christopher Cross)

For the IIT Sailing Club, paradise wasn't that far away (only 24 hour car ride). The 16 people that went adapted to the 85 degree weather and sunshine in Miami.

Once in Miami, we boarded our two 34 foot boats and began provisioning for our week long trip down to the Florida Keys. After all the food and beer was bought and stowed away, we took it easy and awaited our departure the following morning.

We woke the following day to sunny skies and lots of wind (20-30 kn+40). Everyone took their last shower for the next two days and we headed up

by Nick Radoff
Intramural 3-on-3 basketball stars Tracy Leonardi (Jr., Lemont), Sharon Prichett (So., Chicago), Tina Malinowski (Sr., Chicago), Tarchwa (Jr., Chicago), will be participating in the Schick Super Hoops Regional Championships at the Chicago Stadium April 13 during half-time of the Bulls - Bucks NBA game.

The women athletes will be competing against the University of Illinois at Chicago players - Julie Van Eek (Sr., Villa Park), Joan Isabelli (Sr., Shorewood), Lu Hladik (Jr., Cicero), and Claudine Borkovec (Sr., Darien).

According to the National Media Group, the two teams advanced to this championship game by finishing as the top two female teams in the regional tournament at the University of Illinois. On February 17, the IIT women competed against teams from 40 other colleges and universities for this chance to play at the stadium.

This season, nearly 800 colleges and universities with more than 200,000 students across the country participated in the sixth season of Schick Super Hoops.

IIT Students Make Schick Super Hoops Regionals

Team X I.M. Champs

Team X went undefeated during the Tuesday league I.M. basketball season to capture the I.M. championship for the spring semester. Members of the team are Nick Panoussis, Captain, George Jones, Tassos Rigopoulos, Scott Tyler, Rodrigue Demendruz, Arturo Pelo, Cao Kyun, Ryan Kirkland.

The final team standings for the Tuesday league are:
1. Team X 6-0
2. Midnight Runners 5-1
3. Smart Officers 4-2
4. Seahawks 3-3
5. IIT 2-4
6. Tech Mata 1-5
7. C.H. Warriors 0-6

Midnight Runners Take I.M. Basketball Tournament

The Midnight Runners were unbeaten in their Double Round Robin Thursday League I.M. Basketball Tournament. Captain Sam Perry lead team members Kevin Carter, Richard Allen, Tony Mendora, Mark Vincent, Mike Pasham, David Rogers, and Ryan Kirkland in the final game of the season to a 26-20 victory over a tough IITRI team.

The final standings for the Thursday Tournament are:
1. Midnight Runners 6-0
2. IITRI 4-2
3. Tech Mata 2-4
4. Bough Rats 0-6
