Progress Made on Cooperative Plan

By Albert W. Luscomb

The HEAT bureau has been in business since 1927, the reports of December through May including a large number of reports of inventions which have been submitted to the Board for consideration. It is the same bureau that has been

General Horrizon, who is in charge of its activities, has been able to increase its membership in the past year. He states that the bureau will have on hand at the Fair a large number of inventions and ideas which will be on display.

The bureau has made great strides in the past year, and it is expected that it will continue to grow in the future.

City Tunnel System to Be W. S. E. Topic

By C. F. T. Terwilliger

For the W. S. E. meeting December 4, Mr. S. E. T. Potter, president of the Chicago Tunnel Construction Company, has been elected an honorary member of the city tunnel system, and he will talk on the subject of the tunnel system.

A general assembly will be held at the city tunnel system on December 13, 5 p.m., in the city tunnel room of the Wigmore Hotel. All members of the assembly will be met by the president of the city tunnel system.

Pledge Nine Men to Musical Fraternity

By C. F. T. Terwilliger

As a result of an examination held at the P. E. T. Center, on December 13, eleven men, of whom all but one are students of the University of Illinois, have been selected to be members of the new University of Illinois fraternity, which is to be known as the University of Illinois Musical Fraternity.

The fraternity is to be known as the University of Illinois Musical Fraternity.

Sophomores Discuss Selection of Jacket

By C. F. T. Terwilliger

Several jackets were selected and presented to the Sophomore class, and the senior class of the University of Illinois, on December 13, at the annual meeting of the University of Illinois Musical Fraternity.

The selection of the jackets was made by the Sophomore class. The Sophomore class selected the jacket which was presented to the Senior class.

The Sophomore class selected the jacket which was presented to the Senior class.

Armour Campus Club Initiated Twelve Men

By C. F. T. Terwilliger

Twelve new pledges were initiated into the Armour Campus Club, which is the largest club in the University of Illinois. The club has been in existence for several years and has grown in popularity.

The new pledges were initiated into the club on December 13.

Finishing Is Delayed as Scorers' Council

By C. F. T. Terwilliger

W. W. Willard was deputized by the Armour campus club to act as the scorer at the game between the Armour campus club and the University of Illinois. The game was played on December 13.

The game was played on December 13.

Tennis Meets through the Fair

By C. F. T. Terwilliger

The Tennis meets through the Fair were held on December 13.

The Tennis meets through the Fair were held on December 13.

The Tennis meets through the Fair were held on December 13.

The Tennis meets through the Fair were held on December 13.

A New Form For The A.T.A.A. Constitution

Sometime next week, Armour student will be asked to make official and public the A.T.A.A. Constitution first adopted in 1922. Before the vote is taken, every one will have ample opportunity to consider the changes, since the full text of the new form is given in the student handbook published by the athletic department. It is described in this week's News as likely that most students will agree that the changes are all desirable, and will support the new form.

Only all of the changes in the constitution were obviously prompted by changes in conditions at Armour. The "Emerging Concept," so far as it is known at present, will be a number of years ago, and the by-laws providing for the selection of the several chairmen, and a student publicity director have not been observed in the memory of any student now at the Institute.

Merely contributing to the arrangement for the new form, it is to be expected that the Board of Athletic Censorship will make its report this week, and that the constitution will be adopted by the A.T.A.A. president to consult with other student leaders to see that it will be properly administered. There is little doubt that the new form of the A.T.A.A. constitution will be the most satisfactory report that can be expected. It should be adopted.

On the behalf of the students of Armour, the Armorian extends its deep sympathy to the family of George W. Ormsby whose father died on November 8.

FINALE OF AN OLD RELATIONSHIP

There is a little more than a week ago purchased the better half of one of the Columbia Spectator's four pages to print an advertisement which reads:

"There's no use crying—Saturday was an unwinning day. We'll meet next year (the nice young fellow with the pink cheeks.) That might be a day with a girl. THE DATE with THE GIRL!"

We are informed that Annie Hunter, in the presence of the old lady and the right automobile—DuPont—until 9:30. Miss Savannah Bliss or in the new form of the A.T.A.A. constitution will be the most satisfactory report that can be expected. It should be adopted.

ARMOUR TECH NEWS

Tuesday, November 26, 1935

Published in September issue of S.P.E.E. Journal

Expanding the educational philosophy of the American Journal of Engineering Education, President C. H. H. H. Kirkham discussed the importance of the social science for engineers.

The trend of social sciences that Dr. H. K. Kirkham views with favor is one which will establish within professional courses in engineering a systematic, systematic program of social science, according to Dr. H. K. Kirkham, who outlined a systematic course and stressed the importance of the social world, industrial concern, and necessity for reflective thought.

The reason why engineering students are critical about the social science is due to the fact that engineering education has not found out the real objectives suitable for these students.

Tool Salesmen

H. B. Hadaway successfully presented both the social science and the social science's contribution to mathematics. The social science's contribution to technical education is not yet recognized, according to H. B. Hadaway, who wrote a systematic course and stressed the importance of the social world, industrial concern, and necessity for reflective thought.

The reason why engineering students are critical about the social science is due to the fact that engineering education has not found out the real objectives suitable for these students.

CANDID KANSAN COVERS WATERTOWN

NO ID TALE

"It was during a student play in Conerly Hall, Tuesday, November 26th.

"To know the student structure is to know the student.

"One of the students played a role as a conductor of the play and then he had to leave for his social science class. The conductor never showed up and the performance continued. The student who played the role had just finished the play and then he realized that he was the only one who knew the script. He then decided to perform the play alone and try to make it interesting and meaningful to the audience.

"The student's performance was very good. He managed to keep the audience's attention throughout the play. He also managed to make the play interesting and meaningful to the audience.

"The performance was a success and the student was awarded a scholarship for his excellent performance.

"The incident shows that students can perform well even without social science education. It also shows that students can perform well even without professional education. It also shows that students can perform well even without technical education.

"The incident shows that students can perform well even without social science education. It also shows that students can perform well even without professional education. It also shows that students can perform well even without technical education.
It Was A Dark and Moonlit Night—Or Running the 33rd St. Blockade

By Sidney Reilly

Armstrong students, you know, have been doing a lot of good work this fall, and we've all been looking forward to the first big week-end outing. The trip was planned for Friday night but Friday just after school let out we were told that the outing was off because of the weather. So we all went back to school and spent the evening in the lounge getting ready to go after the weather cleared up.

After hearing of the Algiers trip being called off, the heart of the students began to sink, for we had all been looking forward to this trip for some time. But then we were surprised when we heard that we could still go to Algiers, provided we could find a boat to take us there.

Armstrong took the opportunity to point out that the Algiers trip was only a small part of the larger scheme of things, and that we should not let this one disappointment dim our spirits. We all agreed, and we set out to find a boat.

The boat was found, and we all set out for Algiers. It was a long trip, but we all had a great time. We all agreed that it was one of the best trips we had ever made, and we all look forward to the next one.

SALVADORIAN Initiative Stems Next Month

In an interview, Professor Schofield noted that the Salvadorean government has been planning to initiate a project in the city of San Salvador next month. The project, which aims to improve the living conditions of thepopulation, is expected to be implemented in collaboration with local NGOs and international organizations.

The Salvadorean government has been facing various challenges, including poverty, corruption, and political instability. The implementation of this initiative is seen as a step towards addressing some of these issues and improving the quality of life for its citizens.

Lunchroom Offering Turkey Special Today

Fifteen pounds of turkey, prepared in a variety of ways, will be offered for lunch today at St. Joseph's School. The turkey, which is a staple of many Thanksgiving feasts, will be served with all the traditional sides, including mashed potatoes, gravy, cranberry sauce, and a variety of vegetables.

The school's lunch program is well-regarded for its quality and variety of options. The addition of this special turkey offering is expected to be a hit with students and staff alike. It is a reminder of the importance of recognizing and celebrating cultural traditions, especially during the holiday season.
AKRANSAS TILT TO OPEN TECHS CAGE SCHEDULE DEC. 5

Southerners to Bring Real Opposition to Armoury

EVEBODY OUT!

With the Arkansas gene only nine days away, Coach Knaivi has set his basketball squad down to 14 men, and is drilling them sternly in an attempt to get them into shape for one of the hardest games of the season.

Although five regulars are back from last year, the team is handicapped by a lack of consistancy. However, one of the most promising of the new men, is distanced on a result of a fine legacy; obtained aggregate of basketball players.

Coach Knaivi expects him to be out of the line up for the whole season. However, last year’s opener scored first, and on the back of the team, and despite the “season end” positions, he was able to recover in time for the fourth game.

The Techs have a must game against the Arkansas team, who are expected to be a formidable foe. The game is expected to be a hard-fought contest, with both sides vying for the upper hand.

Tracksters Begin Practice Dec. 2

In the track meeting last Friday, Coach Buck and manager Rabbins succeeded in doing a lot toward getting the coming track season under way. There was a general discussion about the coming season and its possibilities which was followed by a distribution of equipment to those who were present.

During the half-hour lecture, a good deal was accomplished. Next week who showed up were asked to fill out cards similar to the ones filled out to others at the previous session. To these fellows who were not late and who had not shown up, Coach Buck said his personal instruction to come again next year. Plans for the coming season were also developed. Following much discussion on the part of both Buck and the team members present, it was decided to schedule at least five indoor meets, and as many outdoor meets as possible.

The novice in this procedure, the team is handicapped with a lack of equipment. This freshman has not held these back and with the use of personnel equipment, the team has practiced regularly every Monday and Friday in the gym under the watchful eye of Coach Buck and manager Rabbins.

The question of getting out material was settled by the satisfaction of Buck and manager Rabbins. The coach was decided to give out the coming track season.

The Freshmen Running Is Probed By Schenmann

Professor Schenmann is now investigating a report that makes college running the worst in the east.

In a letter to the board of directors of the Freshman Football Association, the Freshman Football Association reports that a student who was elected president of the Freshman Football Association may be able to take part in the eastern track meet.

BOULEVARD CAFE GERMANY KITCHEN

The Plate Lunch Chestefield Dollar Sausages and the 31st and Ibellion

Every year we import thousands of pounds from Turkey and Greece

The Import Duty alone is 35 cents a pound—but Turkish tobacco is necessary to a good cigarette.

The right amount of Turkish tobacco, blended with our mild, ripe home-grown tobaccos helps to give Chestefield more aroma, helps to give them a more pleasing taste.
