A REVIEW of defenses recently taken by the Armour faculty and students toward the University and their own interests might well lead to the conclusion that the days of the fraternity are numbered. The writer made an effort to see both sides of the question and finally arrived at the conclusion that under the present conditions a fraternity will have to be reorganized and a new set of features introduced in order to meet the demands of the modern college student of today. The writer does not favor the idea of giving up the fraternity system entirely, but believes that a reorganization of the present system is necessary if the fraternity is to continue to exist.

I. The case for the fraternity is well taken.

The fraternity is an institution that has been in existence for over a century, and has served a useful purpose in the past. It provides a social and recreational outlet for students, and also serves as a means of preparing students for college life. However, the fraternity system is not perfect, and there are certain deficiencies that need to be addressed.

II. The case against the fraternity is valid.

The fraternity system has been criticized for several reasons. First, it is often seen as a means of exclusivity and elitism, as only certain students are able to join. Second, the fraternity system is often seen as a means of perpetuating social and economic inequalities. Third, the fraternity system is often seen as a means of encouraging hazing and other forms of abuse.

III. Conclusion.

In conclusion, the fraternity system is a valuable institution that has served a useful purpose in the past. However, it is necessary to reorganize the fraternity system in order to meet the demands of the modern college student. The fraternity system should be reorganized to promote social and recreational activities, while also addressing the deficiencies that have been noted.

Hans Chosen Head Of Alpha Chi Sigma

Alpha Chi Sigma, national professional financial fraternity, held an election yesterday in the main hall of the Armour building to elect its new president. The election was held to fill the position of president, which was vacated by the resignation of the previous president, who had been elected to the presidency of another fraternity.

The election was held in the main hall of the Armour building, and was attended by a large number of members of the fraternity. The election was conducted by the election committee, which is composed of members of the fraternity who are not currently holding office.

The election committee conducted the election in a fair and impartial manner. The candidates for the presidency were nominated by the election committee, and each candidate was given an equal opportunity to speak before the members of the fraternity.

The election was held in a secret ballot, and the members of the fraternity were given the opportunity to cast their votes for the candidate of their choice. The election committee counted the ballots and announced the results of the election.

The election committee announced the results of the election, and the new president was sworn in to office. The new president gave a speech expressing his gratitude for the support of the members of the fraternity and his determination to serve the fraternity with all his devotion.

The members of the fraternity were pleased with the results of the election, and congratulated the new president on his victory. The members of the fraternity expressed their confidence in the new president and their readiness to work with him for the betterment of the fraternity.

Plan to Build Air Conditioning Unit

To promote the installation of an actual air-conditioning project, a joint committee of the mechanical engineering faculty has been formed. The committee is composed of five members from the University and five members from the Air Conditioning Unit. The plan is to install an air-conditioning system in the Lake Hall, which will be completed by the end of the year. The committee will work closely with the University's engineers to ensure the smooth and efficient operation of the system.

The STEAM SHOVEL

Are the JUNIORS and SENIORS returning? John Beadle, freshman, heads of the student elevators from the second to the fifth floor. He is determined to get the job done right.

One-Man Saws
Some 100 people have already signed up to use the one-man saws.

Students are also working on the installation of the new air-conditioning system in the Lake Hall, which will be completed by the end of the year. The committee will work closely with the University's engineers to ensure the smooth and efficient operation of the system.

WHAT PEOPLE ARE SAYING...ABOUT CAMEL'S COSTLIER TOBACCO!

When people try Camel's, they like them. For Camels are made by recognized specialists, the one for you, more expensive tobaccos.

WHAT A DELIGHTFUL FLAVOR CAMELS HAVE

I SMOKE A LOT OF TOBACCO, AND I HAVE foundCamel's the only one that suits me. The filters are clean and the taste is smooth.

$0.00 MY WIND

I SMOKE A LOT OF TOBACCO, AND I HAVE foundCamel's the only one that suits me. The filters are clean and the taste is smooth.

WHAT A DELIGHTFUL FLAVOR CAMELS HAVE

$0.00 MY WIND

In the sanctuary of Camel's, let your senses savor the finest blend of tobaccos. Experience the smoothness and richness of Camel's, the taste of greatness. Try Camel's today, and let your senses experience a new level of smoking pleasure.
FROSH CAGE TEAM LOSES TO LEWIS IN FIRST Contest

Armour's freshmen squad was met by Lewis's business varsity team in a strenuous contest that ended with Lewis winning by five points, 20 to 15. The game was held in the main gymnasium.

The game started with an early lead by Lewis, which was kept throughout until the last minutes of the game. Lewis's players showed better teamwork and coordination, which was evident in their quick passes and accurate shots. On the other hand, Armour's team showed some promising potential, but they were unable to match the intensity and skill of Lewis's players.

Armour's team consisted of several players who showed a lot of promise. They have the potential to become a strong force in the future if they continue to work on their skills and teamwork. Lewis's team, on the other hand, is already a well-established and experienced group.

The game was a good opportunity for Armour's team to learn from their opponents and to gain valuable experience. They can use this experience to improve their skills and strategies for future matches.

In conclusion, the game between Armour's freshmen and Lewis's business team was an exciting and competitive match. While Lewis emerged victorious, Armour's team showed great promise and potential. With more practice and experience, they have the potential to become a formidable force in the league.
