NEWSEASON'S TECHNIC

JUNIORS VOTE FOR CLASS PRESIDENT

Juniors are on the move, voting for the class president. The election is held to select the leader of the junior class for the upcoming academic year.

BERNARD OSWALD was elected president of the freshmen class yesterday, polling 63 votes and defeating his nearest rival, Mike Thompson, who received 25 votes and 12 absences. Oswald is a member of the class of 1917, and has already demonstrated his ability by serving as treasurer of the freshmen class last year.

Bodnar Elected Soph President

Bodnar, a member of the class of 1917, was elected president of the sophomore class, polling 45 votes and defeating his nearest rival, Bob Johnson, who received 22 votes. Bodnar is a member of the class of 1917, and has already demonstrated his ability by serving as treasurer of the sophomore class last year.

SMALLER CIRCLES MEET IN ARMS

Several small circles met in the Arts and Sciences building yesterday afternoon to discuss various matters.

ARMOUR INSTITUTE OF TECHNOLOGY, Chicago, Illinois

James O. McKinsey, elected chairman of the board of trustees, received the congratulations of the student body yesterday afternoon.

SALAMANDER PEDAGOGUS BRISBANUS ET HORN

The annual meeting of the Armour student body was held yesterday afternoon in the auditorium, with the election of the class officers as the main item on the agenda.

Ottosson Zensale Chosen President

In an election held last Thursday, Ottilo Zensale was chosen to lead the Armour Tech orchestra for the coming year. Other officers elected were: S. A. Hedin, secretary; and E. F. J. E. J. Janse, treasurer.

FACILITY ATTENDS SEMI-ANNUAL TAU BETA PI PLEDGING

The facility attended a semi-annual Tau Beta Pi pledging ceremony yesterday afternoon.

FIRE PROTECT'S LEADER GRADUATE PROGRAM

The Armour Institute of Technology is pleased to announce the opening of its new graduate program in fire protection.

ARCHITECT ELECTED

The Armour Institute of Technology is pleased to announce the election of a new architect to its faculty.

ARMOUR INSTITUTE OF TECHNOLOGY, Chicago, Illinois

James O. McKinsey, elected chairman of the board of trustees, received the congratulations of the student body yesterday afternoon.

In an election held last Thursday, Ottilo Zensale was chosen to lead the Armour Tech orchestra for the coming year. Other officers elected were: S. A. Hedin, secretary; and E. F. J. E. J. Janse, treasurer.
“The Slipstick”

Clouse to “The Slipstick”: let the Slipstick fly where it may.

**THE FRESHMEN’S ODDS**

**PHILLIPS HAS YOUNG, KATHY RANZA’S OVERSTATED PROMISES TO BE REALIZED**

The freshmen’s odds—now the boys say it may be.

And with an air prefix of cash for the Freds.

Their boards have been and borne on cash for the Fords.

And the boys are under someone’s cash.

**HEARD IN THE BOOKSTORE**

Author: "Those are my notebooks and answer books.

Customer: "I can’t imagine, unless it’s shelves.

Author: "Why is it so much richer than the last book?

Customer: "Because something in the last book.

Author: "I didn’t know your son was at college. Is this his freshman year?"

Customer: "Oh, no, indeed! He’s a sophomore.

**In Our Bandbox**

"Going all night on my feet," the fresh demands of stay, our bookkeeper.

He was located next.

"Looks kind of weak," remarked our green patched mouth, breathing it derivative.

"Yes, the days are getting shorter.

Freshman: "Toms, I always travel in the best circles.

Not from the secondary school.

"Why don’t you travel in the best circles?"

"Women," I said, "I never saw a fellow in the best circles.

**DELTA TAU DELTA**

Plans are being made for a party on Saturday night. The social committee, Barry Toree, chairman, will meet to make arrangements.

**ALPHA MU**

We shall plan to name the officers of the group shortly.

**FRATERNITY SLOGANS**

"More is no little talk," and the freshmen shall be heard for another stool.

**DELADEL ORO**

The rush on the group will last, but the rush on our group will last.

**KAPPA DELTA SIGMA**

The freshmen are now in the process of assembling their group.

**Time to Call a Hal t**

If there is any force in the Armour Institute of Technology who can offer any justification for the completely unobjectionable, completely unattached, and dog fights between freshmen and sophomores which resulted last week in the serious injury of at least one student, the Tech News will be glad to give him a hearing. We would particularly like to hear from some of the seniors who have been standing on the sidelines shouting “SIT!” and “I’ll hold your coat, buddy.”

In one of these battles a stop for a while, now that a man has been hurt, but why they should ever have been, or should be, is a question that we cannot answer. Our sole purpose: our own eye tell us that the freshmen have been hurt in these wrangles, and it is highly improbable that, should they refuse to wear them, such tactics as those which have occurred on the field of battle can cause them any good or harm. On the contrary, we believe that, if these wrangles were at a minimum on a football field that is being matched in very few other American colleges.

When a young man enters college, there is no doubt but that he has some pre-conceived ideas as to what he will find there. What they are probably depends greatly on how exact they were formed, but the great mass of popular fiction dealing with college life never fails to depict the freshmen as a much imposed-upon, helpless individual, and the new man has probably absorbed enough of this sort of thing to have at least some suspicion about his probable reception by the other classes.

In the case of many American schools, such as the feeling is more than justified. Institutionality, jaunty, urbane, and a little too much liberalization of all forms for violations of all sorts of traditional rules, and often for the mere crime of being admitted by the college.

At Armour, in recent years at least, the fact that the freshmen are received on terms of complete equality, and that the freshman as a whole is completely unknown, has been an outstanding feature in the common sense and practicality of the school.

The introduction of the green but dull a few years ago against the men who were born in the same band, but it was made in good faith to compensate a little for the over-population of the divisions among the first year men. The freshman have grown up as men, but the sudden increase in the number of street cars after its introduction was entirely unnecessary.
Will Burton, the baseball star, has been connected with Georgia Tech brand for twenty-seven years.

"S. R. B," is the degree which a number of University of Wyoming graduates received this year. The university is offering a new course in the degree of bachelor of professional education. According to the agricultural faculty, the degree in the field of education is preparing the students for the new world.

Whitaker College, Wheaton, California, recently conferred the degree of "Doctor of Science" on Miss E. L. S. Smith.

A survey (let's say it's a survey to tell all survey) at the University of Wisconsin brings out the fact that 90% of the students agree that their first year of college had four days a week in which they felt they were not studying.

To prepare for military, or to solve family problems, the average student now offers a course in marriage and home economics. He learns to be a good housewife or husband.

After years of research and preparation, a Chicago radio station recently developed a program that makes 10 to 15 hours of use. This is the first time it is set for and watched with regularity.

Last year American colleges and universities had 5,720 students from foreign countries abroad.

When the father of a University of Kansas student visited his son, he was surprised and questioned her about college life. She told him about her political beliefs, her attendance of lectures, and so on. When he inquired about the service, she said "We are supposed to be college students, not just college students."

A U. of Iowa dean has a new development in campus cigarette. He claims that students should have the freedom to choose what they smoke, and that this freedom will be honored.

The chances are 100 to 1 that you will live through the school year, and 10 to 1 that each teacher will live the same time for the year, according to estimates made by Profs. Bill of the University of Oregon. He says that there's no chance of this, and that there are no chances of the Governor's life.

At the University of Utah, a sweet young maid (did you ever hear of one that wasn't sweet?) was caught up in the library and asked if she could have some coffee and a sandwich. She was given a form of payment: "Thank you."

The steam shovel is the key tool for the steam shovel company. It's the shovel's driver who makes the steam shovel work. He's trained in all aspects of the machine and is responsible for all the machinery.

Fire drill rules are guarded in all colleges and universities. The fire drill must be performed at least every six months. The fire alarm is a pedagogical test in all buildings.

"Safety first" is the most important lesson, and therefore all students should remember to practice it. Fire drills are conducted on the following occasions:

1. From the main building: Cross the street on the sidewalk on the main side of the street.
2. From the Music building: On the sidewalk on the north side of the street.
3. From the Engineering building: On the sidewalk on the west side of the street.
4. From the Agriculture building: On the sidewalk on the east side of the street.
5. From the Machinery building: On the sidewalk on the north side of the street.

The above rules are necessary in order to avoid interference with the operations of the fire department.

Alderman Explains Traffic Problems

Last Friday the board of the W.R.E. began the year's program of traffic problems. An address by Alderman John A. Murdock, Chairman of the City Council Committee on Traffic and Public Safety, thoroughly revised the traffic problems and proposed improvements. The handling of the huge volume of vehicular traffic, he presented specifically a picture of the existing situation, and some of the tentative attempts to alleviate congestion and the high accident rate.

According to Alderman Murdock, the present traffic situation, approximately 750,000 automobiles move in the city streets, 5,000 a block of which must cross the width of Michigan avenue near the bridge.

The discussion found an audience eager and interested speeches on the subject.

Fire drills are conducted at least once every six months, usually on Wednesday, at 10 a.m. The drill is conducted in all buildings, including the library, the dining hall, and the gymnasium.

Motor Club Inn HANDICAP SPECIAL

"We Order to Stabilize" Madison & Big Ten, 33rd and Michigan

Mr. J. E. Wilson, chief engineer of the March-McCawson company, recently visited the Fire Protection Engineering factory last Friday on "The Fireman's Holiday." He congratulated the firemen and emphasized that the firemen must continue to be paid well, as we need firemen who are well trained. Wilson explained that the firemen's work is the most important of all the work of the fire department. He emphasized the fact that the firemen must be trained in all aspects of the work. He said that the firemen must be trained to be able to handle any fire, no matter how big or small. He said that the firemen must be able to work together and must work as a team. He emphasized the importance of the smoke detectors and the fire extinguishers.

Mr. J. E. Wilson was in the capacity of a consultant to the Fire Association, and he told the firemen that the education of the firemen is a very important matter, and that they must be well trained in all aspects of the work.
**Junior vs. Senior Tilt Starts Cage Series Tomorrow**

**Seniors Rate Chance to Cop Soph's Title**

**Final on Friday**

As a preview of this winter’s basketball season, annual interscholastic tournament, starting tomorrow with the senior-junior games, and followed Thursday by the games between the champion sophomores and the fresh fours. On Friday, the championship final will be the feature. After the freshmen work out this afternoon, each team will have had six days of practice, and in the opinion of the various teams, it looks as though there will be a winner among them.

**Soph 82nd Good**

Letterwinners being included, the champion sophomore team will be without Bill O’Brien, but they still sit pretty well and have a real chance of repeating results. Reminiscent last year’s team, enough men showed up at the team practices for almost three more teams. Their lineup will probably be drawn from the following list: Brown, BUSINESS, ALCOHOL AND TREATISE, Darrel, STEPHEN, Ted, STEPHEN, AND, and BROTHER.

The class of ’36, the veteran by last year’s standard, will stop on the floor tomorrow afternoon at 4:45, confident of repeating last year’s exciting victory. Then, as junior, they handled the late graduating class with a 33-31 triumph. Right behind the seniors were the Maclaren and Stetson, with 12 and 11 points, respectively. They will provide a nucleus for the contest team, and should lead Bill. Bostwell.

**Swimming Aspirants Gather for Meeting**

At the university swimming held Wednesday, October 6, plans were discussed for the coming season. Thirty-six seniors exhibited responding to the call for new men and were present at the meeting. The freshmen were represented by fifteen prospective swimmers. With the five men of last year’s squad and the new material, Coach MacDuffie expects a better season than in recent years.

The team will practice at Hartwick pool on the U. of C. campus every day except Saturday. Practice hours are from eleven to one o’clock and from three-thirty to five. As far as possible competition will include contests in the Harvard, Brown, and Yale clubs.

**Cagers Add Three Schools to List**

In accordance with last year’s triumph over the basketball team, several new college have been added to this year’s schedule. Argonauts’ hosts have been going on for the past three weeks, has been very well attended and has given coaches dry summaries of the local high schools.
