**Armour Groups Hold Three Dance Within Month; Freshmen Are First**

**Junior Informal On December 20**

Plans for different dances, three of them to take place within the next month, have been announced by Armour junior groups. The groups have been in existence for only a few weeks, and this marks the first time they have held dances. Two of the dances will be held this month, the last dance is scheduled for December 20.

The freshmen, with Armour again at the Triton on Friday, November 20, and on Saturday, November 21, and the sophomore social chairmen have planned a series of dances for next month. The Triton receives $0.25 from each guest.

**ENGINEER WILL BE OUT TOMORROW; USE LARGER PAGE**

---

**Featuring a striking cover design, Engineering is prepared to be out tomorrow. The revised publication now serves the interests of the members of the Institute, the students, and, to a lesser extent, the alumni, and has a total circulation of 4,000, which includes free copies to the members of the Institute.

---

**The increased circulation makes it possible to secure a superior quality paper and to print the magazine at lower cost. The increase is to be limited to about 200 copies a month. The subscription rate is $1.00 per year.

Fraternity Notes

"Mother's Club"事

Three of the Fraternity held "Mother's Club" teas last week. The mothers and members of Delta Tau Delta, Phi Pi Tri, and Pi Kappa Phi were present. The mothers discussed the activities of the past year and plans for the future. A large number of guests were in attendance.

Howell Dancees

Other social events of the week included the annual Delta Eta Elizy dance held last Saturday. The dance was well attended by active members and guests. The program included dancing, games, and refreshments. A large crowd was in attendance.

Campus Life

Students at Illinois have a good deal of dancing or whatever is in season to enjoy in their leisure time. If you can't get ticketed for concerts or events in your area, then you are watching the game from a television set.

SIDELINES (Continued from page 1)

Before Stabilization

In order to stabilize the Illinois, it was necessary to establish a price support system. This was done by creating the Illinois Cotton Market and setting up a stabilization fund. The fund was used to purchase cotton at the market price and sell it at a lower price to farmers. This helped to stabilize the price of cotton and increase the income of farmers.

The Ranks and Business Interests

The cotton growers and business interests felt that the stabilization program was not enough to protect them. They wanted a guaranteed price for their cotton. The government agreed to this and established the Commodity Credit Corporation (CCC). The CCC was responsible for buying cotton at the guaranteed price and storing it until the price increased. This helped to protect the cotton growers from the risk of price fluctuations.

In every-day life, physical features play a big part. There are many people who believe that they are attractive to others because they feel good. In order to maintain these beliefs, they tend to focus on their physical appearance and avoid thinking about their social skills or other qualities.

Skegard Plant Is Inspected by A.S.M.E.

Several members of the American Society of Mechanical Engineers inspected the Skegard plant last month. The visitors met with the management and discussed the operation of the plant. They were impressed with the efficiency and safety measures in place.

Then looked at their own, physical and social characteristics, and decided they should work on those first. They realized that being attractive is more than just looking good. It involves having good manners, being friendly, and being a good conversationalist.
Tackle Football Is Due Next Friday

As in previous years, the Junior Prom is held during the football season. This year, the Junior Prom is scheduled for next Friday, September 29th, at 8:00 PM at the Armory. The Junior Prom is a popular event among the Junior class, with students from both the Junior and Senior classes attending. The theme for this year's Junior Prom is "Under the Stars," and there will be a live band, a dance floor, and a variety of food and drinks available.

Water Plant—

(Continued from page 1)

up the process and precipitation of suspended and dissolved matter, which may affect the quality of the water. A water treatment plant is crucial for ensuring the safety and health of a community. The water plant is typically designed to handle a certain amount of water per day, and it is essential to monitor the flow and quality of the water regularly.

The water plant is operated by a team of skilled workers who ensure that the water is treated and distributed efficiently. Regular maintenance and inspection of the plant's equipment are crucial to its proper functioning.
