By M. M. Ross

OHIO University lies even more in the Great Rift of Ohio than it has ever been before. The things around us have been made to look more interesting, and the people are truer to their promise of making it a better place.

The campus is a place of great excitement. There are more students than ever before, and they are doing things that make the place more interesting. The library is open later, and the sidewalks are filled with people. The campus is a place of great activity, and the people are making it a better place.

The weather is beautiful, and the days are long. The campus is a place of great excitement, and the people are doing things that make the place more interesting. The library is open later, and the sidewalks are filled with people. The campus is a place of great activity, and the people are making it a better place.

Veterans of Future Wars

The news of the day brings us constant reports of changes in the veterans of Future Wars (Veterans of Future Wars) and National Veterans of Future Wars (National Veterans of Future Wars). The veterans of these organizations have been given new responsibilities and duties by the government, and are now being approved by nearly all professors and students. This is being done by the veterans of past organizations, and will probably be soon by Mr. Hone.

Exempted from the declaration on the charter are veterans of the military who have been exempted in war within the last thirty years, and whose service in the military was not in the" war zone," or veterans of the military who have been exempted in war within the last ten years, and whose service was not in the" war zone." A number of these veterans are exempted from the charter, and are now being exempted in war within the last fifteen years, and whose service was not in the" war zone.

About the most important of the veterans of Future Wars is Mr. S. A. An- 
nexed, who said that the veterans of Future Wars are the most important of the veterans of Future Wars.

The veterans of Future Wars are being exempted in war within the last fifteen years, and whose service was not in the" war zone." A number of these veterans are exempted from the charter, and are now being exempted in war within the last fifteen years, and whose service was not in the" war zone.

The Steak Shovel

By V. R. Watts and F. R. Hulingsworth

The ideal time to reheat those left-over chicken, stewed potatoes, and fried fish... or any other kind of goodies you might have in your refrigerator is when you're about to serve dinner for two. It will certainly make life much easier in your kitchen. You can now serve your guests a delicious meal in under 15 minutes without any fuss or stress.

One way to make your life easier is to invest in a slow cooker. These appliances are designed to cook food slowly at a low temperature, allowing you to prepare complex dishes without having to spend hours in the kitchen.

The slow cooker is particularly useful for busy families, as it allows you to prepare a delicious meal in advance and simply reheat it when you're ready to serve. It's also great for people with limited mobility or those who have difficulty standing for long periods of time.

In addition to being convenient, slow cookers are also very affordable. You can find models for as little as $20 at many stores, and they come in a variety of sizes and styles to fit any kitchen.

So why wait? Start enjoying the benefits of a slow cooker today. Your taste buds, and your sanity, will thank you.

Urgo Tea Beta Pi To Contact Local Alumni

Organization of an active alumni group of Beta Pi Fraternity in the Chicago area has been announced by W. C. H. Xaverius, captain of the national organization, and alumni representatives who addressed the alumni chapter in the Beta Pi Tea meeting last Friday evening.

It was reported that the Chicago chapter, now one of six Tea Beta Pi Fraternities in the country, is looking forward to the possibility of forming an active chapter in the city. A number of alumni have expressed interest in participating in the chapter, and it is hoped that this will lead to the formation of a new chapter in the near future.

The meeting was well attended, with many alumni coming from a distance to attend. The alumni representatives discussed the future of the chapter and plans for upcoming events.

THE STEAK SHOVEL

Poor Bill Smith, he's out of luck! If he could only get the steaks and something to make them with, he could be the envy of his neighbors. But he can't. He's out of luck!

One way to solve this problem is to invest in a slow cooker. These appliances are designed to cook food slowly at a low temperature, allowing you to prepare complex dishes without having to spend hours in the kitchen.

Another way to solve this problem is to invest in a slow cooker. These appliances are designed to cook food slowly at a low temperature, allowing you to prepare complex dishes without having to spend hours in the kitchen.

Perhaps Bill Smith could also consider investing in some high-quality steaks. These are typically found at specialty meat shops or high-end supermarkets, and they can be both delicious and affordable.

For those who prefer a more affordable option, frozen steaks are also available. These are often found in the frozen food section of supermarkets and can be a great option for those on a budget.

In any case, it's clear that Bill Smith is out of luck. But with a little creativity and a willingness to try new things, he can still enjoy a delicious steak dinner without breaking the bank.

BASEBALL SEASON OPENS ON FRIDAY AGAINST CHICAGO

Teams Out To Average Last Season’s Defeat

PLAY AT U. OF C.

In spite of the retardant weather, Armour’s baseball team has been training hard in an effort to get into tip-top condition for opening games with the University of Chicago on Friday. Coach Knaul hopes of seeing his team beat the U. O. C. this year, as it did last year, and to judge by the performance of the team, Armour has a good chance of winning.

The pitching staff includes such first-string men as Buffington, Dyer, and Kruse. The most on the team will be backed up by a fast- reliable infield. Wagner, Stephenson, and Sachs via will be thrown at chart, and Downs and Logoff will also play second. Jones, a new man, will be gracing of third base and will throw strength to the dugout.

Speaking of sluggers, the batting line-up seems to be headed by Alberts, Balslev, and Schuyler. The lack of batting power, however, makes it impossible to tell what the athletes mean to be in the way of home runs. Defensive play will be directed from behind shortstop by either Rasmussen or Bertrand, but I am sure it will be good.

On paper, Armour has the makings of a winning team, and if the players hold together they may carry out the forecast of Friday’s game.

Hearse On First for Chicago

On the other hand, has been in practice in the brief period of time that the team has had to work with. Harley, U. C. coach, has decided to try the triplets in first base, and will probably vary them in the same way. The team has to fill in both your's game, when he draws in two runners in the first frame on a single.

Another interesting feature to be watched this year is the team's desire to be a team that will do everything they can to take the field.

Staff Tourney Delayed by Snow

 Armour's third annual intercollegiate softball tourney received a setback last week when fourteen of those hoping to play saw snowflakes fall on their games. The opponents for Friday's games were borrowed from the U. O. C., but were too slow to set up.

Sapp’s Faintest Hope

The work of the present season is not over yet. Some of the players will play in the tourney at the Big Ten, the University of Chicago, and the University of Illinois. The tourney will be held on Saturday and Sunday.

Tech Trackmen Prone for Cinder

With the culmination of the indoor track season on the Armour Tech Rubbers, the trackmen have put their indoor schedules. Taking home of the first team to take part in the University of Chicago's field house, the Techs are looking forward to their outdoor season with much excitement. The track team will be in the field of the indoor season.

A brief review of the indoor season shows that the track team has been very successful. In three categories, a second in the 100 yards dash, and a second in the 400 yards dash, they have made the Techs a very strong team.

Armstrong, a captain of the track team, has won the first place in the 500 yards dash. The Techs are looking forward to their outdoor season with much excitement. The track team will be in the field of the indoor season.

The Techs have had a very good season. They have been successful in many meets and are looking forward to a great season this year.

Golfers Prep For Wright Jr. Meet

Spring again heralds the opening of another golf season. This year the turn of three of last year's pair, Bolling, Ham, and Bertrand, the golfers are looking forward to a successful season. The fourth man will be a new member, whose name will be announced later.

The golfers are working hard to win the tourney by playing in the O. U. C., and will be successful. The team is in fine condition and will make a good showing in their first outing.

Each Puff Less Acid

A LIGHT SMOKE

RICH, RIPE-BODIED TOBACCO

Over a period of years, certain basic advances have been made in the selection and treatment of tobacco leaves for Lucky Strike Cigarettes. They include preliminary analyses of the tobacco sample; use of center leaves; the higher heat treatment of tobacco ("T"-rating) consideration of acid-alkaline balance, with consequent definite improvement in flavor; and controlled uniformity in the finished product.

All these combines to produce a superior cigarette—a modern cigarette made of rich, ripe-bodied tobacco—A Light Smoke.

Lucky’s "IT’S TOASTED"

Your throat protection—against irritation

against cough
