**STUDENT OPINION**

**Dear Editor:**

During my student years at Armour up to the present time, there has been a very few, very few... in fact, there have been quite a few on the campus. All the few I've had to swallow the idea of being an influence on the few that I've met and that have been satisfied with the little change that has been made in the little that I have been a part of.

**RELAXATION**

Today is a special day. No, the stock dropped. The last stock is a special day. No, it isn't. I'll tell you what I'm going to do. I'm going to relax. I'm just going to get out of here and relax.

Today is a special day. No, it isn't. It's only a special day. No, it isn't. It's only a special day. No, it isn't.

Relax. Just a need.

NEW PROJECTS

Professor T. V. Ayars also revealed that construction of another laboratory for research purposes would begin in the near future.

The third project being worked upon is the "wet" laboratory in Mission. The work on this project will be completed sometime in November, and by then the men's laboratory will be finished. The lab is to be temporarily used by the students. After November the use of the laboratory will be taken over by the Foundation.

This new wing, which will be ready for use next semester, will be completed on the second floor of Chapin Hall, according to present plans. The second floor will be used to house the new wing. This wing will be finished by the end of the first floor, the wall of the wing being a large wall.

This proposed revision in the advertising department will be of interest to all students interested in this type of work in the future.

Thomas E. Cooke

On the other hand, we must be willing to risk the risk of the other three.

The rest of those projects to be done are: (1) A large piece of work, the new wing being done by 1930.

An important part of the plan is an analysis of the four branches.

IN PRACTICE, it is a policy of freedom, achievement, and the future of the people.

It is a policy which the Republican Party, in its honest and true declaration against monopolies, prefers to use. The policy is approved by business, and the principles of progressive taxation are embodied in it. The new wing will be finished in the first floor, and it will be finished at the same time as the present.

The third floor will be finished in the second floor, the wall of the wing being a large wall.

This proposed revision in the advertising department will be of interest to all students interested in this type of work in the future.

The plan will be presented near the Thanksgiving holiday. All the members of the Advertising Club have been working on this project, and it is well received by the students. This project is an important part of the plan, and shows the progress of the Advertising Club.

The plan is an important part of the plan, and shows the progress of the Advertising Club.
A. I. Ch. E. Has Air Pollution Lecture

"Doctors proved inadequate for the purpose of conserving the workers' health in industrial processes, so now the chemist has to take care of it," was the opening sentence of Dr. A. I. Elmore's lecture, "The Chemical Professor," at the A.I.C.E.'s second meeting of the year held in Leslie Hall last Friday.

Dr. Elmore, a student of the chemical school of 1921, a consultant engineer for the city, has been at work in this field for the last three years. He has seen the results of the work he did for his Masters and Doctoral Engineering degrees on his very subject of atmospheric pollution.

The speech was accompanied by a series of slides which Dr. Elmore explained in detail to illustrate the text of his speech. Although the speech covered a broad range, it did not cover the sewer and combustion aspect of the subject.

The next meeting of the A.I.C.E. will be held in two months. This meeting will feature a debate on the subject, "Can Chemistry Solve Our Problems?" with Robert S. Salkin taking the affirmative and Robert A. Sherman taking the negative.

The University of Chicago has one of the most complete newspapers in the West. The Chicago Daily, the student and school newspaper, has an excellent staff.

Carrying on a campaign which began in the fall of 1921, the students of the University of Southern Illinois, are making sure that their paper will be read by as many people as possible.

A recent issue of the paper was devoted to the subject of "The Value of Literature." The students are making an effort to make sure that their paper is read by as many people as possible.

A few years ago, the editor of the school paper, went out on a tour to see how people were getting along with the new paper. He found that the students were making a great job of getting the paper out. The paper was read by many people and the students were making sure that the paper was read by as many people as possible.

The students of the University of Southern Illinois, are making an effort to make sure that their paper is read by as many people as possible.

**FOR BIG MOMENTS - A Light Smoke!**

When Thrilling Events Lead
To Constant Smoking!

When you're excited...happy and thrilled, you smoke many cigarettes without thinking about it. And when you have a light smoke, the smoke doesn't seem to bother you. But when you have a light smoke, the smoke doesn't seem to bother you. It's a light smoke. Smoke Lucks for Lucks are a light smoke of rich, ripe-bodied tobacco. They are made of the finest tobacco that money can buy. And they are just as easy to smoke as the finest tobacco that money can buy. They are just as easy to smoke as the finest tobacco that money can buy.

Touchball Tournament Inaugurated With Fast Play And Large Scores

FIVE GAMES PLAYED BY UPPER-CLASSMEN; NO INTERCLASSMEANS OUT

In Four Matches Won

In one of the first games of the tournament, the Touchball team faced off against the faculty team. The game was a fast-paced affair, with points scored quickly and easily. The Touchball team emerged victorious, winning all four matches played this weekend.

Junior Arthur Davis made the winning point in the final match, scoring the winning goal with a clever dodge and a well-timed shot. Davis's performance was a key factor in the team's overall success.

Junior Sam Brown also played an important role in the team's victory, scoring two goals and setting up several others with his quick reflexes and excellent passing.

The Touchball team is now looking forward to their next match, which will take place next weekend. They are confident in their ability to continue their winning streak and are excited to challenge the upcoming opponents.
