GOODMAN THEATER SITE OF MUSICAL CLUBS' CONCERT

Under the sponsorship of the Faculty Club, the Armour Music Club, and the Women's Auxiliary, a winter concert at the Goodman Theater, 1650 N. Dearborn St., will be presented on Thursday, December 22, at 8:15 p.m. Dr. M. G. Brown, director of the Armour Choral, a vocal quartet, and a symphony orchestra will form the nucleus of the musical program.

One of the most outstanding features of the Armour Music Club's activities is the musical directorship of George Gundersen, a member of the Armour faculty. Dr. Gundersen is well known and highly respected in the field of music. He has been associated with the Armour Music Club for many years and has worked closely with the Armour theater group. His contributions to the musical life of Armour have been invaluable.

Honorary Banquets At Adventurer's Club

About a hundred of the school's outstanding students received invitations to attend the Adventurer's Club banquet held at the Armour Hotel on Friday, March 3, at 6:30 p.m. The banquet is an annual event sponsored by the Adventurer's Club, a student group that promotes social and cultural activities on campus.

The event is open to all students, faculty, and staff of Armour. It is a great opportunity to meet new people and to enjoy a delicious meal in a festive atmosphere.

New Freshman Given Orientation

Orientation tea was held on Tuesday, March 7, at 2 p.m. in the Armour Hotel. Orientation is the first step in the academic process, and it is important to make a positive impression on your new classmates.

The first orientation tea was scheduled for 2 p.m. The goals of the orientation tea were to: create a welcoming environment for new students, introduce them to the campus and its facilities, and provide an opportunity for students to get to know each other.

One of the first tasks on the agenda was to welcome the new students and to introduce them to the campus. The orientation leaders were asked to share information about the different departmental resources available to students, such as academic advisors, financial aid, and counseling services.

The second task was to provide an overview of the campus and its facilities. The orientation leaders were asked to show the students around the campus, highlighting the key buildings and facilities, such as the library, the student center, and the dormitories.

The third task was to introduce the students to the campus community. The orientation leaders were asked to share information about the different student organizations on campus, such as the student government, the athletic teams, and the clubs.

The fourth task was to provide an opportunity for students to get to know each other. The orientation leaders were asked to facilitate small group discussions, where students could share their expectations for the semester and ask any questions they might have.

The fifth task was to introduce the students to the student services. The orientation leaders were asked to explain how students could access the various student services, such as academic advising, financial aid, and counseling.

The sixth and final task was to provide an opportunity for students to ask any questions they might have. The orientation leaders were asked to be available to answer students' questions and to provide any additional information they might need.

A.I.Ch.E.浦行 Process Outline

An outline of the mechanical and chemical processes involved in the production of a given product was given by Dr. Paul Bolin, director of new product development at the Armour Products Research Group at Argonne National Laboratory. Dr. Bolin explained that the industry depends largely on chemical processes, which are then activated by the addition of various materials.

The first process outlined was the distillation process, where the material is heated and then cooled to remove impurities. The second process was the filtration process, where the material is filtered through a series of filters to remove any remaining impurities.

The third process was the precipitation process, where the material is precipitated from a solution by the addition of a precipitating agent. The fourth process was the extraction process, where the material is extracted from a solution by the addition of a solvent.

The fifth process was the crystallization process, where the material is crystallized from a solution by the addition of a crystallizing agent. The sixth process was the drying process, where the material is dried to remove any remaining impurities.

The seventh process was the pyrolysis process, where the material is heated to a high temperature to remove impurities. The final process was the incineration process, where the material is burned to remove impurities.

Armour Jewelry Will Award During Week

Jewelry award festival several weeks ago will arrive this week, according to the Armour School Board of Jewelry.

The jewelry award is a prestigious event that is held annually to recognize the best jewelry pieces created by students and faculty at Armour School.

The theme for this year's jewelry award is "The Art of the Ring." The award will be given to the student or faculty member whose jewelry piece best represents this theme.

The judging process will be conducted by a panel of judges, who will evaluate the pieces based on their creativity, craftsmanship, and originality.

The winners will be announced on Thursday, July 3, at 6:30 p.m., during the Armour School Board meeting. The winning pieces will be displayed in the Armour School Board office for one week after the announcement.

Children's Friend, Thomas Jefferson, has been awarded the third annual "Jefferson Award" for his outstanding contributions to the community.

The award is given annually to an individual who has made a significant contribution to the community, either through volunteer work or through other forms of service. This year's winner was selected by the Jury of People, which consists of community leaders and professionals.

The award ceremony will be held on Thursday, July 3, at 6:30 p.m., in the Armour School Board meeting room. The winner will be presented with a plaque and a certificate, and will be honored at a press conference to be held immediately afterward.

The winner was chosen from a field of five finalists, who were selected by the Jury of People from a pool of over 100 nominees. The finalists were selected based on their accomplishments and their dedication to making a positive impact on the community.

The award is sponsored by the Armour School Board and is supported by a grant from the Jefferson Foundation.
The Slippstick

The story of the slippstick by which you may

The Bells

The Bells have rung throughout the school today. And be ye Reader... To quote Beatty: "Bells, the 220 pounds worth..." Thus spoke our editor-in-chief. The Editors of the Technical Times. But be ye Reader, ye may infer what news is being passed around. An arrow shot with half a ball in its tip, when people ran together it only woke up your dog. But when you saw it and didn't call the police, you didn't have to raise your pets from the floor. A bell that when you pressed the button rat-a-tat-tat rat-a-tat two minutes ago. This is what is going on in the school. Before the five bells--it should.

Socialist Party: Playing hockey in the school with no rules you stay away anyhow.

New York State: You are not back here now.

"Everyone is everybody here," bragged N.H. "But we are not in the school of the,basic aspian.

Overseas at the Junior Prom: "And Joe is marrying Kitty by telegraph connection?" "Yes, you said you'd do it," said one of her friends. "For five years I've tried to make "the talk," The Wallch., "Don't forget," and others. I never give you all even one again. Then I tried Easaki and made it right away. He must be funny."

Don Q.

My course is a poverty pay job.

Are there any two that?

N A Y A Program

As a method of providing student aid the National Youth Administration program has had many facet---the slings and arrows of our wayward youth. And in the faces of the increasing better business conditions and the administration of the National Youth Administration program has been an increase in the number of students who have had the opportunity to meet the demands of the increasing better business conditions. And in the face of the increasing better business conditions. This is the year of the N A Y A program to one of every eight students.

to one of every eight students.

The program of 1937-1938 includes an increase in the number of students who have had the opportunity to meet the demands of the increasing better business conditions.

and the other prefessionals, in
preparation for the New Deal policies.

AS EXPLAINED BEFORE, under
the New Deal, the justices (those
who have been on the bench for
at the present time) have the
influence to make the decisions of
the Court. This is a critical time
in the history of the country,
and the decisions of the Court
will affect the future of the
nation. It is essential that
the justices be qualified and
capable of making sound decisions.

ALSO FOR ALL practical
purposes, the justice is over-50
years old, and can no longer
be replaced by a younger man.
This is because the
judges have lives in the private
and public spheres, and they
are not available to
replace them. The age
requirement is necessary to
prevent the Court from
becoming too young or too
old.

LAST WEEK, a thousand
students were preparing for the
final examinations. President
Johnson was present, as
usual, to encourage the
students. He reminded them
of the importance of
working hard and
preparing well.

JUDY W. R. received
a scholarship to
attend Harvard College.
This is a great
achievement, and
the whole school is
proud of her.

IN THIS EDA—which is not
new by any means—there is
nothing new. The government
has not made any changes.

JUST LIKE the President,
the Congress is also
preparing for
the next session. The
President's Address was
delivered on
January 22.

THE FORUM—As
expected, the food prices
have increased signifi-
cantly. This is a
concern for many
people, especially
those on a fixed
income. The government
is working on solutions
to address this issue.

**THE STEAM SHOVEL**

After picking up the waiter after the news interest last Thursday, Mr. R. C. Campbell, chief of the engineering department, had his first chance in a week to enjoy one of the many musical performances that are given at the Armour School of Mines. The chief of the engineering department was accompanied by Mr. W. C. Allison, chief of the school of mines, and Mr. H. C. Brown, chief of the school of electrical engineering.

**SALOMON S. SCHULZ**

The best way to meet a noisy neighbor is to say “Hello!” The next best thing is to say “Good morning!”

**FRATERNITY NOTES**

Barbara Stanwyck says:

“Luckies make a hit with my throat.”

“When taking pictures arrived, my stage experience warms me. I can make you any change you wish, as we can make it here and we can have the shots taken with the same person for every shot.”

And an independent survey was made recently among professional men and women—lawyers, doctors, lecturers, scientists, etc. Of those who said they smoke cigarettes, more than 87% stated they personally prefer a light smoke.

Miss Stanwyck verifies the wisdom of this preference, and so do other leading artists of the radio, stage, screen and opera. Their voices are their fortunes.

And presently so many of the players are smoking Luckies. You, too, can have the throat protection of a Luckie—a light smoke that can’t harm harsh irritants removed by the exclusive process “It’s Toasted.” Luckies are gentle on the throat.

HEIKE STILLS OUT

A STORY OF CAMPAIGN VICTORY

The scene was one of jubilation and excitement as the Shell Oil victory parade rolled through the streets of Chicago. The air was filled with the sound of cheering crowds and the ringing of bells as the floats and floats were pulled by horses and pulled by horses and decorated with colorful streamers and flags. The parade ended at the Grant Park where a huge crowd had gathered to witness the event.

The event was the result of a long campaign of hard work and determination by the Shell Oil Company to boost sales and increase their market share. The company had invested heavily in advertising and marketing, and their efforts had paid off in a significant increase in sales.

The parade was a symbol of the company's success and a celebration of their hard work and dedication. It was a fitting end to a successful campaign, and a reminder of the importance of perseverance and determination in achieving success.

Here's aroma for you

...a picture of Chesterfield tobacco just as it comes out of the 1000-pound wooden hogheads after aging for three years.

If you could be there when these hundreds of hogheads are opened up... if you could see this mild ripe tobacco, pristine and ready to be made into Chesterfield Cigarettes... see the golden color of the leaf... and get a whiff of that delightful aroma... you'd say...

"Delicious... makes me think of fruit cake."

Mild, ripe home-grown and aromatic Turkish tobacco... aged three years... make Chesterfield an outstanding cigarette... give them a more pleasing taste and aroma.
