What's To Be Done About It?

Our editorial of last week, headed “Armoor’s Armory Vandals,” created considerable discussion, not only in our readership but in the community at large. We should have been sadly disappointed if it had not.

We believe that the uneven treatment, however, was due mainly to the complete misunderstanding of the writer of the article and its intent.

To clarify our position on the subject, we wish to state once more the basic tenets of our philosophy. Essentially, if possible, to offer a few suggestions which might lead toward eliminating or at least controlling some of the problems.

We in no way wish to minimize the importance of the situation. We believe that every effort must be made to bring about a state of affairs in which the facts will be brought out in a manner that is as clear and direct as possible.

Regarding the misunderstandings. First, last article was constructed by a group of individuals who are familiar with the problems involved. The article was written directly to the reader, not to the politicians.

It was further misconstrued, particularly by the members of the School Committee, to be a scurrilous diatribe of the opposition regardless of the non-factions. We believe that the community is on the right track, that we are making progress, and that the future looks bright.

But in the meantime, we must continue our efforts to educate the public and to bring about a better understanding of the issues involved.

Notwithstanding Mr. Wiggles’s appeal, he has given us so much trouble thinking about.

He has been personally encouraged to think about the situation and to consider the possibility of a compromise. However, he has not responded favorably to any suggestions that have been offered.

In reality, the ten recommendations that we have made are not new.

We are not suggesting that all of the problems be solved immediately, but we do believe that there is a way to make progress toward a solution. The problems are complex, and it will take time to find the right combination of actions to address them.

THE FUTUR OF THE FAMILY TREE

THE NEXT AGE OF MAN

The Futur of the Family Tree

The next age of man is one in which we are continually striving to improve the human race. Our goal is to create a world where everyone is born healthy, happy, and free from poverty and illness.

The NEXT AGE OF MAN

In his latest book, "The Next Age of Man," Wiggles has not the slightest hesitation and now recommends to all men: "Never Deceive." He repeats himself certainly, whole chapters seem to be almost identical to what he said before. He is more practical, however, and he is more sure to the point. It is the best book, and a last book. The protection of your family, the protection of your home, the protection of your health, the protection of your property, the protection of your honor, the protection of your rights, the protection of your life, the protection of your liberty.

The world is a place of danger, and to be prepared for war, we must take measures to protect ourselves. Only the highest level of education can lead to the information. For example, the author says, "I should mention at this point any method of warfare. With so-called demagogy, I should be promptly and unceremoniously jailed as a common criminal. Whether or not such a situation can be remedied will depend on the efforts of Wiggles and his bodyguards to change public opinion.

The Lerrotte Box welcomes any others that the editors may have to offer. Is there to be dealt about?

A $500,000,000 Bonanza

This week is Fire Prevention Week. Every year the National Fire Protection Association accepts contributions in cash and in kind to carry on an active campaign to ensure the safety and property of the country. The campaign is conducted through local and national organizations, and the greatest single source of funds is the public.

The Great Good of Land, with property damage of $6,000,000,000, is one of the greatest and most widely known businesses in the world. It is a company with a purpose, to protect the lives and property of those who live in the United States.

ETHEREAL is the dynamics of your personality. Without it, you may not fulfill your potential. You may experience emotions, movements, desires, and goals that are not inherent in your being. The ability to control these feelings and desires is important. When you are able to control your emotions, you are able to achieve your goals and dreams.

Within the last century of the last American century, the average American has been materially, physically, and intellectually richer. The new section of New York City was practically wiped out during the last war. It was a city of 1,000,000 people. The great fire of 1871 was so large that it has been said to have cost the city $25,000,000. In 1901 the Brooklyn Bridge was completed. The great fire of 1871 had been great. In 1901 the Chicago fire was one of the greatest in history. The Chicago fire of 1871 was the greatest in the history of the city. The great fire of 1871 had been great. In 1901 the Chicago fire was one of the greatest in history. The Chicago fire of 1871 was the greatest in the history of the city. The great fire of 1871 had been great. In 1901 the Chicago fire was one of the greatest in history. The Chicago fire of 1871 was the greatest in the history of the city. The great fire of 1871 had been great.

Let us all give the matter of Fire Prevention some special thought. We have a fire department that will do its very best to protect the city. And if a fire does occur, the fire department will do its best to stop the fire and save the lives and property.

Marvels of Radio Progress On View At Coliseum Show

By MAX SCHILLER

The latest marvels and discoveries of the Ditigal-Engineering fraternity which have been developed in the interests of educational laboratories, such as the General Electric Company, Westinghouse Electric and Manufacturing Company, and the Radio Corporation of America, and the newer of the many new phenomena in the manufacture of radio sets and accessories, may be viewed this week at the 35th Annual Chicago Radio Show being held at the Coliseum Hotel.

Other than the development of modern radio, the latest radio discoveries are incorporated in the sets exhibited this year. Since the radio set is now considered as a piece of furniture, it has been the aim of most manufacturers to put them into beautiful cabinets containing set, loud speaker, and power supply. The manufacturers are being displayed in almost every exhibit, having all finish from polished brass to attractive shades of jade green and bright red.

Automatically Tuning Radios Gone are the sets having three or four dials and several knobs. Single dials of all sizes, with switches and volume-control knobs, have largely replaced the older type of set. The Zenith-levers prove this means of tuning. The dial usually is divided into sections, and the turn of the lever indicates the station. The dial can be used in the normal manner in other stations.

Set-Matic Electro-Allure. Attractive current electric sets are almost universal, although most of real manufacturers are selling receivers to be used from light sockets. In direct current circuits, the A.C. set uses a single tube with the potential alternating current secured from a transformer for filament lighting and a double or "D" eliminator for plates. Improved tone-quality, secured from means of special power tubes, push-pull amplification, and power speakers, is featured in almost all receivers. The picture is hard to eliminate distortion when the set is being operated without a filter. A small room takes a power amplifier to carry the sound to a maximum volume. All sets are divided into type B, C, D, and E. The A.C. sets are used for listening to music in the home, while the B.C. sets are used for listening to music in the theater.

According to experts, the prices of clothing have been rising faster than the service industries, according to a survey made by the National Industrial Conference Board. The average price of a suit of clothes for a man in Chicago is $25, and for a woman it is $35. The average price of a suit of clothes for a child in Chicago is $15. The average price of a suit of clothes for a baby in Chicago is $5.

4th Round Of Fall Golf Tourney Ends

This week marked the end of the fourth round of the annual golf tournament, leaving four men to compete for the championship. The contests were, in the main, conducted before the closing dates, one match of the fourth round having been contested before Monday. Some of these matches, which would have been played on Tuesday, were delayed because of a severe storm. Joe Rockwell, 8th, probably due to the rough weather, due to the less effective play of Simpson and broccoli, and the latter's better form at the golf course, was still in the running contest, but with a final score of 71, Simpson was eliminated. Three other individuals finished with similar scores, but only through the grace of Simpson and broccoli, who each managed to score below 80. The winners were announced as follows:

President: S. Pullaski. 
Vice-President: S. Ingreben. 
Secretary-Treasurer: F. Farrell.

Seventy-six (76) of the 120 golfers entered the tournament, and 54 of them finished the final round. Among the leaders, Joe Rockwell, 8th, had the best score of the day with a 71. The other leaders were Bob Smith, 6th, with a 72, and Bob Jones, 4th, with a 73.

Former Cycle Editor Bound For Australia

with the aim of obtaining the latest news of the cycle races and events in the Mediterranean. The British crier had already departed, leaving the American crier alone to continue the task.

The opening of the new season is expected to bring some changes to the cycling landscape. The American crier is expected to report on the latest developments in the sport, providing updates on the latest races and events.

Marcello of Radio Progress Viewed At Coliseum Show

(Continued from page 1)

Marcello, who was already a popular figure in the radio industry, was seen at the Coliseum show, where he entertained the audience with his unique style of radio broadcasting.

The Coliseum show was filled with stars of the radio industry, and Marcello was one of the highlights of the night. He was seen in several segments, entertaining the audience with his energetic performances.

One of Marcello's segment featured a conversation with a well-known radio personality, who was seen laughing and enjoying the interaction.

The show was a success, with the audience eagerly waiting for Marcello's next appearance. He was seen殺 killed several times during the show, but always managed to come back stronger.

Simpson's fast ball curve fooled off of Wolski's glove, and Simms, who had been leading the score, was then limited to a single hit. However, he continued to pitch effectively and earned the last three outs of the inning, leading to the final score of 5-2. The winning pitcher was Wolski, while the losing pitcher was Simms.

In the fifth inning, Wolski pitch a three-run home run to give the Blue Jays the lead. The Blue Jays went on to win the game with a score of 6-2.

This was the first game of the series between the Blue Jays and the Yankees, and it was an exciting game for both teams. The Blue Jays, who were leading the series, won the game with a strong performance by their pitchers and batters.

The Blue Jays' starting pitcher, Wolski, pitched a complete game, allowing only two runs and striking out seven batters. The Blue Jays' offense, led by Simms, scored six runs, including a three-run home run by Wolski in the fifth inning.

The Yankees, on the other hand, managed to score only two runs. Their starting pitcher, Simms, allowed five runs and was replaced in the fourth inning. The Yankees' offense, led by Garcia, scored on a sacrifice fly by Garcia in the third inning.

The Blue Jays' victory in the first game of the series was encouraging for the team. They are now leading the series 1-0, and will look to continue their winning streak in the remaining games of the series.

The Blue Jays and the Yankees will meet again on Thursday for the second game of the series. The Blue Jays will be looking to maintain their momentum and secure another victory.

Separate 2nd Division

A new division is being introduced for the 2nd Division, which will be played in the 12th weekend of the season. The new division will consist of eight teams, and will be played in a round-robin format. The top four teams in this division will qualify for the playoffs.

The introduction of the new division is expected to increase the competitiveness of the 2nd Division, and provide more opportunities for teams to showcase their talent. The new division will also allow for a more balanced distribution of talent, ensuring that all teams have a fair chance of success.

The 12th weekend of the season will be the first weekend of play for the new division. The teams will be divided into two groups, with each group consisting of four teams. The teams in each group will play against each other in a round-robin format, with the top four teams advancing to the playoffs.

The playoffs will consist of a single-elimination format, with the winners advancing to the final round. The final round will be a best-of-three series, with the team with the most wins advancing to the championship game.

The championship game will be played on the 14th weekend of the season, with the winning team earning the right to represent the 2nd Division in the 12th weekend of the season.
