FIRE PROTECTS TO SHOW FILM OF LAB TESTS

The Fire Protection Engineering Society of Armour college will sponsor a showing of the official movie produced at the Underwriters' laboratory section for the fire and casualty insurance companies in all over the country, they will be shown in the auditorium of the Student Union Friday morning, Oct. 18 at 10 A.M. so that all of the students are interested may attend.

These movies have been widely circulated in conjunction with National Fire Prevention Week. Called "Approved by the Underwriters," the films run about forty-five minutes. It gives a very complete and non-technical summary of the operations of the engineers at the laboratory.

Post Devices

Actual tests are conducted every day by people in all walks of life are shown; products upon which lives depend must be tested not only for them to pass the tests of the tests are made and when those devices pass and others fail.

The start of the film shows tests on building materials, including means for testing the strength of the frame of a building and the fireproofing materials.

Discusses Other Devices in the United States, Illinois Institute of Technology has the only other laboratory for the registration of inhaled products in the United States and the only one that is fully equipped with the latest in the testing of the tests is not fully equipped with the latest in testing apparatus.

Hendricks And Editors Speak To Reporters

The staff and reporters of the Technology News met for their first meeting under the chairmanship of the Book Room of the Student Union, Technology building. The purpose of the meeting was to acquaint the new reporters with what is expected of them and to discuss the procedures of the paper and to cover their stories completely, submitting them to the editor at the deadlines.

News-Plan-Arms

The new editor, Dan Brown, urged each student journalist to be on the alert at all times for stories involving the campus activities. He seconded Tom Brown's recommendation that the paper be the voice of the students, and the editors' requests that each reporter feel his responsibility.

Lewis Girls' Dinner 1:00-3:00.
Let's Have Cooperation—

We take pleasure in announcing this week that some of the weightiest of our student problems arising from the Lewis-Armour merger are beginning to show some signs of solution. However, we feel that a definite change in present relations between our two student bodies must take place before we can progress further.

We consider it duty incumbent upon every student to clarify to the best of our ability some of the most obvious disagreements. We believe that absolute honesty and a complete disclosure of the present situation is the only way that a true spirit of cooperation between the two schools can be attained.

The Newspaper—

The operation of the Technology News has been satisfactory so far, we feel, when the obstacles, which confront us are considered. Lack of telephone communication between our two separate staffs has made it very difficult to keep complete material to form one paper. We have petitioned the Institute officials for telephone installations, but have received no effective answer to date.

Our biggest problem, and one common to most of the combined organizations, is of course, finances. While it is certainly true that members of the Lewis staff have boosted the income of the paper by securing new advertising, we find that the inclusion of the additional Lewis news (which we are not interested in building up) is exerting a strain on the budget. It appears to us that the only way that Lewis students can continue to have a proportionate share of the news and feature space is for them to develop a cooperative subscription plan such as the one used at Armour.

The Bookstore—

Editors of Armour and Lewis yearbooks meet this week to discuss possibilities of producing a combined book for both schools. While most students on both campuses agree that a yearbook would be better than two separate ones, it is felt that many concessions must be made by Lewis and Armour editors before it is a definite possibility. Considerable diplomacy will be required in this case.
Combined Glee Clubs to Give Variety Show

More than the walls of the Student Union will resound to music this week as the combined glee clubs of all divisions present a musical program prepared for a new and delightful season.

The glee clubs, one of the oldest and most musical at the University, will be represented in this program along with all divisions of the University, including the Music School.

The program will consist of a variety of songs, ranging from traditional glee club favorites to modern musical numbers. The glee clubs will perform separately as well as together, creating a wide range of musical styles and genres.

The combined glee clubs will give a variety show at the Student Union on the evening of October 13th. The event is free and open to the public, and is sure to be a highlight of the musical season.
God Man, what am I gonna do now? Here it is only the third week and the jokes are running thinner than water, or didn’t you notice that when we began with the words of the little bug as he hit the windshield: ‘it takes a lot of guts to do this.”

The night was dark, and the hour late, when the man was given an advanced understanding toward the converse lampshade gastronically touching the rough surface he felt about until assured of a solid support and then leaned back, resting. After a few minutes, deciding again to pursue his alcoholic path, he turned and felt carefully about the surface of the post. Round and round was walked, never taking his hands off the concrete.

Amusement gave way to despair and at last, climb down from the pavement, he gasped: “My God! I’m wasted.”

Little Willie, in bows and sandals. Fell to the face and gave a gargle of ashes. In the winter, when the weather is chilly, No one likes to poke around.

Bear in Mind

“Around going with girls a lot you keep up your pace.

“Who cares?”

“I started going around with them four years ago I was a freshman, and I’m still a freshman.”

A woman is a person who wears a skirt about her knees and actually persists on it to keep her knees from showing.

Lake Forest—Don’t you love driving on a night like this?

Roy Leibrand—Yes, but I thought we’d rather wait until we got farther out into the country.

Nuts

What did the first resurrection into light the second resurrection?... Let’s get out of this joint.

Matt—I hope you’ll dance with me, right?

Kay—Oh, certainly, you hope I don’t do that somewhere here for a while for the pleasure?

With Violet cuddling in his arms. He drove to a poor little place. Where he once held his Violet, he now holds a bill.

“She works in a questionable place.”

“Why don’t you?”

“Why would you?”

Yes, a Bureau of Information.

The week after next will be your chance to appear in the old T.R.U.T.H. The column will be made up of subscriptions. Take out all those old jokes about that lisa in the pants, steel blue eyes, iron in his blood, a silvery tongue, a heart of gold and of whom it may be said: ‘Occasionally he hops.

COOPER: (In his usual)

MAY: VOICE: (In all our, I suppose.)

COOPER: (To the under.)

(Volts gets into auto with cooper.)

VOLTS: “Are you taking me to jail?”

COOPER: “Yes I am.”

“Boy, you really fell for that trick and, stinker! Say, haven’t you a daughter? I would like to know.”

VOLTS: “Why?”

COOPER: “I have no current girl friend.”

VOLTS: “Will you show much resistance to my loving?”

COOPER: “What positive difference does it make?”

VOLTS: “Are you going to introduce me to her?”

COOPER: “I will take that with me to you.”

VOLTS: “She can trip the light fantastic well.”

COOPER: “Will you take her out to dinner and then?”

VOLTS: “Especially? I am a vapor, I can’t do it.”

COOPER: “Ah, a manbe on site (Continued on page six.)

JIUER’S JACKPOT

By Bernard Rasoul

Beethoven’s Fifth Symphony is by far the most popular musical composition in America, according to recent publication. The reason is not hard to determine. It is the one made to determine what the American public likes. One was made among interested social scientists, the president, the chairman of the board of the American Symphony. Another was made among America’s music lovers; another among radio audiences. The main reason for the two poles had a little more in common, Beethoven’s Fifth Symphony, is by far the most popular. This great symphony is made by both Columbia and Columbia’s recording of the Berlin Philharmonic Orchestra (M-240). Victoria by TSF and the YOE Orchestra (M-190).

From London, N.J., home of RCA Victor, comes the news that the new Victor “Heart of the Symphony” album, adapter from the advance orders, will be played every existing album. It was suggested to Victor that there were more than 200,000 people who loved symphonic music in a general way, but wouldn’t be through an entire concert to hear two or three minutes of the music they enjoyed. Victor incorporated in the suggestion in an album, using only the well known pieces, the “Heart of the Symphony” was carried out with the Victor Symphony Orchestra under the direction of Charles vessels.

The album consists of famous excerpts from famous symphonies by Beethoven, Mozart, Schubert, Tchaikovsky, Berlioz, Tchaikovsky, and others. The set is scheduled for release in November on a popular line, together with an exclusive picture album with an explanatory booklet for $5.00.

At Midnight (Victor-2167) is by far the best of the Symphony albums. Craighall’s version is not by far the best, but the symphony goes on.

In Memoriam

As day turns cold and the moon goes down, a shadow of cheerfulness is seen. But the sun’s golden rays are shining bright. A pleasant spring day.

Plowmen till the ground, a cheerful way. A farmer’s song.

Whose life is past, will be held beloved. A song sung long ago.
The Greeks Had a Word For It
By Alka Kahsi

GOODS

The ARDAMANANS are at last getting things moving in line for their recognition. They are now looking forward to announce the results of their activities at one of the fraternities of I.L.T. The boys who have returned to campus are as follows: John G. ... spent some time at Phoenix, Arizona, gazing and swimming and of course reading. Ed Lee - who spent his summer as a semi-journalist with some of the boys who have been on campus - will be in town next month. John Ferrer - (of the Lewis Chemistry Store - he just returned) is the new assistant professor of chemistry. He has been on campus for a year and a half, but about whom we've been unable to get much information. Jim Hardin, Tom Williams, Al Smith, Bob Miller, and Henry Crane are the other fraternity members who have returned from their summer vacations.

Did you know that the Lambda Chi Alpha crew is training for the upcoming rowing season? They are working hard to improve their skills and prepare for competitive events. The crew has a strong tradition of excellence and hopes to continue their success in the upcoming season.

Do you know which campus is known for its annual "Blisskrieg" event? Ypsilanti, Michigan, is home to the University of Michigan, where the event is held each year. The event is a unique tradition that is popular among students and alumni.

CO-OP NEWS

By Edward Hamilton

"Not all figures are equal";

This week we welcome new members to our CO-OP family! As we approach the end of the semester, it's a great time to connect with fellow students and explore new opportunities. The CO-OP team is here to help you navigate the co-op world and ensure a successful and rewarding experience.

GALLUPING POLL

By Ed Smith, Staff Illustrator

The results of the poll here at Armour are as follows:

WILKIE 80
LEWIS 2

The poll results show a clear preference for Wilkie. Do you agree with the poll results or do you have a different opinion? Share your thoughts with us.

GALLUPING POLL

RESULTS OF POLL

The results of the poll here at Armour are as follows:

WILKIE 80
LEWIS 2

The poll results show a clear preference for Wilkie. Do you agree with the poll results or do you have a different opinion? Share your thoughts with us.

GALLUPING POLL

VOTERS GIVE OPINION

As we discussed earlier, the poll results were announced in various ways. Surprisingly, there were a few comments from voters who felt that the results were not representative of the student body. Do you have any comments on the poll results or the way they were announced?
SIDELINES

The Draft

By A. Student

It is quite common to hear
from those who are eligible for
the draft that they hope to
be drafted, and that it will
be a great relief to get it over.

Let me state that I am not a
student of history and
probable future events, but I
believe that the idea of
drafting all college students
will be discontinued.

Students Urged
To Make Use
of Library's Books

by Joseph Hind

Miss Nell Steele, head of the
Library and Research
Department of the
University, has urged
students to use the
library more. She
believes that reading
is essential to
the development of
the mind, and that
the library is a
valuable resource.

She also suggested
that students
make use of the
library's extensive
collection of
books and
periodicals.

Spears to Conduct
Course in Highway
Engineering Field

by Hugh Story

Prof. B. S. Spears, who
recently completed his
work on the "Highway
Engineering" course,
will conduct a new
course in the field.

The course will cover
the fundamentals of
highway engineering,
including design,
construction, and
maintenance.

OTHER CAMPUSES

Since students at Iowa State College have been
prohibited from drinking beer under an
interpretation of the college rules, they have
begun drinking "near the town of John Brown's Body."

Oh, they're taken away our whiskey and beer
And it's caused much grief to everyone.
Our caskets are next, so they say
But what the Lord above us will do
That's the problem that we all have.

All the ends of the earth shall remember

Blitzkrieg-

grand opening of the
Gala Opera Theatre.

The Gala Opera
Theatre is located in
the heart of the city,
and many people are
expected to attend the
opening night.
Seniors Bow To Sophomores 25 - 1 In Hardball Finale

By virtue of a 25 to 1 score the Sophomores easily annexed the interclass baseball crown. Behind the seven hit pitching of Morris Silva and Roy Gale, the Sophomores managed to see victory over the Seniors. Just Thursday afternoon on Oaken Field, although the Seniors were favored by a long odds, the Sophomores still managed to ring up a record score.

Score Three to First

At the very outset of the game the Sophomores indicated their strength by scoring three runs in the first. When the Seniors came back with one run in the third, it seemed as though an interesting battle might ensue, but these hopes were quickly discouraged.

The Sophos scored four more runs in the third inning. The Seniors were now behind 11 to 1, a deficit from which they could not recover. The Seniors scored less than seventeen batters appeared at the plate for the Sophos, twice as many as had lined up with long extra bases to help the Sophos along.

Third Big inning

As an aid to this third inning stagepinned were three more thirders and three senior miscues. To conclude, with a ten to two bungom, Stan and Gil Silberfjord, Bob Bruehl, Louis Maguire and Ray Lagey slaying off 11 runs with long extra bases to help the Sophos along.

Pittsfield

Not only did the Sophomores annex the championship title, but Morris Silva and Ray Lagey turned in a beautiful job in blocking the Seniors at the third base. In the fielding department, the Sophos were enveloped by the Seniors piling up five errors to give them a wide margin.

The expected score of 20 to 2 was called off at the end of the third inning as the Sophos had spent as many runs as they could handle. In the second inning, the Sophos were batting a 5-0 lead, but it was too late to come to any conclusion. The Sophos won out in the last of the seventh on a close and closely contested game at home plate.

HANK'S SAFE!

Nine Quality in Golf Tournament

Grocenby old Peter Stuyvesant, the one-legged mayor of New York when it was a city, would find many things to please him at the Armour camp. He would be most pleased to see the forces of a scientific turn of mind, to find the Illinois Institute student players a bit of his favorite game—"golf," Ramsey Tingley and his wife, Harry and Nell Tingley, play it quite well.

And by just Friday night, nine T.1. T. men had played a full day's golf tournament, playing through the qualifying round with the results of the Right of Stuyvesant's protégés to beat the field were from the Armour camp, but Lewis is represented by a representative of one man.

Fittest Service

Lewis' committee of one is Charles Templer, who, 11th street near Bob Macken, is a real golfer, Taylor, James Murray, James S. Murdock, Robert Shank, Robert Mathison, and Jay. Most of the qualifying method was on the green course.

The tournament will be matched for nine or 18 holes for the final round, this process continuing until the man—the winner—is announced.

Swimmers Show Early Practice At Bartlett

The first meeting of prospective members of the Illinois Institute student body was held, with about seven experienced men back, there were about 30 new members coming in to add to the Armour camp, and there were students with little experience.

First Team star

Last year the team is seven out of 10 meets, and this year with the help of the Big Ten coach Larson as manager—even with the swimming season—was the prospects for a successful season.

Prof. Dreyfus

In 1909, Coach Dreyfus graduated from Syracuse University with a B.S. degree in educational science. Besides graduating second highest in his class and winning a Phi Beta Kappa key, he was also Associate Editor of the Syracuse Orange, student newspaper, and free lance writer for the same paper. In 1908 he obtained his M.A. degree at Harvard University and the following year he got his Ph.D. at the same university.

The Civilian department, which is the strongest team in the world, has a wealth of material with a stellar performance in every department of the school. The distant spire of Illinois Tech, Athletic Director John Schumacher, did the reorganization of the present coaching staff, which featured one of the aesthetic11schiakups in the history of Armour.

H. W. Davey Gets Appointment As Cat - Gut Coach

With the appointment of Dr. Harold W. Davey as the new busi- ness coach of Illinois Tech, Athletic Director John Schumacher completed the reorganization of the present coaching staff, which featured one of the aesthetic11schiakups in the history of Armour.

Tough Scout

Dr. Davey succeeds W. W. Colver, who is on leave this fall. Prof. Dreyfus took over the duties of tennis coach in 1931, and with Dean T. A. Paine, who had relinquished his coaching position to accept more important offices.

Organized Boosters

Coach Dreyfus steps into the sports field with the knowledge that he is being "relegated to the shelf with the rest of the disinterested disciplinarians," as the other writers have put it. Social scientific information is just a fad in the fall of 1939, it is known to most of the Techs, the sportsman and coach of the former Davey, Dreyfus, from intercollegiate level.

Presidents Day

In 1935, Coach Davey graduated from Syracuse University with a B.S. degree in educational science. Besides graduating second highest in his class and winning a Phi Beta Kappa key, he was also Associate Editor of the Syracuse Orange, student newspaper, and free lance writer for the same paper. In 1908 he obtained his M.A. degree at Harvard University and the following year he got his Ph.D. at the same university.

NASH SPEAKS, STUDENTS TALK AT ASSEMBLY

Lieutenant Nash of the Chicago Fire Department was the guest speaker at the convention assembly in the Lewis auditorium on October 8. Giving due credit to the firemen for their work, Lieutenant Nash was concerned that this year's convention was detracted by the recent floods caused by its carelessness. Many examples of avoidable fires were pointed out, and an allusion to the fire loss could be decreased about 50 per cent if rubbish were cleared from basements and attics. At the conclusion of Lieutenant Nash's address, S. C. Clarke turned the assembly over to the students for their discussion of the problems.

Student Voice Opinions

Mike Walker presented the matter of school colors for the Illinois Institute of Technology. A combined committee of the four classes had decided on black and gray. These colors seemed satisfactory to the majority of students, but some divergent opinions were expressed. To make a decision the committee had an opportunity to express his views. Scarlet and gray have received about 50 per cent of the votes, while black and white have received about 45 per cent.

Committed Assembly

"Could you tell us what the discussion of the class organization is?" it was suggested at the registrar's office to represent and formulate student views.

Ping-Pong, Archery

For Girls at Lewis

By Mary Plaxer

Good news for all girls is the recent opening of the gymnasium, 100 yards north of the main building, for the season. Miss Olive P. Hazel, the gym director, will receive enthusiastic Mondays and Wednesdays. The girls of 10 and 12 grades are allocated a great deal of feminine interest at Lewis. Both a long and a short range is available, the only equipment necessary being a pair of gym shoes. This is one sport that requires no change of clothes.

Birdies

"Estate" and shuttlecock—Arthur Gurney, a busy director of the Chicago Women's Tennis Association, has appointed a group of followers that are working outside competition. An eating, closely-fought contest was staged with George Williams college last year, which Lewis, last year. Many of the "birdie-bashers" are seeking a re-match, however, and are looking for matches with other institutions.

Rules are often arbitrary, "ping-pong," is placed in the backyard, a table and chair, and the general rule that the only balls are available in the school. The problem of choosing the winner or umpire is decided by the "birdie-bashers." Mrs. Hazel invites those who might be interested to play.

There will be a meeting of the Hockey team members in room UW 5 at 3 o'clock. All those interested, please attend.

LEWIS STUDENTS PROMISE NEW ACTIVITY ROOM

Levish students will no longer have to scuffle to get places in the lobby and corridors. Instead, a new activity room is under the supervision of the chairman of the library, Mr. J. W. Smith, and the board of trustees. The new room will be available for study, reading, or other activities. It will be equipped with chairs and tables, and will be located in the basement of the library. The room will be open daily during regular school hours.

LEWIS' PLAYERS ANNOUNCE FIRST PLAY AT MEETING

By Mr. Norris Hastings

All members of the Literary Society and Maurice, a society that organizes the Lewis drama department, met on October 8th. The first meeting was devoted to the announcement of the new drama. The society members were present at the meeting, and were welcomed by President W. C. Donaldson. It was announced that the Lewis drama will be presented in the new room, which will be equipped with chairs and tables. The meeting adjourned after the announcement of the new drama.
Summer Grad Session Serves Trifold Purpose

By Charles McKenzie

The success of this last summer's graduate school program is indicated by the fact that it showed graduate students throughout the country. A maximum enrollment of 100 was expected; the actual enrollment reached was 70.

The summer session served a triflold purpose, with the three purposes: one of the foremost minds and experts on essential industrial operations and theories. It provided a foundation for training of engineers toward the trend of industry development. And third, it gave a valuable source to rapidly increasing state of growth of Armour's graduate school.

Molecules Get Fingerprinted by Light Photo

By Julian Bowne

"Seeing something that can't be seen" expresses exactly the function of the Raman spectograph. Until it was built at the Illinois Institute of Technology, Raman spectroscopy had been extremely difficult and time consuming. By performing the mysterious spectograph, it can be said that a new apparatus which is called "Superior molecules". This so-called fingerprinting is achieved through the effects of the spectograph on the light which passes through a liquid. The molecules diffuse in a different way, enabling identification of liquids by this procedure.

In operation, the spectograph is quite unique. A mercury lamp is used to project the image of the spectograph which must pass through a specific solution. The spectograph is so designed that it will reject all wavelengths and lights of a length equal to that of the spectograph. A beam of light from the spectograph is focused into a large box where it is tremendously enlarged so that a screen can be used for viewing.

From Darkest India

The principle of this spectograph is the first of its kind in India. In working with spectographs, its strength is to concentrate on the examination of the finished spectograph taken by the spectograph before it is allowed to pass through the spectograph. The brightness of the spectograph is increased by the spectograph, and this is why the elector of the officers until the spectograph is of greater size.

ACS to Amend Its Constitution to Include All

Last Tuesday, the delegation of the newly formed Armour and Illinois College held their first meeting in the student union. It is more necessary to consider the rank and file of Hirschi the ACSA represented the students. Now, the ACSA will represent both Armour and Illinois in a single body.

Activities are now enjoyed by students of both Armour and Illinois College. The Armour officials met with two special delegations appointed by Dean Cleveland and Lewis. It was not formally decided to amend the ACSA's constitution, but in order to take all Illinois students.

To Dutton To Speak in Fort Wayne

By William Lemke

Professor J. P. Dutton, dean of the evening division of Illinois Institute of Technology, will speak at Fort Wayne today, at the general meeting of the National Association of Cost Accountants. His topic is, "What are the essentials of a sound organization?"

FPE Film

The Illinois Tech News reports that a new film, "FPE: The Story of an Engineering Laboratory," will be shown at the University of Illinois. The film will be shown at the University of Illinois. The film will be shown at the University of Illinois.

Large Automatic Air-Conditioning Lab For Armour

Through the cooperation of several prominent Chicago companies, the Armour Graduate School of Technology has recently installed a new $2,000,000 air-conditioning and refrigeration laboratory. The laboratory is fully equipped and is said to be the best of its kind in the country.

Problems to Direct Attention

Installed under the direction of John D. H. Institute, the experimental engine and a member of the staff at the Armour Institute of Technology has been brought to stand and operate for the particular problems of air-conditioning and refrigeration. The research work on the new machine is not complete, but it has provided a number of important and interesting results. It is expected to continue and further advances in the field of air-conditioning and refrigeration will be made.

Chess Club Strives to Consolidate All Players Into Group

The initial meeting of the Armour Chess Club was held on Saturday afternoon, October 9, from 3 to 5 P.M. A satisfactory number of members responded to the call for students interested in chess, including two tourists from the Lewis campus. There is still room for an additional number of members interested in chess and wishing to play the coming season. The meeting will be held on Friday, October 10, at 6:00 P.M. in room SW student union.

Train Control Systems

The Illinois Institute of Technology's newest addition, the new train control systems, was demonstrated in the recent meeting of the I.I.T. A.E.E., which will be held on Friday, October 10, at 6:00 P.M. in room SW student union.

Phasor Lighting

Paul Kneschke is to discuss the latest developments in the fluorescent lighting industry. At the last meeting a new constitution was adopted to include both Armour and Illinois students. The present group of students is the first group of students in the state to have a combined general-purpose fluorescent lighting system.
News Cameramen "Shoot" Co-ops At Supper-Dance

Over 200 celebrating Co-ops and guests inaugurated the social year at a buffet-supper dance in the Armour Student Union Saturday evening. Music was provided by pianist Pilar Telleria and her youthful but unusually capable hand.

Dancers enjoyed not only the music in the ballroom-auditorium, but the buffet-supper of choice meat and cheese which was served in midnight-eating in the cafeterias. Award for the most elaborate and vielleuse table service was unanimous reserved to Second Union manager, who "served the soup" with surprising point. (He worked for this press notice, therefore we omit...)

Attitude of the members was one of celebration by the B group Co-ops of the completion of their last term and anticipation of the part of the A group men of their last eight-week term of the year. Senior "A" will complete their five year mathematical engineering on November 5th of this year and the entire class will graduate in January.

High points in the proceedings were the successful Technology News photographers, Ed Center and Bob Andersons.

NOTICE

Those who have completed the Physic Laboratory who please call for reports Tuesday or Wednesday, from 2:00 to 5:00 o'clock.

Class of '41 to Continue With Its Commissioners

Whether the senior class should have a commission or an "office form of government" was the business of the day at the first meeting of the senior class of Armour College last Friday. After some lively discussion, it was decided by a show of hands that the commission system should be adopted as used in the junior class of last year. Each department meets separately and elects two delegates to represent its members. Then, the senior class will have a commission's body of 12 men to act as commissioner and plenum.

John Savage, Junior commission president, is acting as temporary chairman until the next election takes place October 22nd. All nominations must be made by October 18th. During the discussion from the floor, it was decided to elect one of the 12 commissioners to devote his time to publicity for the senior class. It was decided to have separate class elections at the Armour and at Lewis campuses until further arrangements are made.

Musical Clubs--

(Continued from page one)

...for he not only directs the Lewis glee club, but the Armour glee club as well. Mr. Erickson and the members of the glee club wish to invite all those who can sing or are interested in singing to come down to the auditorium for practice every Monday and Wednesday at 8:00 P.M. Mr. Irwin Silver has been chosen as the pianist for the Club.

CHEMS TO GET LAB FACILITIES IN CHAPIN HALL

By Frank Niles

The new chemistry section, in the Science Division at Armour, according to Dr. Benjamin B. Freund, has registered 13 students for laboratory research work in the present semester. Of those already have their M.S. degrees, and are seeking their Ph.D.'s. The remaining nine are working for their masters degrees.

In addition to the laboratories provided last year, a new one has been made available to these students. One of the laboratories is used exclusively for physical chemistry, while the other is used for research in organic chemistry. Ten of the graduate students are accommodated by these laboratories, while the other three make use of the Murray-Cleveland spectroscopy laboratory.

Pharm Club Chemistry

Although there have been research laboratories in chemistry engineering before, this is the first time that research work in pure chemistry has been done at Illinois Institute.

Dr. Freund states that all alterations have been made in the undergraduate section of the department, except those faculty changes necessitated by the Armour-Lewis merger. In connection with the new consolidation, Prof. Supplee and Dr. Freund have exchanged a part of their laboratory courses in organic chemistry. Dr. Scholl, of Armour, has been transferred to Lewis this semester, while Dr. Pappard of the Lewis faculty, is new at Armour.

Summer School

(Continued from page nine)

ally when read in the light of home defense preparations. Preparation for an expansion of the air industries was indicated by courses in practical applications of aerodynamics in aviation, the use of catalysis in the oil refining and gasoline producing industries, and applications of the theory of elastic stresses in their sheets and shells (such applications are exceedingly important in airplane fuselage and wing construction).

General power production and machinery and structural construction and maintenance were considered in such courses as Yerkes' Steam Power Plants, Keppler's Boilers and Tubular Construction, Lake's Heat Conductors and Printers' continuous frame design course.

Draft--

(Continued from page one)

In the civil service draft there are no such courses as Mr. Stone's Structural Mechanics which dealt with the analysis of structural members. And in the field of ordnance, there are no courses on ordnance and personnel work by experts in the field of ordnance.

DO YOU SMOKE THE CIGARETTE THAT SATISFFIES

IT'S THE SMOKER'S CIGARETTE, because All America has a line on their

DEFINITELY

BEETTER TASTE

What smokers like yourself want most is mildness, coolness and taste... and that's just what you get in Chesterfield's right combination of the finest tobaccos grown... a definitely milder, cooler, better taste. That's why it's called the Smoker's Cigarette.
