Placement Dept. Gets Interviews For Class Of '41

The placement department of the Armour College of Technology has launched itself on another busy year of service to the students.

As always, the efforts of the placement office are centered on the securing of positions for graduates. Of the 130 graduates thus far secured, the majority are already under application and employment forms should be ready by the close of the week. In connection with the present interviews, requests will be made for close attention to the notices which will be placed regularly on the bulletin board in the Student Union.

Applications Are Sought

Mrs. Carroll will be glad to receive the applications of students desiring to take part in the placement board. Blank forms also appear frequently on the placement bulletin board.

The success with which Mr. Schoniger has been operating the placement department is shown by the record that has been achieved with regard to the placements of 1919 graduates. Over 75 percent of the 130 graduates have been placed.

The position in the oil industry is a desirable nature, for example, the recent placement of a man with the Standard Oil Company of California (Continued on page 6).

CHEM MEETING HEARS TALK ON OIL INDUSTRIES

Provisioning of Petroleum. "Provisioning of Petroleum" was the subject of a talk given by George Overman at the regular meeting of the Chemical Society, held at 7:30 at the Armour College of Technology, on October 18.

As early as 1920 crude oil which seeped through the ground was known as shale or oil or coal, or a mixture of various other substances. The two main components of this crude oil were tar and gaseous substances taken up from the ground, so that the process of extraction was an oil from these.

History

The first crude oil was discovered at Titusville, Pennsylvania, in 1854, just after the War of 1812. After Driskill's discovery, it was found that crude oil remained more volatile substances, and that at that time it was not used for any product lighter than kerosene, but that this process was not used for ends.

Illustrates Lecture

Mr. Overman, using an illustrated chart of a modern crude oil refinery, outlined the various processes through which the products of crude oil are obtained from the various products.

The capacity of the Cities Service refinery is approximately 100 barrels every 24 hours. This plant processes all the products of crude oil with the exception of paraffin wax and lubricating oils.
A Capital Idea!

The ITSA dance held in the Student Union last Sunday night was an unqualified success to the satisfaction of those students from both campuses who had so carefully planned the affair. Without question one of the most effective features of student union dancing, the dance was a strict student enterprise from the excellent band to the dancers themselves.

An outgrowth of the progressive Armour-Lewis student government plan, the idea of the all-student program promises a bright future. Plans are to be approved heartily, call for an alternate choice of location in order that more students may take part in these activities.

To be congratulated for the success of Friday's dance are the members of the Illinois Tech Student Association for their careful planning and the Pan-Hellenic Council for its cooperation and movement "dance" to the Student Union. Students of IIT are proud of their new affiliations and look forward to social occasions of this type.

STUDENT UNION CONCERTS

The Speaker's Club is sponsoring a group of concerts known as the "Musician's Series." The concerts are to be held bimonthly on Tuesday and Thursday, from 1:30 to 2:30 P.M., and the Student Union. Interested students are listening to these concerts and many others may attend. The program for next Tuesday, Oct. 22, and Oct. 29, appears below:

Program

Vernon Kopp

Wagner Quartet

The Speaker's Club was organized last summer by the "A" group of George Freiberg. Its purpose is to promote the intellectual and cultural development of its members. Officers are President—Henry Glazier, Vice President—Paul Williams, and Secretary-Treasurer—Thomas Dunne.
INTRAMURAL FOOTBALL TOURNAMENT PLAY STARTS; FEATURES BRILLIANT TEAMWORK

Senior Departments Spark Competition

Bairn washed out the opening game of the 1949 intramural football season, which was scheduled between the Jr. Chemists and the Soph Chemists. The precipitation on Wednesday, October 21, caused the match to be postponed.

JUNIOR CHEMS LOSE

Pulleying a fast one on certain predators, the Junior Fire Pro- tections outfought a heavy and bruis- ing Junior Chem team last Thursday, with the result of a safety, a touchdown and a subsequent extra point, giving the Junior Chems a first-round score of 7 to 0. The Senior team, however, did not let the Junior Chems get away with the lead, as they scored a point on the last play of the game.

CIVILS, ELECTS TIE

Spectacular play was featured in Friday's game as the Soph Chemists tied the Senior Electrics for a 46 to 46 tie.

FORTY MEN TURN OUT FOR FOOTBALL

With a group of about forty Armour students turning up, a small but enthusiastic team was organized last Friday night in McMillen Hall. This is the first official eleven-man football team that has ever originated at Armour and will be called "The Boys from Ar- mour.

Junior Elected Captain

Pup for the team elected Fred Lenihan, a former University of Wisconsin football player, captain, but he had to be released from further participation in the game because he had been called up for military service.

TRIP IT LIGHTLY

Light practice will be held to-morrow and Thursday in anticipation of a game on Friday afternoon in the gym.

SWIMMING POOL MADE AVAILABLE

Interested in swimming? It was announced this week that the Illinois Tech Cage will be open to all students of the Institute for the duration of the swimming season.

DELTAS TRIUMPH IN FRAT TOURNAMENT

Interfraternity competition has seen the start of another season. The first game of the interfraternity tournament was won by the Alpha Delta team last weekend.

There will be a meeting this Friday of all Illinois Tech students interested in the Varsity football team, which will be held in room 101 of the Student Union at 10 A.M.
The Greeks Had a Word For It

THE GODS

BY Robert Creagan

The Delphi-Phi touchdown game proved to be as good as the homecoming game. The student fans appreciate the show of support the Greeks put on across the lawn and then did a repeat performance to get the extra point. After the game, the Theta Phi's and Delphi-Phi's had a toast to the victors. A good time was enjoyed by all, for the games were very good sportmanship, and we have reasons to be proud of our team. The Delta Phi's-Mustash and Gallberg shared the spotlight with their school's colors.

The Delta's had a game last Saturday and the "One and Only" were trickin' down, but they didn't have money. The game was over by 1:45, a win of 35 to 20. If you're interested in a game of any kind, call Mr. Gallberg, toll-free, to get your ticket.

President Keene has his horse in sight for the first time in a week, and he couldn't take his eyes off at all evening. But the horse was not the only thing that attracted the President's attention. He was also watching the performance of the Phi Kappa's at the Inter-sorority game.

What has Triangles' M. Wood to say about his actions last Friday at the Redwood Tails? "Let's get back to our roots, and remember why we're here."

In accordance with the humanitarian policies of this column, we do hereby publicly announce that we are deeply saddened to hear the news of the Phi Kappa's decision to leave school. We are sure that the Phi Kappa's will find a new home and that their good friend, Lookin', will welcome them with open arms.

Wally Nondescript, Soph Civil, is experimenting with a new educational theory. He has decided to take the "mindfulness" approach to teaching. He has promised to prove this drive through his classes. He will be teaching his 800 math classes with the help of his Fiji math class.

Warning to all freshmen and sophomore students: A non-flannel shirt makes you look like a "freshman". This is especially true for the Phi Kappa's, who wear flannel shirts.

The Phi Kappa's announced that they will be having a bake sale to raise money for the Phi Kappa's scholarship fund. They hope to raise enough money to buy a new car for one of the members.

Next time: "Pretty Boy" Raymond, a junior co-op, has his own car, but he's been stopping by to see the "cute girls". Always a popular subject to talk about, but what are you, men or women? This column is for both genders.

Bob Lang, Armour's "trackster", brought a charming girl out to see the Phi Kappa's game last Saturday. The unflattering Delta decided to reverse this prophecy, and embarrassed Holby by declaring her a "coed" at the same time.

You have noticed a girl in the U. S. looking at your hair and hearing the sound of your voice? She may have arthritis in her neck, she may have a cold, or she may be affected by a rare disease called "coeditis". You may be at a loss to understand her behavior. You may be left feeling forlorn and confused. This column is for you, the "coeditis" sufferer.

The Greek's had a word for it. It's the word "coeditis". It's a word that describes the feeling of confusion and frustration that you may experience when you're around girls. It's also a word that describes the feeling of confusion and frustration that you may experience when you're around boys. It's a word that describes the feeling of confusion and frustration that you may experience when you're around other people. It's a word that describes the feeling of confusion and frustration that you may experience when you're around anything.

But wait, there's more! If you're feeling confused and frustrated, you may want to try a new word: "coeditis". It's a word that describes the feeling of confusion and frustration that you may experience when you're around girls. It's a word that describes the feeling of confusion and frustration that you may experience when you're around boys. It's a word that describes the feeling of confusion and frustration that you may experience when you're around other people. It's a word that describes the feeling of confusion and frustration that you may experience when you're around anything.
