**Popularity Queen To Be Selected For Lewis Prom**

Senior Dance Set For June 7 At Stevens

During the second week of June, 2, Lewis will elect its Popularity Queen. The election will be announced by means of a secret ballot. John Proven, who has been placed in charge of the election by the senior class, has made arrangements to have the ballot placed in the chemistry store room on the first floor. The vote will not be known until the night of the senior prom, June 7. All members of the election committee will open the ballot box and count the votes. From an ante-room of the Stevens Tower rooms will be sent in the dance to the girl who has been voted most popular.

The announcement of the election is not the only attraction offered by the members of the Prom committee. For the Tower rooms are in themselves sufficient inducement for dancing especially on a warm summer night, and the dance on Lake Michigan will wind up its own charm to the attention of the Stevies. Her Vic and stunt, and his orchestra will furnish the rhythm of the dance in which the majority will dance from 9:30 to 11:30. This has been a lively selection for the last of the Lewis senior's society as they come down from John Ferraro, dance chairman, Farnsworth, and their orchestra provided the rhythm and music which was enthusiastically received by the dancers.

Mother nature herself, as caught in the whitened movement, provided a superb evening with a sky full of stars. The music constricting sharply with the thrilling wind enjoyed an (1) during most of Junior Week. The dance on Lake Michigan was a standing room only affair, the weather being ideal. The good humor, the beautiful ornamented balcony and the comfortable and inviting vistas where a proper adjournment to a moonlight stroll; all property delectable with the grace of the true Armourian man.

Reflections on thought of the dance are that the woman will performances of “Flamboy” Paul and his advent a vast amount of pleasure that was enjoyed by the performance of their antics. The Junior prom is eagerly awaited at Oliver’s, a popular gathering place of the student body, although he has also played engagements at various hotels in towns nearby.

**A I Ch E Semi-Annual Meeting**

At Edgewater, Begins May 19th

Mr. Robert C. Kinney, associate professor of chemical engineering at MIT, announced last week that the thirty-third semi-annual meeting of the American Institute of Chemical Engineers would be held at the Edgewater Beach Hotel from May 19 to 25.

The general meeting will be held on May 19 and 20, and on May 19 and 29 will be held the student meeting.

The IIT representatives on the general committee are: R. B. Fraud, F. G. Budge, and R. C. Klein. G. B. Zick, R. W. Miller, W. L. Conlon, and E. E. Young are serving on the student meeting committee. Robert Foster is a member of the transportation committee.

McGrew of Engineers will welcome all, the meeting opens on Monday, May 19. The remainder of the day will be occupied with discussions on subjects pertinent to chemical engineering. In the evening come one informal reception, and dinner entertainment, and dancing in the Marine dining room.

Thursday’s program will be the same as Monday. On this day the plant inspection trips will begin. The party will visit the Crane Company, the Southwest Service Treatment works of the Sanitary District of Chicago, the Universal Oil Products Company, Standard Brands, Inc., and the U.S. Brewing Company.

For those who do not wish to go on these plant inspection trips, there will be another technical session on Tuesday afternoon. M. Jakob and K. A. Reis of IIT will speak on “Heat Transfer” (in a Fluid in Laminar Flow Through an Annular Space.” At 7:45 p.m. on Tuesday will come the banquet in the main hall.

On Wednesday the following plans will be visited: Levee Brother. Sheehan-Iron corporation, Sheehan-Williamson company, Hawthorne Brothers. Instru. O. C. Luton, and the International Steel and Forging Company, the American Machine-Produced company.

Wednesday’s technical session will include a lecture on the “Physical Chemical Aspects of the Treatment of Collapsible Materials” which will be given by H. L. M. A., and H. McDorman of IIT. At 2 p.m. the golf tournament will be held.

**Tech for Farm**

Mr. Griffin, for 17 years the faithful stenographer keeper for the department of chemical and mechanical engineering, has now retired to his farm in Poland, Indiana.

Born in Raleigh, North Carolina, Griffin spent a large part of his youth on the farm. He entered the Massachusetts Institute of Technology in 1891 and became stenographer keeper at Ar- man Institute, and he was faithfully held that post until April 30, 1941, when he retired from the farm which he had purchased two years ago.

When at school the Juniors, seniors and faculty of the college engineering department regarded him as a kind of affection a set of valuable pipes and a pipe and tobacco bag.

**Alpha Lambda Pi Honors Miss Hycinth Gloskni**

Last Wednesday at the Alpha Lambda Engineers’ Annual Banquet, Miss Hycinth Gloskni, principal of the school and director of the department of musical education at the Chicago Conservatory of Music in the United States of America, was introduced to the students of the school. She was received with applause and introduced to the students of the school with great enthusiasm. Her musical ability and her knowledge of music were greatly admired. The students of the school were very pleased with her visit and her talk, and they were all very grateful for her visit.

**Dr. H. A. Leedy To Investigate Noises**

Dr. H. A. Leedy of the Armour Research Foundation has been instructed by the Chicago Noise Board of Control, to determine the extent and degree of the unpleasant sounds that have reached Chicago the name of "The World's Noisiest City."

Dr. Leedy will first set up his sound-measuring devices at well known noisy spots, and in the coming months will have his men around to lesser known sources of noise, to present a basis for public comparison.

Thus, instead of reporting that a certain switch engineer's office produces measured sound in some decibels, he will be able to tell the public that it is equal to two or three cars on a curve—off one-half of an ear, which is the measurement they already know.

The general idea is to arouse public interest in noise reduction, and to do so with public cooperation. New York City has just resumed its drive against noise with particular emphasis on motorists. Gotham is now measuring the sound of taxi horns, and the horn manufacturers have indicated willingness to lower the noise which that "will do the job, not scare the neighborhood."

Noises are broken down into two classes: Preventable, and the sounds inescapable to industry. The Chicago Noise Board council is convinced that the preventable noises are the most general and most harmful.

The council is making plans to participate in Noise Abatement Week, June 1 to 7, and one of those plans is to designate "Quiet Chicago Day." The public will be asked to walk on tiptoe, keep the finger off the horn button, speak in whispers, and generally be quiet as they go about their normal life.

Based on New York experience, the council is convinced the results will be both soothing and refreshing. The council aims at listing the aid of the Chicago Board of Health, to stress to Chicagoans that unnecessary noises aren’t good for the nerves or digestion. **GRIFF’ ABANDONS TECH FOR FARM**

**TS A Banquet Features Notables At Lake Shore Club Tomorrow**

Combin es Athletic And Father-Son Dinners

Herealing a program packed with sports and music, the valuable annual ball of the Illinois Tech Student Association will be held tomorrow evening at 6:30 at the Grand Ball room of the Lake Shore Athletic Club. Outter drive and Chicago occasion. This year’s basketball team will be there, with a combination of the basketball ham- mer and the Father-Son dinner, which in the past have been held separately each year.

John J. Schmoller, who himself is scheduled to give one of his little "Frontiers chats," announced last week the list of the feature speakers who will highlight the TSTA banquet’s program. They are Morris McCarty, chairman of the Chicago Times, Pat Flannigan, automotive engineer; Hal Teece, NBC sports commentator; and Ed Cochrane, Harold Armstrong. Although the program has been scheduled, it definitely not scheduled, Hal Blin. WGN sports announcer is also expected to speak.

**To Present Awards**

Sports play a part in the program, there are many awards, and recognition of school leaders, in which activities will be the big event of the evening. It is also to be a gala occasion for fallers to get the feel of the college atmosphere in which their little ones have been having some fun this past year.

The TSTA is expecting also that the entertainment will be a mighty dinner and a good program. This is a part of the program for the evening, which is expected to be a part of the presentation ceremony and entertainment. It has no further details, to be announced to the public, to no means forget to drop by the street car, and see the big box at the Student Union clock room.

Today, students are discussing the administration of Illinois Institute of Technology for its recent action on the distribution of match books with cigarettes sold in the lunch room. In particular, President Hildreth and Treasurer Alliman are due for a thank you note on this, as it was their sympathetic action that removed this irritating thorn from the students' side. Indeed, not only were the matches provided, but we were pleasantly surprised with the incorporation of the color seals and sale in the design of the book.

The former matching of self, of itself, may seem to have been more of an annoyance of insignificance than it is. Certainly, as far as the financial aspect is concerned, the matter was ridiculous to the extreme. Per Miss Roth, the cost is only approximately one tenth of a cent. Too, the inconveniences that might come from the box of the sulfur woods, doing without them, or in taking to the good nature of the company supplying the book have little in few packages as a courtesy, might be considered as having been overestimated.

The real main reason, however, that led Miss Roth to take this step was that some students were taking the boxes without permission, and the incident on the part of the students who patronized the lunch room with cigarette, that they were taking the box of the sulfur woods, doing without them, or in taking to the good nature of the company supplying the book. The latter set of books, however, the students' sentiment was called to the attention of the administration and the condition has been corrected. More than that, we think, could not be asked, unless it is that such understanding and cooperation, as has been stimulated, continues in all phases of the student's relations with the administration. It is, in this case, and as it always has been in educational matters, the moral to the story, if there is any, that such understanding is a vital necessity in a school as large as ours to prevent, as far as possible, the creation of a real harm in student dissidence and cynicism.

OFF TO WORK WE GO...

With the passing of Junior Week, most of us find that the days are suddenly shorter, and that we must face the fact that we shall be working, working, work, and work, work. Reports, drawings, cramping and more reports will all go to make up the worksome load of the next four months. We, therefore, we plan to choose the latter course we extend our most profound sympathy.

We understand how you missed your first choice Monday morning because the moon was full Sunday night. We realize the difficulty of doing homework Monday night while thinking about that Sunday date. We also are quite aware of the excellent record programs that Tuesday night has to offer. Since you didn't do any homework Monday or Tuesday, we dare not say that this is a good day as to cut your class, but that doesn't mean that we do not know theibile time to work Thursday night after getting a refreshing sleep's night Wednesday. But, Ann Jennie and Uncle Jack are on campus Thursday and Friday, so you'll just have to put off that Saturday night date or else postpone your plan.

It is, of course, impossible for us to have any warmth of sympathy for your loss of Monday's hours, but we can understand why you don't want to work Thursday night. We have understood why you are looking for job and haven't them the next few weeks. We have found, and it is the work of an innate necessity, that you have to work.

If you don't want to find yourself in the above position, there is always a chance of being paid. Keep these two jobs, appointments, and don't let those heavy bookwork assignments get in the way of your Friday night. It is our fervent hope that you will make the best of your working conditions and that you will have the opportunity of being paid.

MUSICAL CLUBS: PRESENT CONCERT

An evening filled with music was presented by the Chicago Musical Club, Thursday night, enjoyed by an audience which included many music students of the Institute, Reception and other social events.

The program included songs and dances in various styles and tones, followed by several instrumental numbers played by the Chicago Musical Club.

The next event will be a musical review by the Musical Club, which will be held in the gym on Friday evening.

Thank you.
Johnston High
In Frat Track

In between runs full, the inter-fraternity truck was run. The two fraternities that were in the truck were coming to see a football game, and they had a few puddles. This made the time slow down for a time.

The next event, the 800, was won by Ed Johnston, a新鲜 fraternity brother. This was another high point in the game.

Bob Cregan, Delphi, and Jim Humpch, Phi Kappa, came in together to place, followed closely by another pair, Dick Larson, Alpha Phi Delta, and Bob Wehmiller, Delta Lambda.

The sophomore team

The sophomore team consisted of the freshmen and sophomores on the field. The freshmen were led by Ed Johnston, who was the only one to win a title. The sophomores were led by Bill Mengley, Ed Sullivan, and Ed Cregan.

Bill Mengley showed his stamina in the middle. Not only did he set the pace but he finished first.

Charles Wallace, Triangle, took an easy first in the 880 but he finished fourth. The weather was not the only one to lose this race. The weather was not bad.

The sophomore Johnston came back to win the 100 and 400. Bill Mengley pushed him off the wall. Mengley set a new school record.

Bill Mengley got his second title in 100 and 200. This was the second time he had won a title. Mengley was the only one to break a school record.

The freshman team

The freshman team consisted of the freshmen. This was the first time they had competed against the sophomores. The freshmen were led by Bob French, who was the only one to win a title.

In the field events, Howard Allen, Alpha Sigma, won the pole vault and the high jump. There was a place of 18 ft. in. James and Butcher tied for second.

Bob French, another Alpha Sigma, threw the iron ball. At 14 ft. 6 in. and 100 pounds, he was the only one to set a school record. French set a new school record.

Bill Butcher had a tough time in the javelin. He was not able to throw his javelin as far as he had hoped. Bill Butcher was one of the few who had a chance to win.

The freshmen were not the only ones to set a school record. The freshmen were led by Bob French, who was the only one to win a title.

Blitzkrieg!

As the battle and battle of last week many incidents made the first Illinois Tech open house a memorable event. Not only with the exhibits put on display, but also with the girls in their masks for these blue accessories they've become the center point of all attention. So much so we missed! Everyone duced, now, while I shoot a few Open House office at ye.

Psychology seems to say that in the excitement over the visit to the exhibit hall it was swamped out and with it the nerves of some of the students, but many students and teachers are not as happy with the majority of the exhibit hall.

Aldo Thompson as a boy basketball player—sisters to open house were excitedly and prophetically entered into the publicity department. Aldo brought in the best Maxwell Street vendor by Rod Carvon.

The Lewis casts dressed in white uniforms and made a clean cut in the exhibit hall. Directions as well as making a little difference with a group of Athletic boots led by Robert J. Crenan arrived looking into a corner of the south side campus. Louis was the background picture which they claimed that they had to come to Lewis to see. But the Lewis were affected by the sights.

A glimpse of a certain sorority and Art Peti FJ the states. They had had their eyes in the back of his head; it would have been on the back of his head.

In the afternoon on Monday President Heald was seen entering on an exhibit of the "Great Lakes Naval Shipyard" on the campus of a building. Departments the "sailor boy" was not interested in the exhibit of the little girl with the counter. Louis also uniform were taken over.

It was also her face reddened that had to be in the process. Scott Simon was right on the job. She was trying to point out the most important exhibit in the exhibit ship, but rather difficult was the process. Scott was talking to Mrs. Bader, and she probably didn't care.

Flash! The latest thing in fencing—John Bollus in his capacity as head junior instructor and his student cast in the house economics story, while on exhibit as one of the 101 best women of the country, John, the elevator saw, was expecting for open house. Even to the coverage! And John, the police officer, Aronson and friend of all Lewis' coeds, cause there was no event they missed. Aldo's group of 101 were quite a few dancing cards for the next room Nichols.

It was looking for the Women in the White for the efficient manner in which they conducted their viewing tours. I noted one damsel quite pretty when asked how the parts of it were done and another quite pretty when asked how the parts of it were done. I saw two girls in white uniforms at the Woman's Club, but only three were quite rational. And what about us in white uniforms at the Women in the White?

First Wife: "My husband is a gentleman. He never walks into the room when I'm unarmed.

Second Wife: Neither does mine, he waits until I'm armed.

There was a young girl from College; A mad, wild next of her eye. She seemed quite determined, Till I managed to get her along.

Hap Strawell: "I hear you back."

Same Zane: "Next time I'll try to be more quiet."

A girl was entertaining her friend and was pouring the tea, when her friend spilled a full length portrait, hanging on the wall.

"Why, Matel, is that a pointing of you, did you pose like that?"

"Why, yes, ma'am, but of course I didn't pose for it. Mr. R. painted it from memory."

FASHION NOTE
Woman's are wearing the same thing in classrooms this week.

Bob Oberton: "This next door ought to pull down her shades."

Emily Liebneh: "Has she any shades?"

"Why, yes, ma'am, but she hasn't any here."

Most girls attain their ends by taking enough exercise.

Game Warder: "Hey, you. Don't you know that the base season isn't open yet? What are you doing with your string?"

"Ahem, what are you, Warden, he's been taking my ball all morning, so I went in and I'm ready to go home."

OH MINI!
**GODS**

Robert J. Cresap

ALPHA SIGMA PHI Phi cleaned up the trophy situation during the last week, which was fun for all along the fraternity. The Sigmas started the week off right by defeating THETA XI 15-6 in the semifinals of the basketball championship. Later, the Sigmas continued their good luck by winning the tournament.

**GODDESS**

By Helen Marcallo

On May 30, the members of the Sigma Phi Beta Sorority honored the authors of the article at a Mother's Day tea, held at the Delta Chi house. Co-workers were presented to the authors, and a program of entertainment was presented by the group.

Last Friday, the Kappa Delta Delta Sorority took advantage of the pleasant weather and played a polo match at the Delphi Delta house. The game was well attended and everyone had a good time.

The Delta Chi house was well attended on Friday afternoon when the Triangles boys had a party for the fraternity members. The Sigma Phi Beta house also had a party on Friday evening, which was well attended.

**CO-OP NEWS**

By R. P. Handslen and Bert Millerston

Our two favoriting friends are again in the news. Bob Dawson AB, who was the acknowledged winner of the whiskey-giving contest last week, has been seen to be drinking heavily. He is said to be in poor health and is said to have lost some weight.

On Friday, the Kappa Delta Delta Sorority had a tea at their house. The tea was well attended and everyone had a good time.

The monthly meeting of the sorority was held on Friday, May 9 at the Kappa Delta house.

The House of Lewis brought back many alums to the Kappa Delta Delta house. The reunion was well attended and everyone had a good time.

On May 19, the Sigma Phi Beta Sorority will have their election of officers for the year of 1911-12. Since the informal initiation cannot be held at Matilda house, the election will be held on May 19 in the Sigma Phi Beta house.

The monthly meeting of the sorority will be held at Lewis house, on May 19.

Gretta Portman, of the Phi Beta Pi Sorority, was engaged to Mr. Harold Judson, a former Lewis student. Congratulations, Gretta!

**THE SMOKE'S THE THING!**

**RIGHT, BEN HOGAN?**

The smoke of slower-burning Camels gives you

- **93% LESS NICOTINE**
- **than the average of the other largest-selling brands tested**

- **extra mild, extra mild**

- **5 POUNDS— but they say the "Taza montag" has the greatest swing in golf. And to champion Ben Hogan, Camel's extra mildness is mighty important. Important to any smoker, yes!... no matter how much you smoke, because this extra mildness is in the smoke itself. After all, it's the smoke you smoke.**

And Camel gives you less nicotine in the smoke than any of the other 4 largest-selling brands tested — 93% less than the average of the other brands.

Even if you're only an occasional smoker, you'll find Camel's extra mildness — extra freedom from irritation in the smoke — will add to your smoking enjoyment. Switch to Camel now. Smoke the facts for yourself. The smoke's the thing!

---

**BY BURNING 15% SLOW**

(see above)....

---

**Camel**

**COOPERS'S**

**THE CIGARETTE OF COSTLIER TOBACCO**

---

**EXTRA FLAVOR**

**ALWAYS HITS THE TASTE BUDS**

---

**AND CAMEL'S SMOKE IS MUCH COOLER, TOO**

---

**"THAT CAMEL FLAVOR is something special," says Ben Hogan (above). Yes, too-darn hot... too-foggy mix... that naturally coolest taste in the smoke... dull flavor and fragrance. The camelflavor in Camel is more... more flavorful smoke... and less nicotine (see above).**

---

**5 EXTRA SMOKES**

For each cigarette purchased, you may get 5 extra smokes at attractive current prices.

---

**5 EXTRA SMOKES**

**PER PACK!**

For even greater economy and convenience, each Camel lighter is refillable at attractive current prices.

2. E. Logsdon Tissue Co., Chicago, Ill., No. 1
Tech Shorts

Members of the track team as well as the whole school are going to join the Tech soccer team. Norm Root will be confirmed to a two-year term. We hope it will be for a short time. As a result of Norm's temporary absence, Harry Hilden- reich, manager, and captain Runci will guide the destiny of the team for the remainder of the season.

Some people claim that Coach Root's absence from the mitten has made more anxiety min- ed than his absence from the team.

Wayne McCullough has recently become an authority on religion. While he was on the job in the vault event, he started using some basso woods. Immediately the captain of Wheaton came over and immediately gave Wayne the next points on how to refine from probability.

At the last Tech track meet, '41 captain of the tennis team has been granted a personal leave of absence from the team. The captain has long been recovered, but his enthusiasm to play tennis continues. His absence from the team has been a loss to the team and the way he leads the team will be missed.

Frank de Pfindor, Illinois Tech's star defensive player, was called out on strikers even before moving the ball. His shot was a dud, and the way he made the shot will be missed. The way he leads the team will be missed.

If you're looking for a place to hang out after Tech classes, look no further than the Longhorn. It's the perfect spot to relax and enjoy some good food and drinks with your friends. The atmosphere is relaxed and friendly, making it a great place to unwind after a long day of classes.
