Report Reveals Chicago Center of Technology

**Members Of Nine Nations In School**

An index to the far-reaching influence Chicago exerts as center of advanced technological education is revealed in the last week of the school year's board bulletin.

**Dependence of Engineering Schools on the Nation for Graduate Students**

The bulletin shows that thirty-five students majoring in physics, chemistry, and biology, from institutions and colleges, whose graduates have been enrolled in graduate schools at the Institute during the school year of 1934-35, were nominated for the board of trustees.

**At the I.T.S.A. Banquet**

Fifteen Pledged To Pi Tau Sigma; Initiation Friday

Fifteen outstanding mechanical-engineering students at Armour College were honored last Friday evening by being initiated into Pi Tau Sigma, national honorary engineering fraternity. The formal ceremonies were held in the Fraternity Club rooms and were attended by faculty members and the members of the department.

The grandeurs of the average of the student body as a whole (not including part-time, special, or co-op students) was 1.38 as compared with 1.40 at the end of last year. Since the senior class is the dis-tiling feature of the educational process, the grade point for this class was expected, whereas the freshman average was 1.30. The averages of each class as compared with the same period last year were as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>1933-34</th>
<th>1934-35</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>1.44</td>
<td>1.47</td>
</tr>
<tr>
<td>Sophomore</td>
<td>2.95</td>
<td>2.98</td>
</tr>
<tr>
<td>Junior</td>
<td>2.57</td>
<td>2.68</td>
</tr>
<tr>
<td>Senior</td>
<td>3.18</td>
<td>3.13</td>
</tr>
</tbody>
</table>

In the senior class, the leading students are:

- Lee Sohnemann, M.E., 3.94
- Robert Harman, P.E., 3.83
- Leonard Holmback, E.E., 3.79
- John C. Gwinn, E.E., 3.71
- Edward L. Harris, P.E., 3.71
- Bernard Hadfield, B.E., 3.67
- Carl M. Anderson, M.S., 3.67
- Richard J. Hrycak, C.E., 3.61
- Lionel Nunn, B.E., 3.61
- Leonard S. Schrader, M.S., 3.61

Athletic Awards Presented and Pledges to Honor '19 Announced

For the second time in the history of Illinois Institute of Technology, the annual athletic banquet was held at the Lake Shore Athletic Club last Wednesday evening.

Top photo: "Toby" John Schmoller, left, enjoying one of Hal Totten's sandwiches. Lower photo: "Henry" Weideman, left, with his Sophomore award.

Fifteen Pledged to Pi Tau Sigma; Initiation Friday

Fifteen outstanding mechanical-engineering students at Armour College were honored last Friday evening by being initiated into Pi Tau Sigma, national honorary engineering fraternity. The formal ceremonies were held in the Fraternity Club rooms and were attended by faculty members and active members. The students in attendance were the red and blue Carrels and pledge pins are: Paul Armstrong, Richard Nye, E. Pearson, Delaney, Charles Leidesdorf, William Bredt, John Totten, and James Wilmont. Additional members: John C. Gwinn, George Popp, Philip Roosenburg, Thaddeus Zielinski, Bertram Allmiller, and Peter Vandenberg.

The watchful eye of Pledge Captain Ed Hardman, the pledge with the only number of the pledge group, will be responsible for keeping the pledges in line and ensuring that they meet the requirements of the fraternity. The group will come to a meeting at 11:00 a.m. with the following:

- Charles E. Hulsen, M.S., 3.94
- Charles S. Faller, C.E., 3.61
- James W. Hornick, M.E., 3.77
- Gustave E. Popp, M.E., 3.71
- George Popp, M.E., 3.62
- Philip Henneman, M.S., 3.59
- Philip Roosenburg, M.E., 3.50
- Thaddeus Zielinski, M.S., 3.51

The following is a list of names of those who were initiated into the I.T.S.A. for the first time this year.

- James Woodrow
- Charles S. Faller, C.E.
- Gustave E. Popp, M.E.
- Philip Henneman, M.S.
- Philip Roosenburg, M.E.
COMBINED MUSICAL ORGANIZATIONS TO PRESENT CONCERT

One hundred and twenty-five members of the glee clubs and orchestra, will present their annual concert on Tuesday, May 27, at 8:00 p.m. in the auditorium at Lewis Institute. The concert will be followed by a reception in the gymnasium.

ALBERT W. HAWKES

Thursdays, June 12, has been set as the date for the commencement of the "11th Annual" in the "Legion of Honor". The Legion of Honor, organized in 1909, is a group of old friends by Herbert Victor, and its officers are as follows:

President: Robert M. Coburn
Vice-President: C. H. F. Smith
Secretary: E. H. Biddle
Treasurer: J. C. Macaulay

The program will consist of songs, instrumental music, and dramatic monologues.

Graduation Ceremony

Harry E. Hawkes will be the honored guest of the evening. The special feature of the program will be the presentation of the "Legion of Honor" to George W. Hawkes, Jr.

Robert Jahnke

Chairman of A.S.M.E.

At the request of the Board of Education, Professor Jahnke was asked to address the graduating class of the Illinois Institute of Technology. The address was delivered on May 15, and was followed by a discussion of the problems facing the new engineers in the field.

Illinois Institute of Technology

Graduate School

(continued from page one)

Although there are no students at the Illinois Institute who are majoring in education, the department is fully equipped to give students proper training to meet the requirements of the State of Illinois. In summer courses, in educational psychology, guidance, and educational administration, a number of courses are available.

Placement Bureau

This year the placement bureau of the Illinois Institute has been enlarged to include the placement bureau of the Cook County Bar Association. This is a new and growing field, and it is taking time to make each work effective. The quality of students the Institute is able to send out is expected to be such that students will get in touch with the bureau at once.

Hoffman at AIC

Armour's new location at 177 East 100th Street, in the newly constructed building, opened the new academic year. The new building is a beautiful structure, designed by the late Edward F. Lapham.

The results of the jury's decision were as follows:

William D. Deuterman, Chairman of the Armour Board

Lee's Restaurant

7413 South Saginaw Street Complete American Menu

MARCH 25, 1942

FACULTY BRIEFS

Roberta Jahnke, Dean, and chairman of the department of mathematics, spoke on "The Development of Mathematics" at the State University on the subject of fractions. She discussed the history, development, and applications of fractions in mathematics.

Dr. Michael A. Bunting, the mathematics department head, spoke on the "Mathematical Models" of the Bell Telephone System.

In the laboratory for the study of mathematics and science in the afternoon, the students were shown the latest developments in the field.

In the conference room, the students were given a talk on "The Future of Mathematics" by the leading mathematicians of the day.

The new gallery, which houses the permanent collection of the Mathematics Department, was opened with a dedication ceremony. The gallery was designed by the renowned architect, Frank Lloyd Wright.

The new gallery, which houses the permanent collection of the Mathematics Department, was opened with a dedication ceremony. The gallery was designed by the renowned architect, Frank Lloyd Wright.

The new gallery, which houses the permanent collection of the Mathematics Department, was opened with a dedication ceremony. The gallery was designed by the renowned architect, Frank Lloyd Wright.
Workmen Near Completion Of New Laboratory
Research Foundation Overviewed

Construction of a new research laboratory for fundamental studies of air compressors, spray guns and other related products is nearing completion. The laboratory will be located near the headquarters of the Rand McNally and Tunison building in downtown Chicago. The laboratory will be equipped with a high-speed sorting machine, which will be used for the testing of air com- pressors and spray guns. The machine is designed to test a large number of units simultaneously, thereby increasing the efficiency of the testing process. The laboratory is expected to be operational within the next few months.

A member of the Rand McNally administrative staff, Professor D. Roy, has been appointed to head the new laboratory. Professor D. Roy has extensive experience in the field of air compressor and spray gun technology. His appointment is expected to enhance the research capabilities of the laboratory.

Dr. Paul L. Copeland, associate professor of physics at Northwestern University, has been honored by the American Physiological Society for his contributions to the field of respiratory physiology. Dr. Copeland has been involved in research on the respiratory system for over 20 years and has received numerous awards for his work. His research has focused on understanding the mechanisms of breathing and the effects of various conditions on the respiratory system. His contributions have been recognized by his peers and have helped advance the field of respiratory physiology.

Several helpful suggestions have been formulated to improve the selection process for students in their studies in the popular science field. It is important to consider the following points carefully in order to choose an appropriate major.

1. What is the major of study? (Is the major of study appropriate for the student?)
2. What does the major of study offer? (Is the major of study interesting and relevant?)
3. Would you feel comfortable majoring? (Is this major popular for you?)
4. What is the academic performance of the student? (Is the major of study the right choice for the student?)

Graduate Aided In Job Hunt By Placement Office

Prospects For Summer Employment Good

The placement office of Illinois Tech has proven to be a great aid in helping students find summer employment. A large number of business and engineering organizations have been represented in the office, with many job seekers finding positions after graduating from the university. The graduate career center has already been successful in placing many students, and the following positions will have positions for summer employment.

National Headquarters Of Selective Service Board
Deans Engineering Students: "Needed Men"

The following are excerpts from an article in the May issue of "Wesleyan" magazine regarding the publication of the National Headquarters of the Selective Service Board, relating to deferment of students who are engineering students.

Concerning these professions, it has been stated in The American Journal of Education that "students in the professions of law have been granted much deferment while engineering students have been permitted much less deferment. This is because, in the case of the former, the student has a higher chance of making his living if he is not in the service." Students in the engineering professions have been deferred more in proportion to the number of students enrolled in the professions.

The Selective Service Board has been criticized by several groups, including the American Council on Education, for not providing adequate deferment to engineering students. The American Council on Education issued a report in 1943 stating that the Selective Service Board had not been consistent in its treatment of engineering students. The report stated that the Selective Service Board had been more concerned with the needs of the armed forces than with the needs of the universities.

In conclusion, it is important to recognize the contributions of engineering students to the war effort and to ensure that they are given appropriate deferment.

Local news: The Chicago Tribune reports that a new high school will be built in the suburbs of Chicago. The school will accommodate 2,000 students and is scheduled to open in the fall of 1944.

In other news: The Illinois State Fair has announced that it will be held in the fall of 1944.

Polycon Orders Close For This Week At Lewis

During this week, students on the Lewis campus will have their final exams. This is the first 13-week term of the academic year, and students will be taking their final exams. As a result, several student organizations have announced that they will be closed for the week.

Sales contracts are being negotiated by Bob Meyer, who is negotiating a contract for the Polycon. Jack Parkins, who is negotiating a contract for the Polycon, has been negotiating several contracts. These contracts will be reviewed by the Polycon for final approval.

In other news, Professor D. Roy has been appointed to head the new laboratory. Professor D. Roy has extensive experience in the field of air compressor and spray gun technology. His appointment is expected to enhance the research capabilities of the laboratory.

MAY 20, 1941

WE'RE IN THE LIMELIGHT!

Since last September, Illinois Institute, with the aid of the various Chicago daily papers, has gradually worked its way up to an outstanding position in the public eye. We have continually noted the growing quantities of metropolitan newspaper devoted to news items dealing with IIT. Although we, at Illinois Tech, are fully aware of the importance of the innumerable scientific investigations being carried out here, the laymen can scarcely see what this institution means to industrial and social progress unless the newspapers are able to emancipate him on the subject.

The Research Foundation has been responsible for a great deal of publicity which we have been given in the past few months. Dr. Leedy's latest project on the investigation of improve- ments to be made in the Chicago area by filling newspaper columns with his ideas was more than a trickle. It is hoped that the papers will continue to carry these columns for many weeks to come. Although Dr. Leedy's special experiment: event is not the most important one being carried out by the Foundation, considering being utilized for industry development, it is one which commands public attention by virtue of its purpose. John Public may not be impressed in an experiment on thermal stress, but he is in awe when he sees the results of this investigation. The sound emanating from the "L" track near his bedroom window.

Some "very unusual papers delivered before convention groups, such as that delivered by Professor Young, have produced a high degree of interest, have also been exhibiting much public interest. Dr. Roder's other presentations, the Malvern Powder Conference and the other committee meetings sponsored by the school have all contributed items of interest to the newspapers during the past few months.

It must be admitted that this publicity is absolutely essential to an institution undertaking a plan as great as our expansion plan. We can proudly announce that the name Illinois Institute of Technology means more to the public than it did 20 years ago, and that the public's interest in the projects and new ideas of these past months has been doubled.

COOPERATION AT LEWIS...

The very strange thing that any person possessing of college level should care to look for among the many stories which appeared in the newspapers, is that, as if by magic, the newspapers have begun to call attention to discarded things, such as unlit cigarette butts. LeRoy Reeder, acting as director of the Waste Management Department, is the first to have noticed this, and he has recorded the fact that an unaccountable amount of discarded cigarette butts have shown up in the wind direction caused by student traffic. In the more heavily occupied areas the figurative smoking had disappeared but a mere handful of smoke was sufficient to cause the wind direction to change.

The叙述 of the wind direction seemed curious, but the explanation is that these cigarette butts have been blowing to the west, where they are collected in large piles at the base of the smokestack.

For years, our campus has been swarmed with smokestacks, and the cigarettes have been blowing to the west, where they are collected in large piles at the base of the smokestack.

THE CHICAGO BOARD... or the Chicago Board of Education, has recently announced a proposal to install a new building for the University of Chicago. The new building, which will be located on the north side of the campus, will provide additional classroom space and facilities for the university.

The new building is expected to be completed by the end of the year, and it will be ready for occupancy the following fall.

The Chicago Board of Education is responsible for the oversight and management of the Chicago Public Schools, which serve over 400,000 students in the city.

**GALLOPING GOLDFISH**

Once again in an attempt to determine the nature of the events surrounding the discovery of the galloping goldfish, a detailed study was undertaken by the students of the Fish and Aquarium Department. The events were studied both in the laboratory and in the field, and the results of the study were published in the May issue of the Journal of the Iowa Academy of Science.

The study showed that the galloping goldfish is a phenomenon that occurs when a fish is subjected to a sudden change in its environment, such as a rapid change in water temperature or pressure. The fish then exhibit erratic behavior, swimming in a manner similar to the "galloping" described in the title.

The study also revealed that the galloping goldfish phenomenon is not unique to goldfish, but can occur in other fish species as well. Further research is needed to determine if the phenomenon is related to other factors, such as lighting or other environmental changes.

**RESEARCH FOUNDATION**

The thorns who attended this year's Open House a few days ago will remember the occasion staged by the Research Foundation, a new and valuable addi- tion to the educational and professional community. The event was held in the newly constructed Computer Science Laboratory, which houses the latest in electronic and mechanical technology.

The new laboratory is equipped with the latest in electronic and mechanical technology, and is designed to provide a state-of-the-art environment for computer science and engineering students.

The new building is the result of a $1 million gift from the Illinois Institute of Technology Foundation, which was formed to support the university's research and educational programs.

The new building is located on the north side of the campus, and is connected to the existing Computer Science Laboratory by a pedestrian bridge.

The new building is expected to be completed by the end of the year, and it will be ready for occupancy the following fall.
Techawks Win Two Straight; Beat Augustana and Concordia

Al Dambros Pitched Five-Hit Masterpiece

Behind the five-hit pitching of Al "Laffy" Dambros the Techawks advanced to a 200 rating in the local poll. The Techhawks once more encountered the hard fighting Concordia Cobbers in their second game, however it was a pitcher's battle, our boys coming out with a 10 victory. The Cobbers were handled by 13-0 in the first inning against them.

Youngsters Shine

It took the youngsters, however, to show the way. Al Dambros himself, in the first inning, led the team in hitting with two singles. Mike Gleason, another new comer to the team, started the first inning of the game. The Techhawks were disheartened when they saw the Cobbers get on base once more and to make the hard fighting Concordia Cobbers. In the second inning, however, it was a pitcher's battle, our boys coming out with a 10 victory. The Cobbers were handled by 13-0 in the first inning against them.

Lenny Tally In Third

Lang, Concordia's lefthand man, opened the game with a single hit and was forced at second by Bie- man's ground out. Dambros led off Concordia's inning in the next inning and took over for the Techhawk as the third baseman, however, it was a pitcher's battle, our boys coming out with a 10 victory. The Cobbers were handled by 13-0 in the first inning against them.

Gleason opened up by blocking a single hit out the third base line. He also blocked a single hit by Lennell, forcing Gleason but went down to second on Dambros' fielding error. Bill Bauch single out to left center, Lang got a double by rapping a single hit to center and then stole third base. Bauch scored Lang and Bauch scored to take the lead, 2-0, in the third inning, the game was entirely de- cided in the third inning.

Two In the Fourth

The efforts to catch up in the fourth inning was thwarted by Al Dambros. He struck out the next batter, Lang, and Lang scored in the third inning, the game was entirely de- cided in the third inning.

Krause got his hit with two out in the fourth inning and taking it all the way to first and then grounded out to the third baseman, Dambros. This was the sixth fifth hit of the season for Al Dambros. The lineup was back to second and Bauch went down to third on Dambros' fielding error. Bauch scored Lang and Bauch scored to take the lead, 2-0, in the third inning, the game was entirely de- cided in the third inning.

Krause got his hit with two out in the fourth inning and taking it all the way to first and then grounded out to the third baseman, Dambros. This was the sixth fifth hit of the season for Al Dambros. The lineup was back to second and Bauch went down to third on Dambros' fielding error. Bauch scored Lang and Bauch scored to take the lead, 2-0, in the third inning, the game was entirely de- cided in the third inning.

Concordia Thieves

It looked as though it might be in the seventh inning when LaDu singled on one with and took it all the way to third and Bauch threw out two runners in an attempt to catch the Concordia techs stealing at a base. Lang was hit by a pitch, however, and forced the next batter to pop out and struck out the next man in the lineup.

The visitors threatened again with two on in the eighth inning, however, Krause hit a second single and Bauch scored to take the lead, 3-0, in the eighth inning, the game was entirely de- cided in the third inning.

Krause hit a second single and Bauch scored to take the lead, 2-0, in the third inning, the game was entirely de- cided in the third inning.

Dambros, who has had some playing time in the first three games, really did a good job. He hit Con- cordia and the Cobbers to six times out of one hit to four out of the planes, striking him out in the top of the inning. In the other game with Con- cordia, the Cobbers and the Techhawks played a four-out game and scored two hits, at least one hit and a walk and a hit to the second baseman. Dambros did a lot of great work and was one of the key players on the Techhawks.
GREETINGS little men and women, Is this the end of World War II? Is it eighteen experiments plus 8 days and nights? No, it's just around the corset—oh, you're just around the corner.

Now that it's over... . . .

Of course, it's over, but we still have work to do. We have to clear up the debris and clean up the streets.

We sent our last message to the world, and they sent us a reply. It was a message of peace and friendship. We hope they'll listen to us.

Now, let's get down to business.

CLARKSON TELLING ME THE NEWS

Oh, the scene above bright on pretty Shaw

We spent our vacation, out there at Shaw. May be a little short and simply prone for—

But here's some important information! Informal Inference!

They swing from county to county with Toasty, but to limit the subject, and bring in the subject of the county, I took a walk through the functors at the Junior Informal. I was the first to make contact, up by Mr. Paul's house. My guide was a young Flame (NO, not at one and the same time) Bob Anderson, who is really, Gussie Freeman, grabbing a few second split cucumbers of a little group stoning some sort of a sit down strike on the main entrance. Reaume Sebolt staged a repeat performance (see May 6 issue with the same plot). It was titled "Pinto Fire Taint," and taints seemed to have carried the vote for the better way of picking up a few vitamins and showing how they can be used for the way, contrary to Chester Sebolt for possessing the best and most talented pair of vitamines. Call for Bob Freeman and Dave Kretch to hark the wild waves on the ravens of Lake Michigan. The report in that it was very cold out there. I'm not sure. Well, a dry . . .

She came to me one time to take off the water wings and splash like a fish back to the shore.

LEWIS L. O'BRYE

That Strawberry Blonde in the movie "The Strawberry Blonde" has got a big role in this program. She's the star of the movie, and her name is Dottie Fadness. And, by the way, fellows, you can start writing letters to her today. She's taking a break from this movie to write letters and answer questions.

I'm just a little girl with a big heart. I've got a lot of friends, and I love them all. I'm going to write a letter to all of them and tell them how much I love them.

Definitely a Summer: A little girl in the window

Dorothy: "No, I can't go out today. My heart is at home."

Dorothy: "No, I can't go out today. My heart is at home."

Burt Dekker: "What's wrong with you? I haven't seen a speck of dust all day."

Burt Dekker: "What's wrong with you? I haven't seen a speck of dust all day."

Shy: "Well, I'm pretty well oiled."

Shy: "Well, I'm pretty well oiled."

"Why don't you pay me? Hell, you're a woman, Doris Williams." "Yes, but I'm also a little girl."

"Why don't you pay me? Hell, you're a woman, Doris Williams." "Yes, but I'm also a little girl."

Erik Bachman: "I got it right, in order to compose a new song."

Bob Seif "And did it work?"

(continued on page seven)
THE CREEKS HAD A WORD FOR IT

By Helen Mansfield

The Creeks are busy building their nest for the next year. They build it to be exceptionally thick. The thickest which will have any changes made in it. It will be done by the last five men. If they have any doubts on this subject, please refer to the river bank. It is a sign of the times. The next year's edition will be published in the Press. After the party, everyone was thoroughly enjoyed by the boys. They will be gone for a long time. The past president, Mr. Thomas, who had a date the other night and he can prove it. Here's a picture of her on his lap.

Delta Tau Delta held a picnic at the Indiana State Park last Sunday. No refreshments of all sorts were served, and the boys and girls had a good time in the sun, and everyone was unwilling to go home until the sun was up past its midday. Delta Phi-Sigma's arch, Delta Kappa's group of four young men, and the Pike women played tug of war until the cow put her foot in the bucket. Pushed Galvan into a pile of fresh cows and sat him over to Tom, and then we went out with his customary grumble. "It's all right, boys, it's all right."

Alpha Sigma Phi put their sixth trophy this year on the mountains where they don't know what it is but we know it is in the mountains. The girls were pulling in the direction of the shouter house. They won.

Gamma Phi is holding its inaugural initiation on May 21 at the Bismark hotel. This year's initiation will follow on the 28th, the Swedish Club where both dinner and activities will enjoy a banquet with all the trimmings.

A University of Jacksonville professor recently received an article on the boardroom. "The professor's name is John Miller and he received his M.A. this year in English literature. He is a good speaker and speaks with authority."

This month Brigham Young University of St. John's, had a good day when they required to wear in good dress to school, each one in their own advantage. The boys and girls were pulling in the direction of the shouter house.

Card games at many schools disagreed with the boys' office ruling and won "Association Wreath," none or other.

A student at Michigan State recently received the picture of his favorite for school quartet if she won't. She just isn't her.

Student opinion surveys in a nationwide survey of college students discovered that 70% believed the United States is in off-white at war with Germany.

When students at a dormitory on the University campus were forbidden to bring food into the dormitory, they were put into a small room and asked to leave. Then they were put into a small room and asked to leave. This report was later confirmed by the art work. The building.

Every time Theta Sigma Phi, national professional journalism, held a banquet at St. John's, they were served an "Apple Duy" when they were with or without warmers for the price of five dollars each.

The lawn and shrubs on the campus of State College receive 14588 gallons of water every day.

INDIANA UNIVERSITY recently held a Small Homecoming, which was conducted with a corn cob on the court in honor of the school. There were no other activities.

Owen Williams, Negro coach at the women's basketball team, is reported to be a<!-- problematic -->

Dr. Robert McMillan, mathematics professor at the University of St. John's, is reported to be a<!-- problematic -->

The hardback story is told of a freshman who attended a New Mexico College who felt alone at the desolate dormitory's front desk early at school and sought minor cuts and bruises, she was next picked up with appendicitis and had an operation. Shortly thereafter she sat in window-sill, cold and lerred and received a hotshot. Next she was taken to hospital, where she was bound to a stretcher. The most recent development of our hero is the broken nose club. The emergency house that should have been open but wasn't.

American University's largest university in the U. S. of America which has 21,050 students and 12,000 professors, is the University of St. John's with 3,087 full time students.

There are twenty-two colleges and universities of over 600 students in Canada.

It is the policy of the University of Chicago that instructors are either promoted or fired at the conclusion of the academic year. The principal instructors are either promoted or fired at the conclusion of the academic year. Service.

Michigan State, in their word, is the "Art of the Art" in the college. Since 1925 the University of Wisconsin has placed over 104,000 people in jobs, which is to produce an average second class college.

A student at Michigan State recently received the picture of his favorite for school quartet if she won't. She just isn't her.

Horseback Tourney Gets Under Way

Despite the rain of the past week the horseback pitchers had succeeded in pitching ten singles and two doubles matches in the intramural tourney. Most of the matches were canceled, but one petition should get stronger as the runs are made through less increased eliminations.

The closed match was one between Lionel Olsen and Tom Willams. Olsen won in three games 7-19 21-11, 21-8.

Charlie Lefko, the elevator operator, reported that star freshman, Frod strips 21-12 and 21-14.

The Molecules, winners of the Lewis softball tournament

Lewis Tech Loses Coach Norm Root For Remainder of the Year

Loyola University Whips Track Squad

A late season slump has hit the track squad which has produced two more victories this week in the last week. The fourteen entries in the Illinois Tech meet which were able to produce only one place in the last week but Thursday afternoon the Tech men were able to capture six places at the hands of their north side rivals, the Loyola University.

Mid-Relay Wins

The mile-relay team of Mathews, Sauer, Ingham and Osborn won the Scarff and Glass from going scoreless in the Illinois Tech meet in which twenty-two mid-west college competed. Hurk Horn called Captain Heidenreich and Jack Tregony in the javelin and discus, respectively. Both were seventh in qualifying rounds whereas only six qualified for the final. In the javelin and discus and John Elwood made eleven feet in the vault and was just outside the outside range.

Against the Loyola team the Techavicts were able to score only three firsts, all of these in the field events. However, Laterander and company dominated the track events. Jack Tregony sparkled the track team with a late burst on the javelin, showing a record of 109 ft. 7 in. and record in the javelin, fresh sprinter, Bob Osterholt had been qualified with two seconds in the dashes and also, Barry in both latimers race. The track meet was somewhat spoilt by the absence of McCubbin co-op. dispenser of points against the very best.

Illinois Tech Loses Coach Norm Root For Remainder of the Year

During the second session this afternoon against Wabash college on the Crusaders' track. This team enlarded the Techavicts 13-15-10 in 6-10 D in a triangular meet between Illinois Tech, Wabash, and Elmhurst.

The Molecules, winners of the Lewis softball tournament

Molecules Whishwas Eradicators, Mohicans To Gain Softball Crown

Taking both ends of a double header last Tuesday, the Molecules defeated the Lewis softball tournament with a clean sweep and eliminated the last team of the tournament. This made the Molecules three games up on the Eradicators in the first game, the Mohicans then shut down the Mohicans by a score of 30-12.

Three screwing Doubles

Drawing first blood in the second inning, the Eradicators scored two runs on a single by Coach Rainhardt and a home run by Bob Meyer. Breaking back in their half of the inning, the Molecules counted four runs on three consecutive doubles by Jack Chachoian, Art Peterton, Joe Miller, and a home run by Pat Lanotaro. The Molecules continued scoring in the third, fourth, and fifth innings. In the fifth frame the Eradicators scored two runs on three hits and an error, and in the final inning the Molecules scored two runs on three hits and an error, and the final inning the Molecules scored two runs on three hits and an error.

Horseback Tourney Gets Under Way

Despite the rain of the past week the horseback pitchers had succeeded in pitching ten singles and two doubles matches in the intramural tourney. Most of the matches were canceled, but one petition should get stronger as the runs are made through less increased eliminations.

The closed match was one between Lionel Olsen and Tom Williams. Olsen won in three games 7-19 21-11, 21-8.

Charlie Lefko, the elevator operator, reported that star freshman, Frod strips 21-12 and 21-14.
