**ASME Offers Prizes To Contest Winners**

The meeting of the American Society of Mechanical Engineers held last Friday featured competition, in the form of a speech contest, to honor the premier ASME staff at the convention to be held here in Detroit.

Papers were presented concerning the Allied Expeditionary Controls Program by Morris Harrison, the history of Inertial Control in the New World, by Elmer Henn, and the speech contest, entitled "The Vibration and Control of Vibration, by D. E. Adams. The winners of the contest were decided by students and faculty members who were present.

Prize winners will be announced in about a week. In addition to the college trip, three home books together with a copy of Hendry's "Fireside on Diesel Eng." are being offered as prizes.

**As Seen From the Ashtray**

Llewellyn's students! Are you interested in securing a position? Have you been wondering if the position is one that would suit you? If not, you are wondering if you can find a position that will make you happy. Here is a chance to get that position.

The placement bureau is under the direction of Mr. John Schauer, and is supervised by a faculty representative at Lewis, will be very glad to assist you in answering any question when filling out your application. The applications will be considered in the order received.

You may register in the placement bureau at 1252 from 8:00 A.M. to 5:00 P.M. by putting your name on a list. The students are divided into sections, and seventy-five students have filled out their applications.

**New Program Helps Usher in Spring Quarter**

Under the auspices of the Lewis Student to do and read, with emphasis on the promotion of a thorough analytical reading and writing program, a new program of study will be undertaken. This will occur on April 4.

There will be an assembly entirely under the direction of the student. The program will feature a new IIT pep song, written by James Lindsley, a short skit, and demonstrations by various departments of the Liberal Arts and Science colleges and a wrestling and boxing match. A trio of songs will sing original compositions. The wrestling and boxing matches will pit the skill of two Lewis students, Joe DePinto and Art Ellis, against two of the better athletes in the city.

In the short drama will be starred Robert (Taylor) Mayer and Arthur Thomas. On Friday night a dance will be held in the Lewis Union, produced by the ITSA. The students will go "out to dance." Music will be furnished by the Vandercook boys. Admission will be 25 cents.

**Hockey Hop to Feature Many Novel Numbers**

**Leslie Group Presents 3-Ace Play, Dance**

At 8:15 p.m. on April 25, the Lewis Players will present "Spring Dance." A three-act play of that name will be staged, and immediately following the production, the players will present their own spring dance in the Lewis gymnasium. Music for the dance will be furnished by the Knights of America's Fifty cent ticket gains admittance to both events.

**Aswin Kolle**

In the supporting cast are: Char- lie Hennelly, Alfred Lis, Mercy and Brian Walker. "Intermezzo" is the score, and Margarit and Ruth Stott, both of whom are seniors. The remaining parts will be portrayed by John Perkins, Mary Flader, Robert Reynolds, and Liliy of Shroom and Emmett Robinson.

**Two Assistants Join Lewis Office Force**

Two new men have recently been appointed to the office staff at Lewis. Magdel Schaffer, in addition to helping secretary to Miss Mabel Schmitt, has been appointed office coordinator. In charge of the personnel division is Andrew Houck, who has been Mrs. N. W. Sotzeberg, the registrar at Lewis, of this duty. Miss Schaffer brought with her a wide experience obtained while assistant to the registrar of the Chicago Pedagogic Advertising Club.

**Edinburgh**

Original cast members of the David Harum, Miss Schaffer later came to Chica- go, where she graduated from Deen high school. She then attended Lawrence College and the University of Minnesota where she studied liberal arts. Then Miss Schaffer turned to business, and after studying at Merer Business College, was employed by the Commercial Club of Chicago before coming to the Chicago Pedagogic Advertising Club.

Alice La Pert is the new assis- tant registrar. She is a local girl from the West Side, and she has attended several schoolships from the University of Chicago and has done some work there in the division of romance languages.

She has been here for three years, and has been given the tasks highest women in the graduating class for the last three years. While in college she was employed in the registrar's office of the Chicago Pedagogic Advertising Club.

**Wide Range of Numbers**

Other high spots on the program will be Gus Wundak's comic solo on "Sun Drain," Chuck Fursi on the guitar with billi hilly, and "Sister Mary's Myself, with apologies to the composers."

**Hockey Hop to Feature Many Novel Numbers**

When the students of the Lewis division receive their much-awaited tuition bill for the spring quar- ter, they will notice that a fee of $1.00 has been added. This fee, specifically for the Technology Group, may have come as a surprise to some of the students, but to those who attended their respective class meetings about a month ago, it was no surprise. The suggested fee of one dollar per course by each class, and as a result, the Student Council was empowered to add that fee to the schedule.

**Bigger and Better Paper**

Addition of this fee to the Tech- nology News budget will enable the staff to put out a larger paper occasioned by the increase in the budget for pictures. A committee, which was appointed by Jack Green, chairman of the Student Council, is now at work attempting to secure a larger number of factory activity for the coming year, which will give Lewis activities some extra spots of activity, as this provide for the initiation of new activities.

**Extend Defense Registration To Sat., March 22**

National defense preparations are rolling along at an ever-increasing tempo on the twin campuses of the University of Illinois, according to Dr. J. F. Kellogg, director of the department of mechanical engineering and chairman of the engineering defense training committee. Announced the extension of registration for the second program of engineering defense training to Saturday, March 22, and announced that new classes will be scheduled to commence on March 11. However, it has been decided that the second open session of classes will not take place until Monday, March 11.

Based on present rates of application, the quota of about 1,200 men expected to enroll in the program will be attained. Large waiting lists exist for many classes as many men enter the service before the allotted time for registration of the various classes.

The University of Illinois Officers of Defense makes possible the project with support of the community, the support faculty and wide facilities of the institution. Courses offered, with the particular purpose of preventing a shortage of trained men in defense industries, may extend to 10,000 men.

**Annumus Taken Over**

K. J. McLear, an Armour alumnus, was recently placed in charge of the western department of Owen and Foster, the noted firm of underwriters, at Prosper, Illinois. McLear, previous president of Armour, has been employed by the Underwriters' Association, where he was as special agent and engineer in Iowa.

**Bert Me Bally**

Combing athletic interest, danceable music, and the student Union attuned background, the combination of the big events of the near future. The time will be Saturday, April 5, and the place, the Student Union on the Armour Campus.

Entertainment for the evening will be handled by Buddy Krume- lin and his twelve men of rhythm. Known professionally as Buddy Kruegling, he highlights his playing with solo conditions on the trumpet. Krumelein's rhythm has been featured at the 56th Century Club and many college dances.

Music by Krumelein

Krumelein and his orchestra play free and easy swing. They are a group which does a lot of original composition, and play anything from rhumba to waltz.

Something new in the way of vocal entertainment will be tried two months from now. Singer number one will be that wrestling team cutie, "Social Hour," and how May Martin should have a "My Heart Belongs to Duddy."

Bernard "Bert Me Bally"

The bent will also present the Serenaders Nightingale, Mr. Harold W. Davey, who will reemodel, "A Nightingale Song in Barkley Square," and "You, Darling Dangerous," with apologies to the composers.

**Physical Wreck from Illinois**

**Tech Makes Great Discovery**

by Bennett Edelman

Down the street staggered a small, pitiful figure. Under his arms were stacks of books, from his back teeth (maybe $150), hanging a glittering side view. This moronic looking creature was an engineer. As he drew nearer to the IT campus, one could see that it was our inglorious reporting. As our moth-balled hero struggled to give his corse a rest, an idea struck David. Quickly removing himself from the cowardly blur, he turned into the union. But suddenly realizing that two unions on the campus would make too much work for S. W. (Honey) Wenzel, he took his book of magic and returned to his own affairs.

Taking off his coat and hat, our stooped-reporter whipped out a pencil, piece of paper, and his morning dose of adrenaline. Turning to the one next to him (No. 1572), he asked, "May I use your slide rule?" Mike in my bribe, and the termites won't let me go." Upon seeing the borrowing the Slide rule, he proceeded to work. Back and forth were folds of paper and then, muttered, "27.0 x 2.382 = sum of the rule numbers.

Suddenly our hero stopped, wiped the foam from his lips, adjusted his bow tie, and cried, "I've got it."

"You're a great friend, you know your best friend told you," No. 1572 cried.

"What do you mean!" our hero cried. "Form a cross and I will divulge your secret. Maybe you can't understand."

"Look," our hero explained, "by taking one of your starts. All the students have to cut gasoline as tendencies double or nothing for the rest goes. He is now making the walls, wheels, and the rest is always greased. With the gas wheels you turn the engine."

"That's what I like in your friend," Mike said. Not even a small coke with lemon is used."
FRESHMEN TODDLE TO BE LUSTY BRAWL

With the coming of spring the freshmen have gone to town with their colors flying higher than usual. Just last meeting they had completely frogged up the line and that's why the freshmen Toddle "which is scheduled for April 29th" was given the privilege of rotating the mace of Jack Russell and his orchestra and being held in the Central Union's Frederick Street Hotel.

The term "toddle" may be de- scribed as a little contrived for a short line of men to dance off the dance floor and make up a little "shag" along the lines of their special occasion. The group is expected to arrive at the freshman dance at the Edwardwa- ster Hotel on April 29th.

EARL G. HUXHOLD AT HELM OF IIT SWIMMING TEAM

One of the swimming team's most recent successes, Earl G. Huxhold, has been selected to lead the IIT team at the national meet held during the 1941-42 season.

While Earl, or "Hux," as he is more often called, has had a little experience in the water, he is well and has been a backstroke swimmer for the past two seasons. He went through IIT's first year of varsity swim- mer in his first year at IIT under the guidance of the swimming team captain, and earned his letter as a junior man and as a third-year then dawb man.

Before entering swimming, Huxhold took time off for a little work as a construction worker. Evidence of this "traveller" had little effect on his time, for Earl was able to break 40 in 20 while in the first and third positions at Arnaz. For his efforts, Earl received a minor letter.

At the end of his first season with the team, Huxhold turned over his baton and committed to the sprintman in the medley relay. This was an unusual experiment for everyone, Huxhold keeping on going on one leg if it was the last leg of his hundred in I.T. This good for everyone except one of the hur- dles so far. Last season he swam the hundred and did the medley. This year he did last the same, in one meet, against Mary- land, and the result was the first-place relay with his time of 2:29.

He has had a 1:03 hundred, and has been clocked doing the 200-yard leg of the medley in under 2 minutes. With Huxhold at his side, the Tech swimming team should experience a great season.

BUT there's plenty important in the telephone business, not just cars, but thousands of important items of equipment distributed all over the country and where needed.

Seeing to it that everything used in the toll system is always on is necessary and has long been part of the job of the Western Electric Company. The company's electricians, electricians who have the equipment and hand the material, as well as many other key parts to the entire operation.

Western Electric now pays its part in the day-to-day business and keeps the telephone network running at full efficiency.
Mr. Vagberg Now In So. America On NBC Tour

Herald Vagberg, Armour Research Foundation Director met with government officials and members of the National Research Council's South American Tour in Washington, Friday, March 14. It was learned today that the group conferred at a dinner in the Shoreham Hotel at the invitation of Jesse H. Jones, Secretary of Commerce. Nolen A. Rockefeller, Coordinator of Commercial and Cultural Relations between the American Republics and W. L. Bast, Deputy Director of the Production Division of the Office of Production Management. Mr. Vagberg left Washington Tuesday, March 14 for Miami, where he and the other industrial, banking and research officials of the National Research Council party boarded a special Pan-American Airways Clipper to begin the tour of the South American countries for the purpose of studying undevoloped industrial and raw material possibilities.

Lab Equipment - (continued from page two)

Four sections of pipe are being installed for the measurement of heat transfer through insulation. One pipe will remain uncovered while the other three will be insulated in 1/8-inch, 1-inch, and 2-inch insulations. Illium will be in

Defence - (continued from page one)

elementary chemical engineering, explosives, advanced testing methods, safety engineering, and personnel selection and training.

Some of the courses to be offered at Armour and some at Lewis; others will be given in various parts of the metropolitan area. Professor Talbot declared that persons not actively engaged in defense industry who have had some fundamental engineering training are greatly desired for enrollment. No positions in defense industries are actually guaranteed to those finishing courses, but authorities believe that the probabilities in favor of such a man's being hired are great.

Members of the Institute defense training committee are W. H. Grinner, vice-president of the Institute and dean of the graduate school; F. A. Rogers, dean of the engineering; and Phil Hamilton, director of the department of civil engineering.

Lewis Home Ec Hear Address By Mrs. Olive Hazel

Home Economics Club girls met in the Tea Room on Thursday, March 6 to hear Mrs. O. D. Hazel, the dramatic director at the Lewis division. Mrs. Hazel enumerated the qualities necessary for a pleasing voice: namely, smoothness, loudness of pitch, resonance.

THE SMOKE OF SLOWER-BURNING CAMELS GIVES YOU

EXTRA MILDNESS, EXTRA COOLESS, EXTRA FLAVOR and

THE SMOKE THE THING!

THERE'S NOTHING LIKE FLAVORFUL CAMELS FOR EXTRA MILD, EXTRA COOL SMOKING! THEY'RE SLOWER-BURNING!

BY BURNING 25% SLOWER than the average of the 6 other largest-selling brands tested—slower than any of them—CAMELS also give you a smoking 

90% /

% LESS NICOTINE

tan the average of the 6 other largest-selling brands tested—less than any of them—according to independent scien

tific tests of the smoke itself!

You don't need a science degree to tell you that the pleasure you get from a cigarette is in the smoke itself. That's plain common sense. But science can tell you—and it has pointed it out many times—that CAMELS are definitely slower-burning. That means a smoke free from the harsh, irritating qualities of excess heat—a smoke that is extra mild, extra cool, extra flavorful.

Now science confirms another important advantage of CAMEL's cool-tasting tobacco and slower way of burning—in the flavor in the smoke (see above). So light up a Camel—now.

Try CAMELS. Smoke out the facts for yourself. Desert everywhere feature CAMELS. Not the others. For convenience—for economy—get your CAMELS by the carton.

TECH RELAYS

The Thirteenth Annual Tech Relays, heralded by an enthusiastic crescendo from the Tech Newell, March 11, the day before the start of the new year, proved to be one of the most successful relays ever held at the Illinois Institute of Technology. The relays were held on the Tech campus on March 11, and were the highlight of the athletic activities at Illinois Tech. The relay events were gathered there, much anticipated by the students. The weather was cool and dry, and the campus was bustling with activity.

PHOTOGRAPHY

By a photographer, it is necessary to have a keen eye for detail, as it is part of the job to capture moments that others might overlook.

SPORTS DEPARTMENT

As the spring season approaches, athletes begin to prepare for the upcoming season. Coaches and players are focused on improving their skills and strategies to ensure a successful season. Training sessions become more intense and frequent as athletes train for the upcoming games.

SPEECH DEPARTMENT

President L. L. H. Tait addressed the students during the assembly. He emphasized the importance of hard work and dedication in achieving success. The students were encouraged to strive for excellence in their studies and to always look for ways to improve themselves.

**Blitzkrieg!**

*By Bob Slaye*

On Victoria Street the dead records this week are presented of an alluring attraction. In this set we hear four of the best known “vaudeville” performers of the night. The “Blitzkrieg” is now on the air, and how did all of you blue-boy booking agents and pen pushers do since I last heard from you as a familiar gesture? I'm giving you a chance to prove yourself last... during six hours of exams of a March hit.

A big bouquet of assorted blooms goes to those who have seen the latest editions of the splendid performances at the Goodmen March 14. You were right there, in camp, and how did you manage to get there from your pocket into the cash register? Walking down Main Street with them, it is true, you might go down on any engineer's platform with ammunition.

The girls were at their best that night for the songsters. Let it help it with these gardians they received from the male chorus. How pretty the female devoted people upon each early rapture.

Johnny Roop with his banjo and terrific harmonium, gong, and some of the same to Jeannette Schneidt, with her clarinet and piano, and the women's school that night was the best that ever heard.

Mike was certainly the noisy of the Goodmen, not just the State Street. He was certainly the noisy of the Goodmen, not just the State Street. Mike didn't make much of a hit, but there's nothing like it out of the ordinary. Mike was certainly the noisy of the Goodmen, not just the State Street.

Bill Sherry has been getting new records of the Goodmen and reciters. The trio composed of Deborah, Alton, and Kate gave the Goodmen of All America and Let Me Call You Sweetheart and several others.

Dissertation

**In Man**

Woman consists of a calculating mind, armed and camouflaged by every weapon of modern science; and, like Froude, frankly out to "bring men back alive." They come into the world regret and wholesomeness, and are, in general, not disposed to live in ignorance of every trace of it. Wyman, as well as all others, have divided into several classes. First of all, those that will lead into a night club; next, are twenty-five percent of all. (..) Once then you have in your pocket, and how do I know? I am a woman, and..

**In Factory**

The women find the chief expressions of their character, such as it is, in their hats; for hat, like women, consists of two parts, and variety, varying from the little red rag, awkwardly glued to the back of the head, to that towering monument to the mutilation that is decorated by everything from wild flowers to knitting needles.

So here's to the women, God bless them. How a man can get along with them is another point as inseparable from man as gold.

From the Hereditary

... and with our thought for to-day: There are only two weeks separating us, and we can all be hopped up before I'm through with things so you'll have to speed up your respective processors. As says Mr. Bertelsman, "Double forty, boys!"

**MOOPOFF SPOOPS**

Sally Rand lectured at the University of Minnesota recently on the subject "The Use of White Space in Advertising."

The students in the University of Kansas department of journalism get actual experience in publishing by taking over the production of several of its student publications for one day period.

A survey conducted by the FCC on the University of Kentucky campus shows that the majority of the area's population is familiar with and enjoys the music of its own group. More than 80 percent of the people who listen to the station are familiar with and enjoy the music of their own group.

Weather in the summer of Kansas is often very dull. A new geology course at the university will study the effects of weather on the earth's surface.

**The Greeks**

(Continued from page five)

Philip Stuck (Continued from page five)

Perhaps you haven't heard about the mama kangaroo who took her two babies up to the sky. She was a well-known performer who ended up with everyone in the sky, and the audience was transfixed. "How many times do I tell you to stay off our children in bed!"

Jenny: "Oh, Phil, why do you think of me now that you've kissed me?"

Fred: "It's you who always come to me."

"The modern girl must be very interested in geometry; she tries to make a triangle in every circle she's in."

Gee, men!
Boxers, Wrestlers End Season; Elect Co-Captains for Next Year

Tech Grapplers Win Majority Of Boots

With a record of four victories against two defeats, the Illinois Tech "grapplers and greasers" have completed their season, wrestling for the most part against teams of far greater experience than the "boys" of real Techawk spirit by overwhelming the majority of their opponents.

Starting out with a bang and travelling to the Division street "Y" the team came away victorious to the tune of 209-71. Outstanding in this meet was the splendid job which Captain Blago Ni- grell was able to do. His 15-7 victory took a fall in thirty seconds.

Low to Worstnow

Though the Tech team was listed as second at Wheaton, this was the first of the two events that the wrestlers suffered from the hands of their opponents. The final score was 255-78, the points being garnered by the exceptional wrestling ability of "Hiwko" Harryton at 225 pounds, and Capt. Nigrell at 155 pounds.

Of some interest, perhaps, was the 170-pound class. Here, the Tech Com坦克, as they call themselves, were pitted against a tough crew from the University of Wisconsin, and lost.

Saturday, February 26, 1921, was a day on which the campus was bidden to a historical event by a grand display of Americanism.

After being pushed out of the 192th Engineers Army for several weeks, the army was making preparations for moving to a field camp. The tech team was able to reschedule its workouts.

Apologies are due to Bob Kincheloe of the University of Chicago for missing this column's error in printing the height of Don Daly. His score should have been 137" as "it was actually 137". We wish that he had been able to compete in the meet in the Tech Relays last Saturday. The Tech Relays were canceled.

Although the boxers have troubleful leading opponents, they have completed their season in style. The major event for them was evidently the Golden Gloves tournament. The team's hasn't lost a single meet in which they have participated, even though the number was limited.

"Howie" Pendelbury

Illinois Tech's new baseball captain is Howie Pendelbury. Although the current season has just begun, Howie was quickly to win the confidence of his coach and team mates and his erudite floor play proved his worth.

Hodie Pendelbury in Speculator High School in Chicago where he received his basketball and was elected to captain the senior football team.

It is now time to look back on the season and to review the highlights.

"Swimmers Finish Year With Three Won, Eight Lost

Despite this season's record of three wins and eight losses, the Tech swimmers are looking forward to next season's activities. The team consists of Eleven Deacon, Ann Shaver, Thelerta Stowell, and Bill Powers, who will be back next season due to graduation, and it is felt that, although it is not likely that we will beat the McCollivism in winning ways, their values can be replaced.

Whitney Pearson, who as a freshman led the Techawks to a season of high tension and signal that he will be back next year with the Gray and Scarlet. Pearson is a free-style swimmer of no mean ability. With the exception of blame sprint and relay man, Powers, 250 man, the free-style team will remain virtually the same.

At present, the only dark cloud hanging over the Tech swim team is the possibility that Larry Smith may not be able to continue his school in preference for work, regardless of the fact that he has no plans to, not only by his ability to swim, but also by his fundraising spirit with his Ken will be felt by beauty of the team.

Plumber Edward Shwarzehere of Illinois Tech and 250 yard relay team is expected to be as strong as if not stronger than last season. Smith, having experienced sudden accident and draft possibilities. The back stroke swimmer, promises that with the proper precautions, Smith, will become one of the fastest swimmers in the university.

Hodie Pendelbury may qualify for the varsity boys. The "Howie" Pendelbury may qualify for the varsity boys. The "Howie"

Illinois Tech's Track Team Wins Over Wheaton in Indoor Meet

Bob Osborne Runs 440 Yards in 51.9

Illinois Tech's rapidly improving track team came from behind last Wednesday night to beat the previously unbeaten College squad 50 to 54 in a short season meet. The wine and champaigne as the declared 1100 yard runner, the 110 yarder, 880 yarder, and the 440 yarder. The meet was held in the Wheaton gym.

The mile relay team clinched the meet for ITT in one of the most thrilling races ever seen in the U. of C. fieldhouse. The quartet of Matthews, Baker, McCullough and Osborn outdistanced the Wheaton team by a scant yard to win in the last 100.

Dick Barry, Illinois Tech's hurdle star, took both hurdle races to be high point man of the day. Bob Osborn finished 9th points by winning in the 150 second in the 80 and super anchor leg on the relay. Harry Heidenreich picked up 9 points for the Techs with seconds in the high jump and shot put, as well as his tie for second in the pole vault.

Wheaton was unable to beat Wheaton's Cotsone in the sprints, but came back to win in the two first in the quarter mile. McCullough was too tired to match strides with Charles Cottsone of Wheaton in the mile, so had to take second after a hard race. The two-mile, a repetition of the mile, saw Erickson falling in the last lap only to relinquish the race to Daughers in the very good time of 9:23. When the Wheaton trio swept the half mile the chances of a victory were quite remote.

The Techs picked up enough points in the final events to give the team a neat 255 to a point lead. Elwood and Parks record first in the pole vault and high jump on good performances in both. Heidenreich grabbed second in all three field events as Sannahow led the shot to a third place mark and Watson shared a third in the high jump.

Then came the hectic contested relay that settled the meet. George Mathews, running his leg of the relay first, put the Techs into a 5 yard lead. Hoy Sasser maintained the lead in his leg to give the baton to Wayne McCullough with a 2 yard advantage. Tired after two previous races he met. McCullough was unable to cope with his fellow opponent and was able to relinquish the lead. Bob Osborne started his anchor leg with a 5 yard lead and led more on the final 225. Then rounding the final curve the unstoppable Osborne straddled his kick.

Osborne's time in the final quarter was 25.9 which is three tenths of a second faster than his third place quarter in the Illinois Tech Relays.

BASEBALL TEAM STARTS PRACTICE

Plunk! Put her right in here! Watch that curve! Such are the crys from the Tech baseballers practice everyday in the Armstrong college, chemical known as the gym. The boys have practiced for several weeks the hours and receive has been perfectly pratising their throws in preparation for the coming baseball season. Next week the last days escape out into the open and will get to practice as far as the weather will permit. The aging baseballs are now starting to the college fields and the field will soon be in excellent shape. The practice should show some real workouts in the near future.
