ESMD PROGRAM SPURS Expansion
Lewis Engineering Building
To Be Remodeled

Within the engineering building of the west campus, a comprehensive program of remodeling is in progress. The programs, once considered feasible, have been made reality by the efforts of the planning committee. The improvements will include the extension of offices, the addition of new classrooms, and the installation of new equipment. The project will be completed in time for the fall semester.

Calender for Remander of Academic Year, 1941-42
Arranged to Meet the National Emergency
Jan. 19 to 21 Mon. to Fri.
Mid-Year Convocation
Jan. 25 Thurs.
Fry
Jan. 30 Fri.
Dennis College Year ends
Feb. 2 Mon.
Second Semester begins
Feb. 5 Wed.
Fresenian Orientation Days
Feb. 10 Mon.
Second Semester, Spring Divination
Feb. 13 Thurs.
Fresenian Scholarship Examinations
Mar. 5 Mon.
Fresenian Scholarship Examinations
Mar. 19 Fri.
Fresenian Scholarship Examinations
Mar. 20 Sat.
Fresenian Scholarship Examinations
Mar. 22 Mon.
Fresenian Scholarship Examinations
Mar. 26 Fri.
Fresenian Scholarship Examinations
April 13 Mon.
Fresenian Scholarship Examinations
May 14 Fri.
Fresenian Scholarship Examinations
May 23 Fri.
Examinations to be given during the last week of the spring term.

Peebles Moves Up Registration
Dean Peebles, in a move to eliminate the usual confusion arising at the fall term end and beginning of the spring term, announced on February 10, 1941, that the registration for new students will be completed by the end of the semester.

SAM Visits Lakeside Press Company Plant
R. L. Donnelly’s Lakeside Press was visited by members of the SAM on February 10. Mr. Parker, director of the company, showed the students the various parts of the plant. The visitors were impressed by the efficiency of the operation.

Musician To Leave On Three-Day Tour
Iowa And Illinois
Rearranging the school program has made it necessary to cut down the musical clubs’ trip to three days. However, Mr. Gordon O. Erickson, who has promised three days of “real interior and fun!”

Leaving Sunday morning, February 15, at 7 o’clock, three buses will take the members swiftly to Joliet and Ottawa where concerts will be presented.

Monday, February 16, the clubs will be in Joliet. There will be a concert in the Joliet High School auditorium at 8 o’clock. A meeting of the Jolietolo Chapter will be held at 7 o’clock. The ladies of the chapter will welcome the members back to Chicago following the Pavlova engagement.

Tickets at reduced rates for the Chicago Symphony Orchestra concerts have been made available to the students and faculty of Illinois Institute of Technology. The concerts are held in the University Auditorium and are open to the public.

Orders are now being taken for next semester’s book requirements, the Coop having added several new books to its list.

TICKETS FOR "POP" CONCERTS TO IIT AT LOWER RATES
Tickets at reduced rates for the Chicago Symphony Orchestra concerts have been made available to the students and faculty of Illinois Institute of Technology. The concerts are held in the University Auditorium and are open to the public.

The Coop is offering tickets at reduced prices for the next semester’s concerts. The students and faculty members are encouraged to purchase their tickets from the Coop.

This week at IIT
WEDNESDAY
Dance Club, 5 p.m., in the University Auditorium
INSTRUMENTAL BAND AND ORCHESTRA will present their annual concert.

THURSDAY
Glee Club, Armour Auditorium
FRIDAY
MARCH 10, 10 a.m.
ARMY and NAVY, Science Hall, 10 a.m.
Instrumental Boxing and Wrestling, 4 p.m.
Make the Best of It

By Bernard C. Hertz

Someone once said the world is but a mirror of a man, and what I think he did then he probably was right. This phrase somehow brought me to the conclusion that I had to go through in order to gain a deeper understanding of life. An entire vacation was available during which to prepare and learn something new. I decided to make my next visit to any place safe from the realities of life, and this led me to Pearl Harbor. I had been told in appropriate comments. To fill in the rest of the column I had gone to Hawaii. It seems that it was written the day after Pearl Harbor, and was going to insert it herein with appropriate comments. This war for at least one week (this is a warning about the following week).

However, I was busy tied, because that Whitman poem is real. It has a rhythm. That's why I did work to dig it up and write it down and write it down. It's not only because there is nothing we can do about it, but also because the rhythmic flow of Whitman's verse is something that can be gotten across. Whitman's verse was displayed by King Carol when he suggested that he come to America to start a free Hawaiian monarchy. Good, that's about the war — must not disturb. I just let my mind wander and see what comes. Mum, I was born on my birthday. What a difference. What a difference.

But now, ah, now, to learn from crises of anguish, advancing, straining with strong time and retribution. I need not add anything else. When the war is over and his head goes back again to the well planned past and all the preparations, I hope to go to Hawaii again. I had a wonderful trip. When he is willing to leave the world of the past behind him and begin another, by printing my column, then the best I could do is to stay away from the war.
YELLOTT, FOUR PUBLIC ORGANIZATIONS
URGE IIT INDUSTRIAL SAFETY COURSE

A unique appeal, emphasizing the extent of national unity in the present emergency, was made recently to Chicago's major industry by three local and one national organization. The appeal urged plants in the Chicago area to enroll responsible employees in a tuition-free defense training course in Industrial Safety Engineering from the University of the United States Office of Education.

This course in Industrial Engineering is designed to decrease industrial accidents in Chicago manufacturing plants. Enrollment, which is purely voluntary, will be held during the week of January 12 to 18, 1942, and classes will begin January 19, 1942.

The appeal was made by President J. T. Yellett, chairman of the Illinois Institute of Technology, on behalf of the National Safety Council of America, the Greater Chicago Safety Council, and the National Committee for the Prevention of Mineworker in Defense Industry.

President Yellett said, "Since the tragic morning of Pearl Harbor, industry has taken on a new responsibility to the nation. The future existence of a free America depends upon our ability to produce as much of every industry as victory requires. . . . jobs, more homes, more farms, more munitions."

"With our reducing accidents in 1941, 100,000 fighting planes will not fly. . . . 200,000 destroyers will not sail. . . . 200,000 tanks will not roll. . . . 200,000 planes will not fly. . . . 200,000 ships will not sail. . . . 200,000 planes will not fly. . . . 200,000 ships will not sail. . . ."

In his new position Mr. Yellett will act as liaison officer between the Institute and the alumni. His duties include giving assistance to officers of the Alumni Association by maintaining a permanent alumni officer which will serve them by performing all routine office duties. He will administer the alumni program and form contacts with the faculty and divisions.

A comprehensive alumni program is being projected which includes the organization of alumni clubs in principal cities throughout the country. The new secretary will be responsible for the coordination of alumni activities and divisions.

In this new position Mr. Yellett will act as liaison officer between the Institute and the alumni. His duties include giving assistance to officers of the Alumni Association by maintaining a permanent alumni officer which will serve them by performing all routine office duties.

Dr. E. W. Wright, Illinois Institute of Technology president, announced the annual meeting of the American Political Science Association held in New York during the holdings, were Professors J. D. Larkin and Victor Janney who were on the program.

Mr. Jones announced that the program devoted to policy was "Federalism: Centrally Controlling Tendencies." His paper was on "The New Federalism: Three Constitutional Implications." Dr. Larkin took part in a round table discussion of curriculum problems and in a survey of education practices and problems in the United States.

The last conference was on the teaching of the American Political Science Association. Speakers were Dean G. H. Chamberlin and Harold W. Davy.

Professor R. D. Mathews attended the American Historical Association's Fifty-Fifth Annual Meeting held in Chicago in the Stevens Hotel. Professor Mathews was a member of the committee on local arrangements.

IIT’s professors of mathematics have been very active in their scientific circles. These include Professor C. T. R. Kriechbaum, who attended the meeting of the Mathematical Association of America, the American Mathematical Society, and the National Council of Teachers of Mathematics, at Lehigh University, in Bethlehem, Pennsylvania. Prof. Kriechbaum is present in capacity as a member of the board of governors of the American Mathematical Association.

KNUCKLING DOWN...

The full impact of the war is now gradually being felt in every university institution. School officials think it is almost certain that summer vacations will be eliminated, and the war, at least one, is sure to approximate three years.

In a way this is both good and bad. The student engineer may feel definitely assured now that his efforts to obtain his degree will not be interrupted by any national defense or other governmental proceedings. Furthermore, he may feel satisfied that there will be little to stand in the way of his continuing in the engineering profession after graduation whether it be in the armed forces or in industry.

On the other hand the student engineer is going to do quite a little sweating from now on. The four-year engineering curriculum is still enough to shorten the time a continuous three-year course might well eliminate. The student is losing the past its critical point, that is the point where the student can efficiently and satisfactorily absorb his ideas in his last semester.

Apparently, however, mass production of engineers is the most important factor now that the nation is in total defense and offense. One thing is sure. Regardless of our inactivity, our faculty is engaged in their various efforts. It is not quite a "Charybdis" and Scylla situation but it is definitely a desperate situation.

Illinois Tech is doing its share.

One last thought: What a novel thing it will be to the student to think of almost any literary text book and mention "Illinois Institute of Technology" and have a picture of the famous "Pearl Harbor." And it doesn't have to be a war picture. Pearl Harbor is but one of many events that mold the Futurist in all of us. It is a war that is going on at the moment. Nothing is more important to the citizen than his own work. The more he can do the better for himself and for his country.

"Now, you music fans." What is popular now? It's "Les Miserables." Yes "Les Miserables" is a popular song and it is a novel. Many other songs could have been written for the same purpose. The French genius is really the creator of the music. It is a war that is going on and one that is not going to last. It is a war that is going on in the music and the language. The French genius is really the creator of the music. It is a war that is going on and one that is not going to last. It is a war that is going on in the music and the language.
OTHER CAMPUSES

By Beat Millville

Time and Tide wait for no man. Especially in December. Time never waits, also tide. It doesn't care if they are as fast as they are. It's remiss to all that in three short weeks the clock will have moved on and Godly's fountain will have turned off. The clock is the grandfather of this column, Ed Hall.

We've been helping Ed in this work for as long as we can remember, and now he's leaving us all alone in this cruel world. Here we go, all by ourselves.

This column is the best means of keeping the activities and accomplishments worthy of note. Intramural affairs will take up the bulk of this news.

1. Report all group activities and accomplishments worthy of note. Intramural activities will take up the bulk of this news.

2. Report all individual activities and accomplishments worthy of note. Co-ops making school parties, playing in track meets, etc., or doing anything of interest will be acknowledged or exposed under this category.

3. Report items of current interest Environment at the University of North Carolina at Chapel Hill will take up the bulk of this news.

4. Find a new name for the column.

If you have any suggestions for changes or corrections, please submit them for consideration.

Who Done It?

By Richard K. Nell

"Now, you press the first valve down, and the music becomes more and more. And I don't know how..." Thus went the lyrics of a popular song, and this advice was the same for finding the right audience for a piece of writing. "Who Done It?" is a column that aims to help you in this endeavor. The column will focus on a new approach to writing, and how it can be used to create a more engaging and effective piece of writing. The column will be updated weekly, and will cover a variety of topics, from music and literature to politics and philosophy. So, if you're looking for a unique and interesting take on writing, be sure to check out "Who Done It?" each week. And remember, the key to success is to keep trying, so don't give up!"
Without exception, every student in the architectural department has a pet gripe, or two, directed at the administrative department. So far, these have been harmless, but that is the exception. The grievances are constructive, but only if they reach the hands of the faculty. The AAS has a “grievance” section. At 12:30 p.m. Tuesday, January 30, there will be an open forum between students and the administrative department in the auditorium of the Art Institute.

The AAS representatives will, on Tuesday, January 31, distribute cards to the students to cast their ballots. If the cards are returned by Thursday, January 15, these will collect those cards. The A.S. President, George Hertel, will have each student write down his gripe, signature, or suggestion, and mail it to a designated person.

The format of this form is to be a better understanding of the principles of this school is founded, a better understanding between the faculty and the student. The class division is material — all world-things which for to strive. The faculty has placed its utmost common in this matter, but the ultimate success is contingent on cooperation from students. That's the goal behind it and push.

AN ANTI BRIEFED

TECHNEWS WHIP DETROIT TECH 55-41 FOR THIRD CAGE VICTORY OF SEASON

Bill Smart Scores Twenty-One Points

By Bill Colburn

Illinois Tech’s cages scored their third win in eight starts when the Blue Hens posted a 55-41 victory over our home court last Friday afternoon. The Blue Hens, gaining the lead early in the contest, went on to establish a 16-point advantage at the close of the first period. As a result of last week’s matches in the gym on Mondays, Wednesdays, and Fridays from 4 to 6 in the afternoon, several Booths have reached their peak of athletic ability in the gym. The Illinois Tech has been following the progress of the Illinois Tech in recent months and has produced one of the finest basketball teams in the Metropolitan League.

Tensio’s, that’s the right firing section of the basketball court that is being played. The Illinois Tech is known for its aggressive defense and quick decision-making.

**TECH SHORTS**

By Bob Bochietto

Former hockey forwards Chris Jones and George MacKenzie are now serving in the R.C.P.E. (Royal Canadian Air Force) as nurses. They are in training and will leave for active-duty in England at the earliest date possible in the future. Mrs. Bochietto is still training but will finish soon and be ready for action.

Ragunan Dimitri, fresh from Lewis, and Bob LeCivita, fresh E.L., from Armour put up one of the finest and best fights of the intramural boxing tournament. Bob fought Ragunan all over the ring and then Ragunan fought Bob all over the ring and finally they just stood toe to toe and slugged. Bob came out on top after a swell fight by both lads.

Anticipating an acute rubber shortage the hockey team has procured twelve pucks which they are guarding like gold. Any man attempting to appropriate a puck will be "eliminated" from the Armour campus, if you get what I mean.
