72 Ordinance Inspectors Graduate in E.D. Course

技术时间表

Monday, April 13
Opening session of Junior Instructor training course, Louis auditorium. 9-10 a.m.

Thursday, April 16
Psychological testing open, Louis Room 401. 2-7:30 p.m.

Friday, April 17
Lecture by Leslie K. Hagedorn, "Medical Arts, Good News," Louis room 113. 11 a.m.

Supersession. Lunch. 12:30 p.m.

1,000 at Power Conference: Illinois Institute of Technology, Chicago, Illinois. The conference was sponsored by the Illinois Institute of Technology and the Illinois State Section of the AIEE, Central Station Engineering, Western Electric and Manufacturing Company, East Pittsburgh, and the Illinois Institute of Technology. The keynote address was given by President H. H. Taft of Illinois Tech, who spoke on "Power and the War Effort."
Sing through your beards

by Howard Brown

"Sing sweetly, ye Fraimers! Let thy joyous voices echo among the antiphonal ruffles of Student Union!"

Loosely translated, the foregoing is an announcement of the annual Interfraternity Sing, sponsored by the Junior Marshals, to be held April 13. Mr. O. G. Erickson, musical director, has prepared a harmonious series of events for the evening, and is anxiously awaiting the moment when he may proudly listen to the mellifluous voices of the bearded fraternity, who have long since dwindled from the average of about forty to the present twelve. The old Alpha Sigma Phi line last year, victor.

All members of the Interfraternity council are hereby notified in what manner they must prepare for the Register of the fraternity. A number of the fraternity are already in the practice of harmonizing their voices in the absence of regular singing. This practice is not encouraged.

The worst of all is the practice of the sophomore in the practice of "singing" his fraternity and being prepared for the Register of the fraternity. A number of the fraternity are already in the practice of harmonizing their voices in the absence of regular singing. This practice is not encouraged.

All members of the Interfraternity council are hereby notified in what manner they must prepare for the Register of the fraternity. A number of the fraternity are already in the practice of harmonizing their voices in the absence of regular singing. This practice is not encouraged.

Another epic-making event of Junior week will be the climax of the Interfraternity Sing. Judgement of the contestants will take place April 24, a plaque on which all of the fraternity names will be inscribed and presented. With this in view, anyone with enough intestinal fortitude to withstand the wrath and fury of his fraternity and their female associates, would do well to allow his chin (or worse) to grow unmolested and thereby preserve his manhood.

All are eligible to enter, and the highest prices win.

Power conference

(Continued from page 1)

E. Hobson, director, department of electrical engineering, Illinois Tech,

W. L. Lott, professor of hydraulic engineering at Iowa State University, spoke on "Hydraulic Power" at the 11:15 a.m. session Tuesday.

A joint luncheon with the American Institute of Electrical Engineers was held at 12:15 Tuesday. H. W. Teller, chief electrical engineer, Public Utility Engineer, and Service Corporation, Chicago, spoke on "Preventing and Extincting Electrical Fire Losses."

A 2 p.m. session featured discussion on boilers and stokers, R. N. Bick, superintendent of power plants, Stalbaker Corporation, South Bend, Indiana; A. A. Meador, superintendent of the ASME, New York; and A. W. Thorne, assistant to the president, Carnegie Institute of Technology, Pittsburgh. All spoke.

The closing session of JHS was held at 8 p.m. Tuesday, featuring a discussion on diesel power. Speakers were E. T. Vincent, professor of mechanical engineering, University of Michigan; and M. A. Glesener, member of the engineering faculty, Chicago, Burlington and Quincy Railroad company.

PUBLICITY OFFICE ADDS TO STAFF

Joe Furhman, an outstanding student at the Illinois Institute of Technology, has joined the staff of the Publicity Office. Furhman will be responsible for handling news releases and public relations work for the institute.

On Alert...

the Task Force of the Telephone army!

Wherever the call, a mechanized army of more than 27,000 Bell telephone trucks stands ready. Each has a skilled crew armed with hand tools and power equipment designed especially for the job to be done. It is ready and efficient and can be mobilized anywhere, anywhere.

This is just one way the Bell System is prepared to keep lines open and ready for war-time service — no matter when or where the test may come.

DRAWINGS ON DISPLAY

CO-OPS HAVE JAMBOREEE

by William Wennings

The technical drawing department is located in Room 905 Main, a large number of original drawings made by students in foreign technical schools. The drawings will be displayed throughout the campus until April 20.

A connection with this display of original drawings is a Korf & Green Professional Minnes "Bow Compass" not valued at $5.50. The closing date is April 20. The winner of the contest will be announced in the Technology News.

"4F" draftees take IIT training course

A recent ordinance work may make use of the nation's "4F" non-participants if the rest of the nation follows the lead of a program established at Illinois Institute of Technology.

Twenty-five cards from the Chicago area, all placed in the 4F class, have been selected for study of new ordnance inspection theory and methods at the Institute in a part-time cooperative program.

The group was selected by the state rehabilitation department upon recommendation by the new department, and are not actually in military service.

The training begins with study of ordnance inspection methods for four hours daily for eight weeks, and is of value to ordnance plants. Following the eight weeks, they will become regular full-time ordnance inspectors.

ERRATUM

TECHNOLOGY NEWS sometimes last week a short article, "Samuel Rittenhouse, B.S., associate professor of mathematics," TECHNOLOGY NEWS, page 2, concerning what is to be expected.

All faculty members who claim similar degrees are invited to submit requests to the Publicity Office.
JUNIOR CLASS “SUPER STUFF” JEWELRY NOW AVAILABLE

Orders are now being taken for the junior class jewelry by Cathy Kennedy, Lewis, and Richard Roberts and Charles Fuller at Armar. Early orders have been arranged to ensure that priorities on the metals used will not affect delivery.

Students can now get their rings and pins at a reasonable cost and can display them throughout the year. A down payment of two dollars is required upon ordering, and orders received before April 17 will be delivered before the close of this semester.

The selection of the “super stuff” has been very important and it is hoped it will suit all students. The jewelry is on display in the information office and Miss Kennedy can be seen there any day from 4:45 p.m. Orders from the south campus will be taken in the TECHNOLOGY NEWS office, any time of the day.

HENRY ANDEREGG, LEWIS ENGINEER, RETIRES TO ARMAP

After 20 years service in the maintenance department of Lewis Institute and Ill. Henry Andereggs, right engineer at the west campus, retired last week to his farm near Loretto, Virginia.

He came to Lewis in 1932 as a foreman and rapidly advanced to the responsibility of station engineer. Deciding to devote all his time to the upkeep of his farm, up on the form, he decided to end his long tenure at Lewis and left for a well deserved rest.

SOPH INFORMAL FRIDAY, APRIL 17

SCHOMMER TALKS ON OPPORTUNITIES

“Opportunities for Seniors” was the topic presented to the seniors and junior class in a lecture given by John J. Schommer, director of placement, last Friday in the art room.

At the present time, new factories are being set up for industries that are opening. Opportunities are now open to all graduating students, especially economists and engineers. In seeking a job, one’s college training is very important for Mr. Schommer stated that “in choosing engineers one’s objective such as advanced calculus and physics etc. count more than those in gymnastics, music, art and painting. Those having mathematics, are therefore given preference to."

Advice was given to both boys and girls. Most who believe they are going to be drafted should apply for the V-7 training officer. Women should take a short secretarial course after completing college for it will always come in hand. There are many opportunities for those women in industry who will take the place of men in industry.

A sound education was also stressed for progress it made in all fields. One should keep up with the world’s happening and not become “obsoletian.” Management cards were distributed, greatly stressing the points of personality, character and aggressiveness.

$12,000 PROJECT ADDED AT IGT

A $12,000 research project has been established by the Rochester Gas and Electric Company at the Institute of Gas Technology, it was announced Thursday by Harold Vagnberg, director of the Institute.

The project, one of the initial sponsored programs set up at the eight-month-old Gas Technology, relates to the removal of organic sulphur from manufactured gas.

The six-member steering committee, including three representatives from the Rochester Gas and Electric company and two from the Gas Institute, will direct work on the project. Representing the committee on the steering committee are A. I. Strecker, B. E. Kruger and Lewis Shindler, representing the Institute are Professor C. R. Kintner and E. R. Hols.

FPE8 HEARS ABOUT CHICAGO’S DANGER

Lieutenant Harry Wolf of the Naval School of the Chicago Fire Department presented two sound stunts to members and friends of the Fire Protection Engineers Society, on Friday, March 27. At an introductionWolf illustrated the probability of Chicago being visited by enemy air forces. Chicago is a defense center and relatively speaking, can be fired via Norway and the Polar Region.

Fighting to be as successful as P. 1, university and commercial dance will be held this Friday, April 17, at the Lake Shore club of Chicago.

The Sophomore Informal always one of the top dances of the year, will feature the music of Gay Clardy and his popular band. The dance will be enhanced by the presence of beautiful, vivacious Joan Ryan, our only regret being we couldn’t get a picture of her in time to print it in this issue of the News.

All of the facilities of the clubs are at the disposal of the dancers including spacious lounge, private entrance and checking facilities. First seating begins at 7:30. Prices are $1.20.

The price of one of the silver and red bids is $1.65 (tax included) and it represents the best value in entertainment ever offered at Armar.

There has been some question as to the location of the club and the smallest way to get there. The club is located at 850 N. Lake Shore drive, only one block north of Chicago Avenue and the club’s private entrance is located on Chestnut Street. For those who drive, Lake Shore drive is the best way to get there, for those who have to travel by other means take the elevated to Chicago Avenue and transfer to the Chicago Avenue street car EAST to the end of the line at the lake then walk one block north.

The social committee under the guidance of Bruce Worcester urges that all students who have bids not please turn in the bids or the money for the bids by Thursday. There will be somebody in the information office every afternoon of the week, and bids or payments can be purchased at the Bookstore or at the Information Office.

JUNIOR CHEMISTS WANTED BY U.S.

The United States Civil Service Commission is now seeking Junior Chemists to perform research or other work in chemistry. The position pay $7,000 a year. No written or representation is accepted and qualifications are judged from their experience, education and training.

Women especially are urged to apply. The navy yards, arsenals, and other government laboratories are now employing women in chemical work. Completion of a four-year course in a recognized college or school with thirty semester hours in chemistry is required, although junior students with the required years of college shall be required during the first months of the time of filing application may apply. Experience is not required and it, of course, highly desirable.

Applications forms and further information may be obtained from any post office.

NAVY ANNOUNCEMENT TO COLLEGE FRESHMEN AND SOPHOMORES 17-19

You want to serve your country! Why not serve where your college training will do the most good?

Under the Navy's newest plan, you can enlist now and continue in college. If you make a good record, you may qualify within two years to become a Naval Officer — on the sea or in the air.

Who may qualify

80,000 men per year will be accepted under this new plan. If you are between the ages of 17 and 19 inclusive and can meet Navy physical standards, you can enlist now as an Apprentice Aviation Cadet in the Naval Reserve. You will be in the Navy. But until you have finished two calendar years, you will remain in college, taking regular college courses under your own professors. Your studies will emphasize mathematics, physics and physical training.

After you have successfully completed 135 calendar years of college work, you will be given a written examination prepared by the Navy. This examination is competitive. It is designed to select the best men for training as Naval Officers.

How to become an Officer

If you rank sufficiently high in the examination and meet the physical standards, you will have your choice of two courses — each leading to an officer's commission:

1. You may volunteer for training as an Aviation Officer. In this case you will be permitted to finish at least the second calendar year of your college work, after which you will be ordered to active duty for training to become a naval aviator. Approximately 50,000 men a year will be accepted.

2. You may be selected for training as a Deck or Engineering Officer. In this case you will be permitted to continue your college work until you have received your degree.

DON'T WAIT ACT TODAY

1. Take this announcement to the Dean of your college.
2. Or go to the nearest Navy Recruiting Station.
3. Or mail coupon below for FREE BOOK giving full details.
OPEN LETTER TO

Dear Soph:

We are writing this note to express our concern about the recent events on campus. As students, we believe it is important to address these issues in a constructive manner.

As seniors, we have observed a pattern of behavior that has become concerning. The recent incidents have raised questions about the safety and well-being of our classmates, and we are writing to express our concern and to urge action.

We understand that the administration has been monitoring the situation closely and has taken steps to address the concerns. However, we believe that more can be done to ensure the safety and security of all students.

In light of these concerns, we urge the administration to take the following steps:

1. Increase the presence of security personnel on campus, especially during high-risk times.
2. Conduct regular training sessions for faculty and staff on recognizing and responding to signs of stress and distress.
3. Provide confidential counseling services for students who may be experiencing mental health challenges.

We understand that these measures may require additional resources, but we believe they are necessary to ensure the safety and well-being of our community.

We also call on our fellow students to be proactive in supporting one another. We encourage open communication and a willingness to listen and offer support to those who may be experiencing stress or anxiety.

We are committed to working together to create a safe and supportive environment for all students.

Sincerely,

[Student Names]

[Class Year]
PENTATHLON IN JUNIOR WEEK ACTIVITIES

The Pentathlon to be held on Saturday, April 25, will mark the last of Junior Week. To those who are not new students, this means a new adventure and excitement. The Pentathlon is the event in which a field of young men competes in five events. The individuals with the highest number of points receive a trophy. The events that are featured this year include: ski jumping, with the best of five tries; the bobsledding, the 100-yard hurdles, the high jump, and the shot put. The best of five will be given for each of these events. The team with the highest number of points is the champion.

Netmen beat DePaul in opening match; Loyola next

With the match tied at three games after three and a half hours of rain and sunshine, DePaul and Loyola squared off, with a quick return to the familiar with a third one for each in the fourth game. The match is the first of six played between the DePaul and Loyola teams, with a 6-5-3-5-3-5 final score. Both games were played on the Loyola courts.

The match was a showcase of the DePaul's relentless pressure defense and Loyola's offensive prowess. DePaul's attacking was led by a combination of ace serviters and powerful hitters, while Loyola's defense was consistently stepped up. The match was a testament to the strength of the DePaul team, who were able to weather the storm and emerge victorious.

Baseball squad beats Maroons after losing to Lake Forest

by Warren Spits

We did it! On Friday last, at Greenwood Field, Al Dambrosio hit a 3-run homer over the center field wall in the third inning of the game. This was the key play in a game that saw the team score 9 runs in five innings, winning by a score of 9-5. The victory was sweet revenge for the team, who had lost to Lake Forest earlier in the season.

The game was played in front of a large crowd, with many fans cheering loudly and energetically. The players were all focused and determined, with each team putting in their best efforts. The game was competitive and exciting, with many moments of tension and suspense. The final score was a hard-fought win for our team, and the victory was celebrated with high spirits.

Cindermen prep for Elmhurst meet; depend on new material

don Keigher

The Illinois Tech Cindermen will play next Saturday for the first time in the history of the school. The team, coached by W. H. Keigher, is looking forward to the match against the Elmhurst College. The meet will be held at the Tech campus. The Cindermen are expected to perform well, having recently defeated the Eastern Illinois. The team is currently ranked 15th in the national polls.

Molecules take Lewis basketball title from Turks, 28-24

Last Wednesday the Lewis juniors basketball tournament came to a close with the Molecules snatching the crown from the Turks by a 28-24 score. In the consolation round the Wolves outlasted the TCA Co-ops 22-20 after a heated overtime battle.

Sallie Hahn, Henry Salo, and "Blue" Munday starred for the Wolves with Fishman guarding star Russ Kamen and holding him to one lone basket. Midway in the extra period, Pete Bruscell became the contest hero when he hit the hoop for the winning basket.

Leading the Co-ops were Elmer Lakes, Captain Bob Eber and Mark McAllister with Lakes doing the scoring and the McAllister duo watching the ball in for him. Suffering from the absence of center Mark Ralston, who is being treated in a Gary hospital for a hernia, the Co-ops lost control of the backboard to Munday and Salo. Although the game was close and fast the moral occurred in that the Wolves did not have any personals called against them.

The high point man of the game were Lakes for the Co-ops 12 points and Salo for the victors 6 points.

To climax their undefeated season the Molecules snatched off a Turk scoring spurt in the 20 quarter and went on to take the west campus basketball championship.

With successive baskets by Henry Polk, Les Ziff and Ed Kilroy, the Molecules built up a 3-point lead at the end of the first quarter. In the second period the brilliant defense play of Bill Laut, Ziff and Kilroy held the Turks scoreless, while the atomic wonders enlarged their advantage to 12 points on baskets by Polk, Laut and Ziff.

Joe Delton and Jack Jackson were the mainstays in the Turks fourth quarter defense, which held the mighty offense to a lone basket. The scoring threat in the final stage was paced by Chuck Leary and John Schafin, each hitting the hoop for six markers.

Scoring honors of the game were held by Ziff with ten points, while the Turks leading scorer, followed his mate with four field goals. Schafin led the losers with eight points and adding him was Leary with six counters.

RIFLE TEAM PLACES FOURTH

The Illinois Tech Rifle club entered the Midwestern Intercollegiate Rifle team championship held in the University of Chicago fieldhouse, Saturday, April 3. This event was sponsored by the University of Chicago Rifle club and is an annual event. Out of a possible 1600 points, our boys made 1561 and succeeded in placing fourth. First and second places were captured by the University of Cincinnati, who piled up a total of 1577 and 1575 points. Third place, team, placed was the host, the Maroon Rifle club.

Members of our sharp-shooting team were George Born, captain of the team; Ray Smith, president of the club; Joe Hild and G. H. Neiman. The competition consisted of firing 50 shots at 50 yards and 20 shots at one hundred yards. This is called the Dover course. The type of gun used was a 22-caliber Winchester Model 52, with metal sights.

The club is now holding competitions between non-team members. In the rifle range. Awards consisting of cold, silver, and bronze models will be awarded to the winners.

TECH SHORTS

"Let'er ride!"

Rodeo or Range Top-hand Agree:
"There's Nothing Like A Camel"

The smoke of slower-burning Camels contain 28% Less Nicotine than the average of the 4 other largest-selling cigarettes tested—less than any of them—according to independent scientific tests of the smoke itself!

28% LESS NICOTINE in the smoke makes good harm seem to me," explains Rodeo Shoot and Hells, Mills (left). "Camels have the mildest of them in just as clear a sentence," says Stetman. How? Everywhere you go, it's the same—as for extra mild, delicious and Flavor, there's nothing like a Camel—America's Favorite Tobacco.
ILINOIS TECH STUDENT ORGANIZATIONS

RHODE DELTA PHI

Playing a winnowed field, in football weather, Rhode Delta Phi won their second interfraternity basketball game, an overtime match, 6-5, on Friday night. Going into the last minute and a half behind by two points, the Rho Delts managed to tie the score and send it into overtime, where they scored the winning point. When Kersten scored in the last minute, Rhode Delta Phi had already virtually eliminated the competition.

FIRE SMOKER

The fires projects well a well attended smoker on Wednesday evening in the Student Union. Kurzer, the guest speaker, Mr. Kuker, is a charge of metal technology at the College of Arts, and spoke on the proper smoking of fuses and pipes. Mr. Kuker also discussed the care and use of pipes at high temperatures, advising that the metal be left exposed to a smoke when it gets too hot for the metal to withstand.

MECHANICS MEET

Last Thursday evening a Mechanics Colloquium was held in the main dining room of the Student Union, and invited to speak was the guest speaker, Mr. Kuker, who is in charge of the Metal Technology at the College of Arts. Mr. Kuker spoke on the proper smoking of fuses and pipes, and also discussed the care and use of pipes at high temperatures. He then demonstrated how to light the metal when it gets too hot for the metal to withstand.

CO-OP NEWS
by Bert Millerini

Do you wanna travel? Does your inner self cry out for the open road? Want your mother lightened by a road map? Were you born with a safer stake in your mouth? Then have patience fellows—just wait till you are a senior. With half of your classes at Lewis and the other half of your classes you'll show the sign of a gypsy (I love the Big Leb).

WELL—WELL—GOOD—GOOD—

It seems our little shot in the arm last week for Co-op club has precipitated some action. The president held a special meeting Thursday to discuss and approve a constitution for the formation of a new co-op organization to replace the present Co-op club. The new name will be the Co-operative Students Association, and the constitution is intended to promote activities and good fellowship between the Clubs.

The proposed constitution will be circulated among all the co-op classes (A and B groups) for approval and revision. Perhaps we shouldn't pass judgment on the whole thing just yet, but it will give us some interest on principal grounds for amusing interest in an important matter.

Our sophomore correspondent Ed Kurek gives us the scoop straight. At the secret meeting in the room, E. K. discussed the idea of Tempe students forming a club to discuss and sponsor a campaign for the release of the anti-war students in the United States. The campaign would involve sending letters, petitions, and other forms of support to the students in prison and to the government. The club is seeking members from all classes and majors, and meetings are held on Tuesday nights at 8 p.m. in the Student Center.

SLIPSTICK

My name is Joe and I am the president of the Slipstick club. We meet every Thursday at 7 p.m. in the Student Center for a fun time. We discuss the latest in Slipstick trends, from the newest hairstyles to the most popular movies. Our club is open to all students, and we welcome new members with open arms. So come on down and join us for a slip of a good time!

UNEXPRUGATED EXCERPT

Editor's Note: Several remarks have been passed to your feature editor in the off-key that these pages are too vague and vague. We submit the following article for the more punctilious-minded people. We hope that this excerpt is not

At 4:30 his Uncle Zela rudely rounded him from his horns.

"What's the matter?" gazed Joe.

MUSICAL CONCERT

by Richard Kitham Neil

(Editor's note: "Kitham" is not our fault, it's his lawful name.)

The Illinois Institute of Technology musical clubs proved that music should not be crucified to a cross of mediocrity and slopsicle at Ill at the annual musical concert last Friday evening at the Goodman theater.

The orchestra and glee club reached an all-time high in excellence of performance, and while the Lewis girls glee club appeared in but one number, it was very evident that they had become a much finer organization than they were last year.

The program began with von Supp's much used and much abused "Light Cavalry" overture. The orchestra did not seem to have a full cast.

The glee club then lifted their voices to the heavens in two wonderfully expressive numbers: Beethoven's "Creation Hymn" and Palestrina's "Agnus Dei." For those who had come to hear great music as well as good, here was that feast for which they had been looking. The Palestrina number was perhaps, the supreme moment of the evening. May we have more of that music next year, Mr. Erickson.

The orchestra came back into the spotlight with both "Aqua Bae" and "Northward" from Coates' "Four Ways Suite." In the former number, the divisiion of the vocal part as a trombone solo, the orchestra did its best in these numbers. Hubert, who always plays solo passages beautifully, was extremely fine in this number, and it is hoped that he will always continue to play with the dignity and spirit that he showed on this occasion.

"Hymn to the Night," the night number of the concert was followed by two numbers from Satie's "Atlantic Suite," in which a special choral arrangement by Mr. Erickson was used. Erickson has done a distinguished piece of work in these selections from an absolutely idealistic standpoint, but it is quite questionable that the results produced might be a little too heavy.

The glee club then rendered three sublima numbers: Steinion's "Plantation" of Florida's "Kangaroo Bob" and the negro spiritual "Sisal Away!" It sufficed to say that the singing was worthy and affluent. Noble Cain could not have done a better job than Mr. Erickson did in these songs. If the glee club sings in as splendid a coming contest as they did here, they should receive all of the honors.

The orchestra held forth in the most two numbers which were "By the Sleepy Lagoon" by Coates and "Spring Beautiful Spring" by Link. This was the most momentous moment when all of the sections seemed to come to grief. In all justice it might be said that these light finery...
