CANCELS AFFILIATION PLANS
WITH NORTHWESTERN AFTER
LONG PARLEY BY TRUSTEES

Trustees Believe Best Interests of Both Institutions
Are Served by Decision; To Receive Independent Support

(Special News Release from the President's Office)

The Trustees of Arboretum Institute of Technology announce that the proposed affiliation of the Institute with Northwestern has been abandoned with the consent and approval of both parties involved.

This decision has been reached only after exhaustive study by the Trustees, and the proposed affiliation abandons the best interests of both institutions of education. The Trustees of Arboretum Institute of Technology and the Trustees of Northwestern University have come to an agreement that the two institutions will continue to exist as independent bodies.

F. P. E.'s Cased in Met Lab.

Three students narrowly escaped serious results from being exposed to a high-voltage electrical discharge, which occurred in the Chemistry Laboratory, P. F. E., last Thursday. If the current had been higher, the students, Mr. Scott, Mr. Smith, and Mr. White, would have been seriously injured.

"THE SLIPSTICK"
Clue to the "Slipstick": let the Slipstick fly when you may.

**THE WHoSe**
When it's cold or mild, Cabin isn’t quite as good. Physics may be beautiful but you don’t feel so bad.

But now it’s warm and decent, Homework always is to be feared. You look up at the old friend, And then you go to waste time after class.

Ellie Again
"What’s the bump on your head?"
"Accidental."
"Yeah, so, I wake up too soon, and they didn’t have any other left, so—"

**Professor Charles Edward Paul**
(6th Biennial Series)

**BY STEPHEN JANISZEWSKI**

Charles Edward Paul, head of the Department of Mechanical Engineering at the University of Illinois, is one of the most prominent figures in the field of engineering education. He was born in New York City on December 10, 1854, and received his B.S. degree from the University of Illinois in 1876. He was appointed professor of mechanical engineering at the University in 1891 and served until his retirement in 1926.

Professor Paul was a charter member of the American Society of Mechanical Engineers and served as its president in 1920. He was also a member of the American Institute of Electrical Engineers and the Society of Automotive Engineers.

Armer Chalks Up 3rd Straight Win

Armour's third straight victory clinched him last place in the chase of the Reed Cup. At the end of the season, the Reed Cup was awarded to the team that had the best overall record. Armour's win was the third in a row, and the team continued to dominate the competition.

F.P. E.'s Gassed in Met. Lab.

F.P. E. was gassed in the Metropolitan Laboratory, which was designed to simulate the conditions of the atmosphere in which they worked. The gas was created using a mixture of various chemicals, and the team was exposed to it for a predetermined period of time.

Armour's Cruise Proves Temporary

H. B. Reifstein, 36, F. F. E., who has been suffering from a serious illness, returned to work after being released from the hospital. The team was encouraged by his return and continued to work towards their goals.

Griffith Leaves for Oregon State

Professor D. E. B. Griffith, Assistant Professor of Chemistry at Oregon State College, has accepted an appointment as a full professor at Ohio State University. He will begin his new position in the fall.

OUR PIONEERING WORK HAS JUST BEGUN

A vision come true

In a part of Africa little known to the whites, where oblique trails run, Cecil Rhodes became a colonizer. He lived to build it.

The local laid up was part of a water dream, a dream of an far inland colony linked far to existing over waterways by rail and wire communication. And he lived to build Rhodesia.

First the dream, then the reality, is the rule with telephone men too, as they work to greater heights of service. But in between, there seems more people of careful planning and smooth co-ordinators of many elements.

Science research, manufacture, plant construction, commercial development, public utilities—administration—many vital telephone activities offer a widening opportunity to good-natured abilities.

loyalty is a quality absolutely essential to success. Loyalty to ideas—loyalty to country—loyalty to home and—Mother.
Net Team Invades Lake Forest Sat.

Led by George Johnson, Jr., Lake Forest’s center player, and armed with an intense desire to prove themselves, the Lake Forest Vikings set their sights on victory against the Woodstock High School team this week.

The game, set to take place at 7:00 PM in the Lake Forest High School gym, promises to be a thrilling match-up between two of the top basketball teams in the region. The Vikings have been in top form lately, having won their last two games, while Woodstock has struggled a bit, with only one win in their last four games. However, the Woodstock team is known for its teamwork and fighting spirit, which should make for an exciting contest.

Coach Thomas, Lake Forest’s head coach, has been focusing on improving his team’s defense and ball movement, and he expects his players to execute his strategies perfectly come game night. The Vikings’ offense, led by Johnson and guard Jake Thompson, has been balanced and efficient, with a strong supporting cast.

On the other side, Woodstock’s defense has been their strength, led by senior center Max Jones. However, their offense has been inconsistent, and they will need to find a way to get scoring opportunities against the Lake Forest defense.

With both teams hungry for victory, the game is sure to be a nail-biter. Fans are encouraged to come out and support their favorite team, as the winner will have a significant boost in their claim to the top of the league standings.
