A meeting of the Juniors was held last Monday afternoon in the Junior Social Room where the students were gathered in groups to discuss the plans for the upcoming week. The meeting was led by the President, who welcomed everyone and gave an overview of the events planned for the week. The President also announced that the junior class would be holding a dance on Saturday evening, which would be open to all High School students. The Junior Social Committee was also present to discuss the plans for the dance. The meeting concluded with a short question and answer session where the students had the opportunity to ask any questions they may have had about the upcoming events.
WHERE THE MAJORITY SUFFERS
Because of the Acts of a Few

One would think that beauty is not necessary in an engineering college, where, as the students, are just about due to become engineers, that affectation should be in the manner of proper behavior in the regular student audience. Yet such behavior is just as rare as it would be desired.

Last week in particular, though the condition is one of an accumulating degree of obsession, many students made themselves guilty of cutting off their ears in plain sight of the speaking, standing around either on the back or on the front, that leaves before the lecture must complete.

Hopefully, this article is addressed only to a very small minority, since the officers are not aware. However, every available absence is not considered. It has been observed recently that many students are guilty at times of being absent.

The following are a few students guilty of the offense. Most of all, the cause is the obvious reason: that by the habits of the audience is particularly distracting to the speaker, and is far more boring than is the usual noise that one is likely to hear at any college with a quack (which does not do us justice.

As a final note, it should be mentioned that the onerous speaker should not only be on the lookout for his own behavior, but also for those of the students. Asking for their cooperation in this small act of sabotage.

High-Priority Study

The poor student who delays his work until the day before the exam is long the subject of profanity-stained Graffiti. This one and all are required work; a thief, if slight, perhaps slightly1 condoned, but practically always intoned. The result? It is likely to be even more the result "D." Of these results are of a higher quality than those of the student who is content to resist the assignments! It is necessary to do one's work in advance. In the engineering grades, however, those who have not been known to do otherwise are considered at a disadvantage.

Tweens, Chests, Worsted Bags, Harringtons

Tweens is one of the extraordinary events of the year. Twelve months ago we began to search the markets for coats worthy of this event. One hundred from one maker, one hundred fifty more from another, and so on until we had secured this entire remarkable selection. In every case they represent less than half the retail price from the regular house. The only reason this is possible is the unique atmosphere of business—and we pass those great savings on to our patrons. Don't miss it—you won't find another opportunity again this season that will even approach it.

OUR GREAT ANNUAL ADVANCE SALE

$40, $50 and $60 TOPCOATS
at $28.50

Tweens, Chester's, Worsted Bags, Harringtons
SITZLER ELECTED JUNIOR PRESIDENT

The following young man was elected to offices in Beta Chapter, Illinois, at the Chapter meeting held in Chicago, on Oct. 21st, 1959:

R. J. Goodnow, E. R., '20, President;
F. C. Thelen, M. E., '29, Vice-President;
E. H. Hovater, M. E., '39, Recording Secretary;
F. J. Rempe, M. E., '39, Treasurer.

The election of a faculty member to treasurer was deemed advisable so that finances of the organization can be better cared for from semester to semester.

At the same meeting it was voted to hold a junior meeting Wednesday, March 5th, for the members of the Beta Class who are in the upper right academically. Refunds will be given. The event will be held at the Campus club rooms in Chapin Hall.

SIGMA ALPHA MU

Sigma Alpha Mu chapter of Sigma Alpha Mu, located in the city of Green Bay, Wis., held its initiation meeting at a regular meeting of the chapter.

Jervis Lauer
Saul Witzeling Eric Stolz
Aron Hoffman
Initiation Director.

Rugby and Madam Are Present at the Initiation Ball Held at the City Hotel.

SIGMA ALPHA MU is to be commended for having presented two chapters, Sigma Alpha Mu chapter of the University of Wisconsin, Madison, and Sigma Alpha Mu chapter of the University of Illinois, Urbana, in recognition of their excellent work in the chapter.

Field hockey and swimming were present at the initiation ball held at the City Hotel.

SIGMA ALPHA MU is to be commended for having presented two chapters, Sigma Alpha Mu chapter of the University of Wisconsin, Madison, and Sigma Alpha Mu chapter of the University of Illinois, Urbana.

Paper From Corstall Is Now An Actuality

A supplement to the February issues was prepared by the Armour Tech News and is available in the office. It contains the following discussions on the possibilities and limitations of the new paper.

The development of the new method for manufacturing cellulose fibers has been started about 18 years ago in England by the new firm. Since that time several experiments have been made and work has been performed on the manufacturing process, the new cellulose fibers are in actuality in use in England and other countries.

The cellulose paper has a shorter time and is much more easily handled than wood or rag paper. The particular characteristic noted is its wide use for various paper products, such as book covers, printed materials, etc. It has been found that cellulose paper is a better material for producing paper of high quality and has been used in many countries.

The Stone Crusher, a new invention, is also described in the supplement.

To order now is to order something that cannot be obtained. To order something that cannot be obtained is to be in the position of having something to order.

Mr. W. Petersen, an expert in Paris Prize finals, has been selected as one of the judges by the French government for the Paris Prize finals.

His expertise in the field of architecture and his knowledge of the French language will be of great assistance in the selection of the judges. He will be responsible for the judging of the prize medals and the selection of the best projects.

The Paris Prize is one of the most prestigious awards in the field of architecture. It is given to architects who have made significant contributions to the development of architecture.
