MAKING A SQUARE OF THE CIRCLE

The slipstick is a time-honored tool of the draftsman's art. It was the common practice to use the slipstick for most of the work in the art of drawing. The slipstick is a small, flat, rectangular piece of wood or metal, about 8 inches long and 2 inches wide. The slipstick is held in the left hand, and the pencil is held in the right hand. The slipstick is then laid on the paper, and the pencil is used to draw lines on the paper. The slipstick is used to draw straight lines, and it can also be used to draw curved lines. The slipstick is a very useful tool for the draftsman, and it is a tool that is still used today.
