Freshman frolic opens social season

New director to solve Armour Food problem

Welcome dance Saturday nite in Student Union

by Chet Sway

Administrating the orientation of freshmen and new students, the "Freshman Welcome" dance held on Saturday, October 10, in the Student Union will also inaugurate the social season. The oriental fresh will now be able to meet his fellow classmates in new circumstances. He will also find the upper-classmen wearing slacks, t-shirts, and the usual miniskirt with the same accessories as when they were freshmen. This is a great improvement since the miniskirt was introduced for the first time in college. The oriental freshman will now be able to meet his fellow classmates in new circumstances. He will also find the upper-classmen wearing slacks, t-shirts, and the usual miniskirt with the same accessories as when they were freshmen. This is a great improvement since the miniskirt was introduced for the first time in college.
Fraternities

Alpha Sigma Phi—

Alpha Sigma Phi announces the pledging of the following men: Bob McPherson, John Norton, Philip Jones, Lloyd Johnson, Jim Kennedy, Bob Bilek, Bob Kohn, Tom Anderson, Neil McCaffrey, Tom Kain, Ted Lauter, Tom Allen, Paterson, Ed Purcell, Neil Schmitt, Bob Kohn, Dick Schmitt, Dick Lauter, Dick Wagoner. The five pledged are scheduled to receive their final vows at the installation of the new lodge in Michigan. For more information, please contact the Chapter Advisor, who can be found on the University of Michigan campus.

Phi Kappa Kappa—

Phi Kappa Kappa is pleased to announce the following new members: Robert Martin, Mark Johnson, Brian Lee, and Daniel White. The chapter is located on the University of Michigan campus. For more information, please contact the Chapter Advisor, who can be found on the University of Michigan campus.

WSE plans assemblies

The Western Society of Engineers hosts a series of events on the Amous campus. It was established to promote inter-departmental and inter-campus collaboration, bringing together students from various professional societies located on campus. Members of the chapter are encouraged to participate in assemblies, which are held throughout the year. For more information, please contact the Chapter Advisor, who can be found on the University of Michigan campus.
Rules and Regulations for Student Union Building

I. Management

The Student Union Building shall be under the joint management of the Student Union Board and the Student Union Council. The building shall be open to members of the Student Union with proper identification. Visitors to the building shall be subject to the rules and regulations established by the Student Union Board and to the supervision of the Student Union Security Forces.

II. Hours

The Student Union Building will be open from 10:00 a.m. to midnight, Monday through Thursday, 10:00 a.m. to 11:00 p.m. on Friday, and 11:00 a.m. to 10:00 p.m. on Saturday and Sunday. No outside events are permitted in the Student Union Building during these hours.

III. The Dining Hall

1. The dining hall shall be used as a study area only after 5:00 p.m., and shall be closed to all visitors at that time.
2. Food and beverages shall not be brought into the dining hall.
3. Eating and drinking shall be prohibited in the hall.

IV. Study Hall and Auditorium

The study hall shall be open to all students and faculty for study and research purposes. No food or beverages shall be brought into the study hall.

V. Lounge

1. Smoking in the lounge shall be permitted, provided it is done in a non-smoking area. No food or beverages shall be brought into the lounge.
2. The lounge shall be open to all students and faculty.

VI. General

1. No pets shall be allowed in the Student Union Building.
2. The Student Union Board reserves the right to restrict the use of any part of the building in the event of overcrowding or other unusual circumstances.
3. The Student Union Board reserves the right to close the Student Union Building during any university holiday or during any emergency.

LOST AT LEWIS

TWO (2)

COWARDLY FEMININE
HOGHIDE HAND COVERS

Probably lost in Lewis Lounge or 7th floor corridor.

Since they were a graduation present, I value them highly and am offering a reward (in United States War Savings stamps, of course).

I would appreciate it if anyone finding my yellow pigskin gloves would return them to the business office.

J. R.

Like newspaper work? Are you insane? O.K.!

The Lewis staff of TECHNOLOGY NEWS has been severely depleted by the call of the armed services and graduation. As a result, there are several editorial positions unfilled in addition to the many reporters we haven't got. Can you write news stories, feature, or sports? No? Well, then you're eligible. Previous journalistic experience is not necessary since you would then have a style inferior to ours. If you were foolish enough to be a newspaperman or newspaperwoman, you are already insane and we won't have to waste time training you.

We also need an assistant circulation manager and an assistant business manager. Both positions require little time yet offer all the rewards given to other positions. Anyone even slightly interested in the innuendos of our column will find it worth their while to drop in at the publication meeting, 1:00 Wednesday, Room 302.

The Liberal arts staff is also urgently in need of reinforcement. This may be seen by the fact that not even the Lewis editor has been appointed yet. As it is nearly to appear early as a result of the accelerated war program, the situation is most serious. All aspiring editorial writers, reporters, photographers, and lay-out experts or novices are also requested to appear at the above mentioned meeting.

We realize as we've said before, that white space in newspapers is bad. We just didn't have enough reporters to cover the campus, and rather than use them inefficiently I'll fill this space. We're being honest and demonstrating the need for staff members shown as above.

Irving Kaluzna chosen as first Illinois Tech "Man of the Week"

Who is Irving Kaluzna? Well, that is why we picked him for the Personality of the Week. We want to introduce him. He is about five feet eleven inches tall with curly black hair. His build shows that he is well fed. His smiling face is bespectacled with glasses. He dresses just like the rest of us.

What is his claim to fame? He has two claims; one as president of the School of Music, the other as chairman of the Freshman Student Senate. In his activities as leader of these two organizations, he, along with other students, has been trying to uplift the society for the Advancement of Music. His Delta Delta Delta represents him as one of its officers, his ability in athletics is far exceeded by his whole-hearted support for the teams.

Architecturally brownstone, he is a few stories high or as beautiful or significant and gives ourselves that they must be the finest buildings. What's so hot about the Pantheon? Well, maybe it doesn't have too much detail, and maybe this is the most important thing of the Pantheon's construction, and maybe John Q. Shelled out more than he should. He built a church, and Shelled it out more than he should have.

What's so hot about the Pantheon? Well, maybe it doesn't have too much detail, and maybe this is the most important thing of the Pantheon's construction, and maybe John Q. Shelled out more than he should have. He built a church, and Shelled it out more than he should have.

Can you justify the Gothic cathedral's expense, multitudious decoration, and diminution of man? But mix with this the spiritual vibration, overwhelming transmission of weight from tall to terra firma, and one understands better and those factors win.

Again, try to knock the colonialist with their fame and brick, or the Queer farmer's showman. Comparatively speaking, their simplicity is a refined and craftsmanship would embarrass most of us.

And can't you imagine the delicacy and even the diestartling skewer of Sullivan's first expression of skeleton structure at that early time? Weren't the social and commercial artists put in place by Rood's.
The time has come again for this showl operator to commence uncovering some of the sidelights on activities on the south campus — a record breaking growth of business promises to make life more hectic than ever; Cooks of prize to Iris Kampe for the swell job in organizing the season aid. The students who have benefited from the program... The freshman dance on Oct. 10 promises to be one of the biggest and best ever given over there. There will be dancing in the lounge, auditorium, and cafeteria... Start the social season with a bang by collecting the first two weeks every time you see a card in the mail from your favorite society. The Sophomores have made the dance a success, and the Freshmen have contributed all they can to the success. The Freshmen and Sophomores have been working on the dance, with the result that the Sophomore dance is a success. The Freshmen and Sophomores have been working on the dance, with the result that the Sophomore dance is a success.
**Undefeated Civaero’s succumb to Mech no.1**

In a gallant, uphill battle a scrappy Mech 3-1 team emerged in an all summer softball fight for supremacy.

Despite a 2-1 game Civaero winning streak which landed the Civa on the top of the heap, the Mech 1 finally averted a second Mech crown in the battle for a chance to meet the Civaero, thus launched the favorites in the playoff to cap the title.

Facing a Civic squad which had encountered the best of the other departments, could muster over a period of ten defeatless weeks, the 1-3 Mech go to the Civic game. Mario “Racco” Silva for ten runs and victory.

Open touchball drive with fall tourney

Forty years ago this fall the Army and Navy touchball team were playing a tournament. The present tournament is named in their honor. The Touchball team has been named to represent the IIT. The tournament will be held in the Armory on Saturday, October 25 from 2pm to 3pm. The tournament will have three divisions: men's, women's, and coed. Each division will have six teams, and the tournament will be a round-robin format. The winners of each division will then compete in a playoff to determine the overall champion.

Armory for IIT physical training program sighted

Plans are now being formulated for the use of the IIT Armory for a physical training program to be installed this semester. The Armory has the potential for a winter practice session for the basketball team, with the addition of an indoor practice court for the tennis team. The Armory also has a large area for other activities such as weightlifting and physical education classes.

Divoteers to duck drives as Bibb opens fall meet

Lemme at and Grime do bow! I'm just doing some stuff! "I'm doing stuff." In a Sunday doubleheader, Northwest's Owls' Kick's winning footstool into the wing of things. Pete Zamolaski, chief dividend rider hard over the mound challenge to roses has received orders from internal interrupter Ken Jacob to "shoot the works" to make it the biggest and bestest tourney ever to take place in these pastures.

How YOU can help her speed vital war calls

When you're about to telephone, remember that the wires especially Long Distance circuits are better than ever before, with war calls. We can build new equipment to carry the load because the materials we need are going into ships and planes.

How to help: If you are unable to make calls, please keep your message as brief as possible and let the operator know. This will help us to make the best use of the circuits we have.

Plan to rope in brawny Techmen

Get in condition now. You had better stop those Santa Clausyns and mobiles. The time has come for those morning push-ups. In a short time, you who pride in your physical powers will have the opportunity to prove it. The occasion will be the intramural wrestling and field day competition. Winners of each weight class will receive medals.

Girls' sports under capable leadership

Of prime importance to the women's sports is Mrs. Olive H. Hazen, who, as in the past 23 years, director of that department again this year. Hazen's studies at Columbia College of Education, of which she is a graduate, Delcambre and St. Joseph's College, Flushing, N.Y. England and also the University of Chicago, she has been able to obtain information of interest to students at the various schools.

In addition to these studies, Miss Hazen has studied types of dances and modern dance techniques. She is also proficient in the use of the tape recorder. Her instructors in these courses have been such people as Dr. prenatal and Dr. Brandenburg.

Mrs. Hazen has been the director of the women's sports department at the University of Kansas since 1923. Prior to this she was in charge of recreational work at the Kansas City YMCA.
Yippee, one gal enrols at IIT

The technical nature of World War II is reflected at Illinois Institute of Technology, where an all-time record number of students are beginning classes in the fall term.

Although no girls are included among the freshman engineers, one woman is in the civil engineering department. She is Ellen Holmes, a sophomore transferred from Purdue University.

For the first day of appearance, registration total was 1430 under graduates. This is compared with a final registration figure of 1428 a year ago. Upper class registration, fall, was 90 below last year's final figure, but was expected to exceed that total by last week.

Engineering freshmen, meanwhile, have set a new record by 45 per cent—a total of 728 as compared with 500 last year, including cooperative students in both cases. Vice President L. E. Grindle described the new students saying that their decision to study engineering is "the greatest possible contribution to the service of your country."

The new freshmen included 180 men in the new 16-week course. In addition about 400 returning cooperative students were expected to register on October 5.

Vogtberg analyzes Argentine report

Argentina may prove to be a source of some of the critical chemicals needed by America's war effort. Director Harold Vogtberg of the Armour Research Foundation told today on the basis of a report from the Foundation's field party, now making an industrial survey of the South American nation.

At least four important chemical and mineral products—which are critical in the war effort and of which the United States has a definite shortage—have been studied by the party in Argentina and found to be present in practical quantities.

The one most important product found by the Foundation party in Argentina is copper, and it promises to be a help to the American war effort.

The study, however, has not gone far enough to reveal whether or not the Argentine deposits are of the long duration variety, which is desirable for most purposes. There is a very serious passage of workers in the United States, Foundation experts say.

From at least 11 countries and also include men from Canada, Chile, Germany, Italy, Norway, and Czechoslovakia.

Dr. Yellott lists senior women

Dr. John L. Yellott announced the new senior women in Mechanical Engineering.

They are:

175 women inspectors being trained at IIT

War training for women at Illinois Institute of Technology offers women a chance to serve the nation in the war effort. Among those being trained at the present time are 175 ordnance inspectors.

The ordnance training is for nine weeks. During this time, the women are employed by the Chicago Ordnance District and are trained by Illinois Tech. Every woman in Chicago who has a high school diploma can take the course and be paid for learning.

Faculty Briefs

Mr. O'Dowd was attending the University of Paris in Italy on behalf of the Institute of Technology's training program. Prepared to combat any and all types of accidents in explosives plants, seventy-four explosive safety experts are about to report to ordnance plants throughout the United States.

In addition, 132 supervisory workers were graduated from a special war-training course in industrial management for foremen.

INNOCK n.e. 1555

From the 11-year-old's bedside was somewhat tempered in his ramshackle needles under the guidance of his roofing contractor, who brought his patients to some of the medical centers for the army and navy schools. Among those being trained at the present time are 175 ordnance inspectors.

Mr. Taylor discussed the role of the government in the development of the Institute's new Technology Center. He also reported on the progress of the alumni fund campaign, which to date has raised $50,000 for the development fund.

IIT alumni bear report on "Technology Center"

Illinois Institute of Technology alumni in Cleveland, O., and Buffalo, N.Y., met last week to hear Bernard P. Taylor, assistant to President Heard, discuss the Institute's development program.

Mr. Taylor discussed the role which will play in the development of the Institute's new Technology Center. He also reported on the progress of the alumni fund campaign, which to date has raised $50,000 for the development fund.

IN THE AIR FORCE they say—

"DODO" for the new flying recruit

"KITE" for airplane

"HIT THE SILK" for taking to parachute

"CAMEL" for their favorite cigarette

With men in the Army, Navy, Marines, and Coast Guard, the favorite cigarette is Camel.

(Based on actual sales records in Post Exchanges and Canteens.)

CAMELS ARE ACES WITH ME. THEY HAVE THE MILDNESS I WANT—AND THEY DON'T TIRE MY TASTE. A CAMEL ALWAYS HITS THE SPOT WITH ME.

The "T-ZONE" where cigarettes are judged

The "T-ZONE"—Taste and Threat—is the proving ground for cigarettes. Only your taste and threat can decide which cigarettes you like. It's the best way to test cigarettes, and how it affects your throat. Each cigarette's taste and throat are independently evaluated. If you have a "T-ZONE" in your mouth, you are the one to try it first. Prove it for yourself.

In the Service

Camel
