March 13 sets 15th running of Tech Relays

Schommer's OK
Given After
Many Requests

Records from a possible showdown for the distinction by the regents of a number of major colleges and universities to hold the games despite apparent difficulties. This 43 Relays promises to be one of the major athletic attractions in the midwestern region this year, Preparations for the competition, to be held in the University of Chicago fieldhouse on Saturday, March 15, are already underway.

New Courses in Evening School

With the only program in the Chicago area offering a complete engineering curriculum in the evening and one with tremendous in-growth caused by the war, the War Manpower Commission has ascertained that the number of students is increasing. This is due to the opening of new courses and the establishment of new schools. The University of Illinois has announced that it will open a new school of engineering in the evening. The new school will be located in the University of Chicago building. The school will offer courses in electrical, mechanical, and civil engineering.

School undergoes inspection by Navy

V-1, V-2 eligible
for Navy training

The inspection was made by the U.S. Navy's Comstock, Metcalf and Lt. Parks, accompanied by Dean Poole, Mr. Horace Stogdill, director of the Research Foundation, and Mr. W. J. Spith, treasurer and business manager.

The inspection was made in conjunction with the recent appointment of a new director of Illinois Institute of Technology, the first director to be appointed by the University of Illinois. The new director, Mr. J. W. Stogdill, was formerly associated with the Armour Research Foundation.

Archs win award

Two IIT graduate students in architecture, George Lannon and George Story, recently won $500 by placing second in the nation-wide 1943 Point-Kennard design contest. Their prize-winning entry consisted of a design of a modern block of stone forms. In addition, the architectural firm of Harwood and Crossman, with building plans, won a cash prize in the competition.

IIT receives joint approval

Illinois Institute of Technology is one of the first 201 colleges named by the War Manpower Commission for utilization by the war and navy departments for specialized training of personnel.

The institute, the only college in the city of Chicago listed as eligible for joint approval, will be called Illinois Tech. The Department of the Navy was named for the research and training for which the school is utilized.

The 281 institutions were selected by a joint committee of the army and navy. The Illinois Tech was one of two schools in Illinois approved for the training of engineers.

Tech Time Table

Tuesday, February 16
5:00 p.m. - Commencement in their offices.
5:30 p.m. - Managing Board in Tech House room.
Wednesday, February 17
2:00 p.m. - IAS in Faculty Dining Hall.
5:00 p.m. - Dance Club election.
8:30 p.m. - ASME in room 300.
10:00 p.m. - ASME in room 200.

ITSA meets

The Illinois Tech Student Association will hold its annual meeting on Saturday, March 16, at 5:00 p.m. in the Faculty Grill. John Schaefer will preside over the business meeting. The election of officers, to be held on March 16, will be held in the Faculty Grill.
Past bureau aid dispels vital question
by Private Gordon Land

[Article text]

Professor Larkin appointed public member to War Labor Board
Professor John Day Larkin, chairman of the department of political and social science, has recently been appointed as a public member to the War Labor Board of Region A, comprising Illinois and six neighboring states. This board consists of representatives of labor and management and public members.

Since last September, Professor Larkin has been serving as a special advisor representative on the National War Labor Board in Washington, D.C. He has been especially interested in the Interstate Commerce and the CIIO, in addition to other interests. At present he is working on three cases involving the International Harvester Company.

Women invade drafting field

Women invaded another field that has heretofore been almost exclusively masculine, on Monday, February 8, when a war engineering program will be inaugurated by the first engineering class of the Illinois Institute of Technology.

This program will give women the opportunity to train in engineering techniques. The course, which extends over 40 hours, will last three semesters and will be so arranged that women may graduate at the end of their second and third semesters. High school graduates may apply for enrollment.

After one semester's study a woman should be able to do acceptable work in an engineering department or drafting office. This might include, tracing, drafting, and simple drawings. Acceptable work in elementary machine design should be accomplished by a woman finishing the second semester of training. A woman completing the third semester will be ready for employment in an engineering department or firm, and will be given the opportunity to be employed.

The following phrases taken from one of her books, with the proper gestures and inflections of voice, might be heard by some of Dr. Thompson's students: "Whereas the record of the sadly indigent, those great men whose royalties ineret..."

Advisor task successful

The advisor's role is an important one. He is the link between the student and the college. The advisor should be knowledgeable about the courses, programs, and opportunities available to the student. He should be able to provide guidance and support to the student in making decisions about their academic and career paths. The advisor should also be able to help the student stay on track and reach their goals.

Honor system

Activities of board reviewed

This column will come to you as a weekly analysis of the Honor System, together with some of the actions of the Honor Board. The aim and projects of the Board will also be reviewed.

At the present time there are six different students on the Board. They are: Laurence M. Reid, M.P.E.; Earl Miller, Ch. A. 3; Wilson Nash, C. C. E.; Tim O'Keefe, O. E.; Milton Metzker, O. E.; and Byron, M. E. 3. Dr. Elson and Mr. Robertson, faculty members, also serve on the board, but their tasks are merely advisory and they have no vote in the proceedings. Each member was recommended by his department chairman and elected to the Board by the voting members.

In the future the Board will be elected by the entire student body and an additional person, with similar responsibilities, will be appointed.

The cases reviewed here are published only to show how the board as been functioning. At no time will a review circle names involved, but rather truthfully state the facts and outline the procedure.

Two students were recently reported to the board for apparent cheating in a course exam. Both student and examination hot records were reviewed in each case. The fellows were then requested to appear before the board to explain their side of the situation. One of the fellows knew nothing about the incident, and was dismissed while another admitted that he had copied.

Through questioning, the board discovered that the student who admitted the guilt was working thirty hours a week in addition to taking full time work in school. The board suggested that he drop the outside work and offered to secure a student tutor to aid him in his studies.

The student took the advice and secured part time jobs around the school, but declined any other assistance, stating that he would not be able to spend more time on his studies. This student due to the hardship of earning money for school expenses was handicapped in his school work. Once the headache was alleviated, he continued his school work and obtained good grades. Thus the honor board has been an aid in helping a student on his way to becoming a good engineer.

The Honor System also serves as a good pre-engineering training. This is very important, for all of us will be leaving our country in the armed services. Most of us, because of our technical training, will be holding positions of responsibility. As an officer, a man must possess knowledge, gentleness, and tact, and is respected by his man. The knowledge, the man can obtain from his studies, his manners from here to tomorrow, and training and respect. He can only earn by being an honorable leader. A student should begin now while in school, to practice fulfilling these precepts of a good officer.
New Bacteriology at west campus

An accelerated program in Bacteriology and Food Technology came into effect February 8, 1943, at the West campus of IIT. This course is being offered because bacteriology is recognized by the War Manpower Commission as a critical occupation. Not only are the bacteriologists needed by the armed forces, industry, and in civilian service, but there is an increasing demand for trained food technologists after the war.

The work in the field of bacteriology consists of the use of bacteria, yeasts, and yeasts in the preparation of food products in the dairy, baking and meat packing industries, the analysis of foods for quality control, and the diagnosis of diseases by bacteriological examination.

In food technology, the test is the selection of the proper raw materials for the specific type of food product desired. Of the highest value are the methods of preservation of food by canning, dehydration, and freezing.

This course can be finished in two years and regular college credit will be given to any science student who may desire to take any of such courses. Detailed schedule of the subject can be obtained from the Biology Department.

Mr. Fox injured

Last Saturday afternoon, February 8, Mr. Fox, older in the louer's office of IIT, met with an accident. Mr. Fox was found at 33rd and Wentworth, lying on the pavement and unable to stand since he had torn the ligaments in his left leg and also his left arm. His rescuers were Ulysses Back, Charles Kill, Mr. Callahan, Sonny Weissman, and Mr. Bibb.

EE Department looks ahead

Staff gears itself to total war effort

by Nat Stein

Keeping abreast with the other departments in the present war effort, the Electrical engineering department has developed courses in several new fields. Accompanying these is intensified engineering, industrial electronics and telephone engineering courses, improvements in equipment and separation of laboratories. Laboratories at Lewis are being revamped, and a considerable amount of measuring and demonstrating equipment is being added for the illuminating engineering course. This program received cooperative course for those intending to do advanced work, is given in conjunction with the Chicago Lighting Institute and the Illuminating Engineering Society.

Half of the student's time will be spent at the Lewis Laboratories and half at the Chicago Lighting Institute. It is planned to extend the training offered in this field to provide one or more undergraduate and several graduate courses.

Industrial Electronics

Another important development is that of industrial electronics. According to Doctor Jules E. Heise, director of the Electrical Engineering Department, applications of the principles of electronics in industry will become increasingly important after the war. Included in the new equipment added to the present electronice laboratory are electronic welding, motor, and process controls, and power rectifiers. Training courses will be offered in this field as well as in telephone engineering, the instructor for the latter being a staff from the Bell Telephone Company.

Communications lab

The communications laboratory, established about a year ago at Lewis, has been expanding so rapidly that now they are considered to be one of the best laboratories in the country, with several hundred dollars worth of equipment. There are four laboratories for instruction, each capable of handling 125 men. The transmission laboratory has 15 commercial radio transmitters and an F.M. station in the process of being built. The television laboratory is in the research and development laboratory.

The S.M.W.T. has also expanded with 18 courses in electricity and radio engineering along with evening courses being offered to the 1000 that required. A signal corps teachers staff of 160 men has taught the 400 men in the enlisted Army Radio Operator school, the 750 men in the Reserve Advanced Electronics school, and the 150 men in the Reserve's ultra-high frequency school.

The men behind it

The staff of the electrical engineering department has contributed generously toward the success it now enjoys. Its directors, Dr. Hobson, is one of the youngest men in charge of a department at the school. He is aided by Mr. Freeman, Dr. Koch, Professor Manning, Professor Nash, Mr. Roy, Dr. Higgin, Mr. Schulz, and Mr. Anderson.

Their assistants are Messrs. McEleney, Bence, Table, Messinger, and Pollock.

You too!

Here are some of the new jobs, the electron microscope, or the ultra-modern dressing room in the Research Foundation's laboratory. Technicians of TECHNOLOGY NEWS have seen all of these in operation. They have come into contact with the faculty, industrial engineers, and outstanding personalities on the IIT campus.

At the present time TECHNOLOGY NEWS is a major item and outstanding reports to its present staff. Any student interested in becoming a writer should get in touch with the News Editor and place in the assignment box on the first floor of Illinois Hall.
The Third Front

STEAM SHOVEL

Reports chairman Moore of the coop dance by far the most successful of the season and a large capacity crowd was evident of its good work. Among the notable farm students present were James Davis, Casey Phillips, and his wife, Warren Moore and Margaret Harman, Art Davis and Mary Harman, Phil Nicholas, Piers Fogg, Peter Milamov and Anise Mary Filipich, Jackson Byars and Jerry Dillon and unidentified thousands in the walls of the dance... Important development is Alford Hurley getting married to the former Rose Shivers. The Steam Shovels report that the usual bridal party sponsored by this column must be postponed till after the war, Jackson Byars, prominent athlete and socialite, and Jerry Dillon always found at all social events that conventional dark corner in which to pledge their mutual love. Their oft-cited marriage plans nearly caused Jackson's demise. Though it's sad to relate this, it seems that the dance may be the fast school affair for many a student with the army calling into active duty many of the resources.

A wicked triangle has developed... Ralph, the dashin' back store clerk, has been lizened by students of other departments. In many cases, junior had been elected in the day designated for them and had found that junior classes were filled and closed by lower classes. This condition brings up another suggestion...

The registration should begin with upper classes and work to the lower classes. Students have found that subjects that they needed to graduate were closed due to inadequate enrollment. Example of this are such courses as Welding and Constitutional Law...

There are also causes of instruction who, having expected twenty of thirty students in a class were amazed to find their classrooms empty. Obviously something is wrong. What it can be is not easy to say, but this cannot go on this way. Some system must be established so that registration will not be the test and torture it has been in the past...

Blitzkrieg

Avoid the blitzkrieg and the cold, wet, and the strenuous blow of the bus. The only thing that will make any difference in the situation of the hippie is if a column can be written making it a reality. The future of the hippie... The War of the Cities...

Schorr's Department...
Why Can't You Be Superman?
by E. James Haggart, Sr., '42

That's what I say, why can't you be Superman? Just because you don't look like the Cret Kent when you're out in character, don't give up. Don't worry if you don't have that same sort of super suit like Superman would. His suit probably isn't made by the same union anyway. I don't care if you are not a member of any super society. It is because you are looking for yourself. Honest and truly, have you ever tried walking through a brick wall? Why not try it yourself if Superman can? I can, and you will be surprised at the result. I've tried it and I was surprised to see if I could make a hole in the brick and then try it again. I discovered that it is possible to have a hole in a brick or cement wall and still walk through it. You can tell me I was just joking, but I think you should try it yourself.

Superman flies, birds fly and so can you. You don't have to be a big star to fly. I do and I haven't been able to fly as yet. I started jumping off a first story window of some building the ground around me gave me some extra time and warm to think. I then, after jumping off the second story window into the first floor window of my room. I did not fly. I had two or three times but I was embedded in the ground and a foot and half deeper than before. My falls told the man who came to my room and found me unconscious that I had fallen into the basement. The front yard that he could see there was a piece of time and money if he could dig four feet under the ground. The front yard was dug and I was brought there. Though, and I spent much more time in the hospital telling how I jumped and who did it. I'm glad your customer looked so pleased, said the sales girl to the woman. "What did you want to see?" "No, of course not."

A tourist stepped in front of a little country store, Dunbar was the name of the store, the name of the street, the name of the town. Satisfied. Funeral services. Life preserver, artificial and real.

"Bill Father's Son"

I didn't mean it. My shoes in hand, just as the right wings- And my dad, fear stops above. Doing the same thing.

"Young Husband (kindly) "My baby can see the sky."

"Bacheler. Miss can see sugar daddy."

"Oh, I think you see it."

"Lady. Do you think these children?"

"Yes, madam, we make a specialty of children."

"Lady. How much do you charge?"

"Only $1 a day."

"Well, I shall have to see you later. I only have eleven children."

"Just a minute, you see it."

"And when I start telling them why I got to be so late."

"Just a minute, you see it."

"And the best ways of all go to Chapel Hall."

"I love you, dear.

"Pete "Fisher Twins": Minneapolis

"Queenie Davidson and A. Ballenger, 2A, have been identified for the Army Air Forces. Bill Smith, a former 2A star athlete, is completing his course in the Navy Air Training program. The 2A crowds will be heard at the Army Air Forces."
Greeks

PHI KAPPA PHI

The past week and an informal party was held at the Phi Kappa Phi house to acquire the new rush in the fall of the social season. Instead of Jack Bostrom and Bob Michels, both the right types of members, it was necessary to have a pledge reside with the latter two, so they went to meet their girls. The new pledges were selected and initiated into the fraternity. The formal initiation was held Sunday, February 7th at the Lake Shore Club. We didn't find the wash basin.

PI KAPPA PHI

Following a week of recruiting activities, four pledges, who have weathered the storm, will enter the fold of the Pi Kappa Phi fraternity. Jim Stach, Gorden Sommer, Robert Combs and Harold Cunyn were formally initiated in the Pi Kappa Phi fraternity last Sunday, February 14th.

ALPHA SIGMA PHI

With the boys all back to work again on their 32nd street and everything is fine at the Alpha Sigma Phi house despite the mess in programs.

Ronnie Lind, the steward, seems to be bearing up in a visit to Bigger and John Palla after a few famous trips to Iowa State. They are working to be called to the armed forces.

A regular house dance is to be scheduled for Saturday, February 20th.

RHODES RHO

Surviving the rigors of the informal initiation, the following men were formally initiated into the Rhodes Rho, February 9th: Marvin Gehr, Arden Hambry, Leland, Eliz. and Fred Kiley, Ted Kiley, Morris Shapiro, Robert Nettelfield, Ed Ruby, Kenneth Epstein. The highlight of the evening was the singing address by one of our alumni, Martin Feinberg. To celebrate such an auspicious occasion the treasury was plundered and all of the men were treated refreshments.

The closing of the winter term was a great party at the Sovereign Hotel.

ALPHA SIGMA PHI

Well, the boys are back on busy working here at 32nd street and everything is fine at the Alpha Sigma Phi house despite the mess in programs.

Ronnie Lind, the steward, seems to be bearing up in a visit to Bigger and John Palla after a few famous trips to Iowa State. They are working to be called to the armed forces.

MUSICIANS PERFORM AT GOODMAN CONCERT

The III musical clubs held their ninth annual concert on Thursday evening, Feb. 4, at the Goodman Theater. The men, club's chorus, the mixed choirs of more than 100 voices, and a 60-piece orchestra, took part in the program consisting of both classical and semi-classical music.

A military marching song, "From the Four Ways We're Coming," written by Gordon Ewing, the director of the club, was a feature of the program.

Also highlighted the musical performances were brilliant lighting effects. A hobby of Director Ewing, these are to be a distinguishing feature of the concerts.

FACULTY BRIEFS

Professor Walter H. Higginbottom, recently elected president of the University of Chicago, is the University of Chicago.

Professor William W. Curt of the Physics department, is new in that capacity.

Other officers elected for the faculty clubs are: first vice president, William Handley; second vice president, R. C. Kinser; secretary, Samuel F. Bixby; and treasurer, C. O. Morris.

Doctor Ford, chairman of the Department of Mathematics at III, will speak before the Junior Mathematics Club at the University of Chicago on Tuesday, February 23, at 4:30 p.m. The subject is the subject of the address will be "The Art of Mathematics.

A baby boy came to the home of Mr. and Mrs. K. O. Loving on February 2, 1943.

A baby boy came to the home of Mr. and Mrs. K. O. Loving on February 2, 1943.

ACPE routed by techhawk quintet, 84-47
Tankers clash North Central
Midsummer production has dealt the swimming team a beating earlier in the season by taking from them Larry Rademaker, their captain. Rademaker had taken the team to its most successful campaign in its history when only two meets were lost last season. The winners are also now without the services of manager Jerry Ryan due to the departure of his normal duties. Jim McMenamy, the team's third-year point man, has been named captain to succeed Rademaker. No new manager has been found as yet.
The team went into a meet with North Central last Saturday with a record of three victories as against one defeat. The meet was held at the Loyalty Pool on the University of Chicago campus. Results of the meet were not known at the time that the issue went to press. A complete summary will be given next week.
Saturday the team will journey to Lawrence College in Wisconsin in an attempt to quench the Tech squad for the second time this season. If the team can contain all its present pace it may well surpass last year's record.

Largest score chalked up by techmen
by Mary Larson
Illinois Tech's hardwood artists scored their eighth win in fourteen starts by overwhelming American College of Physical Education 58-47 on Tech's home court. The game marked the fourth straight triumph for the Tech quintet and maintained their record of not having been beaten on the home floor this season.

Freshmen
Carl Bergstrom-up and coming freshman was high scorer for the Hounds, getting 19 points. He was followed closely by Bill Smart who scored 18 points. The game marked Bill's last for his alma mater; he leaves for the open air this week. Leading scorer of the contest was Nick Beaghey of ACPE. Nick got 21 points for an evening's effort.

Basket per minute
Basket per minute Tech has taken some energy tablets and then red fire works started. The Tech team was able to come out on top of the competition due to the efforts of its consistent teamwork. The forwards were able to establish their position and move the ball about with great efficiency.

Tech Hawk Talk
by Barbas
High Kickers survive the odds of extra time and the nation's challenge, now truly to continue giving you the latest inside dope of Sports and the campus.
During Registration week the annual Father and Son Athletics' Honor Banquet was held. This affair, sponsored by the ITSA, featured the presentation of the highest Tech athletic award, the Scarlet & Gray baton to fifteen graduating seniors and a speech by Lieutenant Dave Zink, member of the Navy who later starred for Ball State. Banquets were presented to the men who won the major athletic awards in their four years of competition.
A hearty lot of new freshmen have just entered the portals of this institution. Many of you have won letters in your favorite sports during your high school career. We congratulate you but we wish you'd won them on our campus. Honor roll, the honor roll of Tech sports, is filled with the names of all letter winners who did not attend Illinois Tech. We'd like to see you on our campus. If you win a letter in your first year, chances are you may win one here. Try out for your sport and in a short time you too may display the proud colors of IIT.

This invitation to participate in sports goes also to those who have earned athletic awards before. You too may try for all varsity sports on the campus. You will find that all are treated with equality and probity and none, we do not have professional athletes. Sports here at Tech are really for the development of the body and mind and not for monetary purposes.

Wizards intramural basketball champs
Just after the last semester ended the final of the intramural basketball tournament was played off. Featured in this game were the 58 Coops and the Cocoa Wizards. Both undefeated and both boasting high-scoring machinations.

The Coops had defeated the Cocoa Wizards in the final game by a twenty point margin and were looking on as the amazing freshmen took court.
During the first half of the game the defense of both teams held the scoring down to a minimum. The Coops, captained by Charles McCullough, and Andy Winterwater defended the Wizards basket for points and, at the half-time led by a score of 15 to 12.
In the second half the Coops put up a grand fight but lost started the second half and were already down, they then, their superior height and speed the Wizards gradually pulled ahead. In the last half of the game Carl Bergstrom and Jim Olds did a dual job of controlling the boards and keeping the ball in the air. Vince Houghton, Tom Krizan, and Charles Buckley produced the speed to combine with the height and this combination overwhelmed the Coops defense.
The winning team was a diabolically effective team with a mix of sharp shooting and defense. They scored at thirty-nine points in the second half and were the only team to have scored 44 to 27 in favor of the Wizards.
High point honors went to Charles Buckley with thirteen points. Charles McCullough and Tom Krizan were tied for second place with 12 points each.
Intramural bowlers to roll soon

Because of the confusion and extra duties entailed in starting a new semester, the deadline for entries in the intramural bowling tournament has been advanced to Tuesday, February 16.

The team shall consist of six men. Each department in each year is allowed to submit one team. Freshmen are not limited in the number of their teams, nor are they required to form their team from one department.

Captains of the bowling teams will meet Thursday, February 18, at 5 o'clock in room 202 Main. The purpose of this meeting will be to discuss the rules of the tournament in order to prevent future misunderstandings.

The matches will be held at the Wicker Avenue alley, fifty-fifth street and a half block west of Halsted street. The charge for a three-game series is fifty-four cents.

Next week's TECHNOLOGY NEWS.

PHYSICAL EDUCATION

A revived and improved physical education program involving both freshmen and seniors has been advanced to Tuesday, February 16.

The team shall consist of six men. Each department in each year is allowed to submit one team. Freshmen are not limited in the number of their teams, nor are they required to form their team from one department.

Captains of the bowling teams will meet Thursday, February 18, at 5 o'clock in room 202 Main. The purpose of this meeting will be to discuss the rules of the tournament in order to prevent future misunderstandings.

The matches will be held at the Wicker Avenue alley, fifty-fifth street and a half block west of Halsted street. The charge for a three-game series is fifty-four cents.

Hawk squads start training

Spring being just around the corner, sports fans are beginning to look forward to the coming of the Intramural and baseball campaigns. Both of these hawk squads have already made their plans for the coming season.

The track team, captained by Ed Johnson, began practice this week at the Armory. With only a little over a month to prepare for the coming Intramural season, the team is facing a rigorous practice schedule. There are several promising new men out for this year's squad and these men along with the returning letter men should make a good showing at the Armory.

The new manager for the team is John Steinmetzer and any man interested in trying out for the team should see him anytime between 3 and 6 at the Armory.

On the baseball front, it has been announced by manager Millie Cotts that there will be a meeting held on March 1. Watch bulletin boards for details. Due to the early graduation there are many positions open this year.

Men out for the team will be expected to practice three times weekly and to bring their own equipment. So dig out your paraphernalia, follow the news and get ready for another exciting season!}
