Now is the Time

Each semester a department brings the attention of the faculty and students to various organizations on the campus. Explanations were made and remedies suggested as to how these organizations could be lifted from the state of lethargy in which we now find them.

November 7 marked the beginning of a new term at IIT. We have turned over another leaf to a clean fresh page. Why can't our organizations make the most of this opportunity for a renaissance of student activities? It can be brought about by the organizations through elections, the selection of interested faculty advisors and by a2 following appealing programs in which all members can take an interest and participate.

When electing officers, serious consideration should be given to a man's ability. Is he willing to devote his energies to that office? Many haven't the ability to lead, or the time to give. Then there is also that person who gladly takes on offices merely to have a large black space under his name in the Integral. Can he best serve a club as an officer?

How has the faculty advisor participated in the activities? Does he come to the meetings? He may be unable to attend always, but has he made his presence known to the people for his advice? Does he suggest to his advisors if he is the one interested in the organizations? Can he give the time that its sponsorship requires? If not, he should be asked to leave.

Remember that the man must be given a chance. If his every act is construed as an attempt to curtail student privileges, or with the suspicion that the man is trying to be a dictator, cooperation can never be brought about. If he is to be condemned or crucified, his time would be wasted. But, if he can prove in practice, he should not be tolerated.

After selecting the officers and faculty advisor, a program should be mapped out whereby the efforts of the club can be directed along channels of benefit to the club and in which every member can take pride. The club should also remember that its function is not merely to provide recreation for its members. It also has a responsibility in the development of the student's personality.

The easy way out, of using the war as an excuse for non-attendance is over. We are still on a 16 week basis and if an active interest cannot be maintained, that activity should be abandoned.

The time has come when our organizations must be considered as standing at the fork of two roads. The road to success can be taken so long as they have in the past, or they can start anew towards a healthy active group. The decision lies with them, and they can make it now.
By beating the New Jersey Huguenot machine in the senatorial race last fall, Senator Hawes, Lewis H. Ray, caused nationwide speculation as to whether he would take the power of the Huguenot machine and not the power of the Huguenot machine was declining. He resigned the National War Labor Board at that time to enter the political fray in New Jersey.

The New Jersey Huguenot machine has been taken over by the chairman of the New Jersey Republican State Committee, who was made head of the Huguenot machine in New Jersey.

By Senator Hawes, the Huguenot machine has been taken over by the chairman of the New Jersey Republican State Committee, who was made head of the Huguenot machine in New Jersey.

The New Jersey Huguenot machine has been taken over by the chairman of the New Jersey Republican State Committee, who was made head of the Huguenot machine in New Jersey.

Thus far, the Huguenot machine has been taken over by the chairman of the New Jersey Republican State Committee, who was made head of the Huguenot machine in New Jersey.

\[ \text{Such is Life} \]

Bowing through the archives the other day, we ran across the following item appearing in a 1977 edition of the old Alumnae Yearbook:

"Bald and beakless, a bird is an ugly creature, with the brain of a person who has been on an energy diet for the past three weeks."

From this we can assume that the bird in question was a bald eagle, as bald eagles are known for their distinctive beak.

Such a magnificent sight is not common, however, and the benefit of those who are balding are happy to have such a creature as this.

But then, as the old saying goes, 'A bird in the hand is worth two in the bush.'

\[ \text{Other Campuses} \]

By Burt Frier

Twenty-six students at New Jersey College for Women in New Brunswick, N.J., are now taking a two-week motor mechanics course. Those who successfully complete the course will be eligible to sign up in the April 25 Motor Car Club at New Brunswick. The girls will learn how to clean and adjust a car's engine, as well as how to change the oil, and to handle any emergency that may arise while driving.

No girl has ever taken a motor mechanics course, as the only girls who have taken such a course are in the men's department, and not in the women's department.

The recent and honorable tradition of the Huguenot machine was observed last Friday by students at Vassar College. The tradition is that all persons attending one another on any occasion give each other a happy greeting. A bright smile, a hearty laugh, and a warm handshake are the usual greetings.

In the state of the Huguenot machine, the procedure is to give a happy greeting. The fact that the machine is made up of a group of people who are always happy makes the tradition a success.

On the East Coast, the tradition is that all persons attending one another on any occasion give each other a happy greeting. A bright smile, a hearty laugh, and a warm handshake are the usual greetings.

\[ \text{Research Report: Secrets of Molecules Delved into by Cleveland and Murray} \]

\[ \text{Diagram of the molecule} \]

The diagram of the molecule shows the various parts of the molecule and how they are connected. The diagram also shows the different types of atoms that make up the molecule.

The molecule is made up of a combination of two types of atoms. The first type is hydrogen, which is the most common type of atom in the universe. The other type is carbon, which is also present in the molecule.

In this case, the molecule is made up of two types of carbon atoms. The first type is a carbon atom with one hydrogen atom, and the second type is a carbon atom with two hydrogen atoms.

From this diagram, we can see that the molecule is made up of a series of hydrogen and carbon atoms. The hydrogen atoms are connected to the carbon atoms in a specific pattern, which is shown in the diagram.

This diagram is a useful tool for understanding the structure of the molecule. It helps us to see how the different parts of the molecule are connected and how they function together.
**Two Illinois Tech Coaches**

**Three Coaches Now Handle Varsity Athletic Program Here**

Here is a new summer and a new sports staff takes over. O. U. Gammon goes without appointment, but he gave me a man and a man with the picture. As yet there are no games scheduled, but the team generally plays the schools of Chicago, Evanston, and Evanston.

In contrast to last season's success, this season will be a full schedule of varsity and interscholastic sports. In the fall the Manitowoc Invitational Meet and the state championship meet are the major events.

Each member of the team is expected to participate in at least one event, and all members are encouraged to try out for a varsity position.

Dr. Hobson to Speak to Wisconsin Utilities Assn.

Before the Wisconsin Utilities Association meeting in Milwaukee, Wisconsin, Dr. Robert H. Hobson will address the group on the need for a new, more efficient system of electrical distribution. Hobson's presentation is expected to highlight the importance of modernizing the electrical grid to meet the growing demand for energy.

New Gym for Cagers Found

Boys' Club to Be Used For Four Sports Here

A new Dall house has been obtained for Illinois Tech, housing the basketball coach, and John A. Bruno, manager of athletics. The facility is now being used by the Boys' Club, and is located in 43rd St. and Roosevelt Rd.

The use of the gym is for boys' basketball and track meets, which are scheduled for the spring season. All games and matches must be notified to the Manager of Athletics, and must be in accordance with the rules of the Illinois High School Association.

The building also has a swimming pool.

Rho Dels in Lead In Touchball Race

Rho Dels Rho fraternity football team moved into first place by defeating the basketball team, 53-28. Previously the Pi Kappa had been leading the league.

Rho Delta Rho has now more fans. They play if you want them to play and they play if you don't want them to play. You may or may not do it for the first time, consisting of Rho Delta, Phi Delta, and Sigma Chi.

The Alpha Chi, who are the present change, look to Pi Kappa to stay in second place after the move of 1.5 to 1.
Services of IIT Date Bureau Now Available to Students

Swan and Pilat Outline Dating Procedure; More Than 300 Girls Listed at Present Time

The IIT's official date bureau, was brought before the public last Monday when John Craigie featured the Link's potential services in his column "Hole-in-the-Day" in the Chicago Daily News.

While the Link is a very real thing to its clientele, Swain, and co-publicist, Pilat, it has not yet become known to the entire campus, although its entire student body is made up to be interested. Some students have gained the impression that many were the only participants.

Over three hundred girls have been placed on the "availability" list, and more and more names are being added every day, as an unusual number was received following the Daily News publicity.

The office of the Link is in Room 212 in the old Chippie Hall. The office will be open during the following hours:

Mon. 2:30-4:30
Tues. 2:30-4:30
Wed. 2:30-4:30
Thurs. 2:30-4:30
Fri. 2:30-4:30

The procedure for obtaining a date is as follows: the names on the list of prospective dates must be obtained at the Link desk in order to have cards mailed to them. An application may be obtained at the Link office, both in the bookroom and at the Link office, and must be signed by the girl.

Over 150 girls have been placed on the "availability" list, and more and more names are being added every day, as an unusual number was received following the Daily News publicity.

Tech News to Hold Phenotten Contest

Phenotten is Popular Craze On IIT Campus

Contest Entries to be Judged on Originality By Managing Board

A phenomenon contest, to be conducted by Technology News, starts on Thursday and is to be a test of originality. The contest is to be open to all students of the IIT campus.

A phenotten is described as a quick mind or a knack for solving problems in a creative manner. The contest entries will be evaluated based on the originality and ingenuity displayed in solving the problems presented.

A winner will be selected each week, and the winner will receive a prize for their original solution. The contest is open to all students, and entries may be submitted anonymously.

Boder Directs IIT Code Class

Students in the International Morse Code class are now available here for the first time to all students. The course is taught by Mr. Boder, and it is designed to teach Morse code to all interested students. The class meets on Wednesdays and Fridays during the regular school hours.

Armour Eye To Elect Officers

Armour Ys will hold an election of officers at its next meeting on Friday, November 12th at 5:30 p.m. The election will be held in the Great Hall of the IIT campus. The new officers will be elected by a show of hands vote.
