Schoen has Juice Box for Student Union
Alumni to Contribute $100 Toward Cost IF ITSA Will Match Gift
Illinois Tech alumni will give $100 toward the student union's total gift. John S. Schoenhammer announced today that this gift will be made in the condition that the student body matches it dollar for dollar, Alumni President George W. Van Gierse presented Schoenhammer with a check for $100. Schoenhammer will ask the ITSA to appropriate the student share at the meeting Tuesday. The check was discovered by Mr. Schoenhammer, who prepared the plan to Van Gierse. The gift will be used as the alumni contribution is matched.

Early this year, the ITSA approved a similar plan to purchase couches, which were purchased with the aid of matching funds from the National Science Foundation. According to Van Gierse, the student body was given a one-month period to purchase the couches.

Dance Club First to Reorganize: Weekly Socials to Be Featured
Complete reorganization of the Dance Club has proved successful, Dr. Tom Dredal, president of the lnterclub Council, reported Wednesday. Twenty-five officers emerged the first meeting of the new season.

Affirming their policy completely on the expansion of the Dance Club, the newly elected officers are expected to attend the meeting Tuesday. The officers are: James C. Oceull, secretary; Thomas W. Osborn, treasurer; and Robert D. Johnson, vice-president. Under the present organization, enough young people are being accepted to take care of the anticipated number of members who will attend. Attendance was estimated at 500 to 1000 members each Wednesday. Last week, the attendance continued until 3:30 a.m. and ended the only business of the evening being the election of new officers.

Christmas Vacation is Still Scheduled
The vacation has been scheduled for December 25, and the meeting will be resumed on January 2.

The Weather is Your Money
A student fraction has been organized to protest against the IIT Student Activity Fee. This student has been taken because many of the items which constitute this fee are believed to be unfairly placed upon the student body in the form of burdens they should not rightfully be compelled to assume.

They are planning to calculate the fees collected in the ITSA meeting Tuesday, at which they are going to ask that the fee be abolished.

The protest is a large majority of the large group of men to pay that fee again this semester was in any way responsible for this action, we are thankful to them not only for recognizing that their money was not being used entirely to promote their welfare, but for bringing the question “What is our money being used for?” to the remainder of the student body.

This is a question that should have been asked a long time ago.

We do not think the present condition could have continued indefinitely. But the fact that the navy men should cause so much to be paid for is just half of the situation. The remainder of the student body had been made aware of this for a number of years, was a valuable stimulus in arousing the rest of us to action.

Before this group demands a complete abolition, however, it would not be a wise course to fire the ITSA budget, decide which expenses should be their responsibility in all fairness, and then ask for a revision of the current fees only. Certainly it is fair for the student body to maintain the institute's athletic facilities and coaches, to build tennis courts, and also has already been suggested. But other expenses, such as lunch, should be considered. It is not the same reason that he refuses to assume those not responsible to him.

Nevertheless, it should also be remembered that most of these costs are fixed costs, and the students' share should be proportioned according to the enrollment.

We ask this present group to consider these things, and also to consider carefully the financial proposal that will be presented at the ITSA meeting Tuesday, before it acts further.
One School or Two?

Lewis and Armour merged in 1940 to form the Illinois Institute of Technology, but they have been managed, in many instances, as two separate schools. Three years after the union a student can enroll at both Lewis and Armour, at a cost of $1,000 per semester hour, or he has the alternative of paying a straight $150 per semester fee. Which fee is paid is determined by the number of credits hours carried by the student, or the course followed, but rather by which campus he attends.

The bulletin lists separate courses (one being identical; yet an Illinois Tech degree earned at Madison and Damen streets costs $1,800 in tuition fees, while the same degree earned at 33rd and Federal streets costs $1,800. How can any college charge two different prices for the same degree covering the same work at the same time?

It appears that the administration should adopt one consistent policy in dealing with the two campuses, and the tuition charged be a good price in which to begin.

W. BURKHART

Your Duty and Your Privilege

Will you save a man from death?

The arrival of the Mobile Blood Unit on November 21 did not escape the attention of many students. The Red Cross is asking for only twenty minutes of your time and one pint of blood.

As stated by Lt. Commander James W. Rehn, medical officer of the V-1 unit, the body can function, without ill-effect, even after a quart of blood is taken. He also stated that wounded men die from the lack of it.

The chimney, to the rear of the catalog and many units have given their full approval to these services who wish to donate. There is, then, no plausible reason why every student and member of the faculty cannot sign a donation card. While only 500 are needed for the arrival of the Mobile Unit, why should not 1,500 sign?

During the last drive, 67 per cent of the army and 46 per cent of the army students gave blood. The civilians lagged behind with only 40 per cent.

The students and faculty at Lewis are a part of Illinois Tech and their representation should show that they are not a展览 campus.

The fact that those at Lewis will have to on the Armour campus to donate should not have any effect on their willingness to co-operate. The short trip is a small request from a wounded soldier.

—H. BURKHART

Must It Come to This?

FROM OUR READERS

Dear Editor:

Since its inception on the 11th floor and the same subject of much discussion, one of the questions that has been posed is: Should students sign the pledge?

However, at this time, there are no instructions on the campus who are not only willing to sign the pledge, but who, according to the rules, are required to sign it.

The students who have come out to sign the pledge will be forced to choose a name amongst the hundreds of the grade, and the name will be kept confidential. The pledge is to be signed by the students in the grade, and the name will be kept confidential.

The name of the grade will be kept confidential. The grade will be kept confidential.

D.E.A.

Dear Editor:

Is there any association with bad

Just because women are women in the Illinois Tech campus, is that any reason for them to be treated coarsely by some of the students?

There are probably only 150 women, including the secretaries, on the Armour campus, and it doesn’t seem that it should be so difficult for women to serve a few of the basic rules of etiquette for doing so.

Your obedient servant,

J. H.

Dear Editor:

Last week we had the foresighted visit of the Red Cross Mobile Unit.

What does the War Council intend to do before the New Year's visit?

Will they send an absolute demand for all the available applicators and ask that the students sign up for the meetings? We do not want our names even more than we are able to direct the activities of a group of young boys and teach them the lore of life.

During those days when he was studying at Elmhurst College, he was a business manager of the school's yearbook. He also held a similar position while at Proviso High.

When he finished his undergraduate work here, Ken intends to enter the industrial field. His spare time, however, will be directed toward obtaining a master's degree in electrical engineering.
Edgewater Beach Gives Special Rights to Civilians

Clarence W. Foster, A. '16, was assistant coordinator of the Tennessee Valley Authority at Knoxville, Tenn., television coordinator of N.B.C., and a regional coordinator of defense housing before he took on his present position: chief of the chemists and drug services of the Price Division, Price Administration, Executive Office of the President, Office of Emergency Management.

Franklin F. Adams, noted economist and "Information Please" expert, graduated from the Armour Scientific Academy with a straight "A" average.

--- IT ---

When William F. Shinn, A. '71, retired as chief electrical engineer of Commonwealth Edison Co. last August, George M. Armacost, "A. '41, was appointed to succeed him.

The title of Knight of St. Patrick, Summit Corn, Iowa, is carried by Alfredon, M. L. Baer, '05. He was given the title in honor of his brother, John Patrick of Missouri. (St. Patrick is the patron saint of engineers since he made the first "worm-drown").

Such Is Life

It is likely the liberal artists have to work for a living from here on in, Emily Pinkard left her home and the idea that the modern girl is not expected to be any different than the modern man. It seems that many women are expected to be as stylish and as well-dressed as the men they work with. The new trend is to see women in suits and ties and to expect them to be as fashionable as the men they work with.

--- IT ---

In the past, the popularity of ballet had declined, but now there is a resurgence of interest in the form. The ballet is being performed in theaters across the country, and there is a growing audience for this traditional art form.

Purification of Sea Water Is Aim of Senior Chemical Project

Preparing fresh water for battleships is the project undertaken by Charles A. F. and Blanche Hooper. Selecting this problem for their thesis, the Wihtoe Hooper will attempt to desalinate sea water from the sea to produce fresh water necessary for drinking and steam generating purposes.

They propose to do this by passing the sea water through a column packed with stones. These stones have a selective action on either the sodium chloride or magnesium chloride, depending on the selection made by the student. The first filter will remove the sodium chloride, while the second will remove the magnesium chloride.

By recirculating the water, or by using the evaporation method of salt, it is possible to make fresh water. This procedure has been used before to remove magnesium chloride from solution, but this is the first application with results.

Dr. Joseph B. Block of the chemistry department is using his students to carry out experiments which will help determine the best method of producing fresh water. This project is being supervised by Peter Brown, a graduate student.

Dr. Block believes that his students will be able to produce fresh water in a practical manner.

The actual procedure of the students is determined by their work under Dr. Block's direction.

The men's basketball team has qualified for the NCAA championship game. The team played a tough game against their opponents, and their perseverance paid off in the end.

Students at the University of Illinois, Urbana-Champaign, are being given the opportunity to take courses in the field of computer science. The university is offering a variety of courses in this field, including programming, data structures, and algorithms.

--- END ---
Basketball Team Experienced; Small Turnout is no Drawback

Only Six Men From Last Year's Squad Return, But New Players are Developing Rapidly

Despite the smallest turnout for basketball in several years, Coach Ed Wagner has high hopes for this year's team. Only about 30 men have been signed up, compared with 70 in previous years.

Several of the new players are already developing rapidly.

The new squad includes five Men's basketballs, a trio of players, and two freshmen. While the freshmen are a bit below average in height, they have shown great promise. The team will need to rely on the freshmen and sophomores to contribute to the team's success.

Peabody Show To Play Here

Lieutenant Commander "Ed" Peabody will bring "Happy Hour" to Illinois Tech starting Tuesday, Nov. 7.

According to Lt. W. A. Hamilton, commanding officer of ITT's V-12 unit, Counts-Peabody will be accompanied by the Great Lakes Orchestra, composed of thirty players, and will bring with him a new show which earned him the title of "Mr. of the World" when he was a civilian entertainer.

The new "Happy Hour" program will be composed of a new act every month; once each month the program will be composed of a new show, taken from the V-12 unit, and a nationally known show artist will entertain the men the other night.

The "Happy Hour" Program has been designed to fill naval personnel for some time, and the signal officer of Peabody is expected to offer an additional show to the cadet's programs.

Navy Expands Gym Program

"The Naval Physical Education program will be greatly expanded under the direction of Mr. George W. M. Russell has been in charge of the program.

Training and maintenance phase of the program are beyond their first-year college term may possibly enlist a larger number of men for the program in the future.

All officers must attend the opening ceremonies, the speech will be given by the Lt. comdy off. (1) W. A. Hamilton's approval, and the student must be willing to enroll. (2) must be in all its subjects and must not be held over by the Pennsylvania.

All freshmen in the unit will be given physicals in the physical exam in their respective gym classes on Wednesday, November 17.

"Paper Shortage" Makes 13 Almost Missive Service

Three students missed taking the qualifying examinations for Navy Specialized Training Program and the Navy College Training Program last Tuesday.

According to Dean Paulson, this was a last-minute rush of students who had neglected to obtain official application blanks. The supply on hand was soon exhausted, and it is impossible to have new shipments from naval headquarters at Purdue University before the exams were scheduled to begin at 9:00 a.m. on Wednesday.

It was finally decided that it was not possible to have new applications sent to the students in time to complete the examinations, which were available for the exams when the official forms were obtained.

Including the students using the forms obtained from the number of papers taken the makeup which was well below the minimum.

Armour Foundation Has 2821 Visitors

A total of 2821 people have visited the Armour Research Foundation's Open House today. The visitors came from all over the United States and from many foreign countries. The visitors were welcomed by the Armour Foundation's Director of Public Relations, Mr. Harold Thompson, who gave a brief history of the foundation.

The visitors were then taken on a guided tour of the facility, which includes a wide variety of laboratories and research facilities. The visitors were also given the opportunity to view some of the foundation's latest research projects.

The open house was a great success, and the Armour Foundation looks forward to welcoming even more visitors in the future.
Hedrick Leaves Arts Guild Helm

Under the auspices of Hedrick, director of the Institute of Technology, students can join the Arts Guild, which is a group of fine arts enthusiasts. The guild is composed of students interested in all phases of the arts, including music, dance, drama, and visual arts. The guild meets regularly to discuss various art forms and to plan events and activities. Students interested in joining the guild should contact the director of the Institute of Technology for more information.

Harris Teaches Mechanics 201

Michael A. Harris, professor of mechanics, has been teaching at the Institute of Technology for over ten years. He is known for his clear and engaging teaching style. Harris is passionate about teaching mechanics and has helped many students understand the complex concepts involved in this field. Students who are interested in mechanics should consider enrolling in one of Harris’s classes.

Moderno Bacteria Killer Installed in Business Office

Bacteriostats have been installed in the business office to help control the spread of bacteria. The bacteria are targeted in specific areas, and the installation is expected to significantly reduce the incidence of illness among the office’s employees.

Foundation Honored In Four Magazines

The Foundation for Research has been honored in several publications. The recognition highlights the foundation’s dedication to supporting research and education in various fields.

Lounge Undergoes New Renovation

The lounge in the library has undergone a significant renovation, and it is now open to students. The renovation has improved the comfort and functionality of the space.

Father of Three Granted Scholarship, 26 Others Receive Awards Worth $2530

Handed out by World War I Veterans John Andelson and John Farley, the scholarships were awarded to students who have demonstrated academic excellence and financial need. The scholarships range from $100 to $500, and they are available to students in all disciplines.

Freshman Face Meeting Crisis

Faculty members are concerned about the high dropout rate among freshmen. The issue is being addressed by the administration, who are implementing new policies to support students and improve retention rates.

E. H. Pelowski To Teach EE 411

E. H. Pelowski, a prominent engineer, will be teaching EE 411, a course on electrical engineering. Pelowski is known for his expertise in the field and is widely respected by his colleagues and students.

Graduate House Found on Drexel

The long-lost graduate house has been found. The building was discovered during a search led by the dean of students.

Rho Epsilon Plans Code Class; Black

Plans for a code class sponsored by Rho Epsilon are currently being discussed. The class is expected to provide students with valuable skills that will be useful in their future careers.

Positions Still Available As Students Assistants

There are still available positions as students assistants in various departments. Interested students should apply as soon as possible.

In this election were born in foreign countries. Ohio, Virginia, a former emigré, was born in Kiel, Germany, while Charles Conard, a distinguished physician, was born in Italy. Minnie Slavos is also the vice-president of the Honors College and a member of Sigma Gamma Tau, the national honor society. Ines Komorosky is also the chair of the Student Government Association. On Friday, John R. G. Volschuk was elected as senior class president.
No Major Changes Made at Curriculum Committee Meeting

Plans Call for No Change in Physics Report Form; Better Reports to Be Collected for Froshmen Laboratory reports and extra-curricular activities formed a major part of the discussion at today's meeting at Sargent Hall. Dean James C. Peabody made known Friday, no major changes were anticipated for Froshmen laboratories next quarter, however, there is a possibility that each department will submit a form which is to be used for the purpose of collecting extra-curricular activities. The committee recommended that the committee submit a form to the University administration so that all of the departments may be included.

Four Added to Lewis Faculty

The news of the day was marked by four replacements on the Lewis faculty. Associate professor William E. R. Pugh, has been appointed by the University to the position of professor of physics at the University of Michigan. Professor Pugh left for Ontario, California, last week, leaving the department in charge of Dr. A. G. B. Fish. Professor W. F. H. Brown, assistant professor of chemistry, has been appointed by the University to the position of professor of chemistry at the University of California. Professor Brown left for California last week, leaving the department in charge of Dr. A. G. B. Fish. Professor E. H. Davis, assistant professor of physics, has been appointed by the University to the position of professor of physics at the University of California. Professor Davis left for California last week, leaving the department in charge of Dr. A. G. B. Fish. Professor J. R. H. Duhem, assistant professor of mathematics, has been appointed by the University to the position of professor of mathematics at the University of California. Professor Duhem left for California last week, leaving the department in charge of Dr. A. G. B. Fish.

Records Reveal Faculty Amassed Total Of Twenty Centuries Service to IIT

The faculty of the University has amassed a total of twenty centuries of service to the University. This total was reached in the fall of the last academic year, and was announced by Professor W. F. H. Brown, assistant professor of chemistry, at the University of California. Professor Brown left for California last week, leaving the department in charge of Dr. A. G. B. Fish. Professor E. H. Davis, assistant professor of physics, has been appointed by the University to the position of professor of physics at the University of California. Professor Davis left for California last week, leaving the department in charge of Dr. A. G. B. Fish. Professor J. R. H. Duhem, assistant professor of mathematics, has been appointed by the University to the position of professor of mathematics at the University of California. Professor Duhem left for California last week, leaving the department in charge of Dr. A. G. B. Fish.

Phenorton Contest to End November 25

Most Modern Care for Army, Navy, Students

The Best of Modern Medical Treatment Available to Army and Navy Students

The best of modern medical treatment is now available to our armed forces. New medical students at Illinois Tech, the new medical school, are being trained to meet the needs of the modern soldier.

Under Lieutenant-Commander J. W. Smith, there are three dispensatories, everything on the campus and one at George Washington College.

The new dispensary, in the Student Union, handles the military cases at Armory. As George Washington College has a similar type set up for army men.

All patients, regardless of condition, are seen by a doctor, and a complete medical year, including all follow-ups, are brought to the dispensary.

Since July, thirty-eight men have been sent to the sick-bay or to the hospital. Of the thirty-eight, the most common causes have been appendicitis, pneumonia, and digestive troubles.

Dean Clarens Continues Indefinite Sick Leave

Dean Clarens, Dean of Clarens, is continuing his sick leave after a stay in the hospital last August 10th, under medical supervision. Despite his serious condition, he has continued to work, and he is now expected to return to his duties.

Four World War I Veterans Enter V-12 Here; 91 New Men Arrive at IIT

Four well-known veterans of World War I entered the IIT campus yesterday afternoon. Following the attack on Pearl Harbor, the men were received with great enthusiasm by the students.

James A. Hagan, a former Marine, was accompanied by his wife and children.

Department of Education, Illinois Institute of Technology, Chicago, Illinois

A strong statement was made in the middle of Illinois Avenue, which has already begun to develop a strong military character in the Jocks and New Germans.

The IIT campus is now a part of the University of Chicago, and the University of Illinois Medical School.

Highlights of the convention will be a dinner meeting at the Phenorton Hotel, Friday, Dec. 4, and a dance at the campus. The convention will conclude on Saturday, Dec. 5, with a dinner at the Phenorton Hotel.
Sunny Leaves $125,000 for Scholarships

One-fifth of Estate Used for Endowment; Trustee for 40 Years

A $125,000 scholarship fund has been founded by the late Bernard E. Sunny, it was announced today by Henry C. Head, president of HIT.

In his will, Sunny left one-fifth of his estate, valued at $500,000, to Illinois Tech in the form of a scholarship fund. The endowment will be kept in trust during the life of his wife. Final evaluation of the estate has not been made yet, and the above figure is only the estimate of the trustees of the estate.

Sunny became interested in Armour labs at its founding and made many donations to it. He established the Sunny scholarship in 1940. He was a trustee of Armour and then of HIT until the time of his death last month.

Known as the father of telephone service in Chicago, he started his career as a messenger for the Atlantic and Pacific Telegraph Co. He was president of the old Chicago Telephone Co. and later to the same position on Illinois Bell Telephone.

Pi Kappa Phi Elects H. Anderson Archon

Harry Anderson was re-elected archon of the Pi Kappa Phi fraternity at a meeting Thursday. Also elected were Henry Dickson, treasurer; Thomas Ingersoll, secretary; Thomas Long, vice-presidential; Malcolm Kinkead, chaplain; and William Peterson, wardens.

A dance is planned for Nov. 28 at the Alpha Club, 608 N. Avenue.

Lind New President of Alpha Sigma Phi

Ronald Lind was elected president of Alpha Sigma Phi fraternity at a meeting last Wednesday. Also named were Bert Peterson, vice-president; Clyde Wagnon, treasurer; Robert Thomas, assistant general; K. W. Schmidt, recording secretary; Lloyd Johnson, corresponding secretary; and Donald Price, pledge manager.

Pi Kappa Phi Pledges Seven New Members

Pi Kappa Phi announced the pledges of seven men. These are the brothers Leo and Melvin Pollock, Clarence White, Allan Dobbins, James Duhon, Roy Chasen and Albert Winger.

In addition, Anderson stated that a meeting for seniors will be held Monday and a pledge meeting on Wednesday.
