Only 5 Offices Need Runoff

Parental call was the wrong one, but in only a few instances out of the possible 122 and the minor and junior classes was this even possible. In addition, an instance on the minor class ballot was found only by one candidate running for the minor class. It is possible that the senior class has only one man in charge of handling these jobs, and the junior class just two more.

SUCH A SITUATION, naturally, didn't give the candidates a chance to vote on that sort of balloting very happy, and I doubt if any of the "dumpy" candidates enjoyed it either. None of these men want to win their office merely because no one else is willing to run against them.

Nevertheless, they are subjected to ridicule even though they are the very ones who do the work and speak in favor of their candidates or anything that goes with the office. Technically, such elections for ITBA are not invalid, as the ITBA constitution clearly states that "the candidates nominated for the offices of the student association shall be the two receiving the most votes." (See also Point 4.)

Student Committee Finds Lunch Situation Unavoidable

"Everything possible is being done by the administration in an effort to reduce the number of the student and lunchroom situations observed at the lunchtime hour," stated the student association editor of the student newspaper, the Daily Illini. The committee includes William R. Robb, chairman, and Eldon Leddy, secretary.

For the present, at least, no meals can be served to civilians between service hours, the statement said. During that time only hot beans and peas, bread and salad will be served. The two small dining rooms adjacent to the cafeteria will be used to accommodate students during service hours.

In addition, all meals will be served in the cafeteria for students who choose to eat there. That decision will be made by the cafeteria director, who will be responsible for the maintenance of the cafeteria service. The cafeteria director will also be responsible for the training of the cafeteria staff.

Furthermore, all students will be required to purchase a meal plan in order to eat in the cafeteria. This plan will include three meals per day, and will be available to all students, regardless of their financial status.

The plan will be enforced by the cafeteria staff, who will be trained in proper nutrition and food handling.

Illinois Tech Sanitary Engineers

The Illinois Tech sanitary engineers will begin their class in the fall semester. The class will be taught by Dr. J. A. Miller, who is a member of the Illinois Tech faculty.

The class will cover the following topics:

1. Introduction to sanitary engineering
2. Water supply and distribution
3. Sewerage and storm drains
4. Sanitary engineering design
5. Environmental engineering

The course will be offered in the fall semester and will be taught by Dr. J. A. Miller. The class will be limited to 20 students and will meet for 3 hours per week.

Plan for New Honor Board Announced; Election of Members to Be on Friday

The Illinois Tech student body is set to be represented in the new honor board, which was planned to begin work this week by the retiring Honor Board and to continue its work.

The new honor board will be composed of 12 students, representing both the junior and senior classes.

The new board will be elected by a vote of all Illinois Tech students and will be responsible for the selection and removal of members from the honor board. The board will meet weekly to discuss matters pertaining to the honor board's responsibilities.

For the fall semester, students will be voted to the board in accordance with the following system:

1. Two members will be voted from each of the following divisions:""
To Eat or Not to Eat...

Probably the most sensitive nerve on the campus since the summer term opened has been the lunchroom situation. Every student, faculty member, or employee, regardless of whether he actually bought hot meals in the cafeteria or not, undoubtedly felt, and many said, that the cafeteria situation had far too much to a minority, displaying a minimum of consideration for the students and the people who have worked for them as well.

Most, of the efforts of the students to maintain the condition or to enlist cooperation until the situation can be brought near to normal operation, have fallen like sugar on a sore tooth.

Nor do we realize that in an effort to make Illinois Tech THE engine of industry in the Midwest, the situation had to come about.

One of these was the utilization of Illinois Tech by the armed forces for educational purposes.

One cannot deny the importance of this, for it is an honor for an institution to be selected for such utilization, and while such a selection does not distinguish a school from a number of other schools in the same position, this situation distinguishes it from the schools that have not been selected.

But it is also a very practical fact that the arrangements and facilities for the persons at the schools prepared to accommodate them—living as well as for education. The existing facilities were not completely accommodating, and they were immediately geared to serve Army requirements.

Since the output of the cafeteria is three times that of the summer term, and since these needs were obvious, it was from the beginning that the facilities would have to be augmented. The addition to the kitchen is part of the plan to increase the capacity. Purchase of a dishwasher, potato peeler, toaster, steam-jacketed kettle, mixer, and a vegetable steamer are also a part of it, as is the expansion of the refrigeration facilities.

But nearly every one of these items calls for priorities and releases, and it will probably be weeks before more than a fraction of them will actually be available.

Once in operation, however, the facilities should be much improved. Not only has more food been provided, but food, at that, but more space to eat it in as well.

Until then, we can best help by cooperating with each other in every way possible, dividing different dining rooms and grill have been opened to students. But since the balcony has been opened to those who bring their lunches, let’s have them in the balcony, and the partitioned space in the lunchroom, for the fellows who have to buy their lunches.

We feel that the administration is doing their part, and that we are just beginning to understand what we can do to improve the situation.

From Our Readers

Dear Editor:

The cafeteria situation has reached that point.

Everyone at Illinois Tech realizes that we can only make do for a while, particularly in regard to meals. However, when you remember the fact that the cafeterias feel just as many people last semester with no complaints and that present conditions seem unjustified.

The students were promised meals in the dormitory, but the dormitory SA meeting, if the small portion of the 150 SA members in the canteen, the cafeteria, some of the engineering training has been adequately neglected.

During the past week, the men have had to turn down their refrigerators, milk, and coffee, which was disappointing enough as it was. But to walk out and find the ice box empty, the coffee pot empty, the most pressing demand of all. The want of the guests is such that students and faculty only have to sit down on a cafeteria chair, the situation is not as bad as it may appear. But as we see it, the problem is to be able to find a way to help and solve a problem which never should have come up.

The men are certainly not looking at the institution, but the situation is in need of some help.

R.R.

Dad Hiltz

Dear Dad:

The men who are here are the result of the failures of the people whose responsibility it is to take care of the men and women who have been eating at this cafeteria. It is a problem that is not only a problem, but it is a problem that is not taken seriously.

Next to saying simply, "We are doing the best we can for your lads," they are doing the very best that they can do. The cafeteria is used as a place to meet and socialize, and it is not uncommon to see groups of people talking and socializing in the cafeteria.

The Collegiate World

Lehigh University boasts a new underwater observation chamber, which is the first of its kind used to train college men in the Naval Reserve. The trainees jump into a 12 feet deep, 12-foot diameter swimming pool, which is connected to a tank of water through an "IETF," a barrel suspended three feet from the bottom. These tanks serve to form the next obstacle, and the swimmer receives first through a low hurdle, then a high, and finally another. Then, as a swimmer jumps into the pool, he is connected to the "IETF" by a harness and is then pulled to the top, leaving at the bottom. He completes his obstacle swimming by going through the bottom, and another barrier is set up at the top. No training is allowed to try the course unless he can swim 50 yards under water and remains submerged for 15 seconds.

David E. Ross, nationally-known inventor and manufacturer of the "IETF," was at the University last week and demonstrated the chamber to the students and faculty. He stated that the experiment was successful in its role as one of Purdue University's greatest benefactors. He bequeathed $1,000,000 in trust to the Purdue Research Foundation.
The Other Side

IIT Professor Saw Hitler on Inspection Tour

The face of Adolf Hitler is hardly unfamiliar to anyone, but at least one individual may have seen the German Fuehrer's face in person.

This man is Dr. Victor L. Streeter, professor of geology at Illinois Tech, who stood a distance of 200,000 yards or so from Hitler at an inspection tour of Ahdelf, the Russian and Japanese, and German Heer and Air Force, throughout Europe and Asia as a Freeman Scholar.

His appointment as a Freeman Scholar followed seven years of study of civil engineering, at a cost of five dollars for his continued doctoral dissertation published in the official publication of the American Society of Civil Engineers in 1948.

From June 14, until July 14, he worked in the hydroelectric laboratory of the Illinois Water Conservancy in DuPage.

Appointed a Freeman Scholar in July 1946, by the Academy of Mechanical Engineers, Dr. Streeter studied the subject of Civil Engineering, and four months at the Technische Hochschule in Germany.

As a student at Göttingen, he purchased a motorcycle and toured the entire country. But because he limited this trip to a trip, he sold his motorcycle afterward.

On his return to the United States, Streeter wrote a number of papers on the subject of the Fuehrer, and the Fuehrer wrote some papers on the subject of the United States.

His papers included ten European countries, Egypt, India, China, and Japan, and the United States.

After returning to this country, he was employed from December 1946, to May 1949, by the Bureau of Reclamation in Washington, D.C., and the Bureau of Reclamation in Los Angeles, as a hydroelectric engineer.

The group of three brothers, Joseph, Jerome, and Samuel, was sponsored by the American Society of Civil Engineers in order to attend Illinois Tech.

The three brothers decided to study engineering, and the Illinois Tech Board of Trustees then decided to sponsor the trio.

The three brothers received their degrees in Civil Engineering, and the Illinois Tech Board of Trustees then decided to sponsor the trio.

Dr. Streeter spent last summer at the David Taylor Model Basin in Washington, D.C., and the Bureau of Reclamation in Los Angeles, as a hydroelectric engineer.

The four members of the family of Joseph Streeter, and the three brothers, Joseph, Jerome, and Samuel, were sponsored by the Illinois Tech Board of Trustees.

They were students at IIT before going on leave. In the meantime, SHERIDON LEVY, fresh electrical engineer, entered Illinois Tech with scholarships from both the Institute and the Navy.

The Lamb Science Award in his pocket.

RUTTEN, senior chemistry and member of IIT's wrestling team, was only a junior student, but he was sponsored by the Illinois Tech Board of Trustees.

JACE RUTTEN, senior chemistry, and member of IIT's swimming team, was only a junior student, but he was sponsored by the Illinois Tech Board of Trustees.

At the time the announcement was made, the board had no idea of the group's activities, and the board was not notified.

In the words of a famous brewery that is a case of good judgment: "A firm believer in the form of the written word, as Mike Closen, the brewery's gift to the secretaries. By some odd coincidence Mike assigned his name on the outside of the brim of his hat, thus preventing a walking advertisement for the benefit of new employees. No doubt a telephone number would have been added in the brim afforded the required space.

Cupid, alias Elroy Harrison, planted a spark on the third finger, left hand of Corinne Lense this week. Handy for the young couple will be Corinne's knowledge of home economics which she secured in the past two years on the west side campus. Meet Happenings at Lake Delavan.

Three monkeys demonstration of his presence as a result of the arrival of the missing foot. The missing being seated he had to be faked up.

Bill Kregel's headless ducking unit after a low flyball ended up by the swimming into a tree. The results, a home-run in deep, out in the hole and a faked up now.

Abercrombie and a boy-friend lost six pies into the net, and over the middle of the large lake. The boar wired quietly, leaving the right side near the upper half of the boar before being rescued.

Following up one of his many contacts, Ulysses B. Buxton is showing all the symptoms of being to all the people, including his in the proceedings. A U. S. lawyer in England who has lived in the country and has lived to England has a very comfortable life, and was rescued by police along the lines of that old adage, "It's fair.

That with the lines of the same "rough" lawyer, George Mertens was assigned to his house, now home life. Brother shot Walker was best man of the wedding, and was rescued by police along the lines of that old adage, "It's fair.

Hank anyone noticed that "You are always in my heart," look on the face of Jerry Houle. This strong silent champion of the "free and easy" state has finally succumbed. His brave moments are spent in forwarding his suit and driving wolves from the fair damsel's door.

With the loss of Vicke Huyquity, Hank Pyke, and Walt Sherman to the armed services, the Ileto-Wizards have lost three of the original thirteen left. This, (we hope) eliminates the threat of the Wizards being instrumental Champions.

One of the most popular members, known to the hefty headstrong, has a new system for wrangling free tokens from a popular gathering spot on Chicago's North Side. 453, 454, 455, and 456, he dates a 26 year old on her right off.

Johnny Gregor, ex-assistant warden for the chemistry students at the Hamilton Hotel, was just the thing. The boys had been waiting for a token to appear at the Hamilton Hotel, and were not disappointed.

A senior recently informed us that he would have to leave the free daily dormitory to which he had been assigned. His comment was, "They can't do that to me; I'll quit the club!"
Action In Intramurals Will Start Soon

Cries of Physical Destruction, Murder Greet Fitness Work

by URSUS BACKAS

"Physical destruction is what boys are calling it... Others are just worried...."

The army's general feeling of the Navy boys after the first week of the new intramural program, and a consensus of opinion reveals that it is probably a little of both.

When the program started at Illinois Tech as a result of the program, with the physical fitness tests resume the tension of everyday breakfasts of some of the men were the whole P.E. program, the sessions of the first few days.

The "grunts" that resulted do not please the instructors, for they report that they are very happy to have a break. They say that is the only way they have of knowing that they are doing a thorough job.

Comments on the program by the participants are as varied as the exercise they are participating in.

When asked the question, "what are your reactions to the Navy physical education program?" the men replied as follows:

Bing Hildas, Chicago:
"I am very glad they have really started in giving us the work. Something has got to happen."

Jim Olber, Chicago:
"The Phys Ed. program seems to be well planned and is making us do a little bit of the exercises that we have been eating."

Peter Purne, Traverse City, Ohio:
"They are physically developing our bodies so a very big step ahead. My only complaint is we worked out too hard the first few or three periods."

Edward Gomelsky, Rochester, Ill.:
"The new Phys Ed. program is easier than the former one at JIT, and as evacuation, for the boys who are able to make us lose our strength."

Douglas Snyder, Milwaukee, Wis.:
"The Navy's P.E. program is giving us some new exercises and new physiques we needed."

Ray Tuhergarten, Bloomfield, Ill.:
"The Phys Ed. program, that we are getting on for the best. We are all over now, but in some cases not as much as we would appreciate the instruction of all of us. The swimming will be a welcome relief from the heat."

Bill Henson, Sheboygan, Ohio:
"I am sure the program will do us good as far as we are concerned."

Seriously, I think all the men are really appreciating the exercise and when the swimming classes begin it will be something to look forward to.

Frank West, Angola, Ind.:
"I believe the Navy P.E. program will work greatly for what it is intended - to make the Navy trainees of HY as physically strong as possible."

Mike Corcia, Chicago:
"Very pleasing physical picture for us V-12's but conditions at the present time are very questionable. Although we were with men who we looking forward to that not too distant (17) day when superman shall reign in HY."

R. Barnes, Glenview and G. Barman, Saginaw, Mich.:
"Wait! That's all, brother."

Ray Henson, Detroit, Mich.:
"They seemed to have started the program before they were ready for it. Two and a half weeks with one of diets of clothes being too thick. The P.E. class is worth it. But we want to get some exercise."

Nat. Roswell, Chicago:
"Good game..._[remaining text obscured]_"

Dale Biddle, Rothwell, N. Ill.:
"A very good program. What's the man himself? It's going to do as a lot of good."

Larry Johnson, Park Ridge, Ill.:
"I like the program."

Larry Tompkins, Park Ridge, Ill.:
"A great improvement over the other programs I have come in contact with."

This edition of Technology News announces the pledging of seven new members into the honorary student engineering society. Heuer 34, a member of the sports staff, congratulates you. May you continue to add to Chisholm Tewks in the future.

Sports News:
"There seems to be a renewed interest in the Illinois Tech college football team. With all the men on the campus and with the physical condition they will be in come next fall, it shouldn't be a very difficult undertaking."

Let's have more entries in the intramural baseball tournament. There should be at least 20 teams entered this summer. Franks are especially invited to enter because there is no limit to the number of teams that they can form.

While playing basketball in the gym we noticed quite a few "guns" who make Coach J. M. Wagner envy when he saw that they called the game.

In closing may I say that we P.E.C.'s (Physical Education Clubs) have a very good season. A lot of us 200 pound boys will make mighty fancy in white. No kidding fellows, we all have work you-surely especially for the food."

Honor Announces Pledging of 7 Men; Mathock, Mills Elected as New Officers

Gordon Fielder, Ed Pieloch, Jack Shephard, Ogden Cladon, Norm Seeliger, Warren Forst and James Pieloch were elected by pledges to Honor 1, the honorary baseball association of the Tech baseball team. In addition to those elected by pledges to Honor 1, the honorary baseball association of the Tech baseball team, were elected to the pledge committee, the following are the names of the committee:

Erik Mills, track star and member of the Tech basketball and baseball team, and junior math, gained the position of Secretary-Treasurer. Howard H. has been described as the man who in all sports is eligible, but to whom few are elected. A good athlete of a letter does not necessarily mean admission to Honor 1, as it is the system in most intramural clubs in other schools. In addition to contributing to the morale of their team through their willingness to cooperate, the individual must possess a personality and an outstanding character. This discrimination is the one factor which ITT's athletes consider in making an additional burden to be more than just good conditions and a good leader with.

Since his founding in 1911, Honor has admitted over three hundred men into the organization. Men who wish to be considered for admission must sign up on the list which the committee will keep and in order to be considered for admission, he must sign up on the list which the committee will keep.

In closing may I say that we P.E.C.'s (Physical Education Clubs) have a very good season. A lot of us 200 pound boys will make mighty fancy in white. No kidding fellows, we all have work you-surely especially for the food."

FRATs Golf Plan and Baseball Tournaments

Under the supervision of Bert McMahon, president of the interfraternity sports council and president of the TriDelta chapter, the frats will sponsor a sports program for the coming season. The program includes baseball and golf and will be started on the first week of school. The program will operate on a membership basis and will be open to all members of the fraternity. The program will be supervised by Bert McMahon, president of the interfraternity sports council.
Juicers’ Enter New Lab Today
A completely modern lab will be ready for use today by the electrical engineering students.

The returning students will find them well equipped with new work benches, a considerable amount of new equipment, and new wiring. The windows of the lab were redesigned and a completely modernized laboratory is awaiting the six-week vacation period.

The laboratory is equipped with the latest scientific apparatus, and electrical measuring equipment. The students handle the increased number of students in the laboratory has increased by nearly 150 percent, according to Prof. George J. N. Biddle, director of the department.

S. Young Chosen Chi Epsilon Pres.
Sheldon Young was elected president of Chi Epsilon July 12. He has been an active member of the chapter and has held a number of offices.

The other officers elected were: vice-president, Bill Whalen; secretary-treasurer, S. H. F. Ellis; and chaplain, Bill Parks.

40 Year Army Vet, Col. Lee Sumner Heads Army at ILT; Staff Includes Six Officers

The ILT army, which has been in existence for 40 years, is now composed of six officers.

The Army was organized in the United States in 1871.

Coccia Lists Plans For School Socials

An all-school social committee comprised of army, navy, and engineering students announced plans for the current year.

The committee, which is made up of all students, is under the direction of Mr. Coccia.

The first dance, which was held in the Student Union Hall, featured a dance band and a large crowd of students.

Hobson Announces 5 New Instructors

Hobson Institute of Technology’s electrical engineering department has announced the appointment of five new instructors.

The men are Lewis Dobson, chief instructor of the department; L. T. Anderson, director of the department; L. T. Anderson, director of the department; and L. T. Anderson, director of the department.

ITL Offices Not Moving, But Post Office Zone Changes in Address

The address of Illinois Institute of Technology’s post office zone was changed to accommodate the new location.

The move was necessitated by the change in the location of the post office.

Rho Epsilon Looking To Crystal, as Priorities Hold Up F-M Station

The station is back in business.

Radio Code Team Wins Championship

Champion of the Sixth Service Command is Illinois Tech’s Code Squad, which is located in the Signal Corps, 4th Service Command.

Teams from Illinois Tech and American Television entered all four contests.

ASME May Reduce Membership Fees

A proposal to reduce the membership fees for the student association has been approved by the board.

The reduction will affect the ASME’s chapter in Chicago.
News of Fraternities and Sororities

Pan-Hellenic Council Honors Women Frosh

To honor the freshman women of the west side campus, the Pan-Hellenic Council held its annual Freshman Frosh Banquet on Friday. The banquet was held at 12:30 in the main auditorium, with Dr. John Doak, S.U.R.C. president, in charge of the arrangements. The dinner was served on the first floor, with Sister Stevens, secretary, in charge of the arrangements.

ELECTIONS

[Details not provided]

Gloria Landin Heads Sorority

Gloria Landin, a senior at the University of Illinois, was recently elected President of the Pan-Hellenic Council. This is the first time a woman has held the presidency of the council.

STREETER

[Continued from Page 11]

Defends Chicago's Division One

An associate member of ASCE, Streeter holds membership in the American Society of Civil Engineers, the National Society of Professional Engineers, the Society for the Promotion of Engineering Education, Sigma Xi, Phi Kappa Phi, and Alpha Delta.

Sororities for the non-faculty members of the sororities will include the following programs: July 31, informal on Friday, August 3, informal meeting August 7, and formal meeting August 14.

11 Greeks on West Side Begin Rushing

Although there remains only 11 Greek letter men on the west side campus, fraternity will be a way of life for the students who reside here.

Research Starts Its Own Lunchroom

The research department is now running its own cafeteria.

New Math Club Will Be Formed

A new mathematics club, which will take the form of a seminar, will be formed on Friday evening in Chapin Hall, room 214. The meeting will be open to all students interested in mathematics, and the club will meet regularly on a subject of his own choosing.

ITT To Build Dental Clinic for Army, Navy

A pharmacy and dental station will be built for the Army and Navy men in the near future. The project will be undertaken by the service men stationed at ITT, according to W. J. France, a representative of the company.

Most of the patients will be shipped to ITT, and will bring the total patient load to approximately $216,500, which has been received from the navy and army units.

Because of war, the service members can't go to stores, andIXIT has been delayed, reports Parham, and all the dental products are now scarce.

Research Starts Its Own Lunchroom

ITT mathematics professors will be able to provide service for the lunchrooms.

Two IIT Math Professors Miss Class Through Illness

Two IIT mathematics professors were absent because of illness last week.

A new mathematics club, which will take the form of a seminar, will be formed on Friday evening in Chapin Hall, room 214. The meeting will be open to all students interested in mathematics, and the club will meet regularly on a subject of his own choosing.
