ASTP Training
To Begin with 22 IIT Profs.
Army to Take Full Time of Most; To Add More If Needed

Twenty-two professors and instructors have been assigned to the Army Specialized Training Program on the Armour campus. The majority of them will be on a full time schedule teaching the army men, and will have the same classes, general instruction, however, will only work part time in the program.

Nine members of the IIT family will teach physics. James S. Thompson, head of the physics department, will be in charge. Other faculty members from the Armour campus are William W. Calvert, professor of physics, and assistant in physics, and Robert S. Kirk, laboratory instructor.

Sophomores Obtain New Bulletin Board
President Tom Rusk announced that the system will have a bulletin board, effective today. The new bulletin board is situated in the main building and will occupy almost the entire space formerly reserved for the former bulletin board. Each sophomore will receive a list of the courses offered and a copy of the bulletin board.

Faculty Criticism By Student Shows Excellent Spirit
Says Faculty; Consider Viewpoint A Bit One-Sided

The editorial of July 26 aroused so much comment among the faculty and the student body that the Managing Board of Technology News is preparing to present the results received from the replies returned to the original letter. The first reply is from Mr. Ernest R. Freeman, professor of engineering, and the second from Mr. Anthony T. Hall, of the technical service department, and the third from Mr. Edward W. Yold of the department of languages and literature.

To Be Here on Aug. 24, 25, 26

500 Blood Donors Are Needed; Navy Men Will Back Drive - Burbank

While present plans call for a drive for 500 blood donors and it is stated that it will be necessary to have 200 donors per day as a total of 500 donors is needed, the committee in charge of the drive has set aside a large percentage of the donors as military personnel.

Signal School Graduates 395

With the completion of pre-nuclear training by 300 students at the Signal School at Illinois Institute of Technology's radio school in Burbank, all of the 395 graduates of this training program in May 1943.

O'Leary Heads Honor Board

Tim O'Leary and Earl Miller have been named as members of the Honor Board following their second year in the Honor Board.

In an election by the board of students, O'Leary, president, Miller, vice-president, and O'Leary's successor, secretary-treasurer, were voted back for the first time.

The election was devoted to installing the new members in the board. This included a review of the new members' qualifications, an interview with each member, and a vote by the board. The election was held on Monday, March 3, 1944, in the boardroom of the Armour campus.
Broken Records?

It has been the custom of the various honorary fraternities to regard the averages as computed by the Registrar's office as the source of and final authority on the scholastic standing of the student body.

Yet you will probably recall the undercurrent of understandings that swept the campus last semester when it was discovered that one of these fraternities had failed to compute several and in some cases their records had been misplaced, and so failed to reach the fraternity's hands.

And as a result, this fraternity was subjected to the great deal of undeserved accusations. No matter how unjustified, they have not failed to leave their mark, not only upon the fraternity involved, but upon all similar organizations.

Already this semester one of the departmental honorary, going over the records of the men in their group alone, has disclosed that the records will have to be viewed with suspicion at best.

One of the highest ranking seniors in that department was not even listed with his class.

Another eligible candidate would have missed out had not his class mark gone his absence from the list conspicuous. It was discovered that his average was listed at a point lower than it actually was.

In her final investigations there is a degree of scholastic proficiency disclosed by the records which often causes enough weight to throw a decision on admission in a definite direction, when it might go the other way in the light of other considerations.

To lose the convictions placed in this factor because of fluctuating records will seriously handicap the purpose and function of these organizations, and might easily lead to an inhuman attitude toward their future activities.

C. W. Kooper, the registrar, recognizes the presence of this situation and the problems that these fraternities must face. He has promised, however, to furnish, after this semester, trained staff teachers to eliminate any possible slippage in the giving of student help. Further, the average will be made available to the respective honorary fraternity with the approval of the Interfraternity Council.

This promises a definite step forward in the future. But each of the fraternities must take the initiative in accordance with the provisions set up by the Interfraternity Council.

This situation is a definite step forward in the future. But each of the fraternities must take the initiative in accordance with the provisions set up by the Interfraternity Council.
Dr. Hobson is Engineer Who Likes Music, Journalism, Horticulture, Psychology

By HAROLD BURKEM

Dr. Harold Hobson, who is making his debut as a writer of a column on the personalities of such fields as the music of Haydn, the engineering of an electric generator, the journalism of a newspaper, the psychology of a human being, and an engineer?

Dr. Hobson is an electrical engineer who has written a number of books on electrical engineering and has contributed articles to various technical journals. He is also a member of the American Association for the Advancement of Science and has been a consulting engineer for the American Association of University Professors.

Dr. Hobson is the author of no less than twenty technical

Don't Be Alarmed—It's a 20 Minute Warm-up

names 'n' notes

CORRECTIONS (notes from the editor on a couple of names) . . . That was a basketball scene that NULL STEELE played center on. AND SHELDON YOUNG, whose avocation is saving lives as a surgeon, is preparing for a vacation as a civil engineer, not as a chemical engineer. Arnold Goldberg, the editor of the New York Times, was quoted as saying, "This is a boon to the Times." HRD REED is grading all the papers. He has a master's degree in mathematics. The Chicago Daily Tribune Union, Local 3, has KURT ANDERSON, senior mechanical, as a member. The New York Times reported that "the picture is set in the early 20th century," and added, "the music is well

Studio Theater Still Breaking Records

THE STUDIO Theater is still breaking records. The Chicago record when the show ended, "The Skin Game," was set on the last night of the run. The record was set by Mr. Hobson, the owner of the studio, who is a retired electrical engineer.

NEW PLAYATCHING at the Studio is "The Skin Game." The title role is played by Mr. Hobson, who is a retired electrical engineer. The play is a satire on the life of a New York politician, with the action taking place in a New York apartment. The play was written by Mr. Hobson, who is a retired electrical engineer.

A REPORTER of the Chicago Daily Times dropped in to interview Mr. Hobson last night, and the report is: "Mr. Hobson is a fine actor, with a fine voice." The reporter added, "The play is a fine piece of work, with a great deal of dialogue."

ASTP Cagers Send Challenge

Former College Stars Look for Competition

One man, countless of them is the challenge extended to basketball teams in the Astp Cagers Send Challenge by members of Astp Cagers Send Challenge. According to these army men, many top athletes are included in the Astp Cagers Send Challenge. In addition, almost every sport is represented by college letterman and professional players.

At the present time, attention is focused on basketball because of its intense competition. The match is based on the ability of the Astp Cagers Send Challenge. The Astp Cagers Send Challenge has a team which can be put on the floor by the will of any team from the Chicago area.

However, their ambitions are not restrained to just the basketball game. They are also interested in other sports for the first class trophy.

The Astp Cagers Send Challenge must be able to do the following:

1. While in the water, approach a man of approximately his own size, demonstrate a "break or resistance" position, and throw him twenty-five yards.
2. Enter the water foot first and swim at least fifteen yards. Swimmer is to break the swimmer's hand by grasping the swimmer's hand at a distance of at least twenty-five yards.
3. Both swimmers have unlimited freedom in water and infinite for report.

This swimmer is classified as one who can "take care of himself". The ideal swimmer is described as one who can "take care of himself" and be able to swim without any assistance.

‘Shepherd Is All Time Great in Basketball,’ Says Pledge Shepherd to Honor I

This guy, Alden Shepherd, is one of the best college basketball players that I’ve ever seen. And I know a lot of people who know the bag of all my life. From the time he used to throw the ball around in the playground to the great games of Austin, Shepherd was always the one to watch. When he was in the line-up, he was just a little quirker and couldn’t help but take over the game. Now he’s a big star, and I’m proud of him.

Alden Shepherd is a great ball player, good around anywhere — a good shooter, too. You just can’t beat him on the court. He’s got some good moves and can always find a way to score. He’s really taking his game to the next level.

The Army boys have been practicing their basketball skills, and they’ve got a lot of talent. They’re always working hard to improve their game. They’re a tough team, and they’re definitely going to be a force to be reckoned with this year.

Serving on the bench, the referees sometimes have to “request” Shepherd to break his leg so he can’t play. His great spirit is a quality that the team definitely lacks when he’s not around. However, they usually manage to figure out a way to win without him.

This guy is a fantastic athlete, and I’m sure he’ll continue to succeed in the future. He’s got a chance to become a great player, and I’m proud of him for all his hard work and dedication to the sport. Alden Shepherd is definitely a strong player to watch out for in the future.
Dining Problem To End in Fall

"By next term the dishwasher will be capable of serving every person at the fast-food lunch hours, a development that has been stated last week."

More effective operation will result from the utilization of all facilities, and the change in class time, coupled with a temporarily reduced schedule of 12 classes during the first hour, will be beneficial.

The plan, as outlined by Dean Griswold, during convocation hour, will be in effect for two classes. The men will be able to eat in two half-hour shifts instead of the customary 12 classes during the first hour, because of the precision training they are receiving, and the men will not be faced with the problem of the congested eating area.

Participants having the 11:30 to 1:00 period will be able to eat from 11:30 to 1:00. The lunchrooms will then be closed from 1:00 to 3:00, during which time the cafeteria will be cleaned and restored for the customary 12 classes.

Five minutes will probably be allowed to be utilized by the members of the class, but this can be no longer extended, as it is considered necessary to maintain cleanliness as efficiently on the 11:30 to 1:00 period as on the other hours.

The change is expected to reduce the time it takes to serve meals, which were formerly served in a shorter period, but on a larger scale.

Ten Added to IIT Faculty

Two persons have been added to the instructional staffs of Illinois Tech, physics and mathematics department.

Dr. Lestor H. Ford, head of the mathematics department, announced the addition of two men and one woman to his staff. These new faculty members are expected to work in various departments of the university, including the engineering and science departments.

Dr. Cleveland Named Fellow

Dr. C. W. Cleveland, professor of physics, was recently appointed a fellow in the American Academy of Arts and Sciences, an honor earned by his contributions to the field of physics.

The council of the society appoints fellows to honor individuals who have made significant contributions to the advancement of science and human knowledge.

Maccoby Gets Badges Soon

Distribution of badges for the students at IIT will begin this week. The badges are expected to be distributed to all students, as a way to identify them and promote a sense of community.

Rack Preview Term’s Plans for Faculty

Theophanides was given a preview of the term’s activities by John Rack, president of the student body. The preview sessions held last Friday were attended by a large number of students, and a hush was maintained throughout the hour.

The company was reluctant to release the details of the plans for the IIT badge, which is expected to be released sometime this week.

The badge is expected to be released to all students, as a way to identify them and promote a sense of community.

Army Carries Its Discipline to Classes; Even Instructors Will Have to Conform

The Army will not be able to enforce its full discipline on its cadets, but it will be able to enforce it on its instructors, who will be required to adhere to the same standards.

The instruction will be conducted in accordance with the regulations of the Army, which are designed to promote discipline and maintain order in the classroom.

Army Trucks Ready for Fall

The Army is preparing for the fall season by stocking its trucks with supplies and equipment necessary for the upcoming term.

The Army is preparing for the fall season by stocking its trucks with supplies and equipment necessary for the upcoming term.

Y-12 Forms Intrahouse Softball Tournament

Y-12 Form has been formed to participate in the Intrahouse Softball Tournament, which will be held on September 10. The team will be composed of members from different classes, and will be coached by a university instructor.
**SIGNAL SCHOOL**

(continued from Page 1)

Note: This group is composed of those students attending our school who are not members of the Signal Corps. The group meets on Wednesday at 10:00 a.m., and officers are elected at this meeting to the Signal Corps. The group meets on the first Monday of each month.
