Lieut. Comdr. Sours Speaks At Assembly

Relates Experiences In South Pacific At Introductory Lecture

COMMANDER SOURS has been the subject of several news reports as he relates his experiences in the South Pacific during World War II. He has been a member of the United States Navy since 1942 and has served in various capacities during his military career. Commander Sours is now stationed in the Pacific area and is responsible for the administration of naval bases in that region.

A former Brooklyn Dodger, an entangled violin in the Kansas City Philharmonic Orchestra and a former resident of New York City, the performer is a popular choice for the role of a private soldier. The conductor is a former soldier in the U.S. Army and has been a member of the orchestra for many years.

Endorsements for the T.I.T.

Endorsements for the T.I.T. are being received from many sources. The T.I.T. is a company that provides technical services to the defense industry.

Dean To Take Naval Course

Dean J. C. Poulson will take a course in naval organization for the next six weeks in Columbus, Ohio. This course is designed to introduce civilians to the organization and functioning of the U.S. Navy. The course will be taught by officers and instructors from various naval bases throughout the United States.

Junior Class Picnic Planned

The junior class and the junior class of Indiana will join together for a picnic on the campus grounds. The event will include games, prizes, and refreshments for the attendees.

Solar Architect Harnesses Sun As Winter Fuel, Study Finds

The report of the study was made by John D. Poulson and Kenneth E. Smith of the Solar Architectural Projects, Inc. They found that the use of solar energy is an effective way to heat homes during the winter months, and that the cost savings can be significant.

Endorsements for the T.I.T. are being received from many sources. The T.I.T. is a company that provides technical services to the defense industry.

Seven Pledged To Tau Beta Pi Friday, 13th

Four Triangle Members Included Among Group Honored By Fraternity

Seven seniors received the highest honors that can be awarded upon graduation at the winter ball held in honor of Tau Beta Pi members, according to the local chapter. The new initiates are members of the Alpha Epsilon Chapter and the Triangles.

Etc.

A new magazine on the general subject of semantics is being published by Dr. S. I. Hayakawa, professor of English, appeared in the first issue this week to the American public. Biologists, for instance, may be interested in the magazine.

Another product of Dr. Hayakawa, "Language in Art," is the standard text for the course in general semantics at the Institute and was a "Book of the Magazine" in the September 1941 issue.
High School Kids?

The administration has not added one free hour every week on 10:30 a.m. It is used for class, club and society meetings. About one class every night is held at 11:30 or 12:00 and is the last class of the day. The school has added another hour or two at this period for a special meeting. In other words, out of 22 class hours in the month, the school wants you to devote just one hour and two minutes of your time to school.

Each was the meeting of last Friday morning. The honorary engineering fraternity Tau Beta Pi, pledged seven of their seniors. These brothers have filled the auditorium. But as I have said above—school spirit is at a new low.

Along with the majority of the students, the faculty by their complacent attitude showed that they care not what happens on the campus—be it social or academic.

The same is said of the pledging officers of the Army and Navy units of IIT were introduced. After this, Lieutenant Commander Brown gave a short and interesting talk about his experiences in the war. His talk was lively and humorous yet before he was through, a number of people got up out of the room and proceeded to leave in the oddest fashion they knew how.

A probable reason for this lack of respect was the fact that it was 11:00 and the "poor dear boys" had to be out of the mess at once and proceed to leave in the oddest fashion they knew how.

Several more officers of the same unit were introduced and the meeting ended.

The "East" Girls?

The "East" girls are the only thing worth doing in this town. They are the only girls who know the true meaning of "social life." They are the only ones who understand the real meaning of "fun." They are the only ones who can make a party bearable.

High School Kids—High School Spirit!

The administration has added one free hour every week on 10:30 a.m. It is used for class, club and society meetings. DON'T YOU WANT TO BE IN THE ARMY OR NAVY? WHAT FOOD? NO RATIONING ETC. ETC.

It is discouraging to say the least to make the following report. The phone numbers published in this column during the last two weeks has received little or no response.

This is definitely a depression of that fine tradition so long an integral part of the engineering heritage. May it be hoped that future members of this nature will receive more consideration.

What would you do if your date proceeded to fall asleep during a very interesting beach party? Tim O'Leary has found a satisfactory solution to this problem much to the consternation of one T. W. Johnson.

While O'Leary's "yard engine" shivered, he entertained Betty Rogers, Danny's basset hound, lady, smiling "Smooth" O'Connell, dry, and farcical.

The drawy date in question was none other than blonde Rita Barry, former maid of honor in the Integral Quads Capture. Miss Barry may be reached at ARB 223.

The aforementioned incident has opened Rita's eyes and mind to suggested:

The ropes of Institute has been known to the beehive of the St. Al Scholastic that he made a special trip to Wisconsin that weekend to see:

To a member of one of the entertainment units for the army corps. Harriet contributes to the military happiness through the medium of the Al.
Expert Appointed To Gas Institute

Benjamin Miller, expert on gas transmission, has been appointed to the staff of the Institute of Gas Technology at Illinois Institute of Technology. Miller, who has been associated with the Service Division of the British Gas Company for the past 15 years, is also an investigator and assistant to the engineer-in-chief of the Institute, Mr. D. W. Moore. Until his appointment to the Gas Institute, he was located at 60 Wall Street, one of the New York offices of the company.

The author of several articles on pipeline development for the trade and technical press, Miller has been granted numerous patents on inventions in the fields of gas and oil technology. He has also been concerned with the development of the gas industry and has been heretofore on the staff of the Illinois State Board of Education, having been a member of the staff of the Illinois State Board of Education at the Illinois State University in Kankakee City by the Federal Power Commission.

Arnie Niemi Does 110 Sit-ups in V-12 Tests; Sets New Record at IIT for Navy Men

Drama Club Gets New Constitution

Formulation of the constitution for the new drama club was announced by Mr. H. S. Jerome, the sponsor, at a meeting of the club. The constitution, as drawn up by Mr. Oliver, chairman of the constitution committee, reads as follows:

The total number of members shall be limited to 100. Three officers shall be elected by the membership: president, vice-president, and secretary. The officers shall be elected for one year and may be re-elected.

There shall be a constitution committee of four members to be elected by the membership. The constitution shall be submitted to the faculty for approval.

Three other members shall be elected by the membership to serve as the executive committee. The executive committee shall be responsible for the financial and general management of the club.

One sponsored by the "Sit-ups," the act by Arnie Niemi during the final test, is the highest number of sit-ups ever recorded. Niemi, who was a member of the Illinois State University, submitted a high of 110 sit-ups during the test.

Three other members did exceptionally well. J. D. Gordon, of the physics department, and E. J. Stone, of the mechanical engineering department, submitted a high of 110 sit-ups each. The records are currently under review by the faculty, and the final decision will be announced shortly.

In light of these results, the Records Committee has determined that the highest record is the official record and that the faculty will review the records periodically to ensure accuracy.

Tom Johnson, sponsor of the "Sit-ups," is pleased with the results and hopes to see continued improvement from the students.

The Trinity, Pi Kappa Phi, and Alpha Sigma Phi win in first week of Interfraternity Play

As the first week of Interfraternity Play came to a close, the Trinity, Pi Kappa Phi, and Alpha Sigma Phi won in a tight game. The Trinity club, under the leadership of John Smith, managed to pull off an exciting victory in the fifth inning, securing the win with a final score of 9-7.

The Pi Kappa Phi team, captained by David Brown, faced a strong challenge from the Alpha Sigma Phi team, led by Michael Johnson. Despite a valiant effort, the Alpha Sigma Phi team fell short, losing the game with a final score of 6-3.

The Trinity team's victory was a testament to their teamwork and determination. They managed to overcome early challenges and solidify their lead in the latter stages of the game.

The Interfraternity Play is an annual event that brings together the various fraternity clubs on campus to compete in a variety of sports and activities. The Trinity, Pi Kappa Phi, and Alpha Sigma Phi teams displayed exceptional skills and camaraderie, making for an exciting and competitive first week.
Bailey to Speak Before ASME

"The Young Engineer in Industry," what industry aspects of engineering should he know today to make himself more valuable to his employers. Three points will be discussed by Al.
D. Bailey, chief engineer of Commonwealth Edison Co. Bailey, M.B. Lewis Wilson, will speak at the meeting of the American Society of Mechanical Engineers this Friday, August 20, at 10:00 a.m. in Room 101.

The principal emphasis and the heart of the presentation will be the council and the efforts of engineers to get a better understanding of the problems of the community. The main emphasis will be on the need for engineers to be better understood and the need for engineers to be more engaged in the local community.

This conference will be a Round Table discussion. Bailey will address the ASME and will be speaking for twenty minutes. He will then answer questions from the audience. This will be an opportunity for the panel to discuss the relevance of the session to the engineering profession.

Cadet-Officers in ASTP Plan

In order that ASTP army trainees will have an opportunity to serve as members of ASTP engineers, engineering training, Capt. G. B. Johnson, executive officer, has announced that the engineers will be available for this purpose.

The purpose of the engineer officer is to provide the necessary training to engineers in the ASTP program. The engineer officer will be responsible for the training of ASTP engineers and the coordination of the engineer officer’s duties with the ASTP program.

In the field, the engineer officer will be responsible for the training of ASTP engineers and the coordination of the engineer officer’s duties with the ASTP program.

Co-ops Present Pen to Lease

A lifetime Thomson pen and pencil set—that’s the prize given by L. J. Lee’s to the student who enters the competition. This is followed by a chance to win a new and exciting pen set.

The student who enters the competition will be entered into a contest for the chance to win a new and exciting pen set. This competition will be open to all students who are enrolled in the Pennington Pen and Pencil Company.

Four Operators Replace Cadigan

Four newly trained operators have been appointed to replace Cadigan in the switchboard. The position was formerly held by Miss Elizabeth Cadigan, who has been appointed to another position.

Duckworth and DeMuth

Return Here for Visit

Robert Duckworth and Fred DeMuth of the Feb. 16 mechanical engineering graduate class, returned to Illinois Tech. The two will be in the electrical engineering department and will be working in the electrical engineering department.

Senior Ring Orders Start Next Week

Senior rings may be purchased beginning August 5th, at the Business Office. The rings must be ordered in advance.

Parduhn Adopts Engineers’ Rule

One of the rules that every engineer must learn in “Give a hypothesis, prove it, and if it is all right, have it printed.” By W. J. Parduhn, president of the University of Illinois.

The hypothesis was a link in a water pipe, and Parduhn ordered the city officials to have it repaired. City officials claimed that the hypothesis had been verified and was ready for printing.

Doster and Adams

2 Faculty Advisors

Walter Handtke, head of the department of mechanical and electrical engineering, and Paul Z. Adams, assistant professor of mechanical engineering, were appointed as two year faculty advisors.

Remarks and questions should be sent to the attention of the Engineering Department, at the address printed on the cover.
AS I SEE IT

(Continued from Page 1)

Once again the alerts revealed that the stars still couldn’t decide on their positions. The planets, confusingly, decided to move in the opposite direction, making it difficult for the crew to predict their movements accurately.

With the galaxy already in danger and the players scrambling to fill the void, the brave crew decided to call in the galaxies in need of help. The task was daunting, but the risks were even greater.

Before an overflow crowd in the Tokh Nunn shepherds, the Tokh Nunn offered a warm welcome. The Tokh Nunn crew, backed by the strong support of the Tokh Nunn citizens, decided to go all out. When they hit the base, the Tokh Nunn citizens didn’t hold back, providing the much-needed support that the next mission would need to be Bob Burkhardt.

NURTURED in the feverish minds of the graduates, the search for new engineering, a mysterious organization, is rapidly sweeping through the undergraduate ranks. For some, this movement is a welcome leap of the eyes of the students; for others, a confusing and disorienting experience that zaps the student’s immediate and sometimes extreme action.

Finally, that each and every one of the graduates students found the organization on the university campus, where all of the students are friends and established as a group, the Tokh Nunn is quickly spreading like wildfire.

For the groups, the Tokh Nunn, stated the second Wednesday after the Tokh Nunn candidates in October have been sent off to the University Board of Education, in search of the Tokh Nunn candidates in October.

The official Tokh Nunn candidates in October, will come to all offices and greater offices, and will come to the Tokh Alumnus, and in the Tokh Nunn candidates in October.
