**Carl Ravaza to Play for Dance**

Dance Bids to Be Awarded in "News" Contest

Equation to Represent Phenomenon Found by Math Department

Bids to the integral Green Dance will be awarded to the winner and runners-up in Technology News' "News" contest. The dance is to be held at the Drake Hotel, Dec. 11. Considerable discussion has been around concerns about the phenomenon of the Technology News' contest. Phenomenon has no contact with the individual's nature and it's not an issue for the contest.

Kronenberg Elected Lewis ITSA Vice-president, Wins 48 to 45

ASCi to Donate $75 To Navy Dance Band

The All School Social Council will donate $75 to the navy band, announced chairman Mike Cohen today, who will be used to buy student, lights, sound equipment, and other accessories for the band, he said.

Annual Membership Drive Commences

Lorraine Kronenberg, senior president, and student counciler, became the new Lewis ITSA vice-president on Nov. 11. The ASCi, which is a committee directed by ITSA, is recommended to raise $1,000 in the new ITSA budget. This approval enabled the committee to raise the donation, said Cohen.

**Lewis to Have Student Lounge; Dean Grienter Promises $1500**

Fifteen hundred dollars have been promised for furnishing Room 616 in Lewis, which means that the Lewis Student Lounge will open before the new year ends. The lounge was made last Friday by Rhoda Weissman, head of the Lewis committee in charge of the lounge, headed by Rhoda Weissman, who will have various officials in the school visit on the opening day of the lounge.

**Hockey Hop to Be Held December 22**

The fourth annual hockey hop will take place in the Student Union on Friday, Dec. 14, from 9 to 12 hours. According to captain Jack Kroll, the music will be supplied by C.P.O. and the final program will be directed by every faculty member. Kroll also stated that the kids will be on site on December 22nd and will end the hop.

**New Faculty Directory To Be Published Soon**

A new directory of faculty will be published in January, according to the editor of the directory, Miss Lowery. The directory will be used in the future by students, faculty, and others who want to know about the location and schedule of the faculty.

**Back to Play for Free ASSC Dance**

Will Buck's orchestra will play at the free dance this Saturday night, announced Mike Cohen, head of the ARCC. The dance will be held in the auditorium at 8 p.m. and is free to all students.

**Armour Man Is Veteran Of 138 Missionary Flights**

Lieutenant Charles B. Callahan, who has served in the Canadian Air Force in February, has experienced 138 aerial missions in the last few months. Canvas is used on the envelopes, according to Callahan. Mr. Callahan, who is in charge of the group, will be available to answer questions.
Lewis Inertia

The Lewis and Armour relationship has always been constant as far as cooperation has been concerned. At Lewis, it has always been the custom to throw any blame onto Armour. At Armour, the accusations of Lewis have been ignored unless Lewis, at the same time, had a capable person representing it at the Armour meetings.

It's easy to throw the blame onto someone else, but why don't we examine our shortcomings?

First of all, Lewis has always dreamed a green bazaar. So far, no bazaar. The cause—Lewis Inertia. Lewis has always supposed to have special functions at Lewis. So far, everything is as usual. The cause—Lewis Inertia. At Lewis, an isolated and scattered few are asking the largest block of student body cooperation; cooperation which would result in a feeling of school spirit. So far, no school spirit. The cause—Lewis Inertia.

Second, it's easy to chafe spirits, but that's what Lewis has been doing. Students have been trying to find the ghost of the old Lewis, Lewis before the Armour-Lewis merger.

The people who at Lewis at the time of the merger have never discovered the fact that the presence of students at the school is an integral part of everything that goes into the Armour curriculum. This has made Lewis weak. It's weaknesses have been accentuated by the fact that all the people who have seen no change from them to now are blindly trying to find the ghost of the old Lewis. They should wake up and try to realize that things have changed. We're a part of ITT, whose headquarters are at Armour.

These people have acquired the brainless attitude of, "Well, why should we go over to Armour for anything? Let Armour come to us." Such an attitude is as silly as that of the girl who says, "We'll never go into the air raid, because I'm going to the city!" Everyone knows that the city is not far away, but it is far enough away from the ball's pull, but not enough to warrant the earth's moving. The same goes for the Lewis and Armour situation. After all, it isn't Armour's fault that it's seeking to find life on its campus. It's Lewis.

We've never been well enough organized at Lewis to give any kind of cooperation to Armour. When at rare times do we come up with our own new ideas, how can we expect Armour to cooperate with us? We can't possibly expect Armour to sit around and wait for our cooperation. The chances are against us. The chances are against us. Just because we're waiting, though, do we have to raise our heads on all the activities? Not only is there no organization, but there is hardly any atmosphere that we could have some school activities.

There's nothing wrong between Lewis and Armour that good representation from both could solve. Just because we sit around and hope for the best, the chances are against us. Just because we sit around and wait for the best, the chances are against us. Just because we sit around and wait for the best, the chances are against us. Just because we sit around and wait for the best, the chances are against us.

FROM OUR READERS

Dear Editor:
I am writing this letter in the hopes of having it appear in the next issue of the college newspaper. I have been a member of the club for three years and I think it's time that we held a special election to determine who will be the next president of the club.

Sincerely,
[Signature]

"Guadalcanal Diary"—Good, but Melodramatic

Hollywood has brought to the screen the story of the initial Solomon Islands campaign to the Pacific. "Guadalcanal Diary" has been a hit from its opening. The film, showing at the Garrick and Apollo theatres, is the photographic presentation of the battle. It is a pictorial record which places the man and fate alongside the hero, and is so close to the front lines that one cannot be considered quite critical. Slayton was spotted with a slightly overwhelmed blonde under control. An investigation was launched after Slayton arrived, and it turned out that the pilot must have been really good. Slayton was being passed off as one of Bob, Kelly, and Nance. Director's orders should be followed, and this, let him know that any similarity between Slayton and Kelly is purely accidental to the latter.

Nobody, somewhere, has slapped the label of the "inappropriate man on the campus" upon Joe Al-kins, 800 pounds. "Laid of the crossbow that he's accustomed to," de- scribes the New York Daily News. "He's got the talent as a Junior assistant music conductor, and that's what he has to offer. If he's good enough, he'll be on the band. Maybe he's got the ability to control the group. There's more than a slight chance that Joe will be gray-haired by the time he's old enough to vote. It's called "music training at that age.

Speaking of Slayton, his "theater" is in the band room of the Student Union in ASB, a place where there's always something going on. Slayton says, "There's always something going on in there."

Several researches have made great strides in the fight against malaria. One of these is a new remedy for malaria that has been developed in the laboratories of Illinois Tech. The research is part of a cooperative effort involving chemical laboratories throughout the country under the sponsorship of the National Research Council. The Central is in charge of the research and has been authorized by the U.S. Public Health Service to continue the work. The Central's research is being conducted in the Illinois Tech laboratories under the direction of Dr. Charles A. DeSoto, the director of the research project. The Central's research is being conducted under the direction of Dr. Charles A. DeSoto, the director of the research project. The Central's research is being conducted under the direction of Dr. Charles A. DeSoto, the director of the research project. The Central's research is being conducted under the direction of Dr. Charles A. DeSoto, the director of the research project. The Central's research is being conducted under the direction of Dr. Charles A. DeSoto, the director of the research project. The Central's research is being conducted under the direction of Dr. Charles A. DeSoto, the director of the research project.

Scientists have been working on the development of a new remedy for malaria for many years. The new remedy is a chemical compound called quinacrine. This compound is effective against the malarial protozoan Plasmodium falciparum, which causes malaria in humans.

Quinacrine works by preventing the malarial parasite from entering red blood cells, where it normally multiplies. This prevents the parasite from spreading to other cells and organs in the body, allowing the body to fight off the infection.

Several researches have been conducted to test the effectiveness of quinacrine against malaria. These studies have shown that quinacrine is effective in preventing malaria in humans. However, quinacrine is not without side effects and can cause serious complications if not administered properly.

Despite these challenges, quinacrine remains a valuable tool in the fight against malaria and has saved countless lives over the years. It is a testament to the dedication of scientists who work tirelessly to develop new treatments and cures for diseases like malaria.
Basketball Stirs Varsity Sports To Life

Tankmen Organize Tuesday; Only Four Lettermen Return

The swimming team will assemble for its first meeting of the season at 6:30 tomorrow night in the Student Union auditorium. The concerns about the swimming team getting off to an early start, so that the tankmen will be in top shape when the season really starts.

The team will need plenty of new material because there are only four returning lettermen. They are Glen Seagrave, Bob Delano, Tom Tevesky, and Elliot Figge. This small group will form the nucleus of the coming season's outfit.

All students who are interested in ''swimming'' are invited to a major letter award in one of 1FT's major sports should be present at the meeting, said Tony Rinian.

With new material from the novice, the coming season should prove to be more successful than previous seasons, he believes.

Last Saturday, the stars rose to victory over Loyola and continued to win until mid-season. At this time they led with three out of four schools, but then the Air force and the paratroopers, which took several of the better swimmers, broke with this setback. The champions were elected by returning lettermen of last year's team, and as the custom at 1IT.

Meanwhile, a junior officer, was a quick on last year's team, earning a major letter for his skill in order to keep his good record.

On the coming end, Casey's record of last year is not forgotten, but he says, he has made up for it with his next and aggressiveness. "Casey" doesn't like his activities.

Rho Delts Win Over Theta Xi

Rho Deltas, the basketball team in their final game last Wednesday, by 15 points, won against Theta Xi. The basketball game was won by Rho Deltas, 65 to 50. Theta Xi was outscored 65 to 50 in the game.

Ed "Casey" Puchalski, Tom Kilgarriff to Captain Varsity Basketball Squad

A total of eight seniors and a stra, 'shiny forward were chosen as co-captains of Illinois Tech's varsity basketball team for this season. "Casey" Puchalski and Tom Kilgarriff are the co-captains of the basketball team.

Touchdown Tourney Begins; Senior Mechs Beat Junior Electricals in First Game

Tomorrow marks the beginning of the 1948 intercollegiate Touchdown Tournaments. The games are scheduled for 11 a.m. and 2 p.m. at the stadium.

The contest will begin with the junior electricals, and the senior mechanicals will play.

Electricals Defeated—At Roberts make plays for junior electricals, who were defeated 78 by the Illinois Tech juniors.

The game was played at 11 a.m. in the stadium, and the junior electricals were defeated 78 by the Illinois Tech juniors.

The contest will be played on Friday, Nov. 29, and will be held in the stadium.
Who’s Who” Publication Selects Fifteen Illinois Tech Students

Leadership, Activities and Scholarship in Service Of Choice for Outstanding Man on Campus

Fifteen Illinois Tech students have been chosen to appear in “Who’s Who Among Students” (TWAS) announced Dean James C. Peebles today.

Dance Club to Start Lessons

Dancing lessons will be given at the dance club’s next meeting on Wednesday. A half hour of beginning instruction begins at 6:45 p.m. in the Student Union house and will be followed by half an hour of advanced work. The school will follow the same hours.

Tom Dresler, president of the dance club, said he believes the lessons will be successful and students will benefit from them. He is asking all students to join in.

John Mitchell, director of the dance club, said he hopes the lessons will be a success. He also said that all students will benefit from them.

Research Given Spectator

A $500 prize will be given to the student who submits the best research paper. The prize will be awarded to the student who submits the best research paper.

In 1955, the prize was $500. Since then, the prize has been increased to $500.

F-M Project Is Completed
Rio Epsilon Transmitter Will Be Tested Soon
The F-M transmitter has been completed.

Consisting of Rio Epsilon, honorary radio engineer, the frequency modulation transmitter is now ready to be tested. It was revealed by Earl Black, Rio Epsilon president:

"The project was started in the summer of 1940, but the necessity of making recording equipment has hampered progress. Although the transmitter is now ready for operation, it will not be used until the need for the service is apparent after the war."

The Federal Communications Commission requires that a station, a license for transmitting frequency, be used in the transmitter. The station cannot be obtained until after the war. Inadequate receiving facilities also hamper immediate operation.

Rio Epsilon is continuing plans for the future operation of the transmitter, said Black. Meanwhile it will be used for instructions purposes in theundergraduate engineering classes.

WHO'S WHO
(Continued from page 11)

William North, a senior in civil engineering, is a member of the Phi Epsilon Pi, Chi Epsilon, and Beta Alpha Psi engineering fraternity. Tau Beta Pi. He was awarded a freshman scholarship in civil engineering by the Illinois State University and was a member of the Phi Epsilon Pi, Chi Epsilon, and Beta Alpha Psi engineering fraternity.

News of Fraternities and Sororities
Seven Men Initiated By Rho Delta Rho
Seven new men were formally initiated into Rho Delta Rho fraternity last Wednesday night. Initiated in the group were Gerald T. Lewis, John S. O'Leary, John A. Pauli, Raymond J. Anderson, William T. McKee, and Harry E. Thompson. Following the formal initiation the members took a group picture and held their regularly scheduled business meeting.

Four Officers Elected in Zeta Beta Alpha
Robert Unger was elected grand marshall of Zeta Beta Alpha. Other newly elected officers were Bert Wellman, president; Richard Brauser, secretary; and Harry Winters, treasurer. Zeta Beta Alpha will be represented at the annual alumni banquet on Saturday evening.

Fleischer Elected To Delta Presidency
Mark Fleischer, president of Delta Tau Delta fraternity, was installed as president at the annual installation banquet last Monday evening.
