BY HAROLD BURKART
THE MOST magnesium poling station
on the local scene occurred in
the illinois Institute of Technology
on April 28. The station, which
has been at the bottom of a mud
looking plot to become another
portion of the TIIT.

The only old-like bit that all poten-
tial students in general, was the
stinging against him, but he also
finished the ballots and later came
the TIIT office where he supervised
the counting of the vote.

Both regulars and non-regulars
are absolutely intolerable especially
at a tech party where a rigid code
prevails as at any.

THE SENIOR electronics have had
a rather unpleasant experience on
the west end of campus this week.
The men have found that they cannot
afford to go to and from their classes
because of the large number of techs
who continually surround them.
Since all of the fellows concerned
are strict integrators, the whole
situation has been very painful to
them.

We wish the new chemistry
students every bit of success in
their new job. For a number of months
he has been observing the campus
while in class, and we have a
good idea of the true state of
affairs. He has played his part very
well and few people guessed his real
identity.

He has always been very courteous in
the discussion of his duties and will
invariably return to the first floor
if someone just misses the tram.

And we don’t give a damn whether
you go or not. But from now on, the
Lewis building will be on the north
campus.

Lewis Building Moves To Ogden Field
50,000 Needed For Dance Club
Arthur Murray to Be Instructor at Large

Arthur Murray is the new in-
structor of the Dance Club. Begin-
ing this week he will personally
instruct the members, especially
the gals, in all types of dancing.

Lewis Lounge Completed Says Walker
As He Pulls Out His Remaining Hairs

The "Lewis lounge is finally com-
pleted," announced Dr. Louis C.
Walker, and then proceeded to pull
out his remaining hair, one by one.

Particularly amusing at the new
lounge was Jonfie George Wash-
ter, who stated, "That was just a
work week; only yesterday I helped
Dr. Pratitli in a few runs.

Three new bars and over 200
rooms have been installed. It is
estimated, by local statisticians,
that over 40,000 dollars have been
spent, in addition, in the form of
hiring.

As one enters the lounge he will
be greeted by the color changing
on the walls, the maroon beige,
and the deep shades of the various
Chicago pieces to the north.

The recent brown paint
which was used in the north
was from the Armour Institute.

Calling Secretary Knox

An extremely disagreeable situation has come to our attention this week—one which is liable to blacken forever the name of HITE V-12.

We refer, of course, to the incident which occurred last Wednesday, when a wild and unruly group of men menaced their commander, Captain W. A. Hamilton, to the extent of the entire depot Union building. The obvious conclusion is that one of the men—was a minor one that we can scarcely believe that the punishment fitted the crime.

Last week, we criticized and what is probably the most unfortunate part of the incident, occurred at 6:30 that evening, when the entire unit assembled and proceeded to hoot, yell and scream.

As a result of the irreparable damage to both his uniform and dignity, it was necessary for the next steps to be taken immediately.

This lack of respect for constituted authority cannot be tolerated, and we believe that the incident will show more evidence to their new commander, Commander Greer, who is the man of the week.

The problem is that no one will ever discover that their new commander knows all the ropes, and is extremely capable.

Why Babies Are Born

In the past few years we have discovered that the birth of new life is no easy task. Much has been written on the subject, many books have been written, and the general public may be able to understand the process of conception. However, the exact mechanism of conception has not been fully understood until recently.

Recent research has shed light on the process of conception. It is now known that the male sperm cell contains the genetic material necessary for the development of the embryo. The female egg, or ovum, contains the genetic material necessary for the development of the embryo as well. When the sperm fertilizes the egg, the resulting cell is called a zygote. This zygote begins to divide and form a blastocyst, which implants itself in the uterine wall. The blastocyst then develops into an embryo, which eventually becomes a fully formed baby.

Research Reports

Brucy And Herbert Collaborate On Project To Speed Victory

The most startling news to come out of the Institute of Technology recently is the collaborative effort of Dr. Brucy and Dr. Herbert. Their project is expected to speed the end of the war by a factor of 10.

Unfortunately, the details of the project are confidential, but it is believed that the Institute has been able to reduce the time required for the research.

The fundamental unit in the project is a small device that can be used as a high potential device with respect to the rest of the group. A combination of electrical, mechanical, and chemical processes are involved, and the device is basically a high-voltage, high-current machine.

The apparatus has been set up in a special laboratory, and the results are promising.

Surprise, another important discovery which is the artificial production of vitamin C. This was done to take the fun out of having a rabbit.

The management is very sorry that a good Bible story was not included in the previous issue, but we shall substitute an important poem which goes...

I see the pathway there,
When this heart feels so sorry.

But I know what may be met,
When my hands are on the wheel.

And I will go thus...

Dublin Hine (disambiguated)

I love the city of Dublin.

Are you there for what you see?

I love Dublin.

For added enjoyment we also have something for you...

There was a little cat called "Whitey"
Who would eat nothing but milk.
West made a lullaby.

With happy heart she go on her way.

Now see my dear faithful friends,
What I have done is quite startling.

I will bring you to the very heart of the matter.

For this reason I must bring this story to a close.
Marshall Will Be Elected on Friday

The Idaho State will elect the new officers on this Friday. A primary election will be held Wednesday to nominate the candidates who will run in the final election.

To encourage student interest, representatives of the ITSA will also be present during the election. Students will have the opportunity to vote for their preferred candidate on the stepping stone council meeting.

Honorary Council To Plan Activities

A meeting of the Honorary Council will be held at 7:30 p.m. in the Senate Chamber. The following council members will be present: Robert Jones, president of the Student Government Association; Achievement Council; and the ITSA council.

Yosman Dutra Added To ITSA's Ship's Company

The addition of Cormac T. Mullen to the ITSA's ship's company was announced by Ed Schultz, president of the ship's company. Mullen is a junior member of the ITSA council.

Eight Girl Athletes Will Receive Blankets As Reward For Efforts Here

Eight girls participated in the women's track and field championships held at the University of Illinois. They were presented with blankets as a reward for their efforts.

Winston Promoted To Department Head

Winston was promoted to the position of Department Head at the University of Illinois. The promotion comes after a year of outstanding performance.

Radio Club Lectures To Commence

The first lecture of the season will be held at 7:30 p.m. in the Senate Chamber. The lecture will be presented by the Radio Club.

Consolidated Vultures Aircraft To Sponsor Specialized Training Program At Illinois Tech

Consolidated Vultures Aircraft Corporation has sponsored a specialized training program at the University of Illinois. The program is designed to prepare students for careers in the aviation industry.

News of Fraternities and Sororities

Forbearance Party Held by Alpha Lambda Phi

The fraternity held a party for their members. The party was held in the fraternity house and was attended by many members of the University of Illinois.

Eight Men Pledged To Zeta Phi Theta

Seven members have been pledged to Zeta Phi Theta. The pledges are: William B. Wells, Robert E. B. Johnson, Robert N. Kline, Harold C. Kline, William B. Wells, Jr., and Robert A. Wells.

Orrin, Budlholzer Initiated by Triangle

Orrin was initiated into the Sigma Alpha Epsilon fraternity. The initiation ceremony was held in the fraternity house.

SPEE Has its Largest Group at Illinois Tech

SPEE, the Society of Professional Engineers, has its largest group at Illinois Tech. The group is organized to promote professional engineering education.

Schmidt Upholds Illinois Tech at Intramural Swim Meet, Takes First in 40 and 100 Yard Events

John Schmidt won the 40-yard and 100-yard freestyle races in the intramural swim meet. He was the top scorer in both events.

8A's and 4A's Elect Delegates To ITSA

The ITSA held its election this week. The election was attended by many members of the fraternity and sorority community.

9 Offices Filled in Election

Elections were held this week to fill nine positions on the stepping stone council. The positions include: President, Vice President, Secretary, Treasurer, and three members of the stepping stone council.

The authors and publishers of these articles are not represented in this text. The text is a representation of the articles as they appear in the document.
Dean Peckham Excuses Certain Classes for Power Conference

Power and Junior mechanical and senior electrical students were excused for the next ten days during the spring session of the Intercollegiate Power Conference, April 13-19, in order to permit travel to and from the sessions.

The conference will be attended by all Friday and Saturday, the junior and senior students will attend the mid-term examinations, and the seniors will attend the elections the next day. The conference ends on April 19.

Football and baseball teams, however, will also travel to the conference, and the athletic conference will be attended by all senior and junior electrical students.

Dirkeen Is Appointed To IIT Managership

Dirkeen, the first football manager, has been appointed to the position of managership. Dirkeen is a very promising football player and has been a leader in the football team for the past two years.

Caggers To Get Silver Awards

Members of the Illinois Tech's 1946 basketball team will be honored with silver awards for outstanding performance. The awards will be presented at the basketball banquet on April 10.

Navy Band to Play For IIT Dance Club

The navy band will perform for the dance and music club on March 24. The dance is to be held in the Student Union and will be open to all students. The music will be by the navy band and the dance will be open to all.

First and Second Semester Juniors To Battle for Class Athletic Title

The first and second semester juniors will battle for the class athletic title. The competition will be held on March 25 and will consist of a series of physical activities.

Two IIT Men Narrowly Escape Elevated Holdup

Two IIT students narrowly escaped a holdup on the elevated train. They were threatened with a gun and were forced to hand over their money.

APRIL FOOL

The following excerpts are from issues dated April 1 or thereafter—mostly Kentuckiana.

In 1881, major General John A. Dix was sent to the Lewiston, Maine, Fish and Game Department as a hatchery inspector. Dix was not impressed with his assignment and resented the idea of being sent to such a remote and inaccessible place.

Dix, however, had a talent for hatchery work and eventually became one of the most successful hatchery inspectors in the country. He even went on to become the chief of the Fish and Game Department in New York City, a position he held for over 20 years.

On April Fool's Day, Dix was sent back to Lewiston to oversee the hatchery work. Delighted, he promptly sent Dix back to New York City, where he remained until his retirement.

Dix's legacy lives on today as a symbol of the importance of preserving the delicate balance of nature, and he is remembered as a master of hatchery management.

Alfonso Greco Named New Commander Of IIT V-12 Unit

Because of his new appointment as Commander of the IIT V-12 program, Alfonso Greco has been chosen as "Man of the Week."

A brilliant naval officer, Greco succeeded Alphonse D. Dubois as Commander of the V-12 unit. He was promoted to the rank of Commodore and was named Commander of the V-12 unit. His first assignment is to take command of the entire V-12 program.

Greco is a graduate of the United States Naval Academy and has served in various capacities in the navy, including as a pilot and as a fleet officer. He has served on many important committees and has received numerous honors and awards for his service.

Greco is a leader of the V-12 program and has been instrumental in promoting the program's goals and objectives. He is a respected and well-respected figure in the navy and is widely admired by his colleagues and subordinates.

Transportation

The transportation equipment used by the IIT program has long been a sore point, and we are wondering if this new system set up by the corporation of the civil, commercial, and governmental departments will do anything to alleviate the situation.

We understand that the new system of transportation makes use of a new breed of horses and that it has worked very successfully. It is not to be expected that the horses will work as hard as before, but we hope that the new system will help to make transportation easier.

Such is Life

In a column in his paper, the columnist writes:

"What Every Working Girl Should Know" will be the subject of a discussion by Professor Ulysses X. Puffness. This subject is considered of vital importance by the young women who are entering the labor market. The talk will be held on Friday evening at 7:30 in the auditorium of the Female College.

The column also includes a feature on "The Young Women's Employment Bureau," which provides a valuable service to young women seeking employment.

For example, a young woman who is looking for a job will be able to consult the bureau's employment records and find out about available positions in her area.

The column concludes with a final message to young women:

"Remember, girls, life is a game. Play it well, and you will be successful."

Names in Notes

Jim Oldshue and Roger Tate, chemical engineering juniors, are charter members of the newly organized Dyhang Club for tall men on campus. "Hiram Berstein, chairman of the chemistry department, claims to have the largest file of six-footers' pictures. He says his collection is second only to the library's collection in the organic chemistry laboratory."

Booth Lind, president of the IITSA, offered to take the tall men to his home in the country for a weekend of good fun. The offer was accepted, and the men spent the weekend playing baseball and enjoying the outdoors.

Other items of interest include:

- The first official game of the IIT baseball team was scheduled for April 1. The team is composed of both freshmen and sophomores.
- The IITSA has announced that it will hold a spring dance on Saturday night. Tickets are available at the door.
- The IITSA has also organized a weekend trip to Chicago for the students.

Gussbied Columnist

In his column, the columnist writes:

"We have been hearing a lot lately about how the V-12 program is affecting the nation's economy. We are not sure what all the fuss is about, but we believe that the V-12 program is good for the country."

The columnist also discusses the current state of the economy and its impact on the V-12 program.

"The economy is in a state of uncertainty, and the V-12 program is one of the few bright spots in the economy. We believe that the V-12 program will continue to play a vital role in the nation's economy for many years to come."
