10 Men Pledged To Tau Beta Pi
Seven Seniors, Three Juniors Honored Friday

Ten men were pledged to Tau Beta Pi, the national engineering fraternity, at a ceremony held Friday in the Union. The men were selected from 150 students, and the boys were chosen on the basis of scholarship, leadership, and character.

Link Files Include Telephone Numbers Of 360 Dateables

A list of telephone numbers of 360 dateable girls has been compiled by the Link Files organization. The list will be used to link students who are interested in dating.

Dr. G. D. Birkhoff To Speak At Graduation Ceremonies

The keynote speaker for the graduation will be Dr. G. D. Birkhoff, professor of mathematics at the Illinois Institute of Technology. Dr. Birkhoff will speak on "The Role of Mathematics in Modern Science".

Shipyards Now Need Engineers

The U.S. Navy is urgently in need of engineers. The Navy has announced that it will offer good salaries and benefits to anyone who is qualified to work in the field of shipbuilding.

3A's to Hold Farewell Dance

A farewell dance will be held at 3A's on Saturday night. The dance will feature live music and food, and is open to all students.

Grants On Tuition to Be Given Worthy Students: States Head

The trustees of the Illinois Institute of Technology have approved a new policy of granting tuition to worthy students. The policy will be implemented starting next semester.

Beach Party to Be Held by 3A Class

A beach party will be held by the 3A class on Saturday night. The party will feature food, drinks, and music.

Bids to Go On Sale for Senior Farewell

Bids for the senior farewell will go on sale at 1:30 p.m. Thursday in the Union. The cost will be $3.00 per bid.

Students Classified in Limited Service Are Eligible to Apply for Deferment

All students classified in limited service who meet the eligibility requirements are eligible to apply for deferment.

Navy Welfare Fund Now Contains $215

The Navy Welfare Fund has reached $215. All donations are welcome and will be used to support the needs of the service members and their families.

Photography for Integral Begins Today, Appointments Taken in Student Union

Photography for the Integral will begin today. Appointments can be made in the Student Union.

ARF to Open Loop Office This Week

The ARF will open its new office this week. It will be located in the basement of the Student Union.

ARF***

*ARF is the acronym for the American Retailers Foundation.

**Photography for the Integral begins today.

***ARF office will open this week.

Research Reports—Nash Delves Into Stresses Beyond the Elastic Limit

Nash received his BS degree in civil engineering at ITT last February. He is working under the supervision of Dr. Le Van Grillo, head of the structural engineering department at ITT.

The condition of structural members after being stressed beyond their elastic limit is being studied by Nash. He has begun his research in the mechanics of structural engineering for the Chicago Bridge and Iron Company.

It is well known that up to a certain point the elongation of a metal bar is proportional to the stress applied to it. This is the elastic limit of the material. When the load is further increased, the elongation does not increase proportionally to the stress applied to it. This is the yield point of the material.

Many structural and mechanical properties are affected in this region. The yield point is the stress at which the material begins to deform plastically. Once this region is passed, the plastic strain becomes permanent.

A summary of the literature of previous work done in the field of plasticity is being made, and a preliminary study of the fundamental problem is being developed experimentally.
Sports, Honor Board and ITSA Identify Smiling Tom Kilgarrif

An outstanding athlete, and a member of the Honor Board, Junior ITSA Representative A.S. Tom Kilgarrif is one of the handsome, lovable, and lucky campus figures.

Tom's athletic career began as a freshman when he played forward on the Track team. He was second highest scorer and the only freshman basketball player to win a major letter.

One season Tom was selected co-captain of the volleyball team in its history and was the highest scorer again. Crossing his athletic achievements was his election to Honor Board this year.

When the first all-school Honor Board elections were held last semester Tom became one of the few freshman representatives. His faithful service is evidenced by his re-election by the Board this semester. Also, Tom was elected to the post of Junior Representative on the campus council.

Tom News has chiseled Tom as a reporter ever since his second semester. For the past two semesters, he has served as a Copy, Headline, and Rewrite editor and is one of the masters of the sports staff.

Here we go with a new week, new circumstances and some new slay to keep the old Dog from getting the best of us. That is what we have here, just the same old jolts.

Has anyone heard about the poor farm lad that came into the city and fixed himself a job in a girls' clothing store as a perfect jockey, so with this job he was given the easy way to every woman.

The following week the Treasurer ran across a boy who was busy racing anywhere and there, and asked him why he didn't come around on payday for his check. Yes, but he was not interested. He had no check to show and was not interested in one.

Starry Night No. 1.

Watched something which if you look at long enough, it will be too late to do what you were going to do before you looked at it.

Phrenology: How do we get to know people? Answers: It's lining up, and you wouldn't want to get your new room until next week? Why?

I can read you like a book, but don't. Don't want to think the pages.

Note to those bewitched followers: How sweet the girl, How true, How brave. Who can kiss her man, When he needs a shave.

I see "Morty, Murphy," called a Negro to his little boy.

"A big student, by the name of him, "surely you mean Murphy," he said. "Who?"

"His full name is Murphy." "What ever made you call him Murphy?"

"I don't know what his name's till one day I hear two gentlemen talking or me and they say that Murphy was the wild puppy. Well, he's boy's puppy was always wilder than his boy.""}

They were dancing together. The soldier was ten feet high.

"You think that any time when I hear two gentlemen talking or me and they say that Murphy was the wild puppy. Well, he's boy's puppy was always wilder than his boy."

Boogie Woogie: I see one of the many ITSA students who were unfortunately enough to miss Prof. S. I. Hayacinth's lecture on Boogie Woogie.

From the comments voiced by those attending the lecture, it is not only on Prof. Hayacinth, but also on his colleague Jim Wagner, that I am anxious waiting to hear him again, during the day. I am sure I shall speak for many.

Elevators:

The other day I noticed that some ITSA students were opening the doors to the elevator by putting their fingers through the opening, rather than slamming the doors back and forth.

Apparently these men feel that they are taking advantage of people with a great deal of mechanical ability to push doors during force by fingers, but they lose control of the most important part of the machine - that they are being in college and supposed to show some signs of intelligence.

The simplest thing to realize that what they are doing may not only cause embarrassment to themselves, but to innocent persons.

Are we, in an institute of higher learning, to be all back and forth? Do you think to uphold the standard of the school? If we can use this sort of trickery, in our daily duty, to reveal fluffs in people in unimportant terms that we are contributing to the ITSA and for other students.

Where Credit is Due:

I believe that credit should be given where it is due. I am referring to the maintenance department.

One of the biggest jobs on the campus is to maintain the campus in a condition that will make the student body proud of its campus. This job is not only the responsibility of the maintenance department, but of all students in the school.

Tom was in the rear of the line behind the cleaning crew.

"I'm sure I'll get there," he said.

"Well," he said, "I've been a hallman in Brooklyn and will not let it be said that I will not be here at all times by this department.

The writer is referring to the recent improvement in the maintenance department of the ITSA and for other students.

Bernard Goodman, Varsity Crew, freshman, was one of the many athletes who have been injured during the year. He was discharged from the hospital after a week's treatment.

Tom Kilgarrif, junior, is one of the outstanding athletes on the track team. He has been a consistent performer throughout the year and is expected to be a valuable asset to the team in the upcoming meets.

The men of DePaul University drove the female members of their newspaper staff away and put out their own traditional "be-man" addition recently.

Names in Notes

BERNARD GOODMAN is the only student majoring in the field of medicine.

CLARENCE SIKORSKI, freshman ME, once took a bicycle trip in which he traveled through six states.... The oldest student enrolled in the engineering department is JOHN HIRAMOTO, 21.

THOMAS HUNTER, an instructor in three different departments, is a member of the Firemen's Athletic Association, and fire protection engineering courses.

DONALD RAPPORT, freshman ENG, freshman in the Department of Physics, is also an expert on the fine arts.

Good Techmen:

The techmen of the Technology News have finally banned the given name 'Tom Kilgarrif' from the faculty list.

It is our understanding that any student who wishes to be known by this name must have it verified by the administration.

Eric Rabin, a member of the editorial staff, has been named as one of the outstanding writers on the campus.
Junior Week Sports Headed by Decathlon and 5 Softball Games

19 Compete in IIT's Decathlon
Gavin, Pappas, Homann
Pospisil Garners Honors
Ten entries are the result of the seventh annual decathlon, junior sports event of Junior Week, won by Jim Pappas, Robert Homann, and John Pospisil in the senior, junior, and freshman sections, respectively.

A total of 19 men competed in the event, each entering in four of the nine events of the meet.

One of the many trophies of the intra-mural department is the third place position, where Pospisil won the event.

The entry of Bob Homann, a member of the Tech baseball team, came in first, followed by John Pospisil and Jim Pappas.

2 Games Set For Ball Team
Illinois Tech's baseball team has two games on its schedule for this week, playing against St. Mary's on Wednesday and the University of Illinois on Saturday at 2 p.m.

The game on Wednesday is the first of three against the Maharishi Mountain team, while the game on Saturday is the third game of the season.

Senior Softball Team Wins Class Title; Whips Faculty 16-4
The senior softball team proved itself to be the class champion by beating the sophomores 5 to 2 and the freshmen 12-8.

The game was highlighted by the appearance of Jim Pappas, who pitched a no-hitter in the faculty lineup during the first inning after his team had retired the first two batters. The game ended in the sixth inning with Pappas on the mound for all nine innings.

Rain Halts IM Softball Race
The only event of the intra-mural softball tournament last week was the first game played by the juniors, who were never able to complete their game due to the rain.

The game was scheduled to be played on Wednesday, but was postponed due to weather conditions.

3A Bowlers Defeat First Term Juniors
The second term junior boys defeated the first term junior boys 25-23 in bowling last week. The game was played at the Uptown bowl, which was the site of the annual junior bowling tournament.

The junior boys defeated the first term junior boys in the first round of the tournament, with a score of 27-21. The junior boys won the championship game, with a score of 30-25.

Schedule for Integral Photos

Visual Education Lacks Operators

The visual education department is sending out a distress call to all nation picture ponders. Movie producers operators are urgently needed to replace men going into the armed services.

Operators work a part-time basis at any time suited to their convenience. All interested should apply at the office at 43 W. 13th St.

Tuition (Continued from Page 1)

Athletics including the intercollegiate program, intramural clubs, and three-student activities which operate under faculty direction will be removed from the general funds of the Institute. For example, the budget of the Department of Physical Education will include all salaries for instructors and equipment and all the expenses incident to the athletic programs.

The Illini Student Association will continue its jurisdiction over student government, student publications and those activities which are essentially student controlled. The Institute will for all purposes appropriate to the Student Association $500 per student per term to finance these activities. This allocation may be changed from time to time as special conditions require.

The Student Association Board will be responsible for the administration of this fund under the guidance of the Treasurer. The present reserve funds of the ITA will remain under the jurisdiction of the Student Association Board.

In a similar way, the operating function of the Student Union and Student Lounge will be broadened by the Institute from its general funds. Operating policies will have to be set by the Student Union Board of Council and the Student Finance Committee.

As a matter of fact, so stringent are the present regulations that I don’t have a leg to stand on, especially now that the twelfth week is past. Unless a student is a Junior graduate, I can do nothing now when he reserves his induction order.

I'll have to get the men now leaving school by a transfer of your order and a copy of your high school report, and if you come from a technical high school, a letter of recommendation from the president of your school. You should also be able to obtain these from Dr. W. R. Krathoff.

The record of the men now leaving school is to take you to the draft board, where you can ask for another examination. Explain that your engineering training in mathematics, physics, and chemistry will be of more value to the Navy in some specialized field than to the Army as an infantryman, concluded Schoenemer.

For the best girl friend—

Junior Week Festivities Go Off In Traditional Manner

With an old-time fervor not seen in two years, another Junior Week was successfully closed last Friday. Marbled by frequent inter-class clashes and co-panning incidents, the planned social activities were carried on as smoothly as possible.

The only serious part of the week's activities included the Town Hall Plowing and a Jazz Band concert. The latter program was the Tau Beta Pi Musical Review featuring student bands under the direction of members of the band. A New Orleans jazz band was engaged to furnish the music, and the program included selections from various sources.

Leonard Brown, Bill Woods Win Board Growing Contest

During three weeks of growing, two kegs of board grew from one keg under their care. The kegs were awarded to the winning students. The judges were Theodore Leland, Robert M. Price, and Kenneth H. Price.

Brown, Leonard, junior in electrical engineering, was adjudged the winner of the most beautiful board. He was awarded an antique monochrome television set. Woods, junior physics major, had the most longest lasting appearance. His prize was a partying trip with the judges to a bowling alley.

Out of 12 original registrants, only three men survived to participate in the judging. Dr. William C. Smith and Dr. Dudley Jacob, technical Secretaries, and Leonard Marlin Roberts Misch acted as the judges.

Don Slayer Wins Pie Eating Contest in Only 65 Seconds

Both men were entered in the contest, with the judges watching the progress. The first man to finish the entire pie was declared the winner. The pie-eating contest was won by Don Slayer, who finished his pie in 65 seconds.

Other events were played by the Junior Chemists, who performed a watermelon eating contest, and the Junior Chemists, who performed a "Cooking Contest." The Junior Chemists were awarded for their efforts.

Froshmen Pull Through in Mad in War Ball

The froshmen defeated the freshmen in a game of war on an outside court. The war was fairly evenly balanced as far as the number of men was concerned. There was an unexpected surprise, however, as the sophomores won.

The game was played with the use of dices on a court which is located between the main building and the library. After the first round the game turned into a tie, and the final score was 3 to 3.

Sophomores Outlast Froshmen in 29 Man Relay

The Sophomore-sophomore relay of Junior Week was brought to an end by the sophomores, who took victory in the relay. The event was run on Friday afternoon, and was the highlight of the day.

The event was considered as a test of the athletes' endurance and speed, with the relay being divided into three sections. The first section consisted of a 1,000-yard dash, the second section a 100-yard dash, and the third section a 400-yard dash.

Your help really counts
when you're a WAC!

say America's college girls

Medical Arts Guild to Present Movie

"Pathways of Thought," an educational film about medical arts, will be featured at today's meeting of the Medical Arts Guild. Dr. Alvan H. Winkelshick, instructor of biology, will present a summary of the film.

"Your help really counts when you're a WAC!" is a slogan used by America's college girls, and it's true.
