Research Foundation to Make Technological Survey of Mexico

The Banco de Mexico has requested the Armour Research Foundation to make an intensive technological survey of the education and employment of Mexico. This has just been announced by Harold Vagabon, director of the Foundation.

The study will be headed by Dr. Francis Ong, associate director of the Foundation. The project is in charge of the Armour Research Foundation in Chicago. The purpose of the survey is to obtain data on the educational and employment opportunities in Mexico for American students.

"Phinal Plung" Sales Continue

Sales of the "Phinal Plung" will continue to be sold at the Student Office all week and will probably be sold out by the end of the week, according to J. A. George Schumacher, chairman of the ARF Club.

The ARF Club will be at the Student Office all week and will be open from 8 a.m. to 9 p.m. and on Saturday from 8 a.m. to 12 p.m. The ARF Club will also be at the Student Office on Sunday from 8 a.m. to 12 p.m.

The ARF Club will be at the Student Office on Sunday from 8 a.m. to 12 p.m.

EE Conference Attracts 2500

The Federation of Electrical Engineering Societies will hold its annual conference at the Armour Institute of Technology on Thursday, Friday, and Saturday.

Many of the guests will be from the technical schools of the United States and Canada. The conference will be held in cooperation with the Armour Institute of Technology and the Chicago Board of Education.

Freshman Elect 2 New Class Officers

Vladimir C. Stepanoff has been elected president and vice-president of the Armour Institute of Technology Class of 1936.

The new officers are Vladimir C. Stepanoff, president, and Robert E. Johnson, vice-president.

Faculty Will Honor Retiring Teachers

The Armour Institute of Technology will hold a dinner in honor of the retiring faculty members this evening in the Armour Institute of Technology dining room.

The dinner will be attended by all the retiring faculty members and their families.

Senior Farewell Is Enforced by Games

The Armour Institute of Technology will hold a farewell party for the graduating seniors this evening in the Armour Institute of Technology dining room.

The party will be attended by all the seniors and their families.

Commencement Tickets Can Be Obtained Starting Wednesday

Tickets for commencement will be available starting Wednesday at the Armour Institute of Technology. The tickets will be sold at the Armour Institute of Technology ticket office.

IT GETS AWARD ON WEDNESDAY

The Armour Institute of Technology will receive the American Institute of Aeronautics and Astronautics Award on Wednesday at a general assembly.

Attention, IT students: All tickets for the commencement ceremony will be sold on a first-come, first-served basis at the Armour Institute of Technology ticket office.
Switching Professors

Now that the end of the term is approaching, and the class schedules for next semester will soon be published, the opportunity to step out of one’s rut and explore other professors’ courses is more than welcome. Reference is made to the practice of signing up for a class with a particular instructor and then having another class take over the class for the very first day. This is unfair to both the students and to the substitute instructor. Sometimes it is not acceptable, but the students will reward his presence nonetheless.

Certainly, a student has a legitimate complaint to make when he discovers that no matter how carefully he plans his class schedule, in order to avoid the undesirable professors, he is forced to put up with them anyway. Unfair practices such as this are taking the students.

Some changes in class scheduling are perhaps unavoidable, but when it becomes a habit, it should be thoroughly investigated. Consider the case of known in which the professors are switched every term. If you sign up for one professor’s odds are that you will get another instead. Whether or not these changes are deliberate, it would be hard to say, but when it is repeated so often, it necessarily becomes inevitable. Furthermore, it is hard to find a student who is pleased by the change. Most feel that something has been put over on them.

The importance of a proper schedule program. When students plan their class programs for the semester, one of the big items they take into consideration is the professors. Many now plan their courses completely and carefully and try to avoid having a professor whom they know to be incompetent. Imagine the confusion then when they find that undesirable teacher waiting for them in the classroom of the first day of school.

Sometimes it is necessary to make certain changes in the schedule after the first one is posted on the bulletin board. However, there should be a deadline on making these changes, and that deadline should be set before the students start registering. On registration day make sure that the student should be informed of all the changes which have been made in the original schedule. It would not be too late for a student to switch or consider a course which should have been posted on the bulletin board. Students should be allowed to have their programs changed without too much difficulty.

Positive action is expected on these proposals.

The students have suffered too long under the present system. They are desirous of change. It is seriously damaging the reputation of the departments for them to proceed in such orderly fashion.

Man Of The Week

2 Honoraries Claim Hiramoto For Unusual Record and Ability

Both a sportman and a scholar, John Hiramoto, senior civil is the election for this week’s Man of the Week. Hiramoto, the sportsman, establishing another outstanding record for the University, is also a student of uniqueness and ability. He is among the few civil engineering students at the University, and has earned the respect of his fellow students.

Hiramoto, who is a member of the University’s baseball team, has shown a remarkable ability in his studies. He is a member of the American Society of Civil Engineers and has been active in various campus organizations.

In his spare time, Hiramoto enjoys playing tennis and swimming. He is also interested in photography and has won several awards for his work.

The cooperation of the University officials in selecting Hiramoto for this week’s Man of the Week is greatly appreciated.

Technician Talking

Frank Winkler, Director of the News Bureau

To air in Chicago on a radio Monday afternoon and will be heard by American College of the University of Illinois. It was a national conference which should have been held in a similar press event.

The conference was attended by several hundred journalists who were given the opportunity to write for the Technology News readers, but a few articles were written about the importance of the new members of the staff.

In my opinion, there is no such thing as operating in the fields of technology. It seems to be true, but it may be a matter of opinion. More important, however, is the fact that I am one of those who have been working on this new technology.

Pick-up, what is that? There is no such expression in the dictionary. It is a term used by people in the fields of technology and engineering. It seems to be true, but it may be a matter of opinion. More important, however, is the fact that I am one of those who have been working on this new technology.

Chop, chop, chop went the saw! Dig, dig, dig went the shovel. Dirt, dirt, dirt was the word. So let’s start with this carwash refrain.

Our new print, “Anchorage Mirror”, shall be preserved to that good print “Wild Bill” Beshel, who has become a successful carwash owner, yet should be preserved. Little does he know that there are more than 100,000 children in this metropolitan area that are not covered by our prints. It is a fact that a carwash is a valuable part of the community, yet it is also a valuable service to our community.

The next time you go to a carwash, please remember that the people who work there are there to help you. They are there to help you wash your car and to help you enjoy your day. It is important to remember that the carwash is a valuable part of the community and that it is a valuable service to our community. It is important to remember that the carwash is a valuable part of the community and that it is a valuable service to our community.
President JERRY T. HEAD is one of the few men in the country who may telephone President Franklin D. Roosevelt, and speak with the president personally. ... JOHN WILLIAMS, freshman civil, began his college career with a scholarship. However, in two weeks he transferred to IIT on another scholarship. ... CALL HEGSTROM, former freshman and member of the 1933 N.S.C. team, is now in command of a B-24 Liberator bomber, with a crew of ten men. ... DICK LUND, freshman civil, won seven awards in track at Loras Prep. ... JERRY WINTHURIS, freshman civil, was only eleven years old when SOL YANOFSKY was a druggist although he is now studying engineering. ... NORM BODWIN, claims that he gets ten hours sleep every school night, but when he has a test it takes more than five hours over the week-end. ... In a department of a factory employing four hundred girls JERRY SCHNEIDER was the only man.

Since the semester is drawing to a close, I thought it would be interesting to review some of the jokes occurring during my stay here. Hold Fast! Let the thimble go!!

First cow: "Where are the rest of the girls?"
Second cow: "They are over in the other lot having a ball session!"

The slip stick.

The physics building.

Presentation of the Scholastic Award for 1940-41.

V-12.

A/B Howard Grant

When the Sea Raven, a U.S. sub, swam to the surface,2 and steamed into the harbor several days later,8 George Williams, who was then serving as an officer on board, told his friends that he had been operating off the coast of Japan and was on hand for the "big blow-off."

Howard, who entered the navy in February, 1941, and received his engineer's training in San Diego, was transferred to Pearl Harbor, where he served on board the USS Replay, a sub-marine. In October of 1941, the Replay was transferred to the Philippines, and was there when the Jap attacked Pearl Harbor and the Philippines. George Williams was instrumental in evacuating many nurses from Corregidor as a result of the Repose's action.

The Repose departed from Australia where Howard was transferred to the San Francisco. In this last journey, what Howard reveals was the experience of all American men who were trapped on villages. The operation was successfully completed and for this fact, the Sea Raven was again awarded the Presidential Unit citation.

Howard's sub operated out of the Philippines and was the first to arrive at the Marshall Islands, January 2, 1943, when Howard heard that the islands were being occupied by the Japs. On February 10, 1943, the V-1 and entered in George Williams' name.

Howard, who took his "boy's" exam in Newport, Pennsylvania, enlisted in the S.S. "Tiea," which is a "beach mark," in his naval service. After the war, he worked for the Marine Board of the V-12 program until 1944. Howard now lives in the Washington D.C. area.

Grandpa had a diabetic patient, and although put on a diet, she did not keep the game and was churning all the time. After numerous violations, she was sent to the hospital.

Owing to the crowded conditions of the hospital, the only available room was the so-called "theater ward." After she had been there only a few days, her granddaughter paid her a visit and was left in front of the door of her grandmother's room when some visitors walked past.

What are you doing here, little girl?"
"Grandmother," said one of the visitors in astonishment. "What is she doing here?"
"Oh," said the young girl, "she's been cheating again!"

A two-year general returned to camp one evening, couldn't produce his identification card, and was sent back to the city.

The Committee on the "little girl" was seated at the Lady's Entertainment Society meeting. Sister Johnson will still get "Pat, Pat is My Little Dog," accompanied by the minister.

The evening will be held in the main living room of the house. The children will be engaged at their best hour at 6:00 p.m.

A young lady asked a nursing student to marry her immediately following the Sunday morning service. When the time came, the minister said, "Will all those wishing to be united in holy bonds of matrimony please come forward?"

There was a great stir as fifteen women and one man rushed in the door.

The subject of this range was debated with much expression of views by a girl and a young man calling upon her. He insisted that it was "always possible for men and women to get along.

(See SUMMIT on Page 15)
Ringer Champs Finally Emerge
Ted Grabinski, with a 79-hour record at the annual IM tennis tourney, finally won the singles match that the victory made Grabinski the undisputed singles champion of the tourney.

The men's final was played earlier in the week. Tom Gravina and Bob Grabinski defeated Young and Ledwell with a final score of 6-3, 6-4. The victory was a sign of the strength of the tourney.

The tourney will continue on Monday, with the singles final scheduled for the same day.

David Aston Captures IM Tennis Tourny
David Aston defeated John Gravina in the singles final of the IM tennis tourney, winning 6-3, 6-4.

Aston's victory was a sign of the strength of the tourney. The tourney will continue on Monday, with the singles final scheduled for the same day.
Co-op Blanks Must Be Returned Today

All students who expect to buy next semester's blanks at the Co-op Bookstore should fill out and return their textbook order forms by noon Monday, according to Robert Popp, Champaign. The forms may be handed in at the information office on the first floor of Main, along with those who did not obtain copies of the questionnaires last Friday will be too late.

Although an accuracy survey would be ideal, said A. J. Lose, president of Engineers Co-op, "If we are still within the books by the course's primary meeting, there's no point in the books, and we will not make copies." The board of directors recently elected Don Allron and Peter J. D pills as the Engineering Co-op representative at the Continental Cooperative Congress to be held this week at the Marriott Hotel. Professor S. H. Hasey, head of advertising and member of the board of directors of the Co-op, will be on a panel discussing "Professional Educational Future: A Challenge to Campus Cooperatives".

A complete program for the entire week, Sunday through Thursday, has been planned by the Cooperative Institute of U.S.A. and its national cooperative groups. One of the largest groups is the two IIT representatives who will attend the Congress, Wednesday at which William Arnold, President of the American Institute of Chemical Engineers, will speak.

Phi Lambda Upsilon Elects 4 Officers

George Wolfisen was elected president of Phi Lambda Upsilon at the meeting of the honorary fraternity last Tuesday.

Other officers elected are: Herman Neman, vice-president; Karl Hiltz, secretary-treasurer; and Professor Hugh McGill, faculty advisor. Professor Vanhorne, the present advisor, is leaving IIT at the end of the semester to go into industry.

Professor Wall Receives Gift From NU Seminar

Professor E. R. W. Wall of the mathematics department was guest speaker at the first meeting of T. L. Hiltz's Collected Works seminar, the 18th of which was held Tuesday at Northwestern University.

Well known to establish the forum which was founded to help students interested in mathematics, the Wall seminar was established at Northwestern University.

Fraternities

Triagle Dances and Bowling During Week

An informal dance at the Skyline Athletic Club on Saturday evening, September 30 started off a busy week for the Triangle Fraternity.

This dance was followed by a bowling tournament on Wednesday, October 4. Following the bowling, a tri-meet inter-fraternity meeting. Bill Atkinson was elected as president of Pi Gamma Phi. Many students of Illinois Tech and members of the fraternity were present. A new member of the IIT unit, who is now at Great Lakes, won the tournament.

Alpha Sigma Phi Will Pledge 12 Saturday

Twenty pledges will be initiated into the fraternity this Saturday. Following the formal initiation there will be a reception for the new members at the fraternity house. According to A. J. Lose, president of Engineers Co-op, there should be 18 new members, but the number was to be determined by the following meeting.

Research: More than 200 students and faculty members are involved in research projects at IIT. The projects are supported by federal grants and private donations.

Brief History of Seven Illinois Tech Departmental Organizations Is Given

Oldest departmental organization on the IIT campus is the American Society of Mechanical Engineers. The organization was founded in 1910 and in 1940 combined with the Lewis branch to become the American Society of Mechanical Engineers.

Tau Beta Pi to Initiate 8 New Men Wednesday

Tau Beta Pi, all engineering honorary, will hold its initiation Wednesday evening at the Johnson Hotel.

The eight men to be initiated are: Karl Hiltz, chairman, A. J. Lose, vice-chairman, F. J. Allen, secretary-treasurer, J. R. M. Anderson, secretary-treasurer, F. J. Allen, secretary-treasurer, and Professor H. H. Neman. These men were elected to their positions at the regular meeting of the society.

Pi Kappa Phi, newly elected, will hold its initiation Saturday evening.

Rho Epsilon Pledges

A Phi Rho Epsilon pledge, who has recently been initiated, will be present.

Safety Conferences to Be Directed by Illinois Tech and National Safety Council

Discussions and demonstrations of the latest practices in the organization and administration of local safety council and similar safety organizations will be directed by Illinois Tech and the National Safety Council, according to John Yelton, director. The conferences will be conducted by experienced instructors, safety managers, and National Safety Council department heads.

LETTERS

Waves should be shipped out of school territories in the St. Louis area.

Do not expect this to help you get to the dentist. In fact, it would be too much to expect that it be easy to find a dentist who would accept the sweep. We doubt that a dentist would be willing to get the sweep, at least because of the danger of the process. We would also have to ask where the dentist would be willing to do the work. The dentist would have to be willing to do the work.

There is still no indication that this is the way to go.

Winning Beauties Decided in Technology News Contest

Contest Runner-Up

Destiny Smith

Is Top Choice

Honorable Mention

Given to Runners-up

By the unanimous vote of the judges, Destiny Smith, an
art student at Illinois Institute of Technology, was awarded the top prize in the
Technology News contest, which was judged by a panel of judges.

SECOND CHOICE—Hannah Johnson, entered by A/S Ed. Q. of
Quarterly 7, and Brad Smith, entered by A/S Ed. Q. of Quarterly 7.

Former Members of Ship's Company

Tell of Experiences Since Departure

Three letters from former members of the Illinois Tech
Y-2 ship's company were received last week by Lieut. W. M. A.,
commanding officer. They were those of John
Shaw, president, George W. Wise, vice-president, and Raymond
Leichtman, secretary, 1st Class.

Dance Club Finishes Successful Season

Approximately 1500 girls, in an average of 100 per group, have
attended this season's meetings of the Dance Club. This is about
the same number as last season. The club was organized by
Lieut. W. M. A., and it has been a success.

ESMWT Now Training

1025 men and women are now enrolled in this season's
courses being offered by the ESMWT according to the
weekly schedule. In addition another 100 are taking courses
in radio and electronics.

NAVAL NOTATIONS

Quarters #1

The nation is in this day's news because of the
armistice, signed by Germany and France.

Quarters #2

In the mail today are letters from
friends at home.

Quarters #3

Patriotic songs are sung at the
quartermaster's table.

Quarters #4

The weather is fine, and the
students are out enjoying
themselves.

Quarters #5

A football game is scheduled for
this afternoon.

Quarters #6

The class is studying
Algebra.

Quarters #7

The weather is cold, but
the students are happy.

Quarters #8

The football team is practicing
for the big game.

Quarters #9

The students are preparing
for the examination.

Quarters #10

The weather is nice, and
the students are out
enjoying themselves.

MICA

MICA's special transmitting qualities are highly important
in communications equipment. No equivalent exists, so
its large demands caused a critical shortage.

Serving the Nation in Peace and War

Bell Telephone Laboratories' scientists were assigned the
task of somehow finding more mica. They found it in the
very considerable amounts of raw mica which visual
inspection had rejected. By developing chemical apparatus to test
the two most important electrical properties they increased the
usable amount of mica by half and so increased current
availability of mica to all military needs.

In many such ways the Bell System is serving the nation,
continuing the work of its engineers for dependable
communications.
