Navy Men May Get No Leave

Students Will Get Honor System Book
Man Of The Week

Honor Student Alton Sept of Idaho is "Man of the Week"

A/S Alton E. Sept first came to the Middle West from his native state of Idaho when the navy V-45 program began to look for students from the University of Idaho to IIT in July 1948. He will receive his degree in electrical engineering this month and leave for graduation in November.

Unlike many students today, Alton has long had in mind what his career was to be, and has pursued it. He applied to the best engineering schools available.

Born in Twin Falls, Idaho, two years ago at the University of Kansas, he was the most natural step for him to take toward a career in engineering. Following the war he will work in industry for two years and then, upon his master's degree, he will proceed to graduate work at the University of Oklahoma.

At the University of Oklahoma, he worked on various experiments under the direction of Dr. C. F. H. H. K. and was associated with Dr. E. H. R. S. in the engineering department.

At the University of Oklahoma, he worked on various experiments under the direction of Dr. C. F. H. H. K. and was associated with Dr. E. H. R. S. in the engineering department.

Graduation

With the close of the semester, another group of students will receive their degrees from IIT. This has now become a semester-end procedure, and the thought of graduation in October is no longer unusual.

However, there is one thing which marks out the new graduates. They were the last group to register at IIT in September. That was in September 1941, and the war started right on two months later. Since then, a great many changes have been made in all phases of school life. A far-reaching transition has taken place which permits the 1947 graduating class to really appreciate this. This class lost many more men than the average pensioner.

Many of those who were drafted, who were not drafted, and who were not drafted, have remained as V-19 students.

Most of the civilian students can now look forward to good jobs and a successful career.

As a data

Dr. Victor L. Streeter, who holds the post of associate professor of hydrology, is a native of Muncie, Indiana. He graduated from the local high school in 1927, and attended Western State Teachers College, Muncie, Indiana, from 1927 to 1929. In 1931, he received a B.S. in civil engineering from the University of Michigan, Ann Arbor.

Streeter was awarded his bachelor's degree in science in 1942. He then went to the University of Wisconsin, where he was awarded a doctorate in 1943. He then went to the University of California, where he was awarded a doctorate in 1943.

Streeter's research has been in the field of hydrology and water resources. He is a member of the American Geophysical Union and the American Society of Civil Engineers. He is the author of numerous papers on the subject of water resources.

--A.L. W. O.

Harry Foster, chairman of the engineering department, was born in the same state as Alton Sept, and was educated at Texas A&M College and the University of Texas.

His father, Mr. and Mrs. Harry Foster, were both graduates of Texas A&M. He was graduated in 1943 from the University of Texas, and has been associated with the engineering department of the University of Texas since 1943.

Foster's engineering work has been widely published, and his research has been carried on in various fields of engineering.

LETTER OF THE WEEK: Success Host
As the season progresses and winter draws around us, it becomes more and more evident that we are going to have one or two of a time staying as though as I am in a pretty poor system. It is therefore, with some reluctance, that I write to you now.

The thing which makes school somewhat difficult is the fact that everything is not as it appears. It seems to me that the student will be more interested in being a part of the group rather than in the individual things that he is doing. This is illustrated by the fact that during the first semester of the year, the student association met very few times. It has been said that the student association is the backbone of the school. I am afraid that this is not quite true.

Making life in general intolerable for the freshman is the Freshman Assembly. This is a rather militant group of boys who are always looking for something to do. They are always in the class and are always ready to give you a hand. They are always ready to help you if you want them to.

Three in One Day
Three events appeared in Technocracy News which I thought you might like to know about. First, the Freshman Assembly met and voted to increase the size of the Freshman Assembly. This was done because the Freshman Assembly had been too small and had been unable to do anything of any importance. The Freshman Assembly is now composed of five members, and it is hoped that this will enable it to do more effective work.

Second, the Technocracy News was published. This is the first time that the Technocracy News has been published since the last issue. It is hoped that this will enable us to keep up with the news of the school.

Third, the Freshman Assembly voted to increase the size of the Freshman Assembly. This was done because the Freshman Assembly had been too small and had been unable to do anything of any importance. The Freshman Assembly is now composed of five members, and it is hoped that this will enable it to do more effective work.

Alumni Column
The Alumni Column is a feature of The Technocracy News that is published every month. It is designed to keep the alumni up-to-date on the activities of the school. It is hoped that this will enable us to keep up with the news of the school.

Don Slager, a member of the Freshman Assembly, has been appointed assistant editor of Technocracy News. He will be responsible for the Alumni Column, which is a feature of The Technocracy News that is published every month. It is designed to keep the alumni up-to-date on the activities of the school. It is hoped that this will enable us to keep up with the news of the school.

Inquiring Reporter
The Inquiring Reporter is a feature of The Technocracy News that is published every month. It is designed to keep the readers informed on the activities of the school. It is hoped that this will enable us to keep up with the news of the school.

Immediately after the war is over, from the vice, I plan to make an observation about the condition of our nation. I believe it is true that our nation is in a very bad condition, and that we must take steps to improve it.

MARCH 4, 1941 - INQUIRING REPORTER

Varsity Groups To Meet Today

A meeting of all students, both
navy and civilian, interested in
the various athletic and
extracurricular activities of the
school, will be held in the gym
classroom on Thursday at 3:30
p.m. The purpose of the meet
will be to discuss the activities
of the various groups.

Frosh to Play First IM Touchball Game

The first game of the intramural
touchball season will be played
this evening between the Fresh
men and the Sophomores at 3:30
p.m. The game will be played on
the outdoor field, and all students
are encouraged to attend.

Bowling Lists Still Incomplete

The list of students interested in
playing bowling is still incomplete.
Students interested in playing
should see the coach of the
bowling team.

Alpha Sig's Top Pi Kaps 13 to 0

Alpha Sig's Lineplay Holds Pi Kaps Down

The Alpha Sig's defeated the Pi Kaps 13 to 0 in the second round of the
bowling tournament. The Alpha Sig'sLineplay was the key to their victory,
scoring 13 points to Pi Kaps' 0.

Torchbearers

The Torchbearers will be holding
their annual torchlight parade on
Friday evening. Students are
urged to participate in this
traditional event.

Navy Touchball

The Navy Touchball team will be
playing their first game of the
season against the Army Touchball
team on Saturday afternoon.

Frosch

The Frosh are expected to have
their first game of the season on
Friday evening.

Tennis

The tennis team is scheduled
to play their first match of the
season against the Army
Tennis team on Saturday.

Tech Shorts by Tom Kilgarriff

The athletic meeting in the Student Union is the first at
tempt to bring together the best athletes in the school.
This meeting is open to all students, both navy and
civilian, who are interested in participating.

The meeting will be held on Thursday evening.

In the game that was scheduled with Lewis for last Wednesday, the
Lancers were defeated by the
Bluejackets. The Bluejackets
were the clear winners of the game, and their impressive
display of skill and athleticism
won them the victory.

The majority of the teams are
looking forward to the rest of the
season with great excitement.

The next game is scheduled
for Saturday against the
Army team.
Yeomen 1-C Smith, Veteran of 17 Major Battles, Served Aboard "Miracle Ship".

A former member of the crew of the "Miracle Ship", and a veteran of one-hundred years at sea, Yeoman 1-C O. W. Smith has been stationed at Illinois Tech V-12 unit.

New Head of News Bureau Will Teach Journalism Classes

Frank W. Wheeler, assistant director of the News Bureau, will teach the journalism course next semester. All students are eligible to take the beginning course, regardless of their major. In addition, all students majoring in journalism are required to complete the course as a major requirement.

Small Stores To Sell Supplies of Clothing

A small store in the Student Union will be set up to sell small stores of clothing. The store will be open on Thursday and Friday, according to Elementary School Bulletin No. 19.

ASME to Hold Election of Officers This Wednesday

The ASME will hold its annual election of officers this Wednesday in the Union. The new officers will be elected at the meeting, and the results will be announced immediately after the meeting.

Triumph Dinner to Be in Marine Room

The Marine Room of the Edgewater Beach Hotel will be the site of the ASME's annual dinner this Wednesday. The dinner will be followed by a dance.

New Admission Office Created

A new administrative position, that of Director of Admissions, has been created at IIT. Dr. F. H. White, formerly a student at IIT, has been appointed to the position.

IIT Alumni Attend Weekly Luncheon

The alumni luncheon held Thursday afternoon have proved to be a big success. The next lunch will be held at the Alumni Center.

Fraternities

Sorority to Initiate Pledges October 25

The Phi Kappa Phi social fraternity is in the process of initiating new members. The initiation will take place the first week of November.

Inauguration of Six Is Held By Pi Kappa Phi

Three new members were initiated into Pi Kappa Phi this week. The initiation was held in the literature building.
Martin Will Leave At End of Term

During the closing down of the laboratory at the end of term, Martin Will has announced that he will leave Illinois Tech after 4 years as a teaching assistant. He has accepted a position in the chemical engineering department of a well-managed manufacturer of chemicals and is engaged in the design of continuous processes. Shortly before the closing down of the lab, a ceremony was held to present Martin with a retirement gift. A number of his former students and colleagues attended the event to express their appreciation for his dedication and commitment to the field of chemical engineering.

Registration Dates Given in Calendar

The following calendar is for the fall semester of the academic year 1962-1963. Students are encouraged to register early to ensure their availability for the courses they wish to take. The due dates for registration are as follows:

- Sept. 28 – Oct. 1: Registration for entering students
- Oct. 26 – Nov. 1: Registration for returning students
- Nov. 1 – Dec. 1: Registration for new students
- Oct. 26 – Nov. 1: Orientation tests for new students
- Nov. 1 – Dec. 1: Registration for new students
- Dec. 23 – Jan. 2: Mid-Winter recess

Sixth New IE Course to Begin Term

An elective course in valued and unvalued properties of metals will be offered this term by Prof. Joseph R. Martin, head of the department of mechanical engineering. The course will cover basic concepts of materials science, including crystal structure, phase transformations, and mechanical properties of various alloys. The course will meet twice a week for lectures and problem sessions, and will be limited to 25 students.

Pocket Model Wire Recorder Developed

A new pocket-size wire recorder has been developed by Dr. R. S. Martin, head of the department of electrical engineering. This recorder weighs only 9 lb. and can be carried in a pocket. It is powered by a small battery and has a sensitivity of 50 microvolts per inch. The recorder is ideal for field work and can be used to record sounds, such as those produced by geophysical phenomena. The recorder was demonstrated at the annual meeting of the American Geophysical Union in January.

Dripping Water Causes Large Damage to Switchboard, Office, and Stockroom

The news is circulating that a large amount of water has damaged the switchboard, office, and stockroom of the Illinois Institute of Technology. The cause of the damage is believed to be a faulty valve that was left open, allowing water to enter the building. The damage is estimated at $3,000 and is being investigated by the insurance company.

Higher Gifts and Loans for Student Loans

The Illinois Institute of Technology has received a $50,000 gift from the Ford Foundation to be used for student loans. This is in addition to the $100,000 gift received last year. The loans will be made available to students who are unable to pay tuition fees.

Upperclassmen Boat Fresco 19 to 19

The annual Upperclassmen Boat Fresco will be held on Saturday, October 19th. The event will feature a boat parade, music, and dancing. The proceeds from the event will be used to support the Upperclassmen's boat teams.
