Integral Dance Attractions

In A Living Room, Speaker on the stage, and the audience, the dance is a living experience. The dancers move in a rhythmic pattern, guided by the music that accompanies their movements. The room is filled with the energy of the dancers, and the audience is captivated by the performance. This dance is not only a form of art, but also a way of expressing emotions and ideas. The dancers are experts in their craft, and their movements are precise and graceful. The dance is a beautiful way to connect with others and to appreciate the art of dance.
Quick Change Artist

With both conventions over the operators of "Robo-Shove" were more concerned with the business at hand. Of course we've gotten some ideas on how to distribute stuff from the politicians, so we'll turn the hands and start the machines. Down she goes and who'll know who'd hit him nobody knows.

"Hell hath no fury like the wrath of a woman." A George Patrick to his wife, who went up in a fit of anger that statement. George has been in the habit of spending his weekends at the north-west Chicago home of Peggy Shea, a Chicago maid. Last weekend however, he blindly announced that he wouldn't be seeing her for two weeks because his house-maid servant was coming to Chicago. Tavern she displayed all the virtues a woman can have by the combination of swimming, tennis, etc. Certainly she can have no use for them except that they might be a very embarrassing pieces of evidence. (A Bill Stewart take warning from the above.)

Orchids to Maintenance

More than 3,400 jobs will be filled by regular employees and maintenance personnel. This includes the work of all interdepartmental work, and the number of these jobs amounted to more than 

Mr. Parduhn and his staff have had to work day and night to complete their work.

As a result of their efforts, the only area this was practically ready for both the Navy and military units when they came here. Many changes have been made in the armory to accommodate the army units. When the unit left, the building had to be completely restored to its original condition. This involved replacering brick walls and refinishing the entire main floor. The navy also required considerable work when they were first taken over, and at the naval yard three carpenters are occupied in their upkeep.

The maintenance department is continually engaged in keeping the building in shape. During the four years the building has been in operation, approximately 100,000 pieces of shabby fixtures have been replaced, along with 600 pounds of grass seed, 1000 pounds of potting soil, and 500 pounds of peat moss.

Larger construction jobs are given to outside contractors and by the end of the year, work with an estimated value of $34,000 were handled by outside firms.

The maintenance department has given Mr. Parduhn a splendid record of service despite the lack of capable workmen and equipment. As a miliary illustration, there were five hand mowers and a power mower in operation at one time. The power mower is used when two hand mowers are left in operating conditions with one impossible to get.

Because IIT is an engineering college, the importance of a well maintained department must perform to a higher degree. As a result, the maintenance department has been more varied and complete than the form "maintained" department includes.

This work done is a tribute to the personality and enthusiasm of Mr. Parduhn and his staff.

Man of the Week

What an awkward time to be asked to contribute a story to the
LETTER OF THE WEEK

Almost a year has passed since the new semester has begun and still no effort has been made to continue with the so-called "Dance Club." Is this a case of the law of the jungle or of Our Sunday Visitor? No complaint can be expressed as far as attendance is concerned. All of the boys have more than willingly coopered to the purpose.

The routine, although nothing like Kappa Alpha Theta, is far more suitable for dancing. Then why not carry on? I am sure that I do not stand alone in this opinion and hope that this letter will produce some real action. We would all like to see this form of entertainment in progress.

Lover of Dancing

Navy Run Around

Although I am not directly connected with the Navy, I have had an opportunity to see what is going on in the Navy. It seems to me that if we want to keep our young men interested in the Navy, we must change our methods.

The regulations are so strict that they are actually eliminating the chance of the young man who wants to join the Navy. If we want to keep our young men interested, we must change our methods.

Belle Kapanoff, Associate Editor

On the Tip Off the Beam

What has happened to the FM station in the Midwest? It seems to me that in the past few years, the beam has been turned off and the station has been left abandoned.

I have no idea why this has happened, but I think it is a shame. The station was a valuable asset to the community and I think the people who own it should be ashamed.

From the Aerial Research Foundation

The story of the Aerial Research Foundation is a fascinating one and one which certainly proves the worth of the American way of life.

Founded in 1930 with three persons on the staff, the foundation now has more than 300 employees, all working to establish the United States as a leader in the field of research and development.

The foundation was established in 1930 with the purpose of providing a research center for the United States government.

It was founded by a group of scientists who were interested in the development of new materials and processes.

The foundation has been successful in its efforts, and it is now a major force in the field of research and development.

The story of the Aerial Research Foundation is a story of success and progress, and it is a story which should be told to all young Americans.
Techawk Baseball Team Again Defeats Chicago Boosters 6-3

For the second time in two weeks, the Illinois Institute of Technology baseball team defeated the Chicago Boosters.

The score of the game played on the University of Chicago diamond was 6-3. This was the first time in 81 years that a Tech team has won a game against the Chicago Boosters.

I-M Softball to Start Today

A schedule of this week's games to be played in intramural softball by the Illinois Institute of Technology baseball team will be posted at the stadium for fans attending today's game.

The Illinois Tech baseball team will play against the Illinois Institute of Technology softball team at 2:30 p.m. today.

I-M Awards Medal to Winning Teams

The most outstanding intramural and varsity teams in each of the five sports have been selected by the I-M committee. They are:

1. Intramural:
   - Baseball: Illinois Tech
   - Softball: Illinois Institute of Technology
   - Basketball: Illinois Tech
   - Soccer: Illinois Tech
   - Wrestling: Illinois Tech

2. Varsity:
   - Baseball: Illinois Tech
   - Softball: Illinois Institute of Technology
   - Basketball: Illinois Tech
   - Soccer: Illinois Tech
   - Wrestling: Illinois Tech

West Campus Lounge

The West Campus Lounge is open from 11 a.m. to 2 p.m. and 4 p.m. to 7 p.m. daily.

Fraternities

Alpha Sigma Phi

Plans for the traditional Alpha Sigma Phi party are in the works. The party will be held at 8 p.m. tonight.
